Anyone who fails to do this faces revocation of For A. F. Hogan

Battle-Torn Texas Flag Is Presented To Gov. Stevenson

AUSTIN, March 1 .-- A battletorn Texas flag which has flown over the command post of an ordnance company of the 36th Division in North Africa and Italy was presented to Governor Coke R. Stevenson today as a keep-sake.

Right back to the company went a brand new Lone Star bannerthe gift of the governor.

Lt. John W. Moore of the ordnance group wrote the governor that his company, composed largely of Texans, was proud to fly the Lone Star Flag alongside that of the Stars and Stripes.

The tattered flag was sent to the governor because Moore said it was feared it would be completely de-

"We hope that you will cherish it for it has a lot of interesting history behind it; history that I am unable to disclose to you at present. I can tell you that it has flown over Casablanca, Oran and other cities in North Africa before we

Texas To Produce Three-Quarters Billion Barrels of Oil in 1944

HOUSTON, March 2.-Texas will county in the Red Cross Drive | produce three quarters of a billion been announced by County Chair- 600 wells and this oil will be the man Wm. R. Edwards as \$1,140.00 deciding factor in the war effort, ent Oil and Gas Association, said the association's silver anniversary on Thursday and Friday, October

"Without the fuels, lubricants, ammunition and synthetic rubber made from Texas oil for our planes tanks, ships, guns and other mechanized equipment, the Allies war effort would grind to a stop on all fronts. That's how critically vital Texas oil is to the war effort," Mr. Nixon said in a statement in which he reviewed the development of the industry since the close of World War I.

"When the association was organized in Fort Worth on May 24 1919, exactly five weeks before the first world war was formally ended by the signing of the Versailles Miss Margaret Ann Carter of Peace Treaty on June 28, Texas ies. The production in 1918 was 38,750,031 barrels. It had a value Miss Carter, who is the daughter of \$1.932 a barrel or a total of \$74,-

> "In 1943-our second year in this war - Texas produced 593,000,000 barrels of oil from 100,606 wells in 151 counties. It brought an average of \$1.18 a barrel or a total of \$700,

"In 1918, Texas produced 13,440,-000,000 (billion) cubic feet of natural gas. Its value at the points of consumption averaged 17.6 cents per 1,000 cubic feet, or a total of \$2,365,640. The output in 1943 was 2,070,171,000,000 (trillion) cubic feet, according to conservative preliminary reports. The average value at consuming points was 15.5 cents per 1,000 feet or a total of \$320,876,505. Texas natural gas production in 1944 is expected to reach two and one quarter trillion feet.

Rankin Girls Take Part In Grandfalls Tourney

Feb. 26. The girls defeated Kermit and Pyote but bowed to the Imperial girls. The Imperial team has not been beaten this year but the Rankin girls are hoping to have an opportunity to play them again as they are going to put forth all the effort possible to break that record

'Freedom from Fear" To be Topic of P.-T. A Meeting Tuesday

The general topic of the P.-T. A. when that body meets next Tuesday will be "Freedom from Fear" The leader is Mrs. Andy Mitchell. Scripture and prayer will be offered by Mrs. Tyson Midkiff; a piano solo by Mrs. John Christy, and the boys glee club, under the direction of John Prude and Miss Kathleen Wheeler, will give a number. The principal address of the afternoon will be given by the Rev. Seth School Friday, March 10 Hughes, Baptist pastor.

and Mrs. Roy Bell.

Mrs. George Stephenson and Mrs. Tomie Stephenson were visitors Saturday in Odessa.

pooled their brains, skills and know-how and built here in Texas

'In the period between the two world-wide conflicts, the petroleum dustry was engulfed in a flood of industry, operating under the Ademands for fuels and lubricants. merican system of free enterprise, Men in the industry realized that reached such a state of efficiency the many and complex problems and capacity that it-alone of all dumped in their laps could best be industries-was prepared to go to solved by co-operative effort. They war with the least loss of time."

At the end of the First World War Texas had forty counties listed

as oil and gas producers. Since that time the number has risen to 173.

