"TEXAS' LAST FRONTIER"

MORTON, COCHRAN COUNTY, TEXAS, THURSDAY, JULY 31, 1947

NUMBER 22

## Tom and John Mather Playing Polo With Cowboy Team In Long Island

If the customer is always right, the U. S. Polo Assn. is wrong. More fans are for Pete Bostwick's \$5000 handicap tournament than any other polo played. But the Polo Assn. is against it.

Despite the association sending letters to every registered club stating: "that the U. S. Polo Assn. is on record disapproving games and tournaments played for prize money..." the fans pack Bostwick's stands for every game. The largest crowd of the season, 3500, watched Palo Duro down Bostwick Field 13-10 in the first semifinal match yesterday.

The Cowboys, Tom Mather, his 19-year-old son John, 23-year-old Gus White who is a neighbor of the Mathers' Palo Duro ranch in Texas, and another Lone Star State player, Stanley Taylor, not only were outmounted but compared to Bostwick, Peter Grace, Alan Corey and Louis Smith were novices in high goal polo.

Yet, the Texans showed the Long Islanders how strong they are and how weak the association's rules are. Originally, Frank Fox and George Kent were grouped with the two Mathers as the Palo Duro team. But at game time Taylor and White were in uniform while Fox was watching from the sidelines. When asked by Pete Bostwick why the change in the line-up Fox told the little fellow: "We merely wanted to strengthen our team." Bostwick objected with: "But the rules, a player must be injured or ill before he can have a substitute." Fox replied: "Pete you had better read that rule." Pete found that according to rule four a player may have a substitute for any reason. Bostwick shrugged his shoulders and said: "I guess, wanting to strengthen your team is any reason."

### Fouling and Over-Confidence Defeated Bostwick Four

Fouling and over-confidence lost the game for Bostwick. After handing the Texans an 8-goal handicap the Red and Blue team evened the count at 9-all in the fourth period. Two foul-shots scored and John Mather, stealing the ball from two Bostwick players right at the mouth of the goal, put the game on the ice for the Texans with a third score. From there on the Texans played for time and not points. Tom Mather played a great game.... Louis Smith who played 10-goal polo at Aiken last spring, was completely off. Strange ponies

## Put The "B" On Bang's Disease

All Texas cattle that are tested for Bang's disease and found infected must be branded on the left jaw with the letter "B" and reported to the Texas Livestock Sanitary Commission, to conform with House Bill 525, recently made law by the State Legislature.

Dr. E. A. Grist, veterinarian of the Texas A. and M. College Extension Service, explains that it is now the duty of the veterinarians who do Bang's testing to place the brand on cows that react positively to the disease. A penalty will be fixed upon any person who refuses to allow the branding, or who sells or disposes of cattle for milk purposes when he knows them to be infected.

The branding of Bang's-infected cows will enable better control of the disease, says Doctor Grist, since control measure must be planned on the basis of individual herd problems.

In the fiscal year, September 1944 to August 1945, 133,891 head of cattle were tested for Bang's disease in Texas, with 9,435 showing up infected. Many of those reacting cattle probably found their way into other herds, says Doctor Grist. The requirements of the branding law will help hold down the spread of the disease.

## Mrs. Tom Arnn Accidentally Shot

Mrs. Tom Arnn, Jr., returned to her home in Morton, Tuesday morning from St. Mary's hospital in Lubbock, where she was taken last Thursday night after being accidentally shot in the left thigh.

Mr. and Mrs. Arnn and Mr. and Mrs. T. K. Williamson, were practicing shooting with a 22 caliber pistol two miles west of town in a caliche pit, when Arnn, under belief all shells had been fired in the gun, was walking with the weapon toward the target when the gun was discharged.

Williamson was standing some distance away at the target counting Arnn's score when the accident occurred.

### SUNDAY GUESTS

Guests in the Earl Wages home Sunday were: Mr. and Mrs. T. L. Anglin, Mr. and Mrs. Short Lemons and son, Mrs. M. C. Anglin and H. C. and Verlin Anglin of Lubbock.

and no fast polo in weeks were the reasons. Smith's wrist watch was ripped off in a scrimmage and hasn't been found yet.... Grace suffered a cut chin.... Bostwick was hit on the nose with the handle of a mallet.... The Texas Club—Cecil Smith, Laddie Sanford, Jules Romph and Bob Nicholds—which plays the California four of George Oliver, Al Parsells, Del Carroll and Buddy Combs, next Sunday, is Tom Mather's selection to win the \$5000.

If the association feels that it can discourage Bostwick, it's wrong again. For Pete is already planning his 1948 tournament, a championship with its own set of rules that definitely state what is allowed and what is not allowed. In the polo association's latest booklet on polo there are 43 clubs listed as being registered members. In the previous blue book published, back in 1942, there were 68 clubs listed. What is the polo association doing to re-establish more than one-third of its clubs?

## Morton Schools Scheduled To Open Sept. 1st.

Morton public schools will begin the fall term of 1947 on September first, according to an announcement made early this week by Carl Ray, member of the school board.

The elementary school is scheduled to be ready for occupancy by September 1 as contractors are fast finishing work on the building. Equipment will probably be moved into the building around the middle of August, Ray said. Elementary pupils attending classes last year in barracks moved here from Hereford after the old elementary school was destroyed by fire in the spring of 1946.

## Voc-Ag. Class To Receive \$4,200 In Farm Tools

Byron Willis, owner of Byron's Auto Supply Store, on the north side of the square, will deliver \$4,200 worth of farm tools and equipment to members of the GI Vocational Agriculture Class at their regular meeting Thursday night, July 31, according to an announcement made by Rex V. Faulkner, Co-ordinator of the Voc. Ag. group.

This equipment is bought by the government for the individual use of members of the classes.

A sound movie projector was recently provided for the Vocational Agriculture group to be used for visual instruction in the classes of GI students taking the various courses of study.

## Missionary Baptist Church Revival Starts August 3rd.

Rev. T. L. (Jack) Bullard, announced this week the beginning of an old-fashioned revival at the Missionary Baptist Church on August 3 continuing through August 17, with two services daily. The morning service of one hour will begin at 10 a. m. and the evening service at eight o'clock with thirty minute song service preceding the sermon.

Roy B. Flippo, well known Amarillo pastor will conduct the preaching service.

Everyone is extended a cordial invitation by the pastor and members to attend any or all of the services.

## Chick Simmons To Play For Dixie Club Dance

Chick Simmons and his orchestra will play for a dance at the Dixie Club, located north on the Muleshoe highway, on Saturday night, August 2.

Morgan Locker, Sax and Clarinet artist, will be featured on the program.

The dance is scheduled to start at 8:30 p. m. and close at midnight.

All those interested in dancing to good music and in a congenial atmosphere are cordially invited by Terrell Johnson, owner of the club, to attend.

### COCHRAN COUNTY OIL NOTE

Stanford Oil and Gas Company No. 1 Hall, section 13, block L, psi survey, Cochran County deepening operation on the southeast side of the two-well Landon pool, was fishing for tools at 7,458 feet, in lime.

SGT. LEWIS GORE of Ft. Myers, visited his cousin, MRS. CARL ENGLAND last week.

## Plans For Cochran-Gaines County 4-H Girls' Encampment Being Made

Plans for the Gaines and Cochran County 4-H Club Girls' Encampment got underway Saturday at a meeting of the County Club leaders and Club presidents.

The encampment will be a two-day affair held in the Girl Scout camp at the McKenzie State Park, Hobbs, August 11 and 12. A group of some one hundred twenty 4-H Club girls and club leaders are expected to attend.

This is the fourth year that the County girls have gone camp. The two days will be spent in learning a new handicraft and in getting acquainted.

K. A. Wilson, Chairman of the County Sponsors Committee, appointed the following members to work out plans in detail: Food: Mrs. Taylor, Mrs. K. A. Wilson, Stokes and La Verne Ches-

ter. Grounds: Mary Helen, Chairman with Lois Willard and Elaine Pugh; Crafts: Cecil Masten, Chairman, Mrs. Willard Henry, Mrs. Morrison, Ella Katherine and Katie Lou Smith.

Entertainment: Mrs. C. O. Bryant, Chairman with Peggy Peters, Mrs. Roulain and Katherine. Transportation: Mrs. I. Hinesley, Chairman with Boyd Willis, Mrs. C. H. Stokell Brown and Martha Wil-

son. The resuscitator now available to the public in County is a combined resuscitator and inhaler unit for the utmost safety in the resuscitation of patients in whom breathing is ceased or where the intake of high concentrations of oxygen or carbon dioxide is indicated.

The unit is readily transported and is used in the scene of an accident. All are carried completely assembled and ready for use in one with a supply of oxygen for two hours. The operation is so simple that it can be carried out by any person without preliminary training.

