## Three Dead, One Seriously Hurt In Car-Truck Crash

Two Odessa brothers were killed and one other Odessa man was critically injured early Wednesday in a grinding automobile collision about 10 miles north of McCamey on the Crane Highway.

Dead are John Hurley Bowen, 29, and Roy Lee Bowen, 28. In a critical condition in the Crane Hospital are Gene Jensen, 24, and Clomer E. Estes, 35.

### BULLETIN

Clomer E. Estes became the third victim of the car-truck collision on Wednesday afternoon when he died without regaining consciousness.

Gene Jensen remained in a critical condition late Wednesday night. Funeral arrangements for Estes were pending late Wednesday.

The sheriff said the truck driver had stopped his truck on the highway because he had been having trouble with his lights which had been going off and on.

The sheriff said he had talked with a witness who estimated the car was going "at least 90 miles an hour." The witness said the car had passed him about a mile south of the spot where the accident occurred.

The sheriff said Miller had "just stopped his truck and hadn't gotten out of it when the crash occurred." Miller was not hurt. The sheriff said the sedan skidded 240 feet before hitting the truck.

The sedan was demolished. The Bowen brothers had been working for Hissom Drilling Co. about one month. The elder Bowen was driller in the crew and his brother and two other Odessans were roughnecks.

The bodies of the two dead men were carried to the Jacobsen Funeral Home in McCamey following the accident.

The bodies were returned Wednesday morning to the Rix Funeral Home in Odessa. Services are pending.

## Widening Of Highway 67 Gets 'Enthusiastic Reception' This Week

Property owners along Highway 67 who have been contacted this week by City Secretary Tom Nevinger were "enthusiastic" concerning the widening of the highway through McCamey, it was reported.

Nevinger said that he hoped to contact all the property owners on the highway during the coming week.

Under the program the State Highway Department will spend some \$64,000 in paving and widening the highway through McCamey city limits, while the property owners will pay the cost of placing curb and gutter along the right-of-way. The entire route must have curb and gutter pledged before the state will widen and pave the road.

The city has 90 days to secure commitments from property owners to the effect that they will place the curb and gutter. The cost of curb and gutter has been estimated at \$1.75 per front foot.

There is 1.2 miles of highway running through the city.

Any property owner having questions concerning the program is urged to contact Nevinger.

## Pelphrey Low Bidder On Wilshire, Pegasus Road

The Upton County Commissioners Court awarded a contract to W. O. Pelphrey of Fort Worth for the construction of 29.4 miles of road leading into the Wilshire and Pegasus oil fields at a special meeting for bid-letting last Friday. The low bid was \$480,617.74.

The road will run north of Highway 67, about five miles east of McCamey, and go in a northerly direction to the north Upton County line.

Mr. Pelphrey told the commissioners that he was ready to start the job "immediately."

The commissioners asked that the initial work on the road begin at a point in the Wilshire Field northward due to the lambing of ranchers to the south at the present time.

This road is a portion of the \$1,050,000 road program approved by voters earlier this year.

Other bidders were Henry L. Stafford Construction Co. of Lubbock; Boyd Callan, Inc., Waco; Holland Page of Austin; Bryan and Hoffman of Plainview, and Strain and Brown of San Angelo.

**SOCIALISM HAS TO WIN ONLY ONCE**

In recent months, it has often been said that the socialized medicine movement in this country has been stopped. That idea is largely based on the fact that Congress has given the Administration-sponsored government compulsory health insurance bill the complete deep-freeze treatment.

It would be a grave danger, however, if we came to believe that this is the end of the matter and that there's nothing more to worry about so far as socialized or politically-dominated medicine is concerned. It is probably true that the socialists have given up hope of achieving their goal at one fell swoop, as was done in England. But they undoubtedly plan making progress through a subtle, little-step-by-little-step technique.

As an example, the President recently announced the creation of a "Commission on the Health Needs of the Nation," to be financed from emergency funds which were allocated for the national defense—though no student of the health problem can see where any emergency now exists. At least one very distinguished doctor refused to become a member of the Commission, on the grounds that it is an "instrument of practical politics," designed to help revitalize the compulsory insurance scheme. A number of leading newspapers observed the findings of the Commission must be discounted in advance, and doubted if it would make anything even resembling an objective and dispassionate survey of the national health. In short, it looks like just one more straw in a wind which has been blowing a long time and still blows—the wind of socialism by indirection.

