SILENCE IS GOLDEN. I'm not sure whether that comes from Proverbs or from some teenager's mother, but I certainly agree that there are many times when silence would be beautiful.

There has been much written in recent years about noise pollution in the nation, with loud music and accompanying warnings of increasing deafness among young folks, about the dangers of working around noisy machinery, jet planes going over residential areas and motorcycles with high pipes, and television commercials which are twice as loud as the regular program.

Much has been made of the so-called generation gap between teens and us oldies, but for the most part we don't have all that much trouble either communicating with or understanding youngsters. One area, however, in which there is absolutely no common ground is in the listening habits of the two generations. Most folks of my general era like soft, soothing instrumental music (like *Musak*), even in offices and working areas, so long as there is no vocalizing by the performers, because words being sung are distracting if you're trying to concentrate on the task at hand.

But the younger folks insist they can study or work better with the radio or stereo blaring in their ears, with some guy or gal or group whining and screaming (or cursing) the latest popular offering. No matter what the youngsters say we old fuddy-duddies will never believe they couldn't do a better job of studying or working if they'd turn off the racket.

Columnist Andrew Tully wrote a piece which the Lubbock newspaper carried recently entitled "John Bar, Go Away". He recalled that a fellow in a Brooklyn saloon once shot and killed a woman, the bartender and himself in rapid succession. The man had pleaded with a woman patron to stop playing the same song over and over on the juke box, and she kept telling him to get lost. Then he went berserk and committed his mayhem.

Tully said that was in the days of Coney, the Andrews Sisters and Sinatra. And he added that there's no telling "what mass slaughter that impatient beer drinker would wreak in today's gin mills. After suffering through the torture of rock, he'd be even madder to take every last one of the customers and then head for the White House with a bazooka."

I have long contended that juke boxes could save on records and make a lot of money by putting in a blank spot on the box, where you insert your quarter and get 10 minutes of silence. Many is the time I would have played that one.

THE JEAN ST. JESTER says his wife likes to eat out "She eats me out at least once a day," he said.

family. Everything seemed to go wrong and now I'm panicky far in debt. I haven't panicked, but I just don't know what to do. What do you recommend?

A Well, you've made a good start by recognizing the danger signals. First, have a family conference. Everyone old enough to understand should be told that the family has a financial crisis. They're a part of the action and they need to be told the truth.

Your family should, of course, immediately stop any new credit use. You can't borrow yourself out of a crisis. Next, develop a bare bones budget. This will permit you to meet basic necessary expenses and to begin paying off those credit obligations.

Finally, contact the creditors. Tell them your problem and that you are facing up to it. Advise them what you are able to do with respect to the debts you owe, but don't promise anything you can't deliver. If you are serious, they will likely accept a part payment while you are getting organized. If your debts are not too substantial, and your credit is good, they may offer you a consolidation loan to lower your monthly payments. Remember, be honest with yourself and with your creditors — and develop a plan for recovery.

The Bible Says

An interesting short story in the June 1975 edition of the Reader's Digest titled SHADOW AND SUBSTANCE tells of the trust and confidence a young child has bestowed in her earthly father. The author told of her walks with her father and his admonishing in the hot-sunny days to walk in his shadow so that he could be her shade. She was at peace as she walked with him, safe in his shadow, protected by the shade he provided her.

Now, as a grown woman, she understands that the shadow of her father was as it was because the man who cast it was who he was: big enough, strong enough, wise enough to be her shelter till she was sufficiently strong enough to step outside and walk in her own way. She concludes her thoughts when she said, "My father gave the best of himself, his shadow and his substance."

Parallel this narrative with the Heavenly Father and His children. The children of God continually walk in their Father's shade. This walk provides the assurance that they need to help them overcome the fears of the world! He has always pleaded with His family to, "walk in His shadow and He would be their shade."

He wants you just as you are to walk in His shadow absorbing His protection and provisions. The longer you walk with Him the better acquainted you will become with Him. Realizing that He is big enough, strong enough, wise enough to shelter you until you meet Him face to face. Each day He gives the best of Himself, His shadow and His substance.

You will outgrow your earthly father's shadow but you will never get too big for your Heavenly Father's shadow!