The equipment operates with a battery and after recharging has been established, it may be changed to act as an automatic unit which will automatically administer oxygen to the patient with any volume of oxygen or carbon dioxide that he requires.

The unit is being kept at the hospital but may be secured for use at any time by telephoning some member of the hospital staff or the county health officer.

Worthy Students of the University Loans

Western University at Georgetown, Texas, has a loan fund known as the "Jesse Dudley Loan Fund" that is set up for the purpose of helping worthy boys and girls to go to the college who have a desire for an education but lack the financial background before launching themselves into the profession. It is the duty of the trustees of this fund to make loans at the very low rate of one per cent per year, while they do not intend to write the total expense of the student, they do desire to help to a very definite degree.

Students who are desirous of a loan may get detailed information from Judge G. W. Thompson or by writing to Mr. McCook, Business Manager, Western University, Georgetown, Texas.

END IN RUIDOSO and Mrs. Carl England and guests, Mr. and Mrs. C. C. Gendert of Ft. Worth, returned Sunday night from a week-end trip to Ruidoso, Cloudcroft and the Sands National Monument, New Mexico.

## Morton and State Building Permits Show Increase

Building permits issued in Morton since May 1, total \$80,000.00 according to records at the City Hall.

Non-residential construction awards totaling \$7,379,895 were granted this week, the Texas Contractor, construction trade journal, reported July 27 in Austin.

This was almost three times more than the \$2,536,323 total for contracts let on residential construction.

Business buildings alone accounted for \$3,407,903 of the non-residential awards.

Contracts were let on 328 homes designed to cost less than \$7,000 each, the total for this category running to \$2,296,218.

There were 12 awards for residences costing more than \$7,000 each, amounting to \$153,605.

One apartment, providing four one-family units, was placed under contract at \$12,500, and duplexes designed to provide living quarters for 30 families were given awards totaling \$74,000.

Awards for the year now stand at \$358,335,243.

No large jobs were reported by the Texas Contractor.

## Farmers Urged To Make Application For Free Bangs Disease Testing

The Bureau of Animal Industry will furnish a representative to test cattle for Bang's disease in Cochran county either in September or October this year if a sufficient number of farmers make application for this service, according to an announcement made this week by Homer Thompson, County Agent.

The service will be free for those who come into the County Agent's office and fill out a regular prescribed form in triplicate. These forms are available now and ready to be filled out; farmers are urged to take advantage of this opportunity at their earliest convenience.

In order to speed up the work these forms must be sent to the BAI office, Ft. Worth, Texas in order to get on the waiting list. Prompt cooperation is requested by the County Agent.

Tests for Bang's disease will also include vaccination of calves with the serum. All this is a free service.

Every farmer who has this work done will be required to dispose of any cattle with the disease as the Bureau of Animal Industry directs. All reactors will be branded on the left jaw with the letter "B" by the veterinarian when reactors are determined.

## Iron Lung Made Available By Local Firemen

A few local farmers have already left their names on the list for this service.

The County Agent's office requests that farmers interested in the free government service execute the forms in triplicate and return immediately.

Farmers who are not interested in the free service may get prompt attention from a Hockley county veterinarian by paying one dollar per head.

## Morton Volunteer Fire Department This Week Announced Purchase of an Iron Lung, Which is Located at the City Hall.

Herman Crockett, Fire Marshal, said the portable lung would be available for use at any time, anywhere in this area.

Anyone in need of the lung should contact the fire department or any fireman. The lung was on demonstration at Todd's Furniture Store earlier this week and previously had been demonstrated to a large group here on the court house lawn.

It is used in cases of drowning, suffocation, childbirth, electrocution, heart attacks, infantile paralysis, carbon monoxide poisoning, surgical shock and many other causes.

The unit consists of three sizes of shields designed to accommodate any body size from that of a child to an adult weighing as much as 280 pounds. The power unit can be operated by hand if there is no electric current.

The Blanchard Mechanotherapist is the oldest portable lung manufactured, according to James M. Compton, distributor, who demonstrated the iron lung in Morton.

The equipment is completely portable, entire unit weighing only 80 pounds. It can be transported and operated by one person.

Firemen are soliciting donations to help pay for the iron lung and the fund is still short by \$500.00, total cost of the unit was \$1000.00. Other contributions may be made to Mac W. Hancock, Sheriff or Mayor H. P. Arnold. All donations will be greatly appreciated, by the fire boys.

## Regular Lions Club Meeting Held In Methodist Church

26 Lions met at the Methodist Church on Wednesday, July 23, for their regular fourth Wednesday luncheon.

Perfect attendance pins were presented by Lion President M. C. Ledbetter to Willard Cox and Zeke Sanders.

The three guests introduced were Ted Luck of the Forrest Lumber Company; Homer E. Thompson, Cochran County Agent and Herb Spencer.

Next regular scheduled meeting is at noon on Wednesday, August 13, at the First Methodist Church.

## Ward Named Chairman Of County For College Building Committee

J. R. Ward, has been named chairman for Cochran county in the campaign urging adoption of the College Building Constitutional Amendment which comes before the voters of Texas on August 23, according to a letter received from Dudley K. Woodward, Jr., of Dallas.

The amendment of which Ward is campaign chairman originated because of Texas' urgent need of college buildings. Texas' 16 state-supported colleges and universities, crowded as never before, face their greatest need today. They urgently need more buildings and equipment with which to provide for vastly increased enrollment of veterans returned to school, and for increasing numbers of Texas high school boys and girls who are attending college.

Educational administrators and governing boards began working on this problem of post-war crowding of institutions many months ago. Last year when this crowded condition actually became a reality, with many students being unable to register because of lack of facilities, educational leaders intensified their efforts to solve this problem. If Texas was to educate its boys and girls, funds had to be made available to construct the necessary buildings.

In the past twenty-five years fourteen of the schools, through their individual efforts, had obtained only approximately \$5,900,000 in appropriations for buildings and associated equipment. It was apparent that relief could come only from a radical departure from the individual method of solicitation. For the old method was then substituted the present plan under which all of these fourteen schools, with the A. and M. College and the University combined, to present a unified, coordinated program on behalf of higher education.

Under this program the fourteen schools would receive in the next thirty years \$45,000,000 as contrasted with approximately \$5,900,000 in the preceding twenty five year period. Agreement among all of the state institutions of higher education upon this program was a unique event and one which will be remembered as a great forward step in Texas education.

Consideration was then given to readjusting the state ad valorem tax by re-allocating a 5-cent portion to state colleges for building purposes. This would assure the program without any increase in taxes. Immediately, this plan appeared to be the answer. An amazing thing happened—an event that will be remembered as a great forward step in educational progress in Texas. The administrators and the governing boards of each of the 16 state-supported schools agreed to support this plan.

This plan is significant because it represents the best thought of educational leaders. All now are in agreement that it is the best possible method of

providing the facilities needed to bring Texas' colleges and universities to the level of plant development necessary for efficient educational progress. It is both unique and significant because it can be accomplished without an increase in taxes. These leaders approached the problem in the realization that higher education in Texas is one program, not 16, and substituted for competition a policy of helpful cooperation.

### Approved by the Legislature

The state's educational leaders, working in co-operation with each other, wrote this plan into a proposed amendment to the state constitution. When the Legislature convened in January this resolution was recognized as so urgent that it became known as Senate Joint Resolution 4. By a vote of 27 to 2 in the Senate, and 110 to 28 in the House, the Legislature approved this measure and ordered it submitted to a vote of the people on August 23rd.

## Garbage Cans Available On Tuesday, Aug. 5

77 approved garbage cans will be offered for sale at cost at the City Hall on Tuesday, August 5.

A City Ordinance enacted in July, 1946, requires that all establishments dispose of their garbage in cans with tight fitting lids.

Cans to be sold here on August 5 are approved by the State Health Department.

## To Conduct Baptist Revival At Maple

T. L. Denton, Pastor of First Baptist Church, Seminole, Texas, will preach for the revival meeting to be held at Maple Baptist Church August 8 to 17.

W. D. Kay, Superintendent of Bula Schools, well known singer and choir director, is in charge of song service at the revival now in progress at First Baptist Church. He will be in charge of the song service for the Maple Baptist Church revival.

Phone 29-

## Flowers and Shrubs Around Jr. High Offer Contrast To Tumble Weeds

One luxuriant growth that all of Morton is proud of is the well-tended beds of flowers and shrubs around the Junior high building, offering a sharp contrast to the tumble weeds very much in evidence on grounds at the Senior building.

Mrs. Mary Gowdy, Junior High Principal, instigated the movement to beautify the grounds around the building. She has been ably assisted in this work by Mrs. Carl Macon and other junior high school teachers.

Last year the Cochran County Garden Club furnished and set out many perennial plants from gardens of individual members.

Jess Tomlin, janitor at the building, has given untiringly of his time and work to keep the beds worked and watered all during the hot, dry summer season.

