Rural Mail Boxes Damaged By Fire Recently

Sheriff Mac W. Hancock recently received a letter from the office in charge of the United States Post Office inspection service in Lubbock, in which he states, "The postmaster at Morton has reported to this office that numerous rural mail boxes along the highway on Route 1 have been damaged by gunfire. The most serious complaint made by one of the patrons is that of Mr. C. N. Jones, whose box is located about 1/2 mile west of Morton. His box was destroyed on September 20, 1946, in damage to the box to several pieces of mail as well as the contents."

Sheriff Hancock stated in a recent interview, "The offenders tampering with the United States mail when they fire at the rural mail boxes and when they tamper with the mail should be dealt with accordingly."

Hancock has been requested by postal inspector authorities to assist in learning the identity of the culprits.

Richly colored and ornate pictures may be used in the living and dining; light and airy pictures are for bedroom or breakfast nooks.

ran county for their splendid cooperation with him in the Black-eyed Pea business. He is still buying dried Black-eyed Peas as well as patches of green peas, and will buy until the peas are all gone.

Peas were grown in the local area by J. D. Tipton, who had 97 acres planted in peas; Paul Walker, 50 acres; Earnest Willingham, 62 acres and Z. G. Garza with 30 acres planted to the lucrative crop. Hancock had 124 acres in peas. Willingham gathered 65,700 pounds of peas from his 60 acres.

Hancock has hauled 15 loads of the peas to canneries, each load weighing from five to fifteen tons. Farmers usually get about three gatherings from one planting, with from 600 to 1000 pounds of peas per acre from each picking.

From where I sit ... by Joe Marsh

On Playing the Fiddle Badly

A favorite recreation in our town is getting together in one or another's home and making music. There's somebody at the piano; a guitar; a fiddle player; and Molly Birtles even has a harp!

What comes out isn't the best music in the whole world. In fact, a lot of it is downright bad. But nobody even thinks to question or to criticize.

Because the spirit of harmony is there—harmony between folks who like each other's company, who enjoy the simple, homey atmosphere

—with nothing more exciting than old songs, and a glass of moderate beer or cider.

From where I sit, it's a heap more important to be a poor fiddle player, than not to play at all. More important to be a part of the American scene—with its community music, home entertainment, friendly glass of beer—than to hold out for professional perfection. (Besides, I like to play the fiddle—even badly!)

Life After Forty Becomes More Complicated

AUSTIN—From a health standpoint, life after forty begins to be more complicated for the average individual, than it was in his earlier years. According to Dr. Geo. W. Cox, State Health Officer, the principal health foes confronting people in middle life are heart disease, cancer, kidney disease, high blood pressure, hardening of the arteries, apoplexy, diabetes, and arthritis.

Middle aged people of today are healthier than were those of preceding generations, and the present generation, when they reach middle age, should enjoy even better health than their parents of today.

Medical care in middle life has two important phases. The first is going to the doctor at regular intervals for a complete physical checkup, whether or not there have been symptoms that suggest the need for medical attention. The second is prompt attention to any illness which may mean the difference between prompt recovery and continued poor health and prolonged invalidism. It is difficult to say which of these phases is the more important.

It has been found that men and women who faithfully pursue the habit of regular health examinations and who follow the advice arising from them tend to live longer, more satisfactorily, and freer from disease than those who simply take a chance and go to the doctor only when pain or disability forces them to give up their normal activities.

It is also a fact that many diseases of middle age respond to treatment in early stages whereas if neglected until later stages they often cause permanent invalidism and even death.

Good advice for persons over forty is that they have regular physical examinations and obtain prompt medical attention for any and all illnesses.

Let's All Vote For This Amendment November 7th.

Texas Legionnaires should all go to the polls Thursday, Nov. 7 and by their votes assure the passage of a proposed constitutional amendment which will create a Veterans' Land Board which is designed to give 10,000 Texas veterans farms and ranches.

This amendment has twice received the backing of the American Legion, at the Fort Worth and the recent state convention in Galveston. Since our organization is the leading one dedicated to veterans' activities, it behooves us all to make a special effort to get out and vote for its passage.

And it will require a special effort. It will be voted upon two days following the general election the first Tuesday in Nov. A clerical slip-up made it necessary to hold a separate election two days later than the general election.

Land Commissioner Bascom Giles, who is sponsoring the bill, has asked The Texas Legion News to bring before Texas Legionnaires the urgency of getting out the vote on November 7.