Socialists can afford to be patient. All they have to do is win once—and then a nation finds it practically impossible to rid itself of the virus. That's true of socialized medicine no less than the other totalitarian goals.

**GOOD NEWS FOR THE RUSSIANS**

As recently as 1929, the money spent by the Federal government totaled less than two-thirds of the income of the people of the single state of California.

During the present fiscal year, according to the First National Bank of Boston, Federal spending will equal the incomes of all the inhabitants of this country who live west of the Mississippi, except for the residents of Louisiana, Arkansas, and one-quarter of Missouri.

Even that doesn't end the sorry tax story. State and local governments dig deep into the public's pockets, too. Their expenditures will equal the total income of the citizens of the rest of Missouri, plus those of Arkansas, Louisiana, Kentucky, Tennessee, Mississippi, Alabama, and two-thirds of Georgia.

All in all, government spending will equal the entire income of people in states comprising eighty per cent of the land area of the nation.

This is a novel and dramatic way of picturing the incredible magnitude of government spending. The nation is being bled white by ever-expanding government—and by waste which has reached shocking proportions. This must be a happy spectacle to the Russians, whose greatest hope is that America will eventually collapse economically and carry the free world down with her.

**GRASS ROOTS OPINION**

Great Falls, Mont., Leader: "The National Bureau of Economic Research, an outfit studying long range trends and not given to spectacular statement, calls what has happened to America's average individual incomes in the past 25 years 'one of the greatest social revolutions in history.' . . . the country which Communists—and Socialists, too—constantly exhortate as the despoiler of the masses is in fact doing far better by the masses than the enemies of capitalism have any hope of doing."

Chester, S. C., Reporter: "The determination to remain free is a decision that all of us must make. Freedom will be protected, not by Congress, heads of businesses, labor leaders or politicians—but by you and me, working from our own personal pulpits . . . and by practicing what we preach."

Forest Grove, Ore., News-Times: "The simplicity of small town living is its strength. Residents of small communities are able to see most of their governmental, economic and social patterns clearly and know how our cherished institutions function. The self-sustaining features of community life are apparent. The citizen of the small community can observe where each individual who performs a useful service is a valuable citizen because he can see how the activities of each affect the whole. Much government is a direct local responsibility and responsive to local control."

Oskaloosa, Iowa, Daily Herald: "During the 39 years of the Federal income tax, the percapita Federal tax burden has grown from \$3.38 in the 'pre-income tax' year, 1912, to \$326.82 in 1951."

**MIDLAND LIVESTOCK REPORT**

Stocker calves were still scarce. One group of 311-pound heifers sold for \$36.50. A lot of 655-pound white-faced steer yearlings consigned by R. H. McCrummen of Seminole was bid to \$31.75 cwt.

Stocker steer calves brought \$33 to \$37, steer yearlings \$29 to \$32, and heifer yearlings \$28 to \$31.

Stocker cows cleared at \$18 to \$23 and cow and calf pairs at \$220 to \$287.

Butcher steers auctioned for \$31 to \$32.50. Best offering was a group of 21 consigned by John Haley, Jr., of Kermit, that averaged 912 pounds and went up to \$32.75.

From where I sit, so many useless arguments could be avoided if a person would remember he doesn't have all the right on his side. Reminds me of folks who insist that coffee, for instance, is the only drink, forgetting that other people have a right to a glass of beer now and then. If we wouldn't get so "hot up" about our prejudices—we'd all be better off!

### How to have a winning TELEPHONE PERSONALITY

by EMILY POST

We're often judged by the way we use telephone service. Good telephone technique and good telephone manners are important to a winning personality . . . and help you get the most from your telephone service.

Of all the many questions I'm asked about good party line manners, probably the most frequent one is "How long should my telephone conversations be?"

**Answer:** The length of your conversations will vary, of course. But purely for a selfish reason, it's a good idea to avoid long, drawn-out conversations. No incoming calls, however important, can get through to you while your telephone is tied up. And your party line neighbor can't make OR receive a call. You're displaying good party line manners when you hold conversations to a reasonably short length—consideration that folks on your party line will appreciate and return.

