LISTEN TO LUKE

There has been quite a bit of talk on the streets and over cups of coffee about the need for an ambulance in Sanderson and Terrell County, and it appears there are lots of comments but no clear-cut answers just yet as to what will be done, when and how.

There is no question but what we need is great and urgent. No one will deny that.

There is also little doubt that the operation of an emergency vehicle is not a paying proposition, and that its cost will have to be underwritten by some benevolent source.

We hope that someone can come up with a workable idea in the near future so that the town and the county, and all passengers through will have such a service if and when it is needed.

In case of an accident of some kind — on the highway or at home — the only conveyance on hand now is some private automobile or station wagon, and it is necessary to round up the vehicle, a driver, service it, and a few other little details before such transportation may be available to those who might be in need.

Disabled Persons May Be Eligible For Social Security

Persons who have been disabled and robbed of their earning capacity should check with their social security office, according to H. P. Thomas, district manager in Odessa.

Monthly disability benefits can be paid at any age up to age 65 to working people who have become unable to work by reason of a severe disability that is expected to last for a long time. Benefits begin with the seventh month of disability, but an application may be made before that time. To be eligible, the disabled worker must have social security credit for at least five years work in the 10-year period before he became disabled.

When you make your application, the social security office will assist you in securing the medical evidence necessary. When this evidence has been obtained, along with other facts, a decision will be made as to whether your condition is severe enough to qualify you as "disabled" under the terms of the law.

If you think you meet the requirements or know of anyone who may be eligible, get in touch with the social security office in Odessa as soon as possible. Delay may result in a loss of benefits.

## State Capitol NEWS

By Vern Sanford  
Texas Press Association

Austin has settled back to being just the capital of Texas after nearly two hectic weeks news-wise as the vacation White House.

Dozens of top cabinet officers, military leaders, and federal agency heads followed German Chancellor Ludwig Erhard and his advisors to the LBJ Ranch for conferences with President Johnson.

Encouraging predictions of progress toward world peace emerged from the President's international discussions. The federal budget and economy were spotlighted in the domestic talks.

Before he departed, White House sources gave these insights into the President's thinking:

He does not feel the U.S. can drag its feet until after elections this year before pressing for new peace breakthroughs.

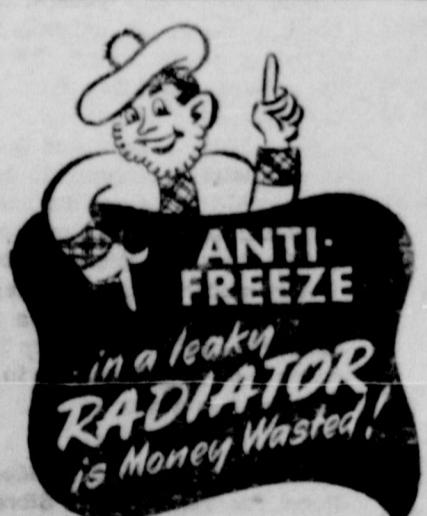

He regards civil rights and the \$11,000,000 tax cut as legislative "musts". Also, he has expressed support for the medicare program of aid to the aged.

Slum clearance and "a home for every American" are seen as goals of his administration. Some newsmen interpreted this as a likely 1964 campaign slogan.

Johnson hopes to steadily improve American preparedness. But he is strong for elimination of military obsolescence, particularly old bases and installations retained in the budget for political reasons.

Congressional leaders will run their own legislative show. But the new President won't hesitate to ask old congressional friends for what he thinks is needed.

Johnson hopes to draw on the talents of both business and labor to render public service.

He is concerned about unemployment and is calling for new solutions.

### Prison Population Reduced

For the first time in 18 years the number of prisoners in the Texas Department of Corrections shows a decrease.

Department Director Dr. George Beto reports that the December 31 count was 12,150, compared to 12,203 the year before. Since 1945, there has been a steady increase in the number of prison inmates.

Beto cited these reasons for leveling off: more adequate parole supervision; opening of a new first-offender unit; a pre-release program of preparing prisoners for freedom; an expanded trusty program; and overall improvement in the prison treatment program.

Prison chief said the reduction not only will save money on prison care, but also in welfare funds spent on families of inmates, not to mention restoring prisoners to productive lives as citizens and taxpayers.