The importance of Texas oil in the present war is shown by the fact

that the Petroleum Administration for War estimates current military

requirements at 1,210,000 barrels daily and civilian needs at 3,215,000

barrels or a total of 4,425,000 barrels. Texas' current production of

petroleum liquids exceeds 2,000,000 barrels daily. This is enough to

supply the war effort and leave about 800,000 barrels daily for es-

WEEKLY NEWS ANALYSIS

American Fleet, Planes Strike Truk, Major Japanese Naval Base in Pacific; Tighten Deferment of Farm Workers; Allies, Nazis Trade Blows at Anzio

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Italy—The Nazis are throwing everything but the kitchen sink at the Allies in Italy. At left, Pvt. Edward Gazler, Michigan City, Ind., is shown with concrete ball that the Germans roll down hills at Allied troops, and, at with concrete ball that the Germans roll down hills at Al right, is big U. S. tank crippled by heavy enemy gun-fire.

PACIFIC: Strike Westward

Two years and two months after Japs' assault on Pearl Harbor, U. S. air and sea forces struck back at the enemy's own big Pacific base of Truk in the Caroline islands, cen-

tral hub of Jap naval operations for

their extended empire reaching into the Philippines and Indies. Preceding the attack on Truk by several hundred planes operating from carriers shielded by a strong armada of battleships, cruisers and destroyers, long-range Liberator bombers plastered the other big Jap

bastion of Ponape in the Carolines. Centrally located in Japan's Pacific empire, both Truk and Ponape serve as a radiating point for enemy naval and air forces to operate against an attacking force while close to home stations. Loss of the Carolines to the Japs would mean loss of their advantage of operating close to defensive bases, and, vice versa, give the Allies the advantage.

As the Liberators took to their wings to plaster the Carolines, U. S. ground forces were putting the finishing touches to fighting in the Marshalls where small islet garrisons were being rooted out, and in the Solomons, where Allied landings to the north trapped 22,000 Japs holding out on Bougainville, Buka and Choiseul.

FARM WORKERS:

Draft Shakeup

Only those farmers who can produce 16 war units a year will be eligible for agricultural deferment, and the 700,000 farmers now in 3-C anti-inflation program. for dependency as well as occupanal reasons, also will be reclassified and put into 2-C only if their

More than 1,000,000 farmers are in 2-C, of which 400,000 are said to be single and under 22 years of age. With the 700,000 presently in 3-C. 1,700,000 farmers considered essential will be put into 2-C and given six-month deferments, with their cases again reopened at the end of

Action on farm workers' cases followed general tightening up of draft regulations in the face of military demands for about 1,000,000 more men by July 1, with city dads no longer deferrable for dependencies and industrial deferments subject to stricter standards.

RUSSIA: Finns Talk Peace

Russian troops made further gains along the Estonian border on the north end of the 800 mile eastern front, while reports indicated that the Finns were sounding out Moscow for peace terms.

As the Russ continued to chew into Nazi defenses below Leningrad, the Germans fell back to avoid encirclement from the rear, and each step backward found them closer to Estonia and the other Baltic states of Latvia and Lithuania.

Russo-Finnish peace reportedly hung on terms Moscow might offer, with the Finns receptive to proposals based on the 1940 border, but opposed to occupation of their military and naval strongholds by the Reds.

With the Russ again in possession of much of the mining region of the southern Ukraine, Finland remained one of the last sources of nickel for the Germans, and Hitler reportedly sought to prevent Finland's desertion of the Axis to protect these de-

EUROPE: Beachhead Battle

With the sea at their backs, U. S. and British troops traded heavy blows with the Germans on the An-zio beachhead below Rome, as the big battle for the Eternal City raged.

While other Allied troops crawled forward up rugged mountain slopes about Cassino, the forces at Anzio fought with tanks on leveler terrain, countering the full weight of the enemy's famed panzer units.

In assaulting the beachhead, the Germans concentrated on the north-ern sector, 10 miles above the port of Anzio, through which supplies were streaming to Allied forces. With the area under fire of enemy artillery and bombers, Allied troops fought hard to keep the port open.

Bloody fighting continued on the Cassino front, with doughboys taking one by one concrete houses made into fortified pillboxes by the Germans, and other Yanks strug-gling up monastery hill to gain command over Nazi positions and the supply road leading to Rome, which lay below.

CONGRESS: Ban Subsidies

With congress voting against continuance of subsidy payments to re-duce retail prices of meat, butter, milk and other food items, GOP house members served notice that if the President vetoed the bill they would attempt to make it part of the measure to extend price control after June 30, thus forcing the Presi-

To assure continued existence of the Commodity Credit corporation in the event of a presidential veto of the subsidy clause, congress wrote in an emergency provision extending its life until permanent legislation could be passed.

dent to accept it or kill his whole

In voting against consumer subsidies, congressional foes of such payments said they could only save the average family about 11 cents a day, during a time when national income was at an all-time level. Advocates of subsidies, however, said abolition of such payments would bring about a 7 per cent increase in the price of the foods affected, and a 3 per cent rise in the general cost of living, leading to a clamor for higher wages.