Recently, a friend visiting at my home noticed a small booklet titled "LONG DISTANCE TELEPHONE NUMBERS" lying beside my telephone. My guest asked "Is there any advantage in making long distance calls by number?"

**Answer:** Indeed, there is. Long distance calls go through faster—often twice as fast—when you call by number. The smart, well-informed telephone user takes fullest advantage of today's fast long distance service by placing out-of-town calls by number whenever possible. Incidentally, if you don't already have one of those convenient booklets for listing out-of-town telephone numbers, you can get one free at the telephone company business office. That's where I got mine.

Here's another test of good telephone technique. When in doubt about a telephone number, should you look in the telephone directory . . . or call information?

**Answer:** You will usually save time if you look in the directory first. Chances are, you'll find the number there. The telephone company people tell me their records show that 3 out of 4 calls to information are for numbers listed in the telephone book. Why make two calls when one will do, three out of four times?

Plaintiff alleges that during the time she and Defendant lived together as aforesaid, she was kind and affectionate to him and always mindful of her marriage vows, but Defendant, on or about the 5th day of April, A. D., 1950, without provocation or cause whatever, voluntarily left and abandoned the bed and board of this petitioner, with the intention of finally separating and living apart from her, and has continued so to do up to the filing of this petition.

4. Plaintiff further alleges that Defendant's actions and conduct toward her generally are of such a nature as to render their further living together insupportable, the premises considered.

5. Plaintiff further alleges that there are no children and no property.

6. Plaintiff further alleges that her name before marriage was Hazel Mae Bearden.

WHEREFORE, Plaintiff prays the Court that Defendant be cited to appear and answer herein and for judgment dissolving said marriage relations, for costs of suit, for restoration of her name, Hazel Mae Bearden, and for such other and further relief, special and general, in law and in equity, that she may be justly entitled to.

If this Citation is not served within 90 days after the date of its issuance, it shall be returned unserved.

Issued this the 20th day of March, A. D., 1952.

Given under my hand and seal of said Court, at office in Rankin, Texas, this the 20th day of March, A. D., 1952.

### Middle Incomes Hit By Heavy Tax Load

WASHINGTON, D. C.—The financial plight of the people in the middle income groups, as the tax load gets heavier, is brought out by the Economic Research Department of the U. S. Chamber of Commerce in its periodical, "Economic Intelligence."

It notes that a married man with two children, earning \$4,000 a year in 1939, now needs a \$9,000 income to give him equivalent purchasing power.

"Perhaps of even more importance," says the Chamber publication, "is the impact of the decline in the value of our money on the accumulated savings of the American people. At the end of 1939, the public owned about \$64 billion in all kinds of savings. A man adequately insured in 1939 and not able to add to it today, is about half as well insured."

One group especially hard hit is made up of pensioners, says the Chamber. Another consists of retired people trying to live on savings and trust funds.

## WHAT ARE TODAY'S FACTS ABOUT NEW CAR ENGINES AND POWER STEERING?

LAST YEAR Chrysler introduced its new FirePower V-8 engine, and America's first passenger-car full-time power steering. Both new ideas "took hold" in a big way.

Today, others are announcing "new engines" and "power steering" . . . but with some basic differences worth keeping in mind if you're buying a new car.

First: about "new engines." The fact is, a really new engine design happens only once in a great while. It did happen in the FirePower V-8. Its 180 h.p. was only incidental to its basic new design. Its key idea is a hemispherical combustion chamber, which makes even non-premium gasoline develop more usable power than other designs can get from premium fuel.

Only Chrysler engineering has so far mastered this design. Several cars do have some power increase, in terms of previous designs. The important fact is that FirePower is not a "warmed-over" engine, but brand new in performance, construction, and efficiency.

In power steering, too, there are basic differences.

Chrysler uses hydraulic power, always in effect, to do two things. First, it does 4/5 the steering work as you turn the wheel. Second, we've cut the amount of wheel turn needed by over 1/3.

Parking or cruising, you get more and easier control than ever before. In sand, snow, or ruts, the hydraulic power is always there to keep the front wheels from "steering back" at you. You get the same amount and feel of control all the time . . . full-time ease and full-time safety.

Actually, the differences, both in engine performance and in steering safety and ease are impossible to put in words . . . but just as impossible not to feel the moment you get into a Chrysler and drive it! Why not see your Chrysler dealer and do that, soon?
