## WOODWORK

BY DALTON

LAST WEEK the United States sent the last of its Surveyor moon rockets to the moon, and it sent back some really great pictures, if we are to believe the space boys. They said these were photographs of the wildest landscape yet on the moon.

I guess so. But all the pictures I've ever seen of the moonscape didn't do much for me. In fact, I've been a little disappointed; it looks kinda like the enlargement of some degenerate's skin.

And no little moon men, or worse yet, no moon maids. (However, if they looked like Dick Tracy's moon maid, I'd just as soon view craters in the soil.) The moon shapes up to be a very dull piece indeed, judging from the photographs.

Still, the space agency said in effect, "the moon probes are over; hopefully, man may be next." We're spending a large batch of cash trying to get to the moon, but I've about decided that anyone who wants to go there has to be a lunatic.

A COUPLE of errors sighted in Associated Press copy last week: A story about a rodeo in Denver said "Tony Haberer of Muleshoe, died for third" in the bareback bronc riding contest. Some people will do anything to get an award.

Also, a statewide weather story, discussing how cold it gets all over Texas, said "Dalhart as usual had the state low, 12 degrees." If this is state law, I hope we never comply with the statutes here.

IF SUDAN schools are to progress, if they are to keep pace with like institutions around the state, the improvements which the school board and other thoughtful citizens hope will be paid by a bond issue must be made. We hope everyone who supports Sudan public schools will show their support by voting for the bond issue in the forthcoming election.

## Clayton Seeks Re-Election

State Representative Bill Clayton of Springlake, announced Monday his candidacy for re-election to the office of State Representative, District 72 consisting of Bailey, Castro, Cochran, Deaf Smith, Lamb and Parmer Counties.

Clayton has received many honors while serving this District as State Representative. He was one of the few men in Texas History to become a Chairman of a Committee during his first term. In the past five years, Clayton has been Chairman of four Committees, two of which were Water Committees. This past year Clayton was presented an award for outstanding service to the Citizens of Texas by the State Soil and Water Conservation Districts. Clayton said "In seeking re-election I feel I can play an important role in water development and water transportation to this area of the State and I pledge my continued influence and efforts to that end. An early morning fire Tuesday razed the White's Auto Store building here, destroying all contents.

The Sudan Fire Siren sounded about five o'clock Tuesday morning, and the local Fire Department members, as well as many interested citizens, rushed

to the scene of the fire. The White's Auto Store, located on Hwy. 84 within the city limits, was aflame and the firemen started work to extinguish the blaze.

Soon after the truck arrived, the heat inside the building became so intense that the plate glass front of the store exploded sending flames and debris in every direction and on to the highway. Through traffic was routed around the fire area.

The auto store contents included tires, both large and small, home appliances, televisions, tools, toys, etc. The burning tires only added to the intensity of the fire.

For instance, the questions on how much money is to be designated to certain areas such as to the remodeling of the school building, bus facilities, the athletic program, etc., no dollar and cents definite answer can be given in each of these areas until a further study can be made as to what is best and what is needed to make this school what the board feels the Sudan residents would desire.

All indicators point to 1967 as a definite pivotal year for cotton on the Texas High Plains.

This is the opinion of Donald A. Johnson, Executive Vice President of Plains Cotton Growers, Inc., Lubbock.

Production from the counties represented by FCCG will come to around 1,150,000 bales for the 1967 crop year, the lowest production from the area since 1950 and less than half the record 2,344,000 bales grown in 1961.

And Johnson says "I think we can assume that this will be the low point for the number of bales produced on the Plains for many years to come. There will almost certainly be more cotton planted in 1968 and most people now expect a 1968 harvest of between 1.5 and 1.75 million bales. From there we are hoping conditions will warrant a return to 'normal' production."

He cautions against firm predictions of planted acreage on the Plains for 1968, pointing out that many farmers, probably a majority, have not yet made firm planting decisions for the year.

"But with the premiums paid for Plains cotton in 1967, and with nationwide prospects for a crop in 1968 that will at best barely cover market demands, some farmers are going to set their sights on the higher profits that can be made from maximum plantings," Johnson believes.

He called attention to the fact that cataloged Government stocks of cotton are now down below one million bales and that very little cotton from the current crop is expected to remain in the loan after August 1, 1968.

"So Government sales of cotton shouldn't have any significant effect on markets for the 1968 crop, and that's one of the strong-

est plus factors seen in the cotton market for many years."

Johnson goes on to say that 1967 was a turning point for cotton quality as well as quantity.

The most spectacular change in the quality mix of the Plains crop came in staple length. In a single year, from 1966 to 1967, the amount of cotton stapling an inch or longer almost tripled from 3 percent to nearly 40 percent. Final quality figures are not yet in, but 41.1 per cent of the first 950,000 bales stapled at least an inch and FCCG is assuming the ultimate figure will be around 38 or 39 per cent.

Along with this dramatic improvement came a substantial rise in the tensile strength of area cotton. Average strength, or prestley, went up to 79,600 pounds per square inch on the first 950,000 bales, as compared to a final 73,000 psi in 1966.