Battleship Texas' New Self Guided "Talk Tours"

Lt. Governor of Texas, William P. Hobby (right) discusses with Rear Admiral C. H. Taylor, USNR (Ret.), Chairman of the Battleship Texas Commission The Battleship Texas' new Talk Tours. Lt. Governor Hobby is one of 12 of Texas leaders of government, television and radio industry whose voices will be heard in the new electronic Talk Tours aboard The Battleship Texas. Moored in Houston in the shadow of the San Jacinto Monument in San Jacinto State Park, Houston, the famed Texas is open to visitors every day of the year from 10 a.m. to 5 p.m.

(HOUSTON) The final completion of the three month installation of a completely new self guided electronic "Talk Tour" of the Battleship Texas was announced today by Rear Admiral C. H. Taylor, USNR (Ret.), Chairman of the nine member Battleship Texas Commission.

For the first time in her 27-year history, the Flagship of the Texas Navy enables a visitor to proceed at his own speed through 12 clearly marked electronic broadcast stations and hear a recorded message at each one describing the life aboard the battleship as it was in that area of the ship. As a visitor tours the 11 decks of the Texas—a veteran of two world wars—he and his family enjoy the salty flavor contained in the electronic messages along with some important facts about the daily events on a real United States battleship that help make the ship come alive.

The Battleship Texas, moored at San Jacinto State Park in the shadow of the San Jacinto Monument, on the Houston ship channel, is the only floating museum of its kind in the world. Her history covers 63 years embracing the AGE of the BATTLESHIP, an era in naval warfare now only in memory in our nation's history.

As each visitor comes aboard this historic naval museum they are greeted at station #1 by Texas Governor Dolph Briscoe. The warmth of the governor's voice makes every visitor feel welcome and comfortable as he begins his tour of the famous battleship.

Nearing the five million mark in visitors, the U.S.S. Texas is one of the state's most popular tourist attractions. She has been toured by visitors from every state in the union and most countries in the world. She is open every day of the year. Admission is Adults, \$1.00. Children under five, Free, and 11 yrs. to 18 yrs. \$.50.

The Battleship Texas Commission has recently published a new descriptive folder which gives a short history and basic facts about the Battleship Texas. Five copies of this folder can be obtained by writing The Battleship Texas, Exxon

Building, Room 2965, Houston, Texas 77002. Or phone (713) 225-5013.

John Taylor Named Top Press Official

To unify the Texas Press Association as a more viable force for protection of the free enterprise system in Texas is one of the hopes of new TPA president, John C. Taylor.

During installation to Texas' top press post at an El Paso convention, Taylor, publisher of The Seguin Gazette, told attendants:

"Newspapers historically have provided the visual evidence of the power of our free enterprise system.

Today, newspapers are faced with the ever-increasing challenge of protecting that same system." The new TPA president has been publisher of The Seguin Gazette for the past 20 years. During that time, he expanded The Gazette into the Trans-Texas Publishing Company, the first central printing plant south of the Dallas area. It publishes a large number of other newspapers and printing pieces. The Gazette was also the first newspaper in South Texas to convert to the rotary press offset method of printing in 1960.

A native of Gonzales, Taylor was a high-scoring star in basketball and football at Gonzales High School and the San Marcos Academy. He was offered a chance to play football at Texas A&M University, but entered the U.S. Marines to serve during World War II.

Reading newspapers during his extensive travels with the Marines, Taylor became interested in newspapers and decided that here was the place to acquire a writing know-how, something in which he had been interested for many years.

When he returned to Texas, he attended Southwest Texas University and earned a journalism degree. While in the university, he was San Marcos correspondent for the San Antonio Light. And after graduation, he went to work full-time at the Light. During some of the years there, he attended St. Mary's University law school at night. Later he served on the university's board of directors.

John Taylor

In 1954, his chance came to buy The Seguin Gazette—and, he says, he "found himself 10 years in debt, but I was a publisher."

He chose the right profession. Testimonies to that fact may be found on his desk and walls—some 60 awards and honors for publishing The Gazette.

John Taylor was the first publisher in Texas to serve as president of two regional press associations—the South Texas Press Association in 1964 and the Gulf Coast Press Association in 1974. He has served TPA in numerous capacities and has been on the board for most of the past 17 years.

