# Humble Spots Ordivician J. O. Barfield Announces of Sheriff of Upton

J. O. (Bud) Barfield, pioneer Upton County citizen, annuonced this week that he would be a candidate for the office of Sheriff, Tax Assessor and Collector of Upton tion 2, block O, EL&RR Ry. Co. County, subject to the Democratic Primary next month.

Mr. Barfield was a resident of this section when the county was a rig on the location. Humble has organized. He has been engaged in the ranching business for most of the time that he and his family No. 1 Parrot will be about five have lived in the county. He served iles south and slightly east of the county as Sheriff a number of Humble No. 1 L. W. Pollock, in the years ago and in a statement to the center of the northwest quarter of newspaper asked that if the peosection 4-M-EL&RR, which was ple who knew him then liked the abandoned dry at 11,145 feet in service he gave while in office, he would appreciate their support, and to those who didn't know him then, he states that the same thing apping the anhydrite at 1,590 feet, the plies- that he would still appre-

> Mr. Barfield also stated that because of the tire and gasoline situation he might not be in a position to visit each voter personally and for that reason is taking this means of asking for their vote.

#### Tire Situation Still Tight in Upton County

The tire situation still remains tight in Upton County despite reports of prospects for more passenger and tractor tires this year, Chairman G. H. Fisher of the Upton War Price and Rationing Board

reported today. "Our unfilled applications are mounting each month and even though the tire inspector may have certified need for new tires, that does not necessarily mean that a motorist will be able to secure a certificate from the Board," Mr. Fisher advised.

According to the Board Chairman, the quotas allotted by the national office enable the boards in

"Our Board, like the others, simply does not have a sufficient quocants, and therefore must issue certificates in accordance with the quota essentially of work in relation to the war effort," he declared. "It is absolutely essential that very motorist repair and recap his present tires to secure maximum mileage. We still have a big gap to fill in the tire situation, and failure to repair and recap tires may mean that some motorists will have to put their cars away for a while.

Mr. Fisher said that the Lubbock District Office had informed him that recapping of tires has slowed down considerably in the past 60

#### WEEKLY NEWS ANALYSIS

## Yanks Advance on Two Fronts As German Resistance Stiffens; B-29s Blast Steel Mills in Japan

Top American military leaders are pictured during their visit to the Normandy beachhead. Left to right: facing camera, Adm. Ernest J. King, commander in chief of the United States fleet; Gen. George C. Marshall, chief of staff of the army; Gen. Dwight D. Eisenhower, supreme Allied commander, and Rear Adm. Alan G. Kirk.

#### THE INVASION: Steady Progress

Supported by the greatest air fleets in battle history, Allied forces continued to expand their beachhead area in Normandy in the face of stiffening resistance on many fronts.

U. S. forces to the northeast of Cherbourg surged past Montebourg, which was still being contested, and captured Quineville on the east coast of the Cherbourg peninsula. Hammering to the west across the peninsula on a 10-mile front, the Yanks met stiff resistance from crack grenadiers of the fifth German tank division thrown into the Normandy fighting.

A communique from General Eisenhower's headquarters said that steady progress had been made west of Carentan across the base of the Cherbourg peninsula and between the Elle and Vire rivers toward St. Lo, key junction 15 miles southeast of Carentan.

#### Battle Westward

All along a 10-mile front, units of the American Fourth division and the 29th Air-Borne division were battling westward against strong resistance in a drive to pinch off the peninsula, and with it the prize port of Cherbourg.

Nazi Field Marshal Erwin Rommel had thrown approximately 700 tanks into the fighting on the eastern sector and appeared to be using far more infantry than the German command intended to use for the defense of one comparatively small section of the invasion coast.

Despite early successes on the invasion front, a word of warning came from Secretary of War Stimson who said that Allied troops in Normandy soon must face fiercer counter-blows "than any we have ever met." At the same time he predicted they would smash ahead until France is liberated and Germany crushed.

While the troops on the Normandy coast were fighting off the German counter-attacks on land, residents of England itself were dealt a serious "anti-invasion blow" when a fantastic stream of pilotless Nazi bombers rained fire and explosives across the island. This was Hitler's longawaited "secret weapon" and no attempt was made by the British authorities to minimize the effectiveness of these robot, radio-controlled bombing plane attacks.

#### CONVENTIONS:

In Chicago

As the advance guard of the Republican party convention delegates began arriving in Chicago, political dopesters had all but awarded the Presidential nomination to Gov. Thomas E. Dewey of New York, but friends of Gov. John W. Bricker of Ohio would not let their candidate be counted out without a battle. They said that the contest for the nomination would go to the convention floor.