A Halloween Carnival put on last October by the students of Junior High provided funds for the purchase of shrubs, which were planted around the building, furnishing permanent background for the colorful zinnias, Asters and other summer flowers now blooming so profusely.

Last fall each student planted a tulip bulb and at one time

early this spring 180 tulips blossomed simultaneously.

The entire citizenry is grateful to Mrs. Gowdy, Mr. Tomlin, the school children and all others who have contributed toward making this beauty spot and it is hoped the project will gain momentum and that in the very near future the grounds around all public buildings will show marked improvement.

## Homemakers Club Met With Mrs. Johnnie Brooks

Ten members of the Homemakers Club answered roll call with household hints at the meeting held in the home of Mrs. Johnnie Brooks on July 23.

Miss Mabel Ann Manley, H. D. A., gave an interesting account of her trip and school work in Tennessee earlier this summer. She had on display many useful items made by hand in various localities; these consisted of pottery, linen guest towels, place mats made of corn shucks and other articles; in describing the article Miss Manley gave full details of workmanship.

Members decided to augment the treasury by crocheting three blocks each for a rug to be sold when completed.

The member who contributes most to the club over a given period of time will be awarded a set of mixing bowls. Refreshments of cake and punch were served by the hostess to Mesdames Ed Neiman, Hood Wise, D. A. Ramsey, C. O. Bryant, Rex V. Faulkner, Bo Tisdale, Ralph Debord, J. H. Buchanan and Miss Manley.

## RETURN FROM WHEAT HARVEST IN COLORADO

Mr. and Mrs. V. V. Williamson and children returned to Morton last week, from Springfield, Colorado, where Mr. Williamson has been working in the wheat harvest.

John and Gene Williamson moved on to Holyoke, Colorado, and from that point attended the world rodeo, over in Cheyenne, Wyo., on Wednesday and Thursday of last week.

## ATTENDED WEDDING

Mr. and Mrs. W. A. Johnson attended the Markham-Breeding wedding in Lubbock Monday evening.

The three younger LEDBETTER children are suffering light attacks of whooping cough.

There's elegance in this beige chambray coat dress to meet the demands of any afternoon or evening event. The dress skirt is cut with a front flare for added smartness. Outfits like this one cater to the increasing demand among women for street-wear cottons, the National Cotton Council reports.

## Mrs. R. C. Ross Was Hostess July 28 To Wesleyan Guild

Mrs. R. C. Ross was hostess to the Wesleyan Guild at her home, Monday night, July 28.

The devotional, "Let Us Search and Try Our Ways," was given by Mrs. Elra Oden. Mrs. C. E. Moore, Program Leader, gave an interesting talk on, "An Orderly World For Children."

Concluding a short business session, conducted by Mrs. Ross, in the absence of the president, refreshments were served to the following members: Mesdames Courtney Sanders, Elra Oden, Cliff Davis, Billie Proctor, C. E. Moore, Carl Alexander, C. M. Cravy, J. D. Hawthorne, J. V. McKay, Gayle Bishop, C. W. Jordan, J. W. Alford, Miss Geneva Famuliner and one guest, Mrs. Scott Hawkins.

## -- annegrams --

— by ann england —

Mrs. Dona Doughty who lost her purse some time ago reports that she found the purse, of all places, in her mail box. Signed checks she was carrying in the purse had been torn up and about 21 dollars in cash removed. However important papers, such as drivers' license, etc., were left intact.

Minnieola Cox, daughter of Mr. and Mrs. English Cox, who accompanied her aunt and uncle Mr. and Mrs. L. B. Childs and friends from Amarillo, to the New Mexico mountains last week suffered an acute attack of altitude sickness while making a trip from Cloudfcroft to Alamogorda.

We can sympathize with Minnieola as we made the same trip last Saturday and the drop from timber line (about 10,000 feet) to 5,000 feet in just a matter of minutes certainly does something to ones stomach.

Too, the rough mountain roads of New Mexico are not very conducive to smooth and comfortable riding. It appears that the money made on Texas tourists alone would provide New Mexico with all the paved mountain highways necessary.

Oh, well guess Texans are just suckers when it comes to spending money. However local hunters have intimated that they may give up their annual hunt in New Mexico since the state has doubled the ante on hunting licenses.

The area known the world over as the Great White Sands contains not one particle of sand. It is absolutely the cleanest dirt we ever saw. Actually the formation is of gypsum, covering approximately 176,000 acres of rippled, wind blown dunes often reaching heights of 30 to 60 feet. The startling beauty of the alabaster dunes is well worth the discomfort experienced in reaching the scene.

We made the trip with the spouse's charming sister and her husband, J. B. as she is affectionately known to her family and intimates bears the quaintly beautiful name of her Mother, Jennie Belle England. In speaking to and of her we alternate between the initials (because we love her) and the full name (because we love it).

C. C. the brother in law, tall, dark and good looking, has sort of stopped growing at each end and started expanding around the middle.

He asked us when and how we got started each week on material and stories for the Tribune. That we couldn't explain; as each Monday when we arrive at the office we are overwhelmed with the white space on newspaper that has to be filled up before the paper can be put on the press.

However as the deadline gets nearer and nearer we usually stumble either accidentally or intentionally upon enough material to fill up. As for instance this week; first W. K. Whitman, City Clerk, phoned us to fix up an ad about some garbage cans that will be put on sale here in August and since we are vitally interested in getting all garbage under cover we immediately saw a little story in that.

Then Herman Crockett, Deputy Sheriff and Fire Marshall, came in soliciting funds for the iron lung the Volunteer Fire Department is buying and of course there is a story.

G. W. Thompson, County Judge told us that the county had a portable resuscitator available to the general public; and while in here he also told about a student loan fund available to deserving students in this area. So there were two stories.

Deanie Arnn's accidental gun shot wound is another; and on Monday we received a short note from one of our dearest friends and severist critics who said, "Ann you are not giving Cochran county folks enough County Court News"; so we have resolved to make regular trips to Joe Pierce's office and gather up all the District and County Court news as well as Probate and Vital statistics.

Roy Hickman was in the office for a visit after a three weeks trip and while in here he mentioned the beautiful flowers growing around one Morton school building in contrast to nothing but tumble weeds around the other. After a drive out

by the schools we decided that was good for a local human interest story.

Rex V. Faulkner came in to bring some club notes from his wife and during our talk he told us that the GI Vocational Agriculture students were getting several hundred dollars worth of farm tools this Thursday night.

Mrs. George Williams brought in news about Tom Mather. Internationally famous polo player, whom Cochran Countians claim as their very own.

Carl Ray, member of the school board, drops in while waiting for the bank to open and gives us a little data on school opening.

So that is the way it goes and if we just keep our eyes and ears open we usually have plenty of good material. The writing it up in an interesting manner is something else again and about all we can do along that line is to just do our best and try to remember previous mistakes and not make them again.

Anyway C. C.'s question did start us to thinking about how we get our material for the paper. As to when we start writing we do that inbetween running to potential advertisers with ad layouts, answering the phone, talking to customers over the counter, looking up old papers published years ago for folks who want to prove things, searching the place over for items the male members of the staff have misplaced, coaching Dolores in gathering personals, writing classified ads and making job tickets. Then we spend some time reading dozens of weekly exchanges, magazines and three daily papers in an effort to learn how other writers do it. And that's really all there is to it.

Since H. S. Hawkins got his red Oldsmobile he is no longer jealous of Joe Nicewarner's red Dodge and Harve Andrews red Buick.

Heard the spouse telling Bill, "No matter how many hats my wife buys, she never gets one she can keep anything under."

BILL COOPER, formerly of Morton, now living in Raton, New Mexico, spent several days in Morton this week on business.

Enjoy our delicious, select, well-cooked foods . . . swiftly, courteously served! Everytime you dine out treat yourself to maximum pleasure at minimum prices!

### Chevrolet Parts Plant To Be Built At Parma, Ohio

A new parts fabricating plant devoted exclusively to the manufacture of Chevrolet parts to supply assembly plants and service parts warehouses throughout the country will be erected in Parma, a Cleveland (Ohio) suburb, it was announced in Detroit by Nicholas Dreystadt, Chevrolet general manager and vice president of the General Motors Corp. The new unit in the nationwide Chevrolet manufacturing system will occupy 1,325,000 square feet. Construction is expected to begin immediately. "When in full-scale operation, the new parts plant will employ approximately 5,000," Mr. Dreystadt said. "Employment will be on a gradually expanding basis as the plant moves toward capacity output."

"Selection of Cleveland was made in consideration of the city's strategic central location, since this unit will supply assembly plants from coast to coast. Excellent shipping facilities and an adequate labor supply were factors recommending this choice."

Albert Kahn Associated Architects and Engineers, Inc., have been selected as the architects, Mr. Dreystadt said.

