

Special Election To Decide Park Improvement Bonds

A special election for Saturday, June 28, has been called by the Upton County Commissioners Court for the issuance of \$275,000 in bonds for the purpose of acquiring and improving parks in Upton County, Texas.

The proposed improvements and approximate costs, as stated in the petition, for the Youth Center in McCamey, are \$94,571.50, and for the Colored Neighborhood Park Building \$36,508.

For Rankin, the amount proposed for the Youth Center is \$112,942.50. In this figure is included space for the use of the Girl and Boy Scouts in Rankin, as they have no permanent home at the present time. Colored Neighborhood Park Building appropriations for Rankin are \$36,508.

Jack Brown, representing R. K. Dasher and Co., appeared before the court and explained the procedure for the holding of the election. He stated the petition was of a particular legal significance, but could only be looked upon as a request to the court for the calling of the election. There were 180 names on the petition.

Commissioners' Hearing To Be Held July 7

Relief may be in sight for Rankin citizens on their water shortage problems. On the second day of the Commissioners' Court this week a petition was filed calling upon the body to organize a water control and improvement district.

A hearing has been ordered by the Commissioners' Court for July 7, 1952, at 10 a. m. At the hearing the court will consider the petition, and on approval, after the organization and formation of the district, appoint directors to supervise the district.

Those persons whose land is included in the proposed district or who would be affected by the creation of such a district may appear and contest the formation, may offer testimony that such a district is not necessary, that it would or would not be a public utility, and that such a plan would or would not be feasible.

The name of the district will be "Upton County Water Control and Improvement District No. 1." The area will cover approximately 186,688 acres.

Authority for the district will be taken from Article XVI, Section 59 of the Texas Constitution, and Chapter 25, Acts of the Thirty-Ninth Legislature. The purpose of the district as stated in the petition is:

"...to control, store, preserve, and distribute water for domestic and industrial uses, irrigation, and for other useful purposes, and to protect, preserve and restore the purity and sanitary condition of waters within the State of Texas."

The petition also calls for construction of supply lines, storage

tanks, distribution mains, pipelines, fittings, meters, installation of pumping facilities and acquisition of necessary rights-of-way, as well as provide other works essential to furnishing the inhabitants of the District with fresh water for domestic, industrial and commercial use.

This work, continues, the petition, is necessary to provide the citizens of the district with an ample water supply. The project is thought feasible because it can be done at a reasonable cost, and the benefits to the land and to the citizens and landowners in the proposed district will greatly exceed the cost.

The cost of the project is estimated at \$1,600,000.

The petition was signed by more than the required number of 50 signers who are also qualified land owners as well as including a majority of that group.

Controls Removed On White Potatoes

The Office of Price Stabilization has announced the revocation of regulations governing the sale of white potatoes at all levels of distribution, according to district OPS officials.

Price Director Arnall announced that the action was taken as a result of the vote in the Senate to discontinue controls of fresh fruits and vegetables.

The announcement of the Senate has rendered effective enforcement of the present regulations virtually impossible, price officials pointed out. Honest operators would be penalized by violations which might follow the Senate action.

OPS further considers that distribution of the potato crop would be complicated through inducement to shippers to withhold supplies in the expectation that controls on potatoes would be terminated by Congressional action on July 1.

The OPS has maintained potato controls in the interest of the consuming public and in accordance with the law during the past several months. During this time the potato supply has been extremely short. It is hoped that the present shortage of supplies may be relieved to some extent in the reasonably near future.

New Director Named In Public Safety Office

AUSTIN.—Bill L. Kavanaugh, a Round Rock attorney, has been named Administrative Assistant to the Director of the Texas Department of Public Safety. Announcement of the appointment was made in Austin today by Col. Homer Garrison, Jr., Director of the Department of Public Safety.

Mr. Kavanaugh, who has been employed by the Department as an attorney in the Safety-Responsibility Division, will assume the position recently made vacant upon the death of the late Bob Massengale.

A graduate of the University of Texas Law School, Kavanaugh was admitted to the Bar in 1950.

Polio Precautions Are Listed In Pamphlet

Branches of the federal government are cooperating with the National Foundation for Infantile Paralysis in assuring widespread distribution of 35,000,000 copies of the 1952 "Polio Pledge" for parents prepared by the March of Dimes organization.

E. J. McGrath, U. S. Commissioner of Education, as well as the U. S. Post Office Department, have endorsed this annual project to alert American children and parents to safeguards which may lessen the possibility of contracting paralytic polio.

The Pledge, in poster form, will be displayed through Oct. 31 in the nation's 44,500 post offices.

This March of Dimes project to safeguard children from the menace of polio was inaugurated in 1945 with a printing of 520,000 copies entitled, "When Polio Strikes."

In 1951, so popular was the project, that the original printing was exhausted. Reorders from the schools both in the U. S. and Puerto Rico, boosted the total to 32,500,000.

Here, in abbreviated form, are the essential precautions listed in the 1952 "Polio Pledge":

1. Avoid fatigue from work or play.
2. Don't get chilled. Don't swim too long in cold water nor sit around in wet clothes.
3. Don't mix unnecessarily with new groups. Don't take children out of camp where there is good health supervision.
4. Watch closely for signs of illness—headache, fever, sore muscles, stiff neck or back, trouble in breathing or swallowing.
5. Put a sick person to bed at once, away from others, and call your doctor. Follow his advice.
6. Contact your local March of Dimes for whatever assistance or financial help you may need.

Teachers Association To Ask For \$3,000 Minimum Salary

AUSTIN.—A minimum beginning salary of \$3,000 instead of the present \$2,403 for public school teachers will be asked of the next legislature by the Texas State Teachers Assn.

"Texas annually must have nearly 5,000 new teachers either as replacements or to take care of the rapidly increasing enrollment," C. H. Tyson, executive secretary of the association, said in making the announcement here recently.

The average salary for all Texas professional public school personnel is \$3,185, but that of the average class room teacher is only \$2,980. The first-year teacher who holds only a bachelor's degree gets \$2,403.

In comparison, the average for all employed people in the U. S. including laborers, is \$3,390.

Tennyson presented figures to show that pay of teachers since World War II has not kept pace with that of other employed persons.

In 1939, teachers' salaries averaged \$1,420 and that of all employed persons, including laborers, was \$1,269. Teachers were 12 per cent above the average.

But this year Texas public school professional personnel averages \$3,185 and all employed people in the country \$3,390. Thus the Texas group is 6 per cent under the national average for workers and the class room teachers are 12 per cent below the national group.

"Good Neighbor Policy"

Remember one time when I told about the old loose-stone wall that separated Easy Roberts' property from Handy Peterson's?

That was when they decided they really didn't need the wall between them in the first place—so they simply stopped repairing it.

Now I hear where a fellow, who bought the old Johnson place, wants to buy all those stones. It seems he figures a stone wall is just what's needed on his property.

From where I sit, if that fellow wants to build himself a stone wall, that's his business. But if it's not really serving any useful purpose he may sooner or later discover—just like Handy and Easy did—that he'd be just as well off without one. Even some old-fashioned walls of prejudice are disappearing—like those that would deny a person's right to a friendly glass of beer now and then. Most Americans are learning that "walls" can get in the way of the persons inside as well as the persons outside.