Bricker sources could not see a first-ballot victory for Dewey. How-ever, the New York governor entered the convention with more delegates actually pledged to him than any other candidate, including Governor Bricker.

Officials in charge of arrangements for the Chicago meeting revealed that the candidate selected would probably make his acceptance speech from the convention floor on the day after his nomination.

Meanwhile the Democrats announced that Gov. Robert S. Kerr of Oklahoma would keynote their convention scheduled for July 19, also in Chicago.

#### PACIFIC:

Action Here, Too

U. S. citizens got a breath-taking indication of the mighty striking power of their vast armed forces when within ten days of the Euro-pean D-Day, terrific blows were dealt the Japanese on the opposite side of the globe.

Day before the new Super-Flying Fortresses bombed Japan proper, a powerful navy sea and air force blasted the outer defenses of the island off Saipan in the Marianas to prepare the way for the landing of American troops on that strategic Jap base only 1,500 miles southeast of Tokyo.

To wrest Saipan from the Japanese, Americans had a job which combined the worst factors of Tarawa and Guadalcanal. For like at Tarawa they had to land over a well-defended coral reef and like on Guadalcanal, the Jap had himself well entrenched in good fortified po-sitions which extended all the way across that jungle island. When the beachhead on Saipan was established there was still a long way to go but word from Adm. Chester W. Nimitz' headquarters indicated that the Yanks were advancing.

Initial reports listed moderate casualties while the official bulletin revealed that: "Virtually all heavy coastal and anti-aircraft batteries on the island were knocked out by naval gun fire and bombing."

While these no longer worried the Americans, they knew their test would come in the inner jungles as they faced the Jap artillery, mortar and machine gun fire.

#### Super Raid

From secret bases in China, not from an aircraft carrier this time, American planes dealt Japan proper a smashing air blow, when a squadron of the new Super Flying Fortresses bombed Japan's homeland. Tokyo radio said industrial areas of Moji and Shimonoseki were hit.

Only a dribble of official news came from American sources on the raid but announcement of aerial task force attack of the giant B-29's indicated that they flew from the China-Burma-India theater land bases.

This raid also revealed the formation of a new air force, the 20th, which would serve the United Nations cause as a roving, globe-circling task force much like a naval fleet. This air arm will not confine itself to attacks on Japan but is 'able to participate in combined operations, or to be assigned to strike wherever the need is greatest."

Before any official announcment of the targets was made by the army, a report in congressional circles hinted that Tokyo itself was one of the main objectives.

#### ITALY:

Allied Drive Continues

German defenses on a broad front 50 to 80 miles above Rome were shattered when Allied Fifth and Eighth army troops drove north in a plunge which netted them hundreds of prisoners.

German resistance had cracked all the way from the Tyrrhenian seacoast around the northern end of Lake Bolsena and down to Terni, 70 miles east of the Allied advance coastal columns.

The enemy was in full retreat from the entire Adriatic sector. Their retreat was so fast that speedy Eighth army flying columns were unable to contact Nazi rear guards. Even fresh German reinforcements, hastened from the north to halt the Allied advance, were routed after joining the Nazi 14th army in a furious three-day battle.

#### HIGHLIGHTS . . . in the week's news

PAIN DETECTOR: An electrical device, said to be able to detect disthe convention of the Gastro-enterological association meeting in Chicago. Dr. Lester Morrison of Philadelphia read a paper on the machine, and explained that it operated by the "viserogalvanic reaction" of the patient.

FACTORY WAGES: In April earnings of factory workers on an hourly eased organs of which the patient is basis reached a new high at \$1.057 unconscious, was demonstrated at per hour, the National Industrial conference reports. Because of a shorter work week however, total earnings were somewhat lower, being \$48.08 on the national average, down .7 per cent from March. Average work week was 45.2 hours in

# PRICE CONTROL:

Parity for Farmers

Under terms of the bill extending the price control machinery of OPA as passed by the House, processors who fail to pay a parity price for any farm commodity would be allowed to charge only 90 per cent of the OPA ceiling for the finished

(Parity is a price calculated to make farm purchasing power equal to that prevailing from 1909 to 1914).

Farm leaders had the support of the administration in putting through the measure in this form after the controversial cotton ceiling adjustment provision had been knocked out of the bill as passed by the senate.

This cotton provision and the parity issue were the main problems between the house and senate conferences.

Once in the President's hands the bill still faced the threat of a veto because of amendment to it which would throw all OPA regulations open for legal tests in the regular federal district courts.