### Prison System Income

Farm products and livestock produced more than \$6,500,000 of the prison system's 1962 income according to the auditor's report just released. Other sources were: manufactured products, \$3,704,616; oil and gas leases, \$39,237; miscellaneous \$3,217,167.

## SAM HOUSTON STAMP

Senator Ralph Yarborough of Texas, right, attends the unveiling of the new Sam Houston 5¢ Commemorative Stamp with Postmaster General John Gronouski at the stamp section of the United States Bureau of Engraving. The drawing of Texas hero Sam Houston is by Tom Lea, famed Southwestern artist of El Paso, Texas. Senator Yarborough, a member of the Post Office and Civil Service Committee recommended Lea as the one to make the design for the Post Office Department. The stamp shows a full length drawing of Sam Houston who was 6 feet 6 inches tall and portrays him as he would have looked at the time he defeated the Mexican Army at the battle of San Jacinto.

Report placed total income from farms and farm industries at \$10,144,773, with expenses of \$14,304,734 for a deficit of \$4,159,961.

Manufacturing operations include license plates, shoes, textiles, clothing, and other products.

### School Income Threat

Texas school income will be drastically reduced unless the Federal Power Commission sets an adequate price for gas in the Texas Gulf Coast area and the Hugoton-Anadarko area of the Texas Panhandle, Attorney General Carr contends.

Carr has filed a petition to intervene in price hearings ordered by FPC to determine reason

able rates for sale of natural gas in the areas.

Earlier he filed briefs requesting FPC to set the price of all gas in the Permian Basin area at 21 cents MCF. The FPC staff sought a nine cents MCF rate for casinghead gas and 13.7 cents MCF for gas well gas.

Attorney General Carr noted in his brief that Texas levies a 7 per cent occupation tax based on market value of the gas at the well head to help support state government.

He also pointed out the University of Texas system owns more than 4,700,000 acres of land

in the Permian Basin area. Bonus and royalty money from this acreage goes to the permanent school fund for Texas education.

More than 18,000,000 acres of state land are involved in the Gulf Coast hearing.

### Important Program 'Ineffective'

Basic structural deficiencies in the mandatory oil import program have rendered it "both ineffective and politically inappropriate," according to a Texas representative to the Sixth World Petroleum Congress.

Sen. Charles Herring of Aus-

tin so concluded in his report. Continued to Page 3

### Highlights —

(Continued From Page Two)

Gov. John Connally.

The time has arrived, Herring stated, "for a comprehensive review of the program, leading toward the enveloping of a whole new approach."

The Senator found "evidence of a serious monopoly trend within the petroleum industry" and no basis for assuming that corrective forces "will emerge from within the industry itself."

Herring said Texas is suffering "grave economic damage" from its attempts to balance supply with effective demand and to "serve as a balance wheel to world oversupply".

### Hay Freight Hike Sought

Although the hay shortage has shoved prices up to double the normal, hard-pressed Texas ranchers and dairymen have another cost increase in sight.

Railroad Commission already has been asked by the Livestock Carriers Association of Texas to increase truck freight rates on hay and cottonseed hulls.

A hearing on the application has been set by the Commission's rate division for January 20. In some cases this would mean a rate increase of more than 100 per cent.

### Higher Education

Governor Connally is expected to decide soon whether to designate an existing state agency to

administer an estimated \$11,600,000 worth of Federal grants for college construction facilities in fiscal 1964 or create a new state commission on higher education.

Although the Texas Commission on Higher Education is responsible for the administration of state senior colleges and universities, junior colleges — which would get some \$2,700,000 of the grant money — come under the jurisdiction of the State Board of Education. There is no state agency for private colleges.

The construction-aid program is designed for both public and private colleges. Connally's decision must meet with the approval of the U.S. Commissioner on Education and be confirmed by Attorney General Carr.

A viewpoint on public education, recently advanced by a subcommittee of the Governor's Committee on Education Beyond the High School, was expressed by the Education Policies Commission of the National Education Association and American Association of School Administrators. Commission recommended that American youths receive two more years of free education after high school.

System proposed is much like that in operation in California.

There any high school graduate may pursue his tuition-free education in a public junior or two-year college.

