West Texas Utilities Co. offers the sound picture "Frozen Foods" at the Grand Theatre on Wednesday afternoon, May 22, at 3 o'and family, clock. The picture, which is filmed in full color, shows preparation steps for freezing fruits and vegetables and the cooking of frozen foods. Also included are details of some methods of cutting and some types of packaging and wrapping for meats,

fish and poultry.

The West Texas Utilities Co. is bringing this picture to McCamey as a public service which ties in with the national food preservation program. Because it preserves food values near their original state, freezing is regarded as a good method of food preservation. Meat is only one of the many foods that can be preserved in frozen lockers and modern home freezers. Many fruits and vegetables, including strawberries, peaches, pineapples, berries, peas, spinach, beans and corn, can be prepared for freezing with less work and in a shorter length of time than that required for canning.

Miss Eudora Hawkins and Miss Verna Westbrook of the Home Service Department of the West Texas Utilities Co. will be present to answer questions in regard to some of the ideas or methods for use in Texas and this immediate area

This educational and instructime film runs 40 minutes and anyone who is interested in the preparation of food for freezing is cordially invited to attend without charge.

#### SADDLE AND BOOT-MAKER TURNS TO ROPE-SKIPPING

Red Jones, ramrod of Bissett & Jones boot and saddle shop in McCamey, is a versatile Joe. The writer, wanting to send a skiprope to the granddaughter of a rancher below Sheffield, asked Red, "Say, Red, can you make me a skip-rope for a youngster about seven years old?"

We expected to see Red turn up his nose and reply, "Heck, no! I'm not a maker of toys . . I am an expert leather-worker, a saddle-maker and a boot-maker, but I draw the line at toys.

But Red just about floored us when he popped right back, "Sure, I'll make you a dingeroo! Have it for you in a jiffy." And, by heck, that's just what

# We're doing all we can to serve people waiting for telephones

HE urgent job of getting telephone service to those waiting is going ahead. We are nearing a milestone: Soon everyone who needs only a telephone instrument itself to get service will have it. That shortage is about over.

In the first three months of this year we have installed 150,000 new telephones in the five states we serve. This is as many as we would have installed in six months of a normal year.

Although 170,000 new applicants for service during this time kept the waiting list long (223,-000 in the Southwest as April began), we now are getting service faster to those waiting longest. A great many of the people waiting for service on V-J Day now have it.

Two big jobs remain:

- As quickly as we can get it, we are wiring the precision, intricate machinery that handles your calls at the exchange. This takes time and skill. We must do years of work in the next few months.
- In a great many places we also need outside cable and wire. We plan to have this in and ready when the new equipment in the telephone office is completed. Where we can, we are wiring homes in advance for telephones, ready to connect them the moment

Meanwhile, we are trying every way we know to s-t-r-e-t-c-h the service . . . and we are temporarily squeezing in everyone we can with party lines, hooking more telephones to already loaded switchboards and dial equipment, putting dis-connected lines back into service faster. If for a while telephone service is not always as fast as you'd like it, it is because of this crowding.

We repeat: The telephone company is doing all it can to provide service for waiting customers. We're looking forward to the day we get in touch with you to arrange the details of installing your relephone.

# Regarding McCamey Police Department

TO THE MAYOR AND ALDERMEN OF THE TOWN OF McCAMEY:

Do the citizens of McCamey have a competent Police Department? The

During the past several weeks a prominent citizen of our town was set upon and stabbed by an escaped maniac from the State Hospital for nervous diseases located at Big Spring, Texas. I regret to say the citizen in question has since died.

Why? Because of the lack of competent police protection.

The present Mayor (and I am referring to Mr. McKinney) in his campaign for Mayor in the spring election of 1945, one item among others he favored, and I am quoting his statements in several issues of the McCamey News prior to the election,

He favored adequate police protection. I leave it to the citizens of McCamey whether he has made any attempt to fulfill this promise.

For some unknown reason, the city officials of McCamey are endeavoring to pass the issue of police protection to the county officials, why I do not know.

The time has arrived when McCamey can no longer expect to employ an officer with other duties to perform to look after the policing of the town.