Dogs may have tuberculosis without showing typical symptoms, and it is possible that dogs as well as cats may spread this infection to people.

### TEXAS TECH COLLEGE SECOND SUMMER TERM TOTALS 2285

Enrollment for the second summer term at Texas Technological College totals 2285, with men students outnumbering women by more than three to one, the registrar's office has announced.

The enrollment figure is an increase from 2011 for the second summer term last year. Arts and Science division leads with 807 students, followed by Engineering with 715. Registration in other divisions include 374 in Business Administration, 266 in Agriculture and 123 in Home Economics. Men students number 1763, as compared with 502 women.

Texas has the only helium plant in the nation, located near Amarillo in Potter county.

Both truck and car were going west and the collision occurred while the car was passing the truck, driven by C. L. Lewis, 29, of Odessa, investigators were informed. James was driver of the automobile.

M. G. Cole of the Texas Highway patrol's Brownfield office and Hockley County Dep. Sheriff George Howard investigated.

### A Wise Polio Precaution: Keep Foods Well Covered!

Cover food to keep flies away, especially during the polio danger months in summer, is another wise precaution to follow in combatting spread of the disease, the National Foundation for Infantile Paralysis cautions through its local chapter. The "blue-bottle" fly, particularly, is suspected as a possible factor in transmitting the virus as a result of evidence disclosed by investigations financed by March of Dimes funds.

The National Foundation also urges that all fresh fruit and vegetables should be washed before use; left-over foods covered properly, and garbage or rubbish placed in containers with lids so that flies cannot get to it.

### Veterans' Questions & Answers

Q. What income provision is attached to the pension that I will get as the widow of a soldier in a German prison camp?

A. As the widow of a soldier who died in line of duty, you are pensionable under the law regardless of income.

Q. I divorced my wife on grounds of desertion and would like to know if she can claim part of pension.

A. The divorce discontinues the marital relationship and your wife could not successfully claim a portion of your pension unless she successfully contests the divorce.

Q. How much is allowed for child whose father is taking a G. I. college course? We are divorced and he claims that he is receiving only \$63 a month.

A. A veteran going to school under the Servicemen's Readjustment Act (GI Bill), if single and without dependents, may receive an allowance of \$65 monthly; if he had a dependent or dependents, he may receive \$90 a month. If the child is dependent on your former husband, he would be entitled to the higher rate.

Q. How long after discharge from armed services is readjustment allowance available to a veteran?

A. Readjustment allowances are available to an eligible veteran at any time after his discharge or release until two years after the date of his discharge or release or until two years after the official termination of the war, whichever is later.

### Texas Highway Dept. Entering Thirtieth Year

Reviewing the activities of the Texas Highway Department now entering its 30th year as the state's road building agency, Commission Chairman John S. Redditt reported paved mileage on the state system had more than quadrupled since it was first accurately measured in 1929.

The endless struggle to build new roads as fast as traffic demand increased has shoved the 1929 paved mileage of 6,061 to 25,734 miles on July 1, with more being added every day.

"This still isn't enough," Redditt declared. "The blight of congestion and hazards to safety on many sections of these paved roads render them inadequate to handle the heavy traffic using them."

He expressed confidence that the Commission's recent expanded policy for building farm-to-market roads on a cooperative basis with counties, together with the current federal aid program, would result in substantial improvements to the state's farm transportation problem.

The total investment in the state road network stood at \$934,197,811.55 on July 1, Redditt announced. This includes all expenditures made under the supervision of the Texas Highway Department since it was created thirty years ago.

"It has been a good investment," he said. "I doubt if any other similar expenditure of public funds has done so much good for as many people."

The Chairman paid tribute to the thousands of employees who had built the organization into one of the top road building agencies of the nation. "Of the 7,663 employees on the payroll today, 2,278 have been with us for ten years or more, while 100 have served the Department 25 years or more. Only one has completed 30 years of service, but two others are approaching the 30 year mark."

"This organization has made it possible for Texas to maintain its place at the top among the states of the nation in carrying out a vast postwar construction program. Today work is progressing on contracts in excess of \$77,000,000, a volume that has never before been reached in the Department's history."

### WOMEN BEWARE

In the year 1700, the British Parliament passed a law providing that any woman who attempted to urge a man into matrimony "by means of scent or cosmetic washes, artificial teeth, false hair, Spanish wool, iron stays, hoops, high-heeled shoes or bolstered hips" should draw upon herself the penalty prescribed for witchcraft and that the marriage would, in the eyes of the law, "stand null and void."

### WATER LAWN AT NIGHT

Watering the lawn at night does more than make the grass grow.

It also helps keep houses cool the following day, according to Miss Margaret W. Weeks, dean of Home Economics at Texas Technological College. As a further aid to cool summer living, she suggested that windows be closed and shades pulled all the way down on the sunny side of the house during the day.

All applications must be mailed before midnight August 30, 1947. Positions for which examinations will be held, and their entrance salaries, are: Laboratory Assistant (\$115); Laboratory Technician (\$161); Senior Laboratory Technician (\$201.25).

Application blanks may be obtained from Russell E. Shrader Merit System Supervisor, Littlefield Building, Austin, Texas.

## LOOKING AHEAD

By George S. Benson, President, Harding College, Searcy, Ark.

### THE MONEY MAN

Just where is all the nation's money? Probably we've all asked that question at some time. However, we don't have to go far to find a multitude of "experts" eager to point out the answer—their answer. These might range from the old wheeze about "90 per cent of the wealth in the hands of 10 per cent of the people," to other outdated adages just as economically unsound.

The real answer is simple enough. In investigating the possible culprits who command the nation's economy most of us fail to consider the most important individuals—ourselves. Yet many people think only of wealth as being controlled by a few. These usually are pictured as pompous capitalists exploiting the masses for their own gain. A more untruth picture could hardly exist.

### Equal Shares

Actually, the distribution of the nation's money constitutes the most striking argument for freedom of endeavor in our country. Together with more than 50 million of his fellow employed workers, Mr. Average Citizen in 1945 took home some 114.5 billion dollars—71.1 per cent of the national income. As members of the largest group they received the largest share of the country's money. This is the natural consequence of democracy.

Wide distribution does not stop here. In the same period 15 per cent of the national income went to the proprietor class—the farmers, small businessmen, doctors, dentists, and other professional people. It is difficult to think of the local farmer, the corner grocer, or the family doctor as greedy exploiters. Through their own work and training they have

provided themselves with a livelihood.

### More Sharing

The remaining 12.9 per cent is again distributed. Rents, interest and dividends account for the major part, with corporate savings amounting to only 2.8 per cent of the national income. Included in rent income are large numbers of small property owners, whose rent-bearing holdings might be only a home or building. Then, too, thousands of small stockholders account for a good share of the interest and dividend income.

The 4.5 billion dollars earned as corporate savings is a far cry from the "profiteers" pictures painted by those who would change our way of economic life. For the most part, this is the source of the laboring man's income. This 2.8 per cent return to corporations is their share of a system which puts 71.1 per cent into the pockets of the employed man. As a minority group, corporations receive a minority share.

### What Change?

Despite these sobering statistics, there are many who would call for a change. There are those who would take the responsibility away from the individual and vest it in a central authority. It is paradoxical that these interests would "give the wealth to the people" in a nation where the majority of the people now receive the majority of the income. They would junk our successful economy to institute an unproved one—all to achieve an ideal which we have achieved already in greater measure than has any other country.

Rather than give serious attention to radical changes, we should strengthen and protect what we now have. It is alarming that in the past few years investment in tools and machinery has fallen off. This is the result of discouragement to capital. It comes from excessive taxes, government control, and uncertainty of industrial problems, for the most part. The use of capital in investment, under private management, has made our system work. To keep a dynamic economy we must preserve that system. Freedom of opportunity is the keynote to a future of prosperity.

### HOSPITAL FOR CHICKS

Where large numbers of poultry are raised, owners should set up a hospital pen for weak and sick birds, says the American Veterinary Medical Association. In this way, healthy birds will have a better chance of staying healthy, and those which are ill or bordering on disease can be kept under close watch.

## New \$50,000 Book Stacks Being Added At Tech

More than doubling book capacity of the Texas Technological College library, work began this week on new \$50,000 book stacks.

When the library was built in 1937, funds were not provided for stack installation, causing a shortage of space for book storage. The new stacks will be arranged on five levels, making room for between 250,000 and 300,000 volumes.

Installation is expected to be completed in time for the opening of school in the fall, according to Librarian A. S. Gaylord. Additional book capacity, together with recent increases in the book budget and provisions for professional staff increases next year, equips the library to meet needs of students and faculty members at all levels of activity, Pres. W. M. Whyburn points out.