Bucks Labor Draft

While congress was voting down consumer food subsidies, AFL President William Green

told a senate military committee holding hearings on the Austin - Wadsworth labor draft that wage stabilization in the face of increasing living costs was the principal cause of strikes.

Said Green: "The Sen. Austin way to prevent strikes is through upward revision of wage rates, or even more effectively, by rigid reduction and control of prices of the necessities of life."

While Senator Austin (Vt.) contended that a labor draft would reduce turnover in war plants and allow the War Manpower commission tighter control over job placements, Green said the act would amount to involuntary servitude, since civilian workers would have to take jobs in plants operating at private profit.

HIGHLIGHTS . . . in the week's news

HICCUPS: A 21-year-old New York city girl, hiccuping for 44 days, appealed to the President to obtain a furlough for her physician, who is a captain in the army. She said that the doctor saved her life two years ago by a delicate operation when she was suffering from another prolonged attack of hiccups. The President granted a leave for the officer

CENTENARIAN: George W. Camerer, a veteran of the Civil war, who now lives in Jerseyville, Ill., has just reached his 100th birthday. He said he "wouldn't mind joining the army and going to Africa if his feet would hold up." He has 10 grandsons, two great grandsons, and a granddaughter serving in the armed forces in the present World War II.

WAR COSTS:

Cut by Army

Because of industry's speed in developing production efficiency, and also because of the army's insistence that savings be reflected in reduced prices, costs of military goods have been cut by 20 per cent since 1941, Brig. Gen. Albert J. Browning, director of purchases, declared.

In all, savings have amounted to about \$9,000,000,000, and an additional \$4,700,000,000 will be saved in the first half of 1944, General Browning said.

Because the army has worked for lower costs through price analysts in the purchasing departments, better ways have been found to produce goods more efficiently and with less material to assure profit margins, General Browning said. In cases where costs were not trimmed there was no incentive on the part of management to cut prices, the general revealed.

GOP Candidate

A .76-year-old Los Angeles, Calif., housemaid has filed formal declaration of intention to become a candidate for the Republican presidential nomination. Though she has never held political office, she said: "I want to see the President's job better done, and I can do it better."

FUEL:

Gas From Coal

With government officials warning of only a 14-year U. S. oil reserve at the present rate of consumption, Rep. Jennings Randolph (W. Va.) introduced a bill which the house speedily passed, calling for an expenditure of \$30,000,000 on the construction of experimental fuel plants to obtain gas from coal, oil, shale and agricultural and forest prod-

The U. S. bureau of mines' laboratory at Pittsburgh, Pa., already has developed oil from coal through a chemical process utilizing hydrogen, but costs have amounted to 16 cents a gallon, compared with costs of only 5 cents for getting fuel from

Whereas U. S. oil reserves have been estimated as sufficient for 14 years, the bureau of mines said U. S. coal resources could furnish material for gas for 3,000 years.

Ask Foreign Sources

America's Allies should reciprocate for our heavy drain upon domestic oil resources

for providing petro-leum for the Allied war machine by transferring a corresponding volume of proven reserves from their fields to the U.S. after the war, the Truman investigating committee declared.

Although the com- Sen. Truman mittee, headed by
Senator Harry Truman (Mo.) said
the development of foreign petroleum fields should be left to private interests, it recommended that U.S.

Bombing's Big Job Nearly 60,000 men were in on the RAF's record 2,800 ton bomb-

diplomacy be directed toward sup-

ing raid on smouldering Berlin, which matched the shattering aerial blow at Hamburg, September 22, 1943.
Of the 60,000 men, 7,000 were flying personnel. About 4,000 men were required to load the planes

The 1,000 planes used 1,000,000

gallons of gas and thousands of gallons of oil. Machine guns on the planes were loaded with 750,-000 rounds of ammunition. About 43 planes were lost on the mission, the 15th heavy as-sault on the German capital.

ARGENTINA:

Political Battleground

Having broken diplomatic relations with the Axis, President Pedro Ramirez of Argentina moved slowly before declaring war on Germany and Japan, since the country's military caste opposed such action. *

Hints that Ramirez' foreign minister was considering a declaration of war against the Axis inflamed the military caste, known as the "Colonels' Lodge," and forced the president to dismiss his foreign chief and reorganize his cabinet to hold the different elements together.

