LISTEN TO LUKE

By Albert:---
 An appeal is being made to anyone interested in making a contribution to West Texas Boys' Ranch to be sure and do so before the end of the year if you want credit for the contribution on 1973's business. It may be that some have been intending to do so, but just haven't done it, so now is the time to help West Texas Boys' Ranch.

If you have any questions about a contribution, call Monty Harkins, he can get the answer for you.

There has been some interest generated in the way that the revenue sharing rebate to Terrell County is spent, and some are wondering if it has to be spent on road maintenance equipment. There are certain regulations and restrictions on how the money can be spent. We read recently where one community used the revenue sharing money to build a swimming pool, other towns have used it for other recreation facilities, some for curbs and gutters, and nursing homes, etc., etc., etc. There are lots of possibilities. The wishes of the people have to be made known in a real and meaningful way.

Once upon a time, the local Chamber of Commerce conducted a survey of what facility was most-needed here. That survey is out of date, but the range was from something like "new school" to "swimming pool". The survey replies were tabulated and kept for something-----

People all over West Texas have been eyeing certain developments that have been taking place and wondering, speculating, and planning on outcomes of action.

We are talking specifically about increased values that have been put on ranch land by development and/or just pure speculation. These purchases have ranged up to a reported \$35.00 an acre in Terrell County and much higher in some of our adjoining counties. And the sale of large and small tracts in the high figures have not been isolated incidents, either. The number is growing, as is the price of the land.

Another thing that affects almost all of West Texas is the ruling of the courts last week that deer leases was a taxable value that could be added to land. Both of these things have some far-reaching possible affects to the entire industry and to the beneficiary of the tax dollar, too!

It would seem that a taxable value on land cannot be ignored for very long in an effort to fairness, any more than could the placing of a building on a vacant lot, or the inclusion of a tract of pasture land into a development area. Is it possible to arbitrarily say that we are going to ignore an increase in fair market values of anything? Really, probably no quicker than we could say we were going to arbitrarily add

A picture of the decoration pieces bought by the Young People's Chamber of Commerce and installed on utility poles on Sanderson's main street is shown above. The green and silver tinsel piece is highlighted by a red and white bell. Community Public Service Co. installed the decorations with some help from YPCC members.

Comet Kohoutek Is Now Visible

December 28 is probably the date of one of the best views of Comet Kohoutek, a once-in-a-lifetime visitor near planet earth. It will be visible at early dusk near the horizon in the southwest sky.

Not the clearest view, but when the longest tail of the comet may be seen, will be on January 11, higher in the sky and slightly later in the evening.

The comet was named after a Czechoslovakian astronomer who discovered it in March of this year. Its orbit around the sun will bring it within 75,000,000 miles of earth, and its orbit is so large that astronomers estimate it will be 70,000 years before it is again visible from earth. It is approximately 13 times the size of earth and the fire in the tail is estimated to be 100,000,000 miles in length.

Persons are warned to never use binoculars or a telescope directly at the sun if looking for the comet in daylight hours when it may be seen if conditions are proper and if the viewer knows where to look. This area is said to expect to view the comet in the southwest and very near the horizon, with its attitude becoming higher in the sky as the days pass.

New Law Controls Meetings Of All Governing Bodies

A new law effective January 1, 1974, concerns public meetings of governing bodies in Texas: commissioners courts, board of trustees of school districts, county board of school trustees, directors of water districts, directors of soil conservation districts, and the governing board of every special district heretofore or hereafter created by law.

Section 1 of the act sets down definitions; Section 2 states in paragraph (a): "Except as otherwise provided in this Act or specifically permitted in the Constitution, every regular, special, or called meeting or session of every governmental body shall be open to the public; and no closed or executive meeting or session of any governmental body for any of the purposes for which closed or executive meetings or sessions are hereinafter authorized shall be held unless the governmental body has first been convened in open meeting or session for which notice has been given as hereinafter provided and during which open meeting or session the presiding officer has publicly announced that a closed or executive meeting or session will be held and identified the section or sections under this act authorizing the holding of such closed or executive session.