Highlights of the amendment are that it was passed unanimously by the house and senate of the last legislature; that the board will be composed of the governor, attorney general and general land commissioner; that such board is given authority in concurrence with the legislature to issue bonds up to \$25,000,000 for the purchase of additional land from the federal government, individual and other state agencies located in every sector of the state; that bonds bearing three per cent interest will be sold to other state departments carrying heavy surplus funds now un-invested, thus eliminating the necessity of any additional taxes.

It should be pointed out that under the amendment veterans would not be required to "homestead" or live upon their land. They also would not be prohibited from selling their equity.

It is planned that farms ranging from 50 acres to ranches up to 2500 acres be purchased by the veterans, thus providing a wide variety of crop and livestock production in various parts of Texas. Each veteran would be limited to a maximum purchase of \$5,000. His bid and check would be accompanied with a photostatic copy of his discharge. The entire purchase routine is planned to be dressed down to the simplest possible form with a minimum of usual red tape.

Only Texas veterans will be allowed to enter bids. The land would be sold either for all cash or for as low as one tenth down payment with notes to run for 40 years bearing four per cent interest per annum. Finally the veteran purchaser retains a seven eighth mineral fee on sulphur and fifteen sixteenth on oil and gas.

In this amendment, Texas is proposing to do something tangible for its own veterans. Many are anxious to enter the ranching and farming business on a modest scale. Commissioner Giles has received more than 5,000 inquiries from men and women veterans.

We urge every post commander to bring this matter to the attention of his members and do everything in his power to get out a vote Thursday, November 7, to assure passage of this amendment.—Texas Legion News.

Lucey spoke on accident prevention work to a number of student groups at Texas Technological College last week.

Wash fabrics may be made fire resistant by dipping them in the solution, he said, while it may be sprayed with good effect on other cloths. The treatment has no effect on fabric appearance except to make it slightly stiffer in some instances, and is effective on all fabrics, including synthetics.

\$150,000 Set For Texas Quota For 1946 Kenny Infantile Paralysis Campaign

DALLAS—Plans for the 1946 Sister Elizabeth Kenny Infantile Paralysis campaign, which will run from November 18 to December 7, are proceeding rapidly, according to George C. Francisco, Jr., Houston, state chairman. The Texas quota is \$150,000.

The state campaign is being conducted by counties, with a separate quota for each county. Chairmen are now being selected for the individual county cam-

paigns. Funds from this campaign will be used to send nurses to Minneapolis to train as Kenny technicians, and to eventually build a Kenny clinic in Texas, so that Texas victims will have access to the best known treatment of this dread disease.

Anyone wishing to help in this campaign is asked to contact the Texas Headquarters, Driskill Hotel, Austin, Texas.

Lots of strange faces around town since the construction crews moved in—every one in town is glad to see them—as it means we will soon have a completely paved square.

We congratulate Lloyd Evans, Louise McKee and the spouse—they all celebrated birthdays Wednesday.

Marie Hancock is the newly elected reporter for the Morton Jr. 4-H Club. Marie brought in such a nicely written report of the club's activities we did not have to make a single correction.

Phiefer and Mattie are betwixt and between—they have started moving into their beautiful new building—part of the stock is in the new, part in the old building and the rest piled up in the back yard. We can't tell whether they have turned grey from all the confusion or if that is white paint in their hair.

Monday we had a short visit with Mrs. J. W. McDermitt in her beautiful new pent house apartment—atop the office building of her husband. She selected the nicest wall paper for decorating the entire apartment we ever saw. The whole apartment is beautifully arranged and furnished.

We couldn't resist clipping the following from the Terry County Herald, published by our colleague, Mr. A. J. Stricklin over in Brownfield, Texas.

There is no further doubt in our mind now as to why the various government agencies seem slow. After all one can't just sit down and answer these queries on the spur of the moment.

OF SUCH WAS WARTIME LIFE The following sentences were taken from letters written by the mothers and wives of men in the service when making or correcting their applications for allotments and reproduced in Publishers Auxiliary of Sept. 21.

Please send me my elopment, as I have a 4 mo. old baby and he is my only support and I need all I can get every day to buy food and keep him in close.

Both sides of my parents is poor and I can't expect nothing from them as my mother has been in bed for one year with the same doctor and won't change.

