The old-fashioned "light" bill, like the surrey with the fringe on top, is a thing of the past. Electricity for lighting is only one of many items represented by your electric service bill. Today, in most homes, you're likely to find two or more electric appliances in every room-many homes have a score or more. That's why your electric service bill can no more rightly be called a "light" bill than a "refrigerator" bill.