Other sub-paragraphs under Section 2 relate the things that constitute and do not constitute executive sessions, except paragraph (i) which

SP Railroad Abolishes Local Agents

The Southern Pacific Railroad will abolish the position of agent in Sanderson and 10 other south Texas communities at the close of business on December 31, 1973.

Notification of the action was sent to agents in Flatonia, Gonzales, Luling, Seguin, Hondo, Uvalde, Del Rio, Sanderson, Marathon, Schulenberg, and Kenedy last Thursday afternoon.

Railroad employees holding these positions will be able to exercise their seniority in obtaining other clerical positions.

It is anticipated that other clerical personnel in Sanderson will continue to carry out duties now performed by the agent here.

In most of the stations affected, the depots will ultimately be torn down.

The action is made possible by the installation of Centralized Traffic Control, which will eliminate the necessity for agent-telegraphers to assist in the direction of train movements.

The CTC will enable the dispatchers in Houston to throw switches by remote control, providing instructions to trains by means of signal lights and direct microwave radio communications.

The Texas Railroad Commission, following a hearing in San Antonio several months ago, has authorized the railroad to create a Regional Service Center in San Antonio to take care of the customer service functions formerly carried out by station agents.

Joe Little, who now lives in Richmond, was the last full-time agent here. Since that time agent-telegraphers have been used, Otto Hagelgans Jr. now serving in that capacity. After December 31, he will continue as telegrapher here and Sanderson will no longer have an agent.

It is the No. 1-31 University.

Location is 2,441 feet from the south and 2,549 feet from the west lines of Section 31 in Block 35 University. The ground elevation is 2,428.

BROWNIES SING CAROLS

Tuesday afternoon the Brownie Girl Scouts sang Christmas carols at several stops in the down-town area here. They were accompanied by their leaders, Mrs. Chris Hagelstein and Mrs. Marvin Morris. They then gathered in Memorial Park for cookies and punch prepared by the mothers and leaders.

The other half of the party that picnicked on Independence Creek. E.W. Hall, the crauer in last week's picture, is seated "shotgun" in this picture. The other two are not identified. The old car is not identifiable. Mrs. W.H. Savage is the owner of the picture and was on the trip, more of which will be shown later.

some false figure or non-existent fact to something for the purposes of taxation.

Another case of basic honesty, as we see it. Not flim-flam, prejudice, or greed!

Speaking of basic honesty, and we all like to consider ourselves to having that attribute -- there was some derision read into an editorial of an area daily paper last week when they talked about a resolution of the commissioner's court to uphold the law. A lot of people have been intensely interested in the outcome of those deliberations, investigations, etc. And a lot of people read the editorial, too.

What else is a new year's resolution? Don't we supposedly resolve to do something that we should have been doing all along? Aren't our resolutions supposed to be for something better in our lives?

If I were to resolve to be a better citizen would this be out of line? If I were to resolve to try to be more honest, more friendly, a better newspaper publisher, a better anything that is good, what is wrong with that?

The only thing I could think of is that I should have been a better everything a long time ago and improving daily on that -- or trying.

I'll resolve here and now to try to be more honest! Will you join me? And I don't care who writes an editorial about my decision!

And if we included in those resolves, an effort to be a better citizen, upholding all the laws in our efforts, we don't see anything wrong with that!

Maybe it depends on how we look at everything.

'T'was The Season To Be Jolly

'Twas the season to break his three-drink limit, too. What the heck, though, the Christmas Season comes but once a year, right? Sure it does. Assuming you're around to see it. Just remember, some people have a lower tolerance to alcohol than others. For them, one or two drinks can be trouble when they try to drive. If you're feeling a little too jolly after this year's big party, call a cab or get a sober friend to take you home. It could have a lasting effect on your happiness.
