FIDEL CASTRO, Stokely Carmichael and some of their pals recently held a conference in Havana aimed at promoting revolutions all over the world.

All in all, it was a pretty revolting group.

AN ANTHROPOLOGIST recently praised the current trend of men to be more feminine and women to be more masculine. He said both trends are good things—both need it.

He cited tenderness and the ability to love as desirable feminine traits and a spirit of adventure as a desirable masculine trait. "Since these traits are taught," he said, "we can all learn to change in the desired direction."

I'm gonna give that some thought at next week's sewing circle.

IN SWEDEN, the government is experimenting with a plan to give convicts a two-week vacation each year, letting them out as free men for that long.

This might be feasible, providing they let everyone else go to jail for that same two weeks, so the citizenry will be safe.

A COLLEGE graduate starting to work today can expect to earn an average of \$444,000 during his career, the Institute of Life Insurance reports.

This should just about cover the premiums on his policy, plus maybe part of his doctor bills over and above whatever insurance pays for.

LAST YEAR 133 million Americans visited the national parks in this country, as compared to only three million visitors in 1930.

Most of these people got to the parks before we did, and grabbed up all the picnic tables first.

IN KANSAS, the home of one man was struck by lightning

three times during an electrical storm in less than an hour.

He surely is convinced now that somebody up there doesn't like him.

SCHOOL REGISTRATION BEGINS TUESDAY

BICYCLE WINNERS - Shown above are Debbie Hall (left), daughter of Mr. and Mrs. O.C. Hall; and Donna Provence, daughter of Mr. and Mrs. Bud Provence, as they were awarded their bicycles won recently in the Sudan Beacon-News subscription contest. The contest is open to all boys and girls and will continue until Sept. 1.

Registration for all students in the Sudan Independent School District will be held next week for the 1967-68 school term.

Seniors will register Tuesday, beginning at 9 a. m., and the juniors will register that afternoon beginning at 1 p. m.

Wednesday morning will see the sophomores busy with schedules and the incoming freshmen will register that afternoon. Registration will take place in the high school library.

Thursday, August 24, teachers workshops will be held.

Friday, grades one through

eight will register in their respective departments. Buses will not run during registration.

Classes will begin Monday, August 28 at 8:30 a. m. School will be dismissed at the regular time of 3:55 p. m.

With school registration beginning Tuesday, there is officially one vacancy in the Sudan school faculty. The Board met Monday night and hired Jerry C. Tomroy as high school math instructor. Tomroy, a graduate of Texas Tech with a double major in math and Spanish, recently completed two years service with the U. S. Navy.

Other than the vacancy of public school music teacher, there is some debate over the

position of band director. Mike Metz recently submitted his resignation, which was not accepted by the board. The teachers contracts read, according to W. E. Hancock, that teachers cannot resign after August 1 unless approved by the board.

It is reported that Metz, after receiving word from the board, stated that he will accept a position with the Ardmore, Oklahoma schools regardless of the opinion of the board. Hancock reported that further action will be taken by the School Board.

A complete list of teachers and their positions is as follows:

Elementary School—principal, Wilson; First grade, Reid, Turner; Second grade, Jordan, Nichols; Third grade, Seymour, Vernon; Fourth grade, Brown, Sims; Fifth, Sixth, Seventh language, Turner; social studies, Magness, Chitty; math, Patterson; health, science, McInturf, Laceywell; boys P. E., Cain, Chitty; girls P. E., Harrison, McInturf; Title I, Hargis-Hamer, Noles.

High School—principal, Noles; English IV, III, II, Wilson; English II, I, Speech, Graw; English 8, Magness; Math IV, III, II, Tomroy; Math II, I, 8, Chisam; History IV, III, World Geography, Magness; History II, 8, Coach, Adams; Science IV, II, I, Patterson; Science 8, 7, Coach, Laceywell; Health, Boys P. E., Cain; Health, Girls P. E., Harrison; Librarian, Hutchinson; Agriculture, Ham; Home-making, Burgess; Commercial, Tollett.

In other school news, Hancock reported that the school did not receive any bids for the dwellings located on the school ground that they wish to have moved. He did say however, that the dishwasher was sold to Waymon Bellar, although other bids on appliances were refused by the Board.

Jaycee officials also met with the School Board for discussion in moving the Little League Ball Park, which is located where the proposed football stadium is to be constructed. The ball park will be moved to the west end of the block of land purchased last year by the school.

Contract for moving the post and lights has been let and the Jaycees agreed to be responsible for the rebuilding of the fence and reconstructing the playing field.

If work proceeds according to plan, the field will be ready for the 1968 season.

LAMB COUNTY LIBRARY TO RECEIVE BOOKS

Mrs. Rosalyn T. Shambelin of Amarillo, the Texas State Library Field Consultant for this area of the State, has recommended the placement of a collection of reference books on permanent loan to the Lamb County Library from Field Services Division, Texas State Library.

This collection of forty-three titles has been assembled to provide a basic nucleus of materials to answer questions on a wide variety and range of subjects of interest to Lamb County readers.

LAMB COUNTY HAS SEVEN RURAL ACCIDENTS

The Texas Highway Patrol investigated seven accidents on rural highways in Lamb County during the month of July, according to Sergeant Therman Keffler, Highway Patrol Supervisor of this area.

These crashes resulted in two persons injured and an estimated property damage of \$3,300.00.