As vice-chairman of the TPA building committee, Taylor assisted in investigating and obtaining the option to buy the property that later became TPA's permanent headquarters building.

Taylor has been very active in Rotary Club, Boys' Club, Seguin Youth Center, American Legion, Seguin Elks Lodge, Chamber of Commerce and Jaycees.

However, he has a philosophy about a publisher not participating too strongly in a limited number of organizations. "We're responsible to all in the community as a newspaper," he maintains.

The new Texas Press boss has been a director of the huge and expanding Guadalupe-Blanco River Authority for several years, having been first appointed by Governor Preston Smith. Recently Governor Dolph

Briscoe re-appointed him to a six-year term extending to 1979.

Currently Taylor is chairman of the Seguin Bicentennial Commission that has been highly recognized on a national scale as an example of a good working commission. It's application for state and federal endorsement has been copied by many other cities in other states.

Among his commission's ambitious projects for Bicentennial celebration are returning to Seguin from Mexico the remains of the Texas patriot for whom the city was named, Juan N. Seguin, and construction of a coliseum-auditorium that is the largest single Bicentennial project in Texas, and possibly in the nation.

Taylor's wife, Juanita, holds a very active part in publication of The Gazette and in operation of the publishing company.

She also is executive director of the franchised "Miss South Texas," "Miss San Antonio" and "Miss Austin" scholarship programs. This makes her representative of the "Miss America" program in Central Texas.

Taylor has six children—Nancy is now Mrs. Ron Watts, of Dumas; Beth, living in Munich, Germany; Kay, who works for a newspaper in New Mexico; and Johnny, Marilyn and Lisa, all of whom are attending school in New Mexico.

In Taylor's acceptance speech at the El Paso meeting, he said "A unified TPA, with more member participation, is necessary to do a better job today... I will be calling on more people to do more things because the ranks of editors and publishers in the Texas Press Association are the catalyst of community and state action."

"We've got the greatest, elite corps of civic workers for community action—people who originate an idea and follow through to its completion..."

"TPA is for every member, and I hope everyone will become involved."

AID SOUGHT IN NURSES RETURN

On Tuesday of this week word was received from Mrs. Ponciana Naron, R. N. from the Philippines.

Mrs. Naron has been employed by South Plains Hospital for 2 1/2 years as a registered nurse. During this time she did not see her husband nor her six daughters, though endless efforts have been made to bring them to the United States. Since this could not be accomplished on June 5, Mrs. Naron boarded the plane for the Philippines on a temporary leave to be united with her family.

Since her departure there had been no news from her, so approximately ten days ago a persistent vigil to reach her by telephone began. Because of limited telephone circuits in Philippines and a 12 hour time difference it is very difficult to complete a call originating in the United States.

The Country is also under Marshall Law, which makes it even more difficult. The Naron's telephone is at their place of business, a mercantile store, and they are not allowed to be on the streets after 11:00 p. m. The telephone switchboards in this country also close at 11:00 p. m. and do not open until 7:00 a. m. When it became apparent that Mrs. Naron could not be reached by telephone from here, a telegram was sent to her asking her to call.

On Tuesday around 10:00 a. m. CST and 10:00 p. m. their time, Mrs. Naron called. She explained that she and her family were well, though they had experienced some difficulties. The bus more burned which caused the city to be without communications for some time. Fortunately their business and home were spared though it became necessary for the family to evacuate their home at one time during pre-dawn hours.

Mrs. Naron, her husband, and children send their regards to all of their friends in Amherst and she said that she had written as soon as she arrived in the city of Tagbilaran but because of poor mail service in the Philippines she felt sure we had not received it yet.

Mrs. Naron said that if everything went according to plan that she should arrive back in Amherst the first week in August. Unfortunately her family will not be able to accompany her, but her husband said that his prayers were that it would not be long.

SOCIAL SECURITY NEWS

Question: If you should become unable to work because of disability, what amount of social security benefits could you expect to receive?

Answer: The amount depends on your average earnings. A worker whose average yearly earnings are \$5,000 would receive total monthly benefits of \$409 for himself and two dependents.

If his earnings averaged \$10,000 annually, the disabled worker still at least two dependents would receive \$722.

For information about potential benefits due you under social security, call your nearest district office.

It's crop questionnaire time again from the Texas Crop and Livestock Reporting Service.