A portion of the book fund is being set aside for the purchase of special collections of books and reference works to round out fields. A special collection of Southwest history will be housed on the first floor of the building, according to present plans. College research facilities are

Tribune, Morton, Cochran County, Texas, Thursday, July 24, 1947

being further boosted by installation of 95 study carrels in the stacks for use of graduate students and faculty members working on special projects.

A Statement To Our Customers About Resale

# PRICES of PRODUCTS

Built by International Harvester Company

Here at Harvester we are concerned over the fact that a growing number of our products are appearing on the resale market at greatly inflated prices.

As manufacturers, we try to produce at the lowest possible cost. We cannot set the prices at which our products—tractors, motor trucks, farm implements, refrigeration, and industrial power equipment—are sold. We can and do suggest list prices which the great majority of our dealers adopt as their retail prices.

**\$20,000,000 Price Reduction**  
Our basic price policy was publicly stated in March, 1947, when we announced price reductions at the rate of approximately \$20,000,000 per year on our products. At that time, Fowler McCormick, Chairman of the Board, said: "ANY PRICE IS TOO HIGH IF IT CAN BE REDUCED."

Practically all of our dealers cooperated with this policy and passed on the savings to their customers.

The objective of the price reductions was to make it possible for customers to buy our products, which they need so badly, at lower prices. Naturally, this purpose is defeated when our products are sold by anybody at inflated prices.

**IH Production at All-Time Peak**  
Inflated prices are caused by

the difference between supply and demand. To increase supply, we now have the greatest number of employees in history on our payrolls—almost 90,000 in the United States, as against about 60,000 prewar. Large new plants are getting into production in Louisville, Evansville, and Melrose Park. A fourth will soon be in operation in Memphis. The men and women now employed are turning out the greatest quantities of IH products of all kinds that we have ever made. These are also the finest products we have ever made, and recognition of that fact is an important contributing factor to the demand for them.

### Distribution to Dealers

But even record-breaking production is not sufficient to give your dealer—and other IH dealers—enough products to meet today's demand. We have tried to make the fairest possible geographical allocation of our products so that every dealer would get a fair share, and we know that dealers, in most cases, have tried earnestly to make the fairest possible distribution to their customers.

But we also know that many of our products—far too many—are being resold at inflated prices. The public criticism and resentment of these resales are of real concern to us, as we know they must be to our dealers, because such reactions en-

danger the good will of the dealer and the Company any community.

**Distribution to Customers**  
Experience shows that IH new products are being sold by users who decide they can continue to make out on their old equipment after they have had an inflated offer on their new equipment. To illustrate this, many dealers are taking measures to be sure the equipment purchased is their customers' own use is not to be resold.

Nearly all IH dealers, we believe, are now using the book of PRESENT NEED as their primary guide for the sale of scarce products. The customer whose need is real and urgent is not likely to resell.

### What Price Should You Pay?

While it may take a little more time to get delivery, we urge our customers to consider the factors mentioned before paying more than list price for any IH product. Any IH dealer or branch who furnishes the suggested list price for any IH product.

We know that the overwhelming majority of IH dealers are as much opposed to inflated prices as we are. In public interest, we have already asked their cooperation—and are now asking the operation of customer cooperation in correcting this situation.

# INTERNATIONAL HARVESTER

Sirs, what must I do to be saved? ... Believe on the Lord Jesus Christ, and thou shalt be saved.—Acts 16:30, 31.

## "Afraid?"

That earthquake would scare anyone! It tore open these iron doors! I knew the prisoners had escaped! My head would soon come off!

The way you two Christians took that beating yesterday turned me sick. I reckon I began then to want something that now I know I must have.

Later, in your stocks, you talked with Someone I couldn't see. You even sang. And now you beg me not to kill myself.

I can't go on the way I've been—selfish, and mean, and cruel. I want what you've got. What must I do to get it?

NOTHING?  
Nothing I can do to get it? Then I can't save myself!

Oh, Sir, must I only believe that there is One whom you call Jesus who can and will save? And depend on Him to do it? I will— I do believe on Him NOW!

For by grace are ye saved through faith; and that not of yourselves: it is the gift of God: Not of works, lest any man should boast.—EPHESIANS 2:8, 9.

## Wing Of Southwest Farm Markets

attle, sheep, and cotton netted losses last week, and some of the farm products found dull demand, according to the Production and Marketing Administration, U. S. Department of Agriculture.

Large world requirements heightened wheat last week, but cool weather unfavorable to corn tended to offset July estimates of increased production.

Wheat netted a slight advance, and white corn gained a cent or two. Oats held firm, influenced by scarcity of good grain from the new crop. Offerings from the current harvest of barley and grain sorghums held prices relatively unchanged.

Large week cotton losses liquidated early gains, and spot prices closed mostly \$1.00 to \$7.00 lower. Current ginnings in South Texas sold freely in good demand. Quality held up well at mostly strict middling grade.

Good quality candied eggs held fairly firm last week, but lower grades and current receipts met dull demand, and some markets quoted lower prices. Fryers and broilers continue in good demand. Liberal supplies of hens moved slowly, and some went into storage. Prices dropped at Denver early and at Dallas later in the week.

After showing strength on some classes early last week, cattle eased later to close steady to 50 cents or more lower on most classes. Common to medium steers and yearlings sold from \$14 to \$20 at Houston; while medium kinds brought \$18 to \$23 at Fort Worth, and medium to

## LITTLE DOES A LOT . . .

When a woman starts improving on nature, as women have done for centuries, the results are shown on the eye. And it's a surprising fact that American women spend more money each year on beauty aids than they spend for the electric power that makes their homes so comfortable.

This doesn't mean women are cosmetic-crazy. It at all! It merely proves that electricity does a lot for a little.

Every penny of those FEW dollars spent monthly for electricity buys you plenty of dependable, labor-saving service. One penny will light a 100-watt bulb for about 2 hours. It will give you the finest radio entertainment for an evening. It can wash the dirt from 3 large tubs of washing—give you correct time for 4 days—run your refrigerator for about 5 hours. Yes, electricity does many, many more chores than the average home than it did 15 years ago—it does about twice as much for the money as it did then! And how dependable it is!

## Texas To Have Finest State-Operated Colleges With Passage Of Amendment

Texas will be provided with the finest system of state-operated colleges in the nation, and this without increasing taxes, if voters ratify a proposed amendment to the state constitution creating a special building fund for colleges, according to officials at Texas Technological College.

A special election on the amendment will be held August 23. The fund would enable Tech and other colleges to begin work

## Midget Auto Racing In Progress At Lubbock Again

Midget auto racing is again in full swing in Lubbock at the Fair grounds every Thursday night and will continue weekly until opening of the 30th Annual Panhandle South Plains Fair.

Des Abbott, new promoter of the races, has agreed not only to furnish a fast and exciting program weekly, but will also put on daily afternoon contests at the Fair, September 29 through October 4.

Fifteen drivers drove in the best races of the season last week over an improved track. Three races were decided by less than a car length.

## Coffee's On The House

Something new has been added to make rail trips more enjoyable for the much-traveling American public, especially during these summer vacation months. It's "coffee" on the house" served passengers on transcontinental trains of the Texas and Pacific.

Twice daily a dining car partyman prepares fresh coffee to be served free of charge to the passengers. Dining car attendants pass through the cars with coffee, sugar, cream, and paper cups to furnish travelers these pleasant midmorning and mid-afternoon treats.

The famous Texas-thru-to-New York "Sunshine" Special is one of the trains featuring this unique post-war service which holds high approval by travelers especially since "It's on the house."

## Time Saver In Polishing Silver

Home makers may bid goodbye to spending long and tedious hours polishing the family silver.

Flatware may be rendered gleaming in from two to five minutes by placing it in an old aluminum pan and boiling it in a solution of one teaspoon of soda and one teaspoon of salt per quart of water, according to Miss Lola M. Drew, assistant professor of home management at Texas Technological College. Each piece of silver should touch the pan while boiling.

Knives with hollow handles should not be polished in this manner, as the boiling water will loosen cement. Miss Drew cautioned. Neither should silver with oxidized or French gray finishes be treated with this method, since chemical action of the solution and aluminum will remove the soft finish and make the entire piece shine brightly.

However, for other pieces, many authorities say this treatment is less detrimental to silver than old fashioned rubbing.

Good light lots \$21 to \$25 at Wichita. San Antonio bought medium grass steers at \$19 to \$23, and Oklahoma City paid \$17 to \$23 for common to medium grades. Denver took common to medium steers at \$16 to \$19.

Hogs soared general advances of 50 cents to \$2.00 per hundred pounds at most southwest markets. Good and choice medium weight butcher hogs reached \$26.25 at San Antonio; \$27 at Fort Worth; \$27.75 at Oklahoma City; \$27.50 at Wichita; and \$29.25 at Denver. Sows ranged from \$20 to \$23, and pigs from \$23 to \$27 or more.

immediately on a long-range development program to relieve over-crowded conditions.