As Argentina's internal situation boiled, pro-Ally General Arturo Raw-son, who led the revolt against pro-Axis President Castillo last June, watched developments from Brazil, where he was reported under surveillance of Argentine agents for expressing strong pro-Ally sympa-thies, in opposition to Ramirez' pol-icy of strict nationalism.

SCHOOLS

If a choice must be made, the country child should receive a better education than the city child, because his future is more vital to the national life, Dr. Floyd Reeves of the University of Chicago told delegates to the Great Lakes Conference on

Rural Education. Dr. Reeves pointed out that migration from rural areas with high birth rates to cities with low birth rates maintains the population of the big centers. Cities would dwindle and die without this migration.

CREOMULSION for Coughs, Chest Colds, Bronchitis

WOMAN OVERCOMES HER CONSTIPATION!

"Once Took Laxatives 3 or 4 Times a Week," She Says!

Are you, too, a disappointed "doser"? Then read this unsolicited letter!

"doser"? Then read this unsolicited letter!

"I'd started working nights, and with my way of living changed around, I soon found I was taking 3 or 4 laxatives a week, and feeling terrible. Then I heard about KELLOGG'S ALL-BRAN through your radio program. The Breakfast Club. Since taking my daily helping of ALL-BRAN, I am regular as clockwork. Thanks for what your ALL-BRAN has done for me!" Mrs. Myrtle Wood, 274 Baumanville St., Akron, Ohio.

Yes, it does seem like magic, the way KELLOGG'S ALL-BRAN helps so many people. "Gets at" one common cause of constipation—lack of enough dietary "cellulosic" elements! That's because ALL-BRAN is one of Nature's most effective sources of these elements —which help the friendly colonic flora fluff up and prepare the colonic contents for easy, natural elimination! KELLOGG'S ALL-BRAN is not a purgative! It's a gentle-acting, "regulating" food!

If your constipation is this kind,

If your constipation is this kind, eat KELLOGG'S ALL-BRAN regeat RELLOGG'S ALL-BRAN reg-ularly, with milk and fruit, or mixed with other cereals. Drink plenty of water. See if you don't find real help! Insist on genuine ALL-BRAN, made only by Kellogg's in Battle Creek.

CAMPHO-

Typical Window of **Eighteenth Century**

WE KNOW that the Eighteenth Century is often called the golden age of the cabinet makers. The English cabinet makers, Chip pendale, Heppelwhite, Sheraton and the Adam brothers, flourished then. The furniture types of their day have become standard with us. Visitors to the reconstructed village of Williamsburg. Va., are often surprised to find that Venetian blinds were the fashior

long before the Revolution, and the well tailored canvas lined valance used with floor length chintz draperies also seem modern to them. Yet these were the curtain styles when ladies and gentlemen wore powdered wigs. Valances were made just as we make them today and were tacked to a valance board in pretty much the same manner as is shown here.

NOTE—This is the second of a series on modern adaptations of period curtain fashions. Another version of the shaped type of valance is given in BOOK 5 of the series of ten booklets on sewing for the home. To get copy of Book 5 send 15 cents direct to:

Keep to Low Point Foods on Lunches (See Recipes Below.)

Luncheon Aids

If you don't have the points for traditional staples to make up the children's mid-day lunches, then

glance over the suggestions I'm giving you today. They're low on points, good on nourishment and high in health-

giving vitamins and minerals. Homemakers with growing children who must feed them at home during lunch, and then feed a very hungry husband at dinner, frequently find themselves low on points for these two important meals. They must be well balanced and satisfying or the family will suffer in days

subotage on the home front. Sandwiches are an old stand-by and children look forward to them. To give a well-balanced lunch, they should be served with soups or sal-

lost at school or at work and that's

It is smart to save bits of leftover vegetables from dinner, even if they amount to only a quarter of a cup, and then to use them for a soup for luncheon the next day. Think of the colorful soups that you can create from green peas, spinach and car-rots. And as for nutrition, that's there in vegetables without saying!

Creamed Soup. (Leftover Vegetables)

(Serves 4) 4 cup pulp (onions, carrots, celery, peas, string beans or lima beans)

tablespoon flour tablespoons butter or substitute 1 teaspoon salt 1/8 teaspoon pepper 2 cups milk

Add milk and seasonings to vegetable pulp. Blend butter with flour and add to milk and veretable pulp. Bring to a boil and cook slowly for 4 minutes.

*Cream of Corn Soup.