The rural accident summary for this county during the first seven months of 1967 shows a total of 24 accidents resulting in three persons killed, 18 persons injured, and an estimated property damage of \$66,270.00.

"School days" are almost here again. Many of the schools in this area will be starting classes before Labor Day. Many drivers have become accustomed to ignoring school zones and signs during the summer months with the thought, "My father, school's out anyway," but now the time is rapidly approaching to start paying close attention to signs warning of school zones and buses.

Many parents will attempt to make the last crossing Labor

ACCIDENT INVOLVES FATHER-SON

Billy Ford, son of Mr. and Mrs. Byron Ford, received leg injuries in a farm accident last Wednesday when his leg was caught in a power take-off shaft. The Fords took their son to the hospital in Amherst for treatment of the injury.

Ford then returned to the farm to complete the job Billy was doing at the time of the accident. Several hours later, Ford was back at the hospital, himself in the surgery room—he guessed it—he had become entangled in the power take-off shaft and his leg was also chewed up by the machinery.

Ford's injuries were more serious than those incurred by his son, and the two were still confined to the hospital the first of the week.

**WAYLAND REGISTRATION
BEGINS SEPTEMBER 4**

Dr. Roy C. McClung, president of Wayland Baptist College in Plainview, announced that registration for the fall term will begin September 4 and classes will start on September 7.

In making this announcement, Dr. McClung pointed out three vital factors which make Wayland Baptist College appealing to students.

The private nature of Wayland; Wayland is small enough to provide education tailored to each individual's needs through personal counseling and individual attention; and, it is important in that it provides church related educational development.

Wayland Baptist College will be operating this fall in recently improved facilities with the

classroom space in Gates Hall completely modernized and all of the dormitories have been remodeled to give higher levels of comfort and pleasant group living. Thirty per cent of the faculty this academic year hold doctor's degrees.

Dr. McClung said, "The end product of Wayland's educational process is an intelligent, cultured, socially involved, highly motivated, capable leader ready for maximum participation in the movements of late twentieth century society."

PERSONALS

Sarah Ruth Brown, daughter of Rev. and Mrs. Robert Brown, a senior at McMurry College, will be home Friday for a visit with her parents.

Others present included Mesdames Tray Gaston, Bob Brown, Joe Markham, W. H. Lyle, J. S. Smith, and visitor, Mrs. McNeese, mother of Mrs. F. M. Smith.

Cotton Estimate Down

The "grow-more-cotton campaign," an almost extinct species which reappeared on the cotton scene in late 1966 with the first short crop under a new government cotton program, got more fuel for campaign campaigns with the recent issuance of USDA's first crop report for 1967.

The report, received August 8 in the offices of Plains Cotton Growers, Inc., set U.S. upland cotton production for this season

at 8,250,000 bales, about half a million below the 8.7 million other sources had been estimating and about 5 million below what officials had hoped for.

Original planting intentions of U.S. cotton farmers came to a little over 10 million acres, but bad weather, both during and immediately after planting time, has reduced "standing" acres of upland cotton to 8,477,500, USDA reveals.

Harvested acres last year came to 9,466,000, from which 9.5 million bales were gathered.

In the 23 counties represented by Plains Cotton Growers, Inc., the guess is that 1,173,500 bales will be produced. The High Plains has about 1,250,000 standing acres out of 1,430,384 acres which farmers had signed up to plant. Plains production in 1966 was 1,278,000 bales.

National, State and area production have been drastically cut in both 1966 and 1967 by the cotton section of the Agriculture Act of 1965, which required farmers to divert 12.5 per cent of allotments and offered strong payment incentives for diversion up to 35 per cent.

In addition, the weather has refused to cooperate during both of the years the program has been in operation.

Consequently, the production figures above compare with the 1961-65 average for the nation of 14.9 million, 4.5 million for Texas and almost 2.2 million on the Plains.

The case for increased cotton production in 1968 is built on a decline in the cotton surplus from almost 17 million bales on August 1, 1966 to about 12.4 million on August 1 this year, and an expected decline to under 7 million bales by August 1, 1968.

Cotton "offtake," for both domestic and export markets, is now set by USDA for 1966-67 at 14.0 million bales, some 500,000 below the estimates USDA had been making all year. The total, officials say, is made up of 9.3 million bales consumed by domestic mills and 4.7 million exported. Respectively, these two figures were earlier predicted at 9.6 and 5.0 million bales.

For the 1967-68 cotton marketing program planned.

Alfred Negley of San Antonio, a Director of the Texas and Southwestern Cattle Raisers Association, has been designated by that group to be Chairman of the Texas State Market Development Committee.

This special committee will coordinate its activities with the American National Cattleman's Association, as well as other state cattle associations in formulating a nationwide beef cattle marketing program.

During year, USDA is now saying total consumption will come around to 13.75 million bales, based on domestic use of 9.0 million and exports of 4.75 million.

One USDA calculator-computer operator already is saying this figure may be too high for 1967-68.

Basically, the supply situation for 1967-68 stacks up to a carry-over of 12.4 million bales, plus a crop of 8.25 million, giving a total available to the market of 20.65 million bales.

Mills and merchants are calling for an increase in acreage from around 10 million to as much as 15 million acres. This fraction is possible influenced by a desire to see completely, if not surplus supplies of all staples and qualities as a means to prevent rising prices.

On the other hand, some producers feel the more prudent course might be in the direction of a more conservative acreage increase—one which would permit maintaining an adequate but not excessive carryover each year and at the same time supply the market with the qualities needed.