#### WOUNDED YANKS: Death Rate Cut

Of every 100 American soldiers wounded in battle, 97 are saved, according to Maj. Gen. Norman Kirk, surgeon-general of the U.S. army. The navy has an equally impressive record. In World War I the death rate of the wounded was 8 per cent.

Now it is less than 3 per cent. Abdominal injuries are among those most often fatal, resulting in death in 25 per cent of the cases. This, however, is a great improve-ment over 25 years ago, when 50 per cent died. Penetrating chest wounds are now fatal in less than 25 per cent of cases, while in the first World war more than half the men so wounded succumbed. A still greater advance has been made in treatment of head wounds. Now only per cent die, as compared with 14 per cent in the last war.

#### Umberto of Italy

#### PROGRESS:

In Bond Drive

Treasury officials announced that in the first two days of the Fifth War Loan drive, individual buyers purchased almost a half-billion dollars worth of bonds. Goal for individual buying in this drive is six billion dollars.

At the same time the treasury translated bond purchases into equipment various sums would purchase for the army and navy. Bonds bought now will pay for more and better equipment than a year ago.

For example: A heavy bomber, listed at \$500,-000 last year, is now available for

A fighter plane costs \$50,000 as compared to \$150,000 a year ago.

#### SECOND SCANDAL: At Pearl Harbor

A second Pearl Harbor scandal, revealing neglect and delay in the army's defense preparations prior to the Japanese attack on December 7, 1941, has been reported to congress by a house subcommittee on military affairs.

Responsibility was pinned directly upon Col. Theodore Wyman Jr., district army engineer at Honolulu Hans Wilhelm Rohl, California contractor, who sought naturalization in 1941, 28 years after coming to the U. S. from Germany, was named Colonel Wyman's collaborator. The report stated that Wyman constantly discriminated in award-\$125,000,000 in contracts Rohl's firm. Rohl was to have built a permanent aircraft warning system. The contract was let on December 7, 1940. Rohl was to complete the job in six months. One year later the job was only partially com-pleted. The subcommittee reported that the approach of Japanese planes would have been detected if

the system had been operating. Colonel Wyman and Rohl were frequently companions on wild drinking parties, the report stated,

#### HOUSEHOLD GOODS:

More than 12,000,000 families would like to buy alarm clocks, a survey conducted by the census bureau for the War Production board during April indicates. The study was made among 4,500 representative families to guide the WPB.

The survey covered demand for 56 household articles. It showed that the percentage of "satisfied buyer demand" ranged from 98 per cent for sewing thread down to 5 per cent for wash boilers and lawn mowers.

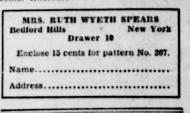

HERE is a bulletin board and blackboard that is easy to make and is so decorative that you will enjoy having it in the kitchen, the upstairs or the downstairs hall; the rumpus room; the children's room or that private corner called one's own.

Dad will find a thousand uses for one of these gayly decorated boards in his study, or den, or over his workbench in the basement. Mom will find one handy in the sewing room where she can pin up fashion ideas and pattern instruction sheets for reference. And, in case you have forgottn it, Grandmother is probably the greatest pin-up fan of all. Pictures of the family, bits of poetry, and greeting cards go right up where

she can enjoy them if she has a bulletin board in her room.

NOTE—Mrs. Spears has prepared an actual-size pattern and complete directions for making the combination bulletin board and blackboard. Stencil designs and color guide for decorations at top and on the handy trough at bottom are included. Pattern No. 267 will be mailed for 15 cents. Address:

**Vegetable Preparation and Processing** (See Directions Below)

Home-grown vegetables are be-ginning to push their way out of the Soil in your own Victory gardens. Perhaps, at first, you will be so de-lighted that you will want them all for the table, but soon will come the realiza-

tion that you can "put up" most of your points for next winter if you can them now. Because pressure cookers are un-

rationed this year, most homemakers will use them for processing vegetables. That is all to the good, for the use of the pressure cooker cuts down processing time, and insures more success in canning if properly used. Non-Acid Vegetables.

Before getting into the fundamentals of canning, we must understand the difference between acid and non-acid vegetables. Tomatoes are in the acid group, but the others, green beans, corn, peas, etc., are all nonacid, and require processing under pressure so that they will keep. Fresh Vegetables.

Selection of the vegetable for canning is one of the important steps. You will be much more careful of what vegetables you put up, if you remember these two points:

1. You get out of your can only what you put into it, i. e., if you can an old, withered ear of corn, then that's what you'll have when you open the jar.

at best, does not improve your food; it only preserves

Save Used Fats!