This is not a one-man job, neither can the city officials expect to afford the

citizens of McCamey police protection for nothing. It is time the citizens of McCamey demanded a competent police department,

that will function, one that will offer protection to all citizens of McCamey, one that will make it safe for your wife or daughter to walk our streets in safety, and not have to be embarrassed and insulted, and be compelled to take refuge in some private business establishment, owing to the lack of police protection.

Lest we forget, the citizens of McCamey are assessed a tax rate of (\$2.40) Two Dollars and Forty Cents a hundred on assessed property valuation, the biggest rate of any town in the immediate vicinity.

What is being done with our tax money we have no way of knowing. After several years residence in McCamey, I have yet to see a financial statement, as to the amount of revenue received by the city administration, or the amount of

However, it is my humble opinion that a certain amount of our tax money should be used toward employing a competent police force in McCamey.

Think this matter over, citizens of McCamey, and I think you will agree it is time for actions, and not political promises.

We now publish four weekly papers, the Crane, Rankin, McCamey and Iraan News. I serve as secretary of the Upton County Fair Association. I am serving as general chairman of the George B. Each year, 30 to 50 girls and young women compete at the Reunion for laurels as to riding a horse and looking the part. At the 16th annual Reunion this year, these girls, many of them actually partaking of ranch work during their normal existence, will be judged 20 on their riding togs and equipment. Riding ability counts 30 per cent; horse's conformation and equipment 20 per cent; and horse's performance 30 per cent. Each sponsor takes every minute detail into account when preparing themselves for this contest. This results in quite an array of feminine pulchritude with a western air.

#### THE RETURN OF DEAD FROM OVERSEAS

The Quartermaster General's Office recently sent this letter to your Veterans' County Service Officer. We quote:

The War Department, in the near future, anticipates authority vill be granted to return at Government expense, the remains of those who died overseas to a final resting place as selected by the next of kin.

State & District, \$15.00; Counincluding Commissioners, when the necessary authorizing this Repatriation When the necessary legislation Program receives Congressional approval and other required arrangements have been made, a poll letter, with a return form and pamphlet attached, will be sent to the next of kin of each deceased serviceman whose remains lie overseas and for whom verified burial information has been

received. Since the problem itself, and the planning and arrangements therefor, are world-wide in scope, the date when the poll letter can be mailed and the date when the answers will be received and can be acted upon is necessarily uncertain. It should be realized, however, that the next of kin will be notified without action on their part as soon as the necessary preliminaries have been completed. You may rest assured that this office fully realizes your desires in this matter and will do everything in its power to fulfill them at the earliest date

# Maybe you aren't this big a nut about cars

Maybe you're able to resist taking your engine apart-as long as it runs swell. That's generally enough for most anybody-no matter how curious he is to see Conoco Nth motor oil in the act of OIL-PLATING the engine's insides.

OIL-PLATED engines aren't forever having the top opened up to see about carbon-nor having the bottom opened up to see about sludge. Carbon and sludge are the camp-followers of wear. But oil-PLATING is in the best position to oppose wear-because it is fastened and held direct to inner surfaces. This is accomplished by the magnet-like action of an added material in Conoco Nth oil-patented.

Company

OIL-PLATING is an addition-a durable protection—to the engine's fine inner finish. Ask new car owners and you'll find them widely adopting OIL-PLATING. This time, with this new car, they want to start out right. . . . And should an older car logically have anything less than the safeguard of OIL-PLATING! The Truth **About That Explosion** 

For weeks Homer Bentley has tried to uproot that big stump in his hayfield . . . with team and tractor. Finally he succeeds-breaks a score of windows round about, and frightens the neighbors half to death!

"All I used," apologizes Homer, "was a couple of small sticks of dynamite, like you should."

"That was no two small sticks of dynamite," Judge Cunningham says severely-and it finally comes out that Homer got so cussed mad at that everlasting stump, he'd plant-

ed a charge of TNT beneath its roots.

Reminds you of all the excuses human beings use to cover up bad judgment. Like the "two-beer alibi." When somebody gets into trouble, and blames it on "a couple of beers," you can be mighty sure they are covering up the truth.

From where I sit, a moderate beverage like beer is a better way of keeping out of trouble than getting into it.