### Rain-Making

John Carr, hydrologist for the Texas Water Commission, has been making local talks on what other states have done about legislation on rain-making.

A major in the Air Force Weather Service, Carr has been gathering information on rain-making and hurricane-breaking as it applies to the Texas climate.

**March of Dimes Lends a Hand, To Silence Child's Tormentors**

When Lori Nelson blew out the candles on her fourth-birthday cake recently, it seemed that every youngster her age in Rosalie, Neb., turned out for her party.

Only a few months before, the remarkably pretty child had been the butt of taunts and giggles from these same children. Lori was born with a rare birthmark—a thick, unsightly covering of hair extending from her right shoulder to mid-forearm. Instead of finding playmates among the other boys and girls, all she ever encountered were finger-pointers and name-callers.

Lori found these gibes, when scarcely out of infancy and the crib, more than any sensitive child could endure. So did her parents, Marlene and Chester Nelson, an attractive farming couple, who for almost three years searched unsuccessfully for a medical answer to the problem.

**Brother Also Heartsick**

Also heartsick was David, 6, Lori's brother, who more than once came home with a black eye because he fought all the heartless kids in town who poked fun at his "hairy" sister.

"Chester and I were almost out of our minds with this terrible affliction," the mother explained. "Lori, a frightened and confused little girl, withdrew into a shell. The present picture was painful enough, but my husband and I looked with dread into the future when our pretty child, like any young woman, would want to go to dances and have dates and fun and, in time, a husband and family."

"No one gave us any reason for hope. Then I read somewhere that the March of Dimes was planning a birth defects center in Omaha. We were waiting at the door when it opened a year and a half ago."

The center, supported by March of Dimes contributions from chapters throughout Nebraska, is at Children's Memorial Hospital and is directed by Dr. Theodore R. Pfundt, chairman of the pediatrics department of Creighton University School of Medicine. It is one of 48 such centers across the nation.

Dr. Pfundt consulted with Dr.

Lori Nelson, 4, after disfiguring hairy birthmark on right arm was removed. She's visiting with her surgeon, Dr. Albert S. Block, at March of Dimes Birth Defects Center, Children's Memorial Hospital, Omaha, Nebr.

Albert S. Black, a noted Omaha cosmetic surgeon, who is a "team member" of the March of Dimes-supported center and an associate professor of surgery at the University of Nebraska Medical School. He saw no reason for despair.

Lori underwent four surgical procedures by Dr. Black. He removed the hairy surface of the right arm which was then replaced by grafts of skin from her right thigh.

**Lori Now Carefree**

"Essentially what we did," Dr. Black explains, "was to excise the cause of Lori's fears and torments, and restore a whole little girl to the carefree

world of children. The arm is still rather scarred, inevitably. But later on by high-speed planing and tattooing, the arm will be normal in appearance—and by the time she is in high school Lori will have difficulty remembering which arm exhibited this perverse quirk of nature."

Mrs. Nelson was selected as the Nebraska March of Dimes Mother for 1963. She and her husband have forgotten their fears about persuading their daughter to go to kindergarten. They confide that next summer, as a reward for her pluck, Lori may be riding around the farm aboard a Shetland pony.

moisture as we have had, would mean only a disastrous spring.

We don't know if it did a lot of good or not, but our comments recently, or a change of heart or attitudes, or something or another caused at least two families to think — at least — about doing more trading at home, at least so they told us.

Since we are one of the local merchants who depend entirely on local trade for our business, we cannot help but hope that more and more people think about some advantages of trading at home when they can.

None of us — except maybe the local electric utility — and water utility — can hope to be able to draw all local business possible.

The rest of us depend upon local business to maintain or increase our present stock and buying power. It's an endless circle — a vicious cycle — and one of the which came first, the hen or the egg? type things.

Sanderson's businesses are not in their healthiest condition at the present time and all of them should appreciate your business — and try to show that appreciation in some way.

But most all local businesses are like lots of other things we take too much for granted — we don't realize what they mean until we no longer have them.

It would be very inconvenient if we had to drive to another town to get a loaf of bread, or a bottle of milk, or a package of paper clips, or a package of cough drops, or a new tire, or for a mechanic — etc., etc., etc.