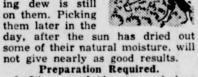

Short Route to Jar. Another old maxim that comes in handy during canning time is the one which goes, "two hours from garden to can." That means that you pick the vegetables from your garden and start canning immedi-

ately.

If you buy vegetables, get to the market early, and select those that come in fresh in the morning. Take them home and get them started on their way to the jar as fast as pos-

Incidentally, if you are using your own Victory garden as a supply base for canning

vegetables, be sure to pick them in the morning while the morning dew is still

1. It's a good idea to wash jars first in hot soapy suds and check them for nicks and cracks. All canning equipment may be prepared a day ahead to have everything in readiness when canning actually be-

2. Prepare vegetable as directed in chart above. In many cases precooking is recommended to shrink the vegetable and set the color.

#### Lynn Says:

Are you perplexed as to how many jars you should have for canning? How much will the vegetable make when "put up?" Here are some guides:
Asparagus—12 pounds yields 6

pints "stalk," or 2 pints "cut." Beets-1 bushel makes 40 pint jars, cut in thin slices. Corn-100 ears of Golden Ban-

tam yields about 14 pints. Greens — 1 bushel spinach yields 13 pint jars. Dandelion greens - 1 bushel

yields 15 pint jars. String beans-1 bushel yields 17 to 20 quarts.

Tomatoes-1 bushel yields 16 to

3. As soon as vegetable is prepared, get into the jar as soon as possible, otherwise flat sour may

#### Packing Vegetable. 4. Most vegetables are packed to within one-half inch of the top of the

jar. Exceptions to this rule are corn, peas and lima beans.
5. Liquid in which vegetable was precooked may be added to the jar except in the case of strong liquids such as spinach and greens.

Before Processing.

6. Wipe top of jar before placing on lid. Use manufacturers' direction in this case, as all lids differ and your manufacturer knows what kind of tightening is necessary.

#### Save Used Fats!

Processing. 7. Process vegetable, using time-

table given above. In using the pressure cooker, allow steam to escape for 7 to 10 minutes before closing petcock. Allow pressure gauge to come up to desired temperature before

starting to count processing time. When processing time is over, remove cooker from range, then let pressure gauge come back to zero before opening.

#### Storage Tips.

8. Remove jars from cooker and lay on several thicknesses of cloth or paper. Do not tighten lid unless so directed by the manufacturer of the jar. Some jars should not be inverted. Here again, consult your individual directions.

9. Store in a cool, dark place. Make sure the jars are not in a draft.

#### Use of Vegetables.

Before tasting or using any homecanned vegetables, boil them in an open vessel for 10 minutes. This will kill any of the toxins which may have formed in the jars.

Non-dieting friends will like this: Chocolate Chip Pie.

1 baked pie shell 1 tablespoon unflavored gelatin 14 cup cold water

11/2 cups milk 3 egg yolks

1/2 cup sugar 1/4 teaspoon salt 1/4 teaspoon nutmeg 1/2 teaspoon vanilla

egg whites 3 tablespoons sugar

Soak gelatin in cold water. Scald milk. Add slowly to beaten egg yolks. Add ½ cup sugar, salt and nutmeg. Cook in double boiler over hot water, stirring constantly until mixture coats a spoon. Add soaked geatin and vanilla. Chill until slightly thickened. Beat egg whites until stiff. Beat in remaining 3 tablespoons sugar. Fold in gelatin mixture. Pour into baked pie shell. Chill until firm. Sprinkle with chipped semi-sweet chocolate.

Lemon Meat Loaf. (Serves 5 to 6) 1½ pounds lean pork, ground eggs, beaten 1/2 cup cracker crumbs

2 strips bacon Juice and rind of 1 lemon cup canned tomatoes Salt and pepper to taste 1/2 cup milk

Combine the meat, eggs, cracker crumbs, seasonings and lemon juice and rind. Place in loaf pan and cover with tomatoes and strips of bacon. Bake covered in a slow (250-degree) oven for 2 hours. Remove cover and add milk and continue baking uncovered for 1/2 hour

If you wish more detailed instructions on vegetable canning, write to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Illinois. Please don't forget to enclose a stamped, self-addressed envelope for your

reply.

# Military Officer a Felony

The impersonation of an American military officer, which is a felony, is subject to a maximum penalty of a three-year sentence, or a \$1,000 fine, or both; while the illegal wearing of a uniform, which is a misdemeanor, is subject to a maximum penalty of a six-month sentence, or a fine of \$300, or both, says Collier's.

Yet impersonators constituted 318 of the 756 persons caught and sent to prison last year for these offenses.