The amendment would assign to the building fund a five-cent portion of the presently constitutionally authorized seven-cent per \$100 valuation property tax for Confederate pension purposes, and would reduce the maximum property tax for the state general fund from 35 cents to 30 cents. This action would have no actual effect on the Confederate fund, since only two cents per \$100 valuation has been levied for several years and the fund now has a surplus. The automatic tax board recently announced that collection of the full 35 cents for the general fund is authorized for next year.

If the amendment passes, this levy will be reduced five cents, thus keeping taxes at the same overall level, proponents explained.

The amendment is endorsed by Gov. Beauford Jester and by a number of state-wide organizations including the Texas League of Women Voters.

## VA To Authorize Dental Treatment For Veterans

Dental services of the Veterans administration regional office at Lubbock announced today that it would immediately authorize dental treatment, at VA expense, for World War II veterans with dental deficiencies who have been out of service less than one year.

VA said that dental difficulties of veterans who were discharged less than a year ago are presumed to be service connected, and treatment in most cases can be automatically authorized without reference to the veteran's medical service record. This saves considerable time and gives the veteran the advantage of much quicker dental care.

It was emphasized, however, that he must, in all cases, secure authorization before going to a local dentist for treatment, otherwise VA cannot pay the bill.

When applications are filed later than a year after discharge, the claim must be adjudicated and rated on the basis of medical evidence as service-connected before dental treatment can be authorized. Such claims require a longer time before authorization can be granted than those filed within one year of discharge, VA officials said.

## Superintendents Announced For Lubbock Fair

Fair officials this week announced the names of the Women's Department superintendents for the 30th Annual Panhandle South Plains Fair which will be held at Lubbock September 29 through October 4.

Mrs. O. R. Copeland of Slide was named director of the Women's Department. Her assistant is Mrs. O. R. Patterson of Posey.

Other superintendents are Miss Lucille Schultz, Plainview Home Demonstration Agent, culinary; Miss Mary Lela Grindstaff, Seminole Home Demonstration Agent, textile; Mrs. Laurette A. Williamson, Muleshoe Home Demonstration Agent, 4-H Clubs; Mrs. George Stiles, Floydada, women's home demonstration clubs; Mrs. J. C. Levens, Lubbock, flowers; Mrs. J. C. Allensworth, Lubbock, art; and Mrs. George R. Pierce, Lubbock, relics.

Mrs. Copeland was director of the department last year. Also serving for the second consecutive year are Mrs. Levens and Mrs. Allensworth.

## Add Salt To Water For Prevention Of Heat Cramps

AUSTIN—If your work is such that it causes excessive perspiration add a pinch of ordinary table salt to each drink of water you take, to prevent heat cramps. This is advised by Dr. Geo. W. Cox, State Health Officer, to prevent a possible increase in the number of heat victims as the Texas thermometer hits 95 degrees and above.

Laborers, mechanics, farmers, and white collar workers whose work causes them to sweat profusely, are in danger of having their body salt content become deficient with resulting heat cramps or heat fag. Salt is a prominent constituent of sweat; the body may lose as high as 40 to 50 grams of salt during hot days.

In industry, a method of preventing heat cramps is to take a tablet of pure salt or a mixture of salt and dextrose with each drink of water. Workmen whose duties require muscular exertion should be especially careful to add more than the usual amount of salt to what they eat and drink.

Heat cramp is characterized by pains (cramps) in the abdominal region, headache, and in severe cases, by nausea and vomiting. The body temperature remains about normal, likewise the pulse rate. Body salt losses occur without the knowledge of the individual until there is a deficiency; then the abdominal muscles begin to cramp.

Salt deficiency may be prevented by taking salt in various ways. Where prepared tablets are not available, table salt may be added to each drink of water. Milk is a source of salt and will help to make up for the deficiency caused by sweating.

It is a wise precaution to keep the body supplied with salt, and thus avoid much possible suffering and loss of time from heat cramps.

## Weekly SURPLUS NEWS

Accomplishments of the Southwestern Zone of War Assets Administration during the past year were recognized by Administrator Robert M. Littlejohn of Washington, who commended Zone Administrator C. B. Rucker of the Grand Prairie WAA office. During the past year the Southwestern Zone has disposed of a large percentage of the inventory within Arkansas, Oklahoma, Mississippi, Louisiana and Texas. Through its accelerated disposal program, the Zone has been able to reduce personnel more than 50 per cent and operating costs 60 per cent.

Described as probably among the last surplus aircraft to be marketed by the government in the Grand Prairie region, two Cessna twin-engine planes will be sold at high bid August 5 by War Assets Administration. It has been announced by the aircraft division. The planes are identical in type except one has wooden, the other metal propellers. They are located at Midwest Airport, Fort Worth, and Blackland Army Air Field, Waco. The public is invited to make inspection daily through August 4.

Big Spring Army Air Field is the newest war-built installation slated for clearance of camp buildings. Two hundred seventy eight barracks, administration and recreation halls, post exchange, storehouses and supply rooms will be offered by the WAA office of real property on a competitive bid basis. Priority groups will have first choice of the buildings after inspection is opened on August 5, and remaining buildings will be sold to the public, with closing date for submission of bids set at August 20. Purchasers are required to make their own removal of the structures from the present Big Spring site.

Purchase of the former Continental Motors Corporation plant at Garland by the National Equipment Company of Texas, Inc. of Marshall, Texas, from WAA has been announced. J. N. Laughlin, president of National Equipment Company, stated that his firm plans to manufacture farm tractors and other auxiliary implements. Possession of the plant will be taken from WAA about August 15.

Wholesalers, purchasing goods originally costing \$5,885,000, bought three times as much war surplus in the Grand Prairie region during June as all other classes of buyers, according to the monthly report of the WAA. Retailers were second high among the buyers, with purchases totaling \$1,941,000, and government and non-profit institutions, industrial users and veterans followed in the order named. Average return to the government netted 15.8 per cent of the acquisition cost of the property for June as compared to 16.1 per cent for the previous month of May. Total sales for the month of June were on property originally valued at \$9,201,000.

## Roy Hudson Back On Job Thanks To Line Comrades

Roy Hudson, well known in Morton, is back on the job due to the efforts of five fellow workers who came to his aid when he received a 60,000 volt shock while at work on March 28.

Awards of \$125 watches went to Truman Perry, foreman of Hudson's gang working for the Brazos River Transmission Electric Co-operative, and to J. E. Groeschell, R. C. Hartgraves, J. C. Compton and J. S. Smith, linemen.

The six men were on the job at Peaster Substation in Parker County when Hudson received the jolt that nearly cost his life. His five fellow workers came to his aid and worked with him 30 minutes until an ambulance arrived and he was taken to a Weatherford hospital.

Hudson now has recovered and is back at work.

The awards were presented in a ceremony Friday at the Granbury Substation. Presenting them on behalf of the Employers Mutual Casualty Company of Wausau, Wis., was Lawrence Mayer, national safety director for electrical power companies.

## Truman Passes On Terminal Leave Bond Bill

President Truman signed the bill, Saturday, permitting GIs to cash their terminal leave bonds any time after Sept. 1, 1947.

The president issued a statement suggesting strongly that "it is to the veterans' best interest that they keep their bonds if they do not absolutely need to cash them now."

He said if a large amount of the outstanding bonds he estimated at \$2,000,000,000 are redeemed soon general inflationary pressures "would receive a substantial boost."

Passed without a dissenting vote by both the House and the Senate, the legislation nullifies a provision of the 1946 law that required former servicemen to hold the bonds five years before

cashing them. The legislation would permit an estimated 9,000,000 former GIs and a smaller number of officers to cash the bonds at face value plus accrued interest through local banks. The House armed

service committee said it expected about \$1,000,000,000 of them to be cashed.

The others would be held by the two and one-half per cent interest the government pays them.

## What Is the Safety Of Your Family Worth?

Houdaille Shock Absorbers . . . .

are thought of chiefly for their contribution to (1) modern riding comfort. That, however, is just the first of seven reasons why they are valued so highly by owners, dealers and manufacturers alike.

The dependable operation of Houdailles for thousands upon thousands of miles is an important factor in assuring (2) maximum tire mileage and (3) gasoline economy. They also play a part in (4) stabilizing the steering system, in (5) safeguarding springs and their mountings, and in (6) helping maintain the body in good condition. Most important of all is their role in (7) safety. For Houdailles increase stability and reduce rolling and side-sway which, in turn, detract from the driver's control and add to the danger of skidding on slippery pavements.

# TRAIL DUST

By DOUGLAS MEADOR

Similarity of many patterns is obvious as to escape interest concern. Pilots are trained to be alert when the plane is making its run to take the air. They know there is a certain point, an instant fraught with destiny, when the point on the runway is reached, the plane may be turned and brought back, but beyond it there is no longer the authority of decision. Life is a plane with each individual as pilot. We are aware of a fatal start and know at that moment when we pass the point where decision is drained of its power. It may be another link of amber liquid, one more hour of association in imperfect fellowship or the empty shell of forgotten duty washed upon the putrid shore of neglect.