A total of 24,700 farmers in Texas have received a questionnaire relating primarily to small grain acres. If you are one of those who have received it, you are requested to fill it out as accurately as possible and return it promptly.

Interest continues to increase in all areas of agricultural production in the state and throughout the nation. During the era of the so-called "burdensome surpluses" there was very little interest evoked when a crop survey was made. But now the questionnaire becomes important.

Another form Texas agricultural producers need to note is the census. Although the majority of the census forms have been returned, the Census Bureau says it still needs those not yet returned.

You need to fill out only those questions applicable to your operation. And the Census Bureau says you can be assured no one will see your answers except the census enumerator.

Figures will be compiled into county, state and national totals.

SCREWWORM CASES continue to be reported in parts of Texas, and screwworm eradication officials urge livestock producers to adhere to its four-point program for eradication.

Check your livestock regularly, treat wounds on livestock with approved screwworm-control remedies, delay surgery on livestock as long as possible and submit suspected screwworm samples to the fly lab at Mission. Your county agent has vials which you can use to send the samples.

VACATION TIP

Will your vacation go to the dogs?

Your vacation can be a lot less enjoyable if your dog goes into heat.

Fortunately, you can prevent those dog days with a new heat control pill developed especially for dogs.

It can make your dog more fun to take on vacation, and less trouble to leave behind. It's convenient, palatable, and easily administered either intact or crushed and mixed with dog food.

These pills have been tested thoroughly in clinical research on thousands of dogs of various ages, weights and breeds, and shown to be both safe and effective.

Only available through your veterinarian, it's made by the Animal Health Division of Schering Corporation and called Ovaban.

It will enable your dog to take a vacation from heat, and so allow you to take a better vacation.

INSUR-MATION
Ed Jennings 385-4489
Texas Farm Bureau Insurance Co.

Is there an accepted formula for determining how much life insurance I should carry? What is "Whole Life" Insurance?

Whole life is permanent insurance which accumulates cash value and paid-up values. This will last as long as you do. Usually the premiums are level. The increase of the above benefits, which are called Non-Fortuitous Values, become greater the longer the policy is in force. You have the option to continue the premiums for the rest of your life but are not required to do so. To illustrate, using an example company, a \$10,000 policy purchased at age 35, the insured could at the end of 20 years cease paying premiums and be insured for nearly \$5,000.

SAVINGS PROGRAM AVAILABLE TO PENSIONERS

Dallas, Texas—North Texas workers not covered by pension programs may now be able to set up their own individual savings programs and gain significant tax advantages as a result of the Employees Retirement Income Security Act of 1974.

A. W. McCasless, district director of Internal Revenue Service (IRS) operations in North Texas, said today that

any employee under age 70 who has not participated in a retirement program during the year can set up a retirement program. Husbands and wives who are both wage earners may each qualify for their own individual program. Mr. McCasless said that those who are eligible can contribute 15 percent of their annual earnings, to a maximum of \$1500, into the program. A major advantage of the program, he added, is that no tax is due on the contributions or interest or other income earned by the contributions until the money is actually withdrawn. Because this a retirement program, withdrawals usually would not begin until the individual was 59 1/2 or older. At that point, the individual would presumably be in a lower tax bracket than during his or her earning years.

North Texas residents who would like additional information can contact their nearest IRS office, or call 800-492-4830 toll free. The IRS can provide a free brochure on individual retirement savings programs and forms to open programs at banks and other qualified financial institutions.

I've switched to soda. Made-it's a natural for our pool!

Here's a great new use for an old product. Baking soda added to swimming pools stabilizes the acid-alkalinity ratio of the water at the ideal range for optimum chlorine effectiveness.

Use one pound of baking soda per week for every 10,000 gallons of water in the pool. Additional benefits will be improved water clarity and softer water. Baking soda is economical and it does not require any special handling precautions. Write to Pool Consultant, Church & Dwight Co., Inc., Two Penn Plaza, New York, N.Y. 10001 for free leaflet.

Happiness means accepting each day
And using it well in God's own way,
Not getting frustrated if you find
It is not the day you had in mind.

In doing His will happiness lies
With joy that all life's troubles defies,
Give of this joy which you are blessed
And each day will bring you happiness.