Please send me my wife's form

Tuesday, Oct. 29**

The Eastern Star is sponsoring a Pioneer Supper on Tuesday, October 29 at 7 p. m. in the American Legion and V. F. W. Hall.

The public is invited and all persons wishing to wear a pioneer costume, are urged to do so.

The ladies of the Eastern Star promise a good supper at a reasonable price.

Please send me a letter and tell me if my husband made application for a wife and baby.

I have already wrote the Pres. and if you don't answer I will write to Uncle Sam and tell him about you.

This is my eighth child—what are you going to do about it? I have already had no clothing for a year and have been regularly visited by the clergy.

Sir, I am forwarding my marriage certificate and my two children. One is a mistake as you can see.

Please find out for certain if my husband is dead, as the man I am living with won't eat or do anything until he nose. I am annoyed to find you branded my children as illiterate. It is a shame and a dirty lie as I married his father a week before he was born.

In answer to you letter, I gave birth to a boy weighing 101 lbs. I hope this is satisfactory.

I have no children as my husband is a truck driver and works day and night.

Curtis Beauty Shop Installs Radio Hair Waving Machine

One of the latest developments of Science is the Radio Timer, automatically time controlled for permanent waving milady's hair.

Mrs. Bessie Curtis of the Curtis Beauty Shop on the north side of the square has installed one of the new machines.

Mrs. Curtis said, "This new machine takes all the guess work out of cold waving and gives one a precision permanent.

It is to beauty operators what x-ray is to the doctor, for it measures these unseen variable factors. Takes permanent waving out of the drug and five and ten cent store and puts it on a professional basis in the Beauty Salon where it belongs.

No other development in the history of permanent waving has contributed so much to the professional progress of the Beauty profession as has the Radio Wave, the precision permanent.

Science shows the way through years of laboratory experiments and testing to a more beautiful, safe and comfortable method of permanent waving."

"Cluny Brown" At Wallace Theatre Wed. and Thurs.

Charles Boyer and Jennifer Jones have at long last been brought together under the magic spell of the fabulous Lubitsch "touch" to provide local moviegoers with the gayest, most excitingly romantic screen event in years. "Cluny Brown", the 20th Century-Fox film in which they are starred, and which shows Wednesday and Thursday at the Wallace Theatre, stands head and shoulders—laughs and romance—over anything this season has yet, or is likely to produce.

So plum-pudding rich in sheer entertainment is this wonderful film treat, that this reviewer is at a happy loss for a starting point from which to begin singing its praises. Rarely has a picture been peopled with so many delightfully out-of-this-world characters, or told so deliciously zany a story as this filmization of Margery Sharp's best-selling novel. Rarely has a picture been so skillfully cast or superbly acted. And, as for production and direction, "Cluny Brown" finds Ernst Lubitsch's sly genius for sparkling romantic comedy at the very peak of perfection—which should be more than enough for anybody's money.

According to law the designs of coins of the United States may not be altered oftener than once in twenty-five years.

Enough Food is no Accident

It is no accident that the largest crops in our history are being harvested this year when we, and the rest of the world, need them most.

In spite of war, loss of labor and little new equipment, the American farmer has again taken care of us and provided a life-saving surplus for abroad.

How do our farmers do it? How is it that only sixteen per cent of our people can feed all of us and go on breaking records in the face of circumstances which slow up industry?

There are three reasons: First, farmers work harder and longer than most other Americans. Second, they know how to make the best use of tools. And, third, they have a long-standing partnership with industry seeking to satisfy their urge to get more out of the land for the same labor. Farmers are still practicing the kind of enterprise that built America.

National thanks are due the farmer for the job he has done in the last five years. Universal respect is due him for his foresight in helping industry equip farms to meet a whole series of emergencies.

BUT... we should not crowd our luck, or the farmer's luck either. Too many farm tools are now worn out. Without new ones production may go down. Farmers need over eight hundred million dollars' worth of new implements and equipment. It is up to industry and labor to keep wheels turning to produce them, but any recurrence of strikes would prevent this.

America should see that the hard-working farmer gets what he needs.

FARM FACTS WORTH KNOWING

Q. Do pigs do better on coarse or fine oats?

A. According to the Journal of Animal Science, a test was made on pigs of 50 pounds initial weight, feeding them coarse, medium, or fine-ground oats, supplemented by proteins and minerals. Those pigs fed the fine-ground oats made the fastest gains. After 60 days of feeding, pigs fed coarse, medium, and fine modulus oats reached 121, 132, and 155 pounds liveweight respectively.