"These quality advances were made in spite of a shortage of seed in some of the more sought-after varieties and under weather conditions that were far from ideal," Johnson notes, "and there is little if any doubt that another giant step toward longer, stronger cotton will be taken in 1968."

## Register To Vote

Lamb County and Texas voters are again warned that they must apply for a voter registration certificate by the end of this month, Jan. 31, if they wish to participate in this year's elections.

A survey of all Lamb County registration stations Friday morning revealed a total of 5,939 who had received their voter registration certificates.

A total of 5,006 had registered in the County Tax Assessor Collector's office in Lamb County Courthouse, 60 had registered at Littlefield's City Hall, 215 at Amberst's City Hall, 56 at Sudan's City Hall, 95 at

Jones Cotton Office, in Sudan, 199 at Earth's City Hall, 258 at Olton's City Hall and 50 at Lovell's Appliance in Olton.

Application may be made either by mail or by personal appearance at the tax assessor-collector's office or at above-mentioned substations. A form for applying by mail is published in today's paper.

Texas Secretary of State John L. Hill, who is sponsoring a statewide voter registration drive, has predicted that this year's registrations will show a very substantial increase over former years.

The previous high was in 1964, the last presidential election year, when a total of 2,984,766 registrants were reported by Texas county tax assessor-collector under the poll tax system then in force.

The total registration in 1966 was slightly under 2,970,000 including registrations under the poll tax system and free registration during a supplemental registration period in March 1966 after a federal court decision invalidated poll tax payment as a condition for voting.

Registrations for 1967, an "off year" for elections, normally could have been expected to drop from the previous year's total.

Attending the Lamb County Stock Show last weekend in Littlefield were Mr. and Mrs. Lewis Fields and family, Mr. and Mrs. Marvin Bowling, Mr. and Mrs. Jerry Ray, Mr. and Mrs. Kenneth Bugess, Mr. and Mrs. Kenneth Noles, Mr. and Mrs. Don Ham, Mr. and Mrs. Wayne Swartz, Mr. and Mrs. S. A. Farmer.

but exceeded the 1966 figure by about thirteen thousand.

Political observers have explained the increase by the fact that the full four months of the registration period were available for registering voters without cost, while only a 15-day period had been provided for free registrations in 1966.

The part to play in life's great game,

is not to strive for wealth or fame,

It's not to lay upon the shelf,

Just everything we want for self.

It's not for show our gifts are made,

Nor should we hope to be repaid;

To help another's burden's bear,

Is one great reason why we're here.

### FARMER SELLS COTTON FOR A GOOD PRICE

Mr. H. L. Fitzgerald who lives on Route 4, Levelland, Texas, and has extensive farming interests in Hockley County, and also a farm in Cochran County 13 miles south of Biadaco, and is a director in the Bronco-Co-Op Gin, has a unique record in some respects concerning the cotton grown on his Cochran County farm in that he sold it straight across the board for 30 cents a pound - every bale - 47 in all.

This brings to mind everyone is aware of now and that is micronaire, for every farmer knows that a price of 30 cents a pound is commanded only on the strength of micronaire and other good qualities. This field was machine stripped and every bale was in the premium micronaire bracket, and the pressley strength ran 30,000 pounds or better.

The cotton planted on this farm was the new Gregg 25V, a cotton first released in 1966, and while being a new cotton under limited plantings this year, there have been some outstanding records made. This is the new cotton with the glandless seed which offers much in improved seed grades, as we think of them on the present commercial basis, regardless of the future disposition of the glandless aspect of the seed which can be fed to poultry and swine, and can be used as a protein diet in human nutrition. Gregg Seed Farms, 2700 Lockney Highway, Plainview, Texas. (Adv.)

**Pears 'n' Cheese Spark Evening Snack**

How many evening snacks turn out to be no more than a fleeting, tasteless pause to satisfy those after dinner hunger pangs? This is not the case when an abundant supply of fresh fruit is at hand.

May we suggest an appetizing treat like Pears 'n' Cheese which not only appeals to the eye, but is marvelous to eat. Juicy, ripe, tender mouthfuls of winter pears tantalizingly complemented with parsley-patted balls of cheddar, cream, and Roquefort cheese will give any snacker pause to reflect and savor his energy to resume evening enjoyment. A chunk of crusty bread is a fine accompaniment. Pears contain a good spectrum of nutrients and yet are very low in calories. Try it - you won't deny yourself again.

**PEARS WITH CHEESE**

1/4 pound Roquefort cheese, crumbled (about 1/2 cup)  
1 package (3-ounces) cream cheese, softened  
1/2 cup grated Cheddar cheese  
1/2 cup finely chopped fresh parsley  
6 fresh winter pears

Blend together Roquefort, cream and Cheddar cheeses. Divide into 12 portions; form each into a ball. Roll in parsley. Halve and core pears. Fill pear centers with cheese balls. Makes 6 servings.

Although parents can claim children who are over 19 years of age and who are bona fide students during the year, 3% of the taxpayer assistance calls during the past year in Northern Texas wanted help on this problem. The answer is simple: Yes Dad, Congress gave you a double exemption. You can claim your child (provided you furnish principal support) regardless of how much he or she made, and the students must claim themselves on their own return.