In the concatenation of trivial events that fashion a wretched life we often neglect to discount our selfish desires which fail to open, allowing them to wear masks of misfortunes.

My more worthy resolutions like old dogs that are unable to resist a comfortable shade when the way becomes long and difficult.

When time rots our splintered beams from the wreckage of empires which sheltered bright ambitions, it becomes more difficult to rebuild from the rubble.

Many moons have shed their splendor since the grey-haired, smiling man, unsaddled his weary horse and went to the house. His old boots are dry and rust-covered and his rope is long frayed. Perhaps none of the hundreds who knew him ever thought of the artist's creed in his heart; he never painted a picture. Yet in the memory of his past rich life, there remains the monument of his love for truth and beauty; his worship of justice.

Looking back into the valley of saddle-sore years, those who have reached the heights have no quarrel with adversity. It is the vital spur that forces more effort in the crucial hour when success and failure race the dry hot sands of doubt. A kite does not rise except when it is held against the wind.

## Farm, Business and Labor Leaders Should Be Consulted by Lawmakers, Says C. E. Wilson

A plan to utilize the knowledge, experience and service of leaders in business, agriculture and labor to aid Congress in writing fair and constructive laws is proposed by

CHARLES E. WILSON

Charles E. Wilson, president, General Electric Company, in an analysis of economic control and political freedom prepared for the American Iron and Steel Institute.

"We are more interested," he wrote, "in creating new wealth for all the people than in dividing what there is, a luxury which only a state-managed economy can bestow upon its children."

Blaming "tinkering in high places" for the present situation in which many manufacturers, and other business men have "no alternative but to increase wages and kick prices a little higher in order to bail out," Mr. Wilson criticized the principal distortion in the price structure.

"In somewhat roundabout fashion," Mr. Wilson told the Iron and Steel Institute, "we have come to a situation in our national life important to management and labor, vendor and vendee, public servant and private enterpriser. It is this: Are we to purchase social stability,

more equitable distribution of wealth, and insurance against the hazards of unemployment, sickness and other unhappy by-products of a non-interference economy by giving up a large chunk of our traditional freedom and independence in favor of a planned and controlled economy?"

Stating that the nation has experienced the preliminary and conditioning doses of planned economy and after a decent interval rejected them at the polls and elsewhere Mr. Wilson continued:

"We do not want to turn away from the problems of inflation, housing, agriculture, depression and unemployment, the perils of unregulated industrial disorders, the benefits of constructive unionism, the question of universal military service, regulation of atomic energy projects, financial and investment safeguards,—from any of the things which will help more Americans live longer, healthier, safer, more comfortable, more efficient, prosperous and useful lives. We want to eat our cake—and have it."

The General Electric executive said we need "government in the modern economic picture, but government's participation must be by law, not by executive whim." Government should participate, he said, as an enforcer, not as a petty tyrant.

Stating that we have right to expect only the virtues of common sense, fairness, and respect for law in our national law makers, Mr. Wilson declared that private citizens owe them a duty to supply expert advice and counsel in special fields. It is vital, he said, that some form of continuous conference be set up at which non-governmental leaders in business, agriculture and labor will sit with representatives of the proper committees of House and Senate, and with access to the statistics and knowledge of governmental departments assist the legislative branch in writing the laws. He stressed that such a conference would be "advisory and unofficial, but extremely practical and helpful."

Tribune, Morton, Cochran County, Texas, Thursday, July 31, 1947

prairie roads near Amarillo is a battle-scarred jeep that has lost its khaki canvas top. The young rancher who often drives with a booted foot on the dash, has replaced the canvas with an untanned cowhide, the hair side to the sun. If all the swords from the world's wars were beaten into plowshares it is probable there would not be sufficient soil for them to till.

Romance advances with the changing scene of life, always breathing the sweet enchantment of youth's moon-drenched garden. Many sleek automobiles were parked in the little drive-in hamburger stand when the skeleton cab of an old farm tractor shut off the motor under the colored neon lights. Doors opened on several cars and laughing young girls encircled the farm youth. He was not a handsome boy but there was a wholesomeness in his voice and a dash of carelessness in the way a shock of rope-colored hair fell across his forehead. He drank a tall glass of soda and ate a hamburger which one of the girls proffered him, then started the engine, switched on his lights, headed the tractor back towards the farm.

Secretly I appreciate my creditors who wait a few days after the first of each month to submit their statements. Thru the delayed billing I enjoy a certain confidence regarding my solvency.

### LIGHTNING STROKE IN COWS

Because dairy cows frequently assemble under trees or along fences, it is not uncommon for groups of them to be killed by lightning. Sometimes the bolt descends directly to the spot where the animals are huddled, but at other times it travels to that point on an electrical conductor. Animals that survive a mild lightning shock may become paralyzed or blind.

It is difficult to prove that an animal was killed by lightning. Often the hair is singed along the path of the electrical charge or there are burns of varying severity. Death due to lightning is strongly suggested if the head is protruding through a wire fence or if grass is found between the teeth.

Clams near Australia with shells weighing nearly half a ton have been reported to capture and kill humans.

### Household Hints

Pull your card tables, folding chairs and games out of cupboards or sliding racks built into waste space under the stairs.

A little wax applied to furniture caster sockets keeps them turning easily in damp weather.

If you will place citrus fruits to be used in salad in hot water for a few minutes before peeling, the under skin will come off easily.

Coat the inside of lids on mustard or horseradish jars with a thin layer of paraffin and they'll not turn green.

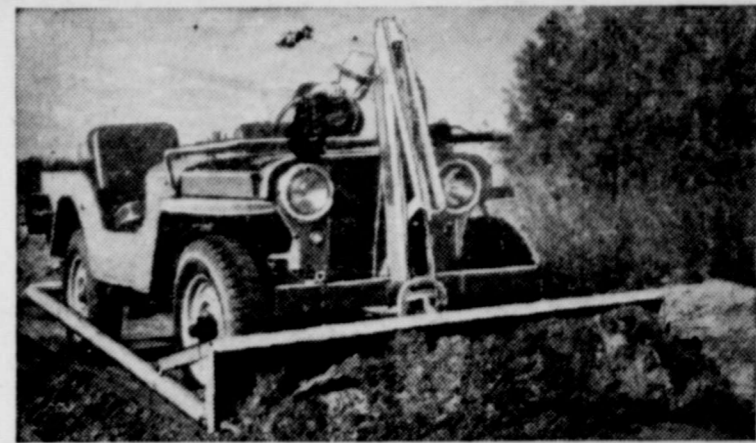

Brushing once a day will double the life of a felt hat.

If your neckline is long and thin, wear high necklines, sometimes softened with ruffles.

To send coins through mail, cut a square from the corner of an old envelope. Slip coin in square and turn back the opening to hold it in.

Glue pieces of felt on the bottom of your vases and they will

### Civilian Jeep Bulldozer

Fitted with a special TMC Hydraulic lift that raises and lowers the bulldozer blade, all four wheels are driving as this civilian jeep scrapes roads or fills ditches, jobs it does as easily as pulling plows or powering farm machinery through a power take-off. Shifted to two-wheel drive, the Willys-Overland vehicle races to the next task at speeds up to 60 miles an hour.

not mar the surfaces of the tables on which they are placed.

Keep an old tooth brush in your sewing box. The next time you have to rip out seams with a razor blade, use the tooth brush to brush off little threads along seams.

After you have washed your

sweater, press it when it is almost dry. Lay it smoothly on the ironing board, placing a cloth over it. Use a warm iron and press lightly, then allow sweater to lie flat on a towel to finish drying.

In some African areas, the smelting of iron is accompanied by a religious ritual.

### LIVESTOCK LIFE LINES

The brood sow's ration should always contain alfalfa.

A high protein diet helps to protect sheep against selenium poisoning.

There is no reliable method of predicting the sex of a chick in the egg.

Pullets should be kept separate from old hens to reduce disease losses.

The well-being of every person in the world hinges on livestock health.

Calves need extra amounts of

vitamin A when they have digestive disturbances.

Approximately 75 per cent of the deaths of swine occur among pigs before weaning time.

Cattle which react to the blood test for brucellosis should not be vaccinated against this disease.

Dried sweet potatoes make good livestock feed, supplying both protein and carbohydrate and comparing favorably with corn.

Should a ewe disown one of her twins, as is sometimes the case, it is generally better to bring up the unwanted one by hand feeding rather than to fuss with the temperamental motherhood of ewes.

Pigs fed exclusively on cereal grains and meat meal develop a deficiency of vitamins A and B. Unless these elements are supplied, preferably by feeding young grass or other green feed, staggers and death often result.