(Serves 6) 2 cups corn (canned or leftover)

2 cups boiling water 2 cups milk 1 slice onion

2 tablespoons butter 2 tablespoons flour Salt and pepper Place corn, boiling water, milk and onion in a saucepan. Simmer for 20 minutes. Rub through a sieve.

Brown flour and butter together. Stir in corn mixture. Simmer 5 minutes. Serve very hot. When making sandwiches, there's a tendency to fall into the same pat-

tern and create real monotony. New ideas can quickly pep up lunches whether they're at home or in the lunch box. It's easy to achieve variety if you use low-point cream cheese or some of the wedge

Lynn Says

easy on butter for spreading:

cuts flavored with pimiento, relish

and chives. These furnish nutritious

butter fat too, and you can take it

Escort Ideas: The little things you do for food are as important as the big things you do for them in cooking correctly. For example, the bread pudding may be good, but it will be better with a

spoonful of spicy apple butter on top, or a dab of grape jelly.

Make your meat casseroles in-teresting by leaving the vegeta-bles in larger pieces. When you make a biscuit topping, use different types of cutters for bis-cuit dough—hatchets, diamonds, cloverleafs, etc.

Apple slices fried in bacon add fragrance to your kitchen, and have that hard-to-resist flavor when served with old fashioned griddle cakes.

Save Those Used Fats; Take Them to Your Butcher.

Luncheon Suggestion

*Cream of Corn Soup Cream Cheese and Peanut Sandwiches on Boston Brown Bread *Date and Orange Salad •Recipes Given

Cream Cheese and Peanut Sandwiches. (Makes 3)

six-ounce wedge cut of cream cup chopped salted peanuts

teaspoon lemon juice teaspoon salt slices white or whole wheat bread Cream the cheese until soft. Add

nuts, lemon juice and salt. Spread between slices of bread. The other half of the wedge can be mixed with 2 tablespoons of lemon juice and pulp and 2 tablespoons of finely chopped nutmeats. This will give ½ cup of sandwich spread.

Devilled Cheese Sandwich Spread. ½ pound mild cream cheese

small onion 3 canned pimientoes 3 hard-cooked eggs, chopped

1/4 teaspoon salt
1/4 teaspoon paprika
4 tablespoons mayonnaise

Grind the cheese, onion, and pimiento. Add chopped eggs, seasonings and mayonnaise and mix well

Liver Sandwich Spread. chopped onion

1 tablespoon butter 2 hard-cooked eggs, minced 1/2 pound liver

14 cup cream Salt and pepper Brown onion in melted butter. Mix well with liver, blend in cream and

seasoning and mix well. Keep spread in cool place until ready to

Cottage Cheese Spread. cup well-seasoned cottage cheese cup finely chopped pezauts

1 tablespoon mayonnaise 1/2 teaspoon salt Combine all ingredients. Use ei-

ther white bread or Boston brown bread. Cheese and Dried Beef Spread.

1/2 pound American cheese 1/2 cup drained canned tomatoes cup butter or substitute 1/8 pound dried beef, chopped

Melt cheese in top of double boiler. Add tomatoes gradually, stirring occasionally. Add butter and blend thoroughly. Add dried beef and mix well. Store in refrigerator. Chopped Meat Spread.

cup leftover meat, chopped 1 teaspoon mustard 2 finely chopped hard-cooked eggs Chopped pickle or vinegar Mayonnaise to moisten

Mix all together. Spread generously on buttered bread. A fruit salad all

quivery and delectable with fruit makes a perfect foil for a sandwich luncheon and gives your menu plenty of variety:

*Date and Orange Salad. (Serves 4) package orange-flavored gelatin

1 cup boiling water
34 cup cold water
1 tablespoon lemon juice
12 pitted dates, quartered oranges, sectioned Lettuce Salad dressing

Dissolve gelatin in boiling water. Add cold water and lemon juice and chill to the consistency of thick syrup. Fold in dates and orange sections. Pour into lightly oiled mold and chill until firm. Serve on let-tuce with salad dressing mixed with lemon or orange juice, or both.

Air Engineers **Get There First**

By Robert McCormick

(WNU Feature—Through special arrangement with Collier's Weekly)

Aviation engineers in Italy are apparently just good little gremlins, scooting hither and thither, building airports where no airports should ever be built, and building them just

at the time somebody needs them. The men and equipment responsible for making the Salerno airdrome a decisive factor in the Italian landing were our aviation engineers, one of the least publicized units of the army air forces, yet one of the basic influences in every victory we've won so far in the Mediterranean.