Q. How long should a cow be dry before she is due to calve?

A. A cow should be dried off about 60 days before she is due to calve. It is therefore necessary to keep accurate breeding dates. The Ralston Purina Company, St. Louis, Mo., issues a "Time Saver" herd record card which may be obtained free of cost from any of its dealers. This handy card may be hung in the barn and has blanks where breeding and calving dates may be jotted down.

Q. Of what value are sun porches on the front of the brooder house?

A. Sun porches provide more room and thus permit better feathering, save labor, keep the house cleaner, help prevent accidents, and help save feed.

Q. What is the cause of running fits in dogs?

A. Canine hysteria or running fits may be caused by several things, such as poor quality proteins, a lack of some of the essential vitamins, or a ration too high in wheat gluten. Many cases of so-called running fits are nothing but a digestive disorder. A dog is a nervous animal and throws a fit when he is in pain. At times, internal parasites cause enough pain so that a dog goes into a fit. The best way to prevent fits of any kind is to feed your dog a well-balanced ration, regularly, and keep him free of internal parasites.

LOOKING AHEAD

By George S. Benson, President, Harding College, Searcy, Ark.

Phrase-makers who refer to Dixie as the Bible Belt have missed an important point. Without ignoring anything, I should like to appraise the whole of America as a Bible Land. This is done humbly, for Americans have sometimes failed to follow the light of truth when that light burned brightly before them.

Despite efforts of some modern historians to interpret the facts differently, our forebears developed this nation with religious principles in mind. They read their Bibles. Regardless of how many Americans have forsaken these fundamentals, it remains a nation that has been blessed bountifully by God. Heathenism has been synonomous throughout history for superstition, ignorance, and poverty. The nations today whose citizens recognize God are the very nations which are most sincerely seeking peace.

Our Best Seller
Where in the realm of recorded human experience can you find a land so blessed with liberty and opportunity, as is America? And where in history has there been a land so prosperous, where material blessings fit only for kings of the past may be enjoyed by each man and his neighbor? In 1939 our national income was not merely the highest in the world; it equaled the total incomes of the next six highest nations on earth. Let it be remembered that America's best-seller is still the Bible, a phenomenon which is cause and not effect.

National Bible Week is celebrated this year from October 21 to 27. Where else among the nations can you find a land so dedicating itself? In calling America a land of Bibles, I affirm that the religious people of this nation constitute its greatest asset. There now would be no hope for world peace, there would be no prospect of good citizenship at home, were this not so.

Practical Application
For example, the Bible offers us the perfect formula to put an end to industrial strife. In fact, I could never expect fair play in industrial relations to come about in a land where the Golden Rule is unknown. We must not forget it, here in America. Shall labor forget this rule of action and become a pressure group so determined to apply pressure upon industry that investment capital will be driven out and replace tools? That is exactly the way to cut production and achieve lower and lower wages.

Industry aims at profits: it wants dividends for stockholders and capital for expansion. Should industry withhold fair wages and seek specialized legislation? No, that is the road to bankruptcy. Industry's first objective should not be its own welfare, but the welfare of labor and of agriculture.

Back To Fundamentals
Agriculture wants high prices for all it can produce. How shall it obtain these high prices? Through selfish, class legislation? No, that's the road to failure. Agriculture wants a prosperous market, with many people eating and living well. This it cannot attain by selfishly look-

ing to itself. It must be more interested in the welfare of other groups.

Wherever we have strayed from God, and from His laws and his formulas, that is exactly the point where we must return. Harmony, prosperity, and peace will surely follow. If we loved one another as we love ourselves, we should have no fear about what use might be made of atomic bombs. Neither science, nor so-called "civilization", nor any of the human-"isms", offers a sure cure for the world's ills. As return to God and the principles found in the Bible is our only hope that we shall not literally destroy ourselves.

Don Herold says:

A guy in jail is guaranteed a job.

He is also guaranteed a fixed annual "wage."

He is guaranteed food and shelter.

If he's in for life, he's guaranteed an old-age pension.

People who want everything guaranteed in this world have got to take the surrender of freedom that goes with it.

The only organization that can "guarantee" is the government, and the only way the government can "guarantee" is to put us all in a virtual chain gang and divide the potatoes we raise.

Personally, I'll take freedom and the risks that go with it.
