Laine Pugh and Brookie Coleman Attending Girl's State In Austin

Laine Pugh and Brookie Coleman left Morton last Saturday, en route to Austin, where they will attend Blue Bonnet Girl's State for one week. Sponsors of these two girls are the 1936 Study Club, Chamber of Commerce and the American Legion Auxiliary.

The state wide program is sponsored by the American Legion Auxiliary and is identical to the program offered boys by the American Legion. The program is a part of the Americanism project of the Legion and Auxiliary to bring to the youth of the country a comprehensive study of the fundamentals of our democratic government.

Petition Being Circulated For Airport Bonds

A petition is being circulated in Morton and Cochran county this week for the purpose of requesting Commissioner's Court to call an election on airport bonds in the amount of \$6,000.00.

This amount, with a like amount provided by the Federal government, is needed to complete the already existing airport.

The \$25,000 bond issue voted sometime previously was not sufficient to complete the job and bring the airport facilities into approval with CAA.

Under the terms of the Federal Airport Act, an actual grant of funds can be made only after local project application has been approved by the Administrator of Civil Aeronautics.

Extended Public Relations Program To Be Presented By Iron and Steel Institute

An extended public relation program to promote better understanding of the steel industry among people in rural areas as well as those in plant communities, was announced today by Edward L. Ryerson, chairman of the Public Relations Committee of the American Iron and Steel Institute.

The program will include an expenditure of approximately \$800,000 for a series of advertisements in 1400 weeklies in rural

areas and more than 245 newspapers in steel plant communities.

Mr. Ryerson, chairman, Inland Steel Company, described the program in an address delivered before the general meeting of Institute members at the Waldorf-Astoria in New York City.

The program which was unanimously approved by the Institute's Board of Directors in April, will employ all the principal public relations techniques. In addition to newspaper advertising there will be community activities by individual companies, booklets, radio, posters and periodicals.

The bulk of the program will be directed to those who live in rural communities and in the 175 American steel plant cities where the Institute's member companies are located, Mr. Ryerson said.

"Opinion polls show that people in steel plant communities and steel company employees are sorely lacking in understanding of the industry.

"Many of them think steel profits are 25 cents on the sales dollar. They think 15 cents would be fair. Actually, in 1946, one of the best peacetime production years on record, the industry made only 5 1/2 cents on the dollar," Mr. Ryerson said.

"Similarly both the public and employees think that working in the steel industry is the most hazardous industrial job. Instead, as the National Safety Council figures show, steel is the safest of all heavy industries, and the steelworker is far safer on the job than when riding in his own car.

"We must convince two different kinds of people—those who are honestly unaware of the facts and those that have been deliberately inoculated with false ideas."

The newspaper advertising part of the program is confined

Sidelights From Washington

By George Mahon

Previously I reported that the Republican majority in the House of Representatives would seek to reduce sharply the requests of the President for agriculture. Last week the Agricultural Appropriation Bill passed the House in a form that was very unsatisfactory to many members from farm areas. I voted against reporting the bill out of the Appropriations Committee and spoke and voted for many amendments offered to the bill.

Briefly, here is what the bill does:

1. Cuts AAA soil conservation payments from \$300,000,000 to \$164,000,000. Farmers will have every reason to feel this is a breach of faith by the government as Congress and the President had in effect months ago promised to provide the full amount of \$300,000,000 for the 1947 crop year.

2. The bill provides that the Farmers Home Administration, successor to the FSA, must discontinue the farm ownership program known as the Farm Tenant Purchase Program. FHA loan funds for crop production are cut by one-third.

3. REA funds for administration of the program were cut by \$1,600,000 and loan authorizations for REA co-ops were reduced by \$25,000,000.

4. Funds for the Soil Conservation Service to be used in connection with the conservation districts, and otherwise, were cut by 10 per cent.

5. Funds for the school lunch program were reduced from \$75,000,000 to \$45,000,000.

6. In previous years 30 per cent of the tariff receipts have been available for supporting farm prices and disposing of agricultural surpluses. The bill reduces this program by two-thirds.

The votes in the House of Representatives on most of the above issues were very close. On a motion by the Democrats to restore the full \$300,000,000 for soil conservation payments and some of the other items, we lost by a count of 174 to 180.

What the Senate will now do with the bill remains to be seen. Undoubtedly some changes will be made by the Senate and House before the measure goes to the President for final approval late in June. The outcome of the controversy over this legislation is of vital importance to all farm areas.

chiefly to newspapers in steel plant communities and weeklies in farm districts.

Mr. Ryerson explained that the purposes of the advertising were:

1. To give continuity to the general program and to keep the steel message alive in the steel communities and rural areas.

2. To inspire companies to use local advertising to tell in their own individual way the story of what steel means to the community.

3. To insure that the industry's message is told as simply and understandably as possible.

Suggestions Concerning Control And Prevention Of Poliomyelitis Issued

AUSTIN—Dr. Geo. W. Cox, Health Officer, has issued the following statements and suggestions concerning the control and prevention of poliomyelitis which is now occurring in certain sections of the State.

At one time it was generally believed that this infection was transmitted primarily by discharges from the respiratory tract. It is now believed that poliomyelitis may be another of several gastrointestinal infections. Therefore, control measures must include clean-up campaigns and improvements in sanitation.

Stringent efforts should be made to eliminate house-flies, mosquitoes, and rodents to destroy their breeding places. Every effort should be made to install approved garbage collection systems, and secure safe water supplies. Where adequate municipal sewage disposal systems are not in operation, it is necessary to install and maintain sanitary septic tanks and outdoor privies.

Firestone Tires

All swimming pools should maintain those standards approved by the Texas State Department of Health. This includes maintenance of proper chlorine level. Where such standards are not maintained, those pools should be closed to the public.

All raw foods and vegetables should be washed thoroughly before use and protected from filth and insects. All food handling establishments should adhere strictly to the State Law concerning the sterilization of dishes and utensils. Those restaurants with insufficient personnel to maintain approved sanitation, should close one or two hours a day so that employees can assist in maintaining cleanliness and high sanitation standards.

Approved milk supplies, rodent control measures, high sanitation standards, and strict personal hygiene are all important. Poliomyelitis cases should be quarantined for 14 days and excreta from cases and contacts should be handled and disinfected with the same scrupulous care as in typhoid fever or bacillary dysentery.

Over-exertion in children should be avoided. Children should not visit homes where there is illness. It is advisable to reduce to a minimum all human

Lubbock's Midget Auto Racing Season Underway

Lubbock's 1947 midget auto racing season got underway, May 29, with a nine-race program at the Panhandle South Plains Fair grounds.

Lloyd Ruby of Wichita Falls took top money in the opening session. He had the evening's fastest time of 17.5 seconds. Other drivers here for the first races of the season included Don Brown, Wichita Falls and Red Dowdy, Dallas.

Races ranged in distance from eight to twenty laps around the one-fifth mile caliche track. Although hampered by a muddy track the first night, officials expect drivers to set new speed marks at future races.

The races will continue each Thursday night throughout the summer. Time trials begin at 7:30 p. m. Races start at 8:00 p. m.