#### SKIN TROUBLE IN COWS

When the skin of cattle becomes scaly, thickened and wrinkled, suspect vitamin deficiency. The missing factor may be either vitamin A or vitamin C, or both. Addition of the missing vitamin to the ration usually corrects this condition.

#### SWINE TUBERCULOSIS

If a large number of swine in a community have tuberculosis, it will usually be found that the tuberculosis rate is also high in people, cattle, and chickens of that community. The reason is that swine become infected by the same types of tuberculosis germs that cause the disease in man, cattle, and birds.

### New Ford Tractor

**DETROIT**—Good news for the nation's farmers as the new Ford tractor rolls off the production lines of Ford's Highland Park plant at the rate of 400 daily. Features include an improved hydraulic system for implement control and four forward speeds. With the new line of Dearborn farm equipment, the Ford tractor is marketed nationally by Dearborn Motors Corporation. Michigan farmerette Gloria Carlson tries out the new tractor at Dearborn Motors' experimental farm, Clarkston, Michigan.

### BOYCE HOUSE 'Gives You Texas'

Visited Oklahoma City recently to make a speech, first time I'd ever spoken in Oklahoma. Upon strolling out of the hotel soon after arriving, I saw billows of black smoke—a big fire was in progress in the center of the business district.

Next morning, I was awakened by a heavy clap of thunder. The Oklahoma City weatherman had predicted "(No rain," so all the weather did was to present an electric storm, whip up a 59-mile an hour wind that flattened some temporary buildings and poured down three inches of rain in a couple of hours. In fact, the weatherman missed so badly, I thought I was back in Texas.

The visitor was made to feel like a "visiting fireman" for Fire Chief McAlpine took me for a tour of the city. Half a mile before you get to the Capitol, there is a row of oil wells on state-

owned land. The derrick of the last one is a hundred yards or so from the Capitol but the hole was so curved by directional drilling that the bottom is under the Capitol.

In front of that structure is an immense flight of steps. You climb it and then, before you can break into a smile of triumph, there is an even more immense flight of steps in front of you. You climb that—and discover that you are on the third floor of the building! The Capitol is a very impressive edifice.

One of the biggest thrills in visiting Dallas is to ride the street cars. Lately, I've had to go back and forth between the office of Harley Hightower in Oak Cliff (he is publisher of "Cub Reporter") and downtown Dallas quite a bit; and the street cars cross the Trinity on a long, trestle-like bridge, with a few rises, dips and curves thrown in—negotiated at so lively a pace that it reminds one of the "thriller" at an amusement park. Look far below and you see cars crawling

### THREE-MINUTE SERMON

By T. L. (Jack) Bullard, Pastor, Missionary Baptist Church

#### "THE GOOD SHEPHERD"

In the tenth chapter of John, Jesus gives a great discourse on the "Good Shepherd." In this we find the will to Heaven. Down through the way men have been kidding themselves in believing that there is bound to be more than one way. There is only one shepherd and only one way to the sheep fold. "He that entereth not by the door into the sheep fold, but climbeth up some other way, the same is a thief and a robber." According to God's word there will be no robbers in Heaven, Jesus said, "I am the good shepherd, and know my sheep and am known of mine."

Jack Bullard

Again we try to believe that we can become sheep of the good shepherd. There is more to being a sheep than just wearing the name. There are many today that claim to be christians that no one would ever know it if they were not told. Their living does not verify that fact. Jesus said again, "My sheep hear my voice, and I know them and they follow me. If we are really the true type of sheep we are going to live like one. We are not going to portray satan in our lives instead of our Lord. All of the Eternal Blessings of the Bible are to the Good Shepherd and his sheep. The door into the sheep fold has not been closed. Jesus is still calling for men to come and become one of his sheep.

The shepherd's hands are bleeding. Out stretched upon the cross in anguish interceding. Because his sheep are lost. The shepherd's eyes are weeping. And how his heart does bleed. Though He, His watch is keeping. His sheep, they will not heed.

#### "A SHEPHERD'S LOVE"

The shepherd's feet are bleeding. As through the world they roam; The shepherd's voice is pleading, Come home my lamb, come home. The shepherd's heart is breaking. Up on a hill to-day; Because his sheep foresaking, Have all gone astray.

#### LEARNING TO MAKE ICE CREAM WITH MOST MODERN EQUIPMENT

Dairy manufactures students at Texas Technological College are learning to make ice cream with the most modern equipment in the industry, according to Prof. K. M. Renner, department head.

The department has recently put into use a new creamery package continuous freezer with a capacity of 40 to 80 gallons per hour and a new low pressure homogenizer to make ice cream mix at the rate of 200 gallons per hour. A batch freezer and a high pressure homogenizer had been in use for some time.

#### Foresight?

—Where is the world's first atomic-bomb-proof factory being built?—In Norway by producers of saltpeper and heavy water. It is said that the underground plant will be able to resist every type of bomb so far invented.

**OPERATION WASHINGTON**

JOHN Q. "... but I don't want my independence removed!"

**Cooling Rains Fell Over Cochran Wed., July 23rd.**

Cooling rains, the first recorded by the Soil Conservation Office for July fell generally over Cochran County, Wednesday night, July 23.

54 was recorded here bringing relief from several weeks of intense heat and providing much needed moisture for the fields planted to fall grain.

A mirror adds immense charm to a room. It reflects and gives vistas; it increases the sensation of space and repeats the colors of the room. In short, the room comes to life, becomes animated through the eyes of a mirror.

**3000 Schools Air-equipped**

Approximately 3,000 U. S. schools have acquired, practically free, millions of dollars worth of war aircraft and equipment, government surplus sales records reveal.

Among the states, Ohio's school system has absorbed the most surplus, with California and Illinois next in line.

Only planes and equipment which cannot be sold on the commercial market have been offered to the schools. Restricted to non-flight use, this surplus includes planes, engines, parts, instrument trainers and even electronic devices.

More than 1,000 planes have been sold at prices ranging from \$50 to \$350. Hundreds of instrument trainers have gone at \$550 each, and several thousand engines have been shipped to schools at \$10 apiece.

A minimum of red tape has featured the government's disposal of aeronautical equipment to the schools. Where delivery has been delayed, state laws prohibiting advance payment have been mainly responsible.

This equipment apparently has spurred aviation interest in the schools. A marked increase in aviation emphasis is noted in the programs of teacher training workshops and institutes scheduled by many states this summer.

**Gratis**—What Cabinet member serves his country without pay? —Because it is illegal for an individual to accept two Federal pay checks at the same time, George C. Marshall has waived his \$15,000 a year salary as Secretary of State in order to accept \$15,751 annually for life as a retired General of the Army.

**We Go Underground**—What is the purpose of the survey of America's abandoned mines which our Army Engineer Corps is making?—To check on the possibilities of building underground war plants in them.

**CARD OF THANKS**

We wish to express our thanks and appreciation to each and everyone of our friends and neighbors for all you did for us during the illness and death of our beloved husband and father. We feel grateful to each of you for the beautiful floral offering, for the food prepared and served, for the beautiful songs. The music rendered by Mrs. Whitman, the cards of sympathy sent to us and especially do we ask God's richest blessings upon Bro. Wright and wife, Mr. and Mrs. Barrett for their untiring efforts made to help lighten the strain of grief to each of the family. We pray that when each of you face the sorrow and grief that came into our home you will find comfort in your good friends and neighbors to help share the sorrow; and grace sufficient in our Lord to help you bear your grief.

Mrs. C. B. Merrill and J. L. Mr. and Mrs. M. F. Merrill and son; Mr. and Mrs. N. L. Amyx and family; Mr. and Mrs. Amos Taylor and family.

**Attention Bell County People**

The annual Bell County Panhandle and West Texas reunion will be held at McKenzie State Park on Sunday, August 10th. We are reminding you of this day and date as agreed upon by the more than 200 present on last August.

Remember all former Bell County people are cordially invited to attend and enjoy a day of relaxation and renewing of old friendships.

Bring as many as you wish and with you well-filled lunch baskets. The Bell County group will have reservations on the East side of the Park, same as last year, and where we will have shade, chairs, and cold drinks.

No planned program, but you may expect an impromptu style of entertainment. So come and enjoy a full day of rest and joy, a day in which to laugh at care and gather strength for toil to come. We expect to get underway at eleven and adjourn at four.

Invitations are being extended to you through the courtesy of your local newspaper.

**BUDGET HEARING**

Notice is hereby given that on the 11th day of August, 1947, a public hearing on the County Budget for Cochran County for the year 1948; will be held at the Court House of Cochran County, at Morton, Texas, by the Commissioners' Court; and any taxpayer who wishes to do so, may appear before said court and protest any item therein.

G. W. Thompson, County Judge, Cochran County, Texas. 22-23
