Farm Road Ruled Out In "Very Near Future"

A trip with the camera over the McCamey Country Club this week showed signs of plenty of activity over the nine hole course . . . along with lots of golfing still being carried on by club members.

The McCamey course in the midst of a program that will give them grass greens by spring of 1952 and maybe sconer.

Shown above is the clubhouse of the organization, a pipeline down the middle of fairway, the storage tanks recently erected by club members, the sprinklers in operation on one of the new greens now under construction, and last but not least, some of the members taking time out for a "little relaxation" on an ideal golf day. -Photo and Layout by Johnson

From where I sit ... by Joe Marsh Just "Can't Get Over" Easy's Fence

years ago, Easy Roberts took a lot of kidding when he planted that hedge of Multiflora roses - along his property line. Folks said he was getting pretty high-falutin'.

But today plenty of people who laughed at the idea slow down when they drive by Easy's place -just to look at those roses. Most beautiful sight you ever saw.

Practical, too! The hedge is a good four foot high now, and at least five foot thick-even a shoat couldn't get through that prickly mass of shrubbery. Best of all, it

cost less than ordinary fencing. (Might be well worth your while looking into.)

From where I sit, there's no sense in looking down on something just because it's different from what we like. For instance, some people think ice-cold lemonade's the best "cooler-offer" on a hot day. Some of us would rather have a glass of beer. The important thing is not to "hedge ourselves in" against other people's ideas and preferences.