Aviation engineers, riding their bulldozers, go right in amongst the bullets, into the front lines, or ahead of them. Their main jobs are to build new airports in conquered ter-ritory, as they did exceedingly well in Tunisia, and to repair captured airports, as they did so nobly in

The big boss of the Aviation Engineers is Brig. Gen. Stuart C. Godfrey, a wiry little person who looks, acts and talks just the way you'd General Godfrey describes himself simply as "General Arnold's engineer" but he is a little of the control of th like to think all our generals do. but he is likely to end up the most important engineer in modern history. His title is Air Engineer,

Army Air Forces. As a sample of how Godfrey's men work, there is the story of how they built five airports in three days near Sbeitla, in North Africa.

Brig. Gen. Donald Davison, engineer commander in those parts, was looking for one of his companies. He started through a sector occupied by an American armored divi-Officers stopped him, and asked him if he knew he was in the front lines, and headed right out into no man's land, beyond even the

American's outer patrols.

'Damn Fools' Are Up Ahead. Davison obviously did not know. The surprise on his face would have detonated a bomb. He asked the boys if they'd seen anything of a company of aviation engineers. The answer was quick and positive.
"Yes, we have," said one of the

officers, "if you mean those damn fools who wouldn't pay any attention to us and took those big machines out. We think they're about 10 or 15 miles down the road." Finally Davison found his engi-

neers. They had put in a few defensive guns, had dug themselves slit trenches, and were at work building an airfield right under the Nazis' noses.

In three days-three days is 72 hours of work to the engineers-the men built five serviceable fields and moved north 110 miles to the area around Le Ser, to grind out more

dromes. The five-in-three deal was the result of careful planning and fast movement. The whole North African battlefront had been looked over from the air, and spots picked out which seemed generally favorable for landing fields. When it devel-oped that a batch would be needed specifically around Sbeitla, the engineers again flew over the ground,

choosing more definite locations. Then the engineer troops, with their bulldozers and scrapers and shovels and all the rest of their equipment, went roaring overland, marching day and night, and they went so fast that they paid no attention to the fact that they had gone clean through the front lines. Or if they did notice it, they were too stub-

born to care. Their ability to build airports just one jump ahead of our combat airplanes is one of the big reasons we gave the Axis such a bouncing around in North Africa as well as in Sicily. By having airfields up front, we kept our air support constantly with—and ahead of—our troops.
Air Force Has to Be Near Front.

There could be no delays in bringing up our airpower. The tactical air force always had to get places ahead of our troops, to blast down enemy resistance before our troops arrived. The strategic air force had to reach deeper and deeper behind the enemy lines, hacking at the channels through which the enemy brought up food, munitions and other supplies. Both groups constantly had to be as near the Nazis as they could get.

This meant turning out airfields at an amazing rate. It meant flattening out barren mountains, filling in colossal mudholes, trying to hold down expanses of drifting, destruc-tive sand. It meant using fumbling native labor, carrying special pec-wee equipment and airborne engi-neers hundreds of miles at a leap by air, and working night and day in bleak stretches of battlefields.

That's what the aviation engineers are up against. Yet they conjured up airports so fast that the pilots never knew, from day to day, where they'd find one next.

paper, Judge?"
"Sure did, Chet...an article here telling
"Sure did, Chet...an being written about prohibition in India being written off by the Madras government as a dismal failure after a three-year trial. They found out that enforcement was ineffective and that there was a steady increase in bootlegging and other violations of the law which increased penalties failed to check.

It's been tried in this country 47 times in the last 33 years and discarded everywhere except in three states. Was found to be a failure and abandoned in Canada, Norway, Sweden, Finland and Russia, too.

"Same thing happens every time ... as soon as legal liquor is voted out, bootleg liquor with its crime and corruption moves right in."

This advertisement sponsored by Conference of Alcoholic Beverage Industries, I c.

Courtesy, like many other things, often becomes needlessly a victim of war. There is no excuse for a lack of courtesy! The raw materials are simple and plentiful . . . the manpower required is negligible . . . courtesy is just a by-product of service.

Yes, we know that "there's a war going on" . . . we know what it is to be short handed . . . we miss the 224 experienced employees who are now in the armed services; but it's a tradition with the employees of your electric service company to give friendly, courteous service.

Lack of material often forces the use of substitutes. Frequently it is necessary to rework old material and supplies. Sometimes, due to shortages or government regulations, service must be delayed. But the employee team, backed by a business policy that encourages individual thinking and recognizes individual effort, is proud of the fact that courtesy, like electricity, is not rationed.
