Just this week we were privileged to be taken into confidence by some young people who said that the main thing wrong with the teen-agers of today was the example that was being set for them by the adults.

In sum and substance, they stated that the wrongs of the world today were of the making of the adults, and that it was going to be the responsibility of adults in some generation to do whatever was necessary to correct these ills.

About the only thing that we can say about that is that they are absolutely right.

And we doubt that any reader can refute those statements.

it puts the burden, and it gets heavy at times, right on our shoulders, doesn't it?

There should be every effort made by most all of the citizens of the county to attend the junta at the courthouse Monday night to hear what the representative of the Sears - Roebuck Founda tion has to say that may be of some help to us.

It will be an interesting meeting to hear an outsider offer his advice to help us, possibly, in getting the services of a physician for our county.

Then on February 23, there vill be another meeting at the courthouse to hear men from the State Water Board - or rather for them to hear us.

It is very important that large numbers come out to that meeting as numbers denotes interest and interest is one of the things they are going to be interested in themselves.

We have heard that one retail business is going to close so that its employees may be able to go to the meeting. We think this is a good idea if other em ployers feel that they can do the same thing.

If there are two meetings that have greater importance than those mentioned above, we hope there is no conflict and that a postponement can be arranged if there are other meetings.

About two weeks ago we noted some words that had a pleasant ring to us. Now we are going to print some that have an unpleasant ring to us - not havng anything to do with the meaning of the words.

These are the words that don't have a pleasing sound to us: cough

Mr. Bell liked to make things better...

After Alexander Graham Bell invented the telephone in 1876, he did not rest on his laurels. He helped form the National Geographic Society, developed the basic method of making phonograph records on wax discs and pioneered a method of locating icebergs by detecting echoes from them. He made suggestions and contributions that helped give us air conditioning and the iron lung. For 46 years after inventing the telephone, he lived a vigorous and creative life.

Southwestern Bell likes to make things better, too . . .

Six short years ago, we did not offer the Princess® telephone. Home Interphone, Wide Area Telephone Service, Centrex service, Data-Phone data communications service or Panel Phone. There was no electronic artificial larynx, no automatic dialer and no Speakerphone. Today, these new items help us provide the best telephone service in the world. But we want to make it better. That's our legacy from Mr. Bell.
