

### Over Half Of Timber Cut Each Year In U. S. Either Wasted Or Used For Fuel

Over half the timber cut each year in the United States is either wasted or burned for fuel.

In a nutshell, that is the picture set forth by the U. S. Forest Service in a report, "Wood Waste in the United States," issued following a nation-wide forest re-appraisal.

About 188,500,000 tons of wood are cut in U. S. forests each year for lumber, pulp and paper and other commercial products, and 108,900,000 tons—57 percent—is wasted or burned, according to the report. The Forest Service points out in the report that the United States needs far more ef-

fective means of putting down costly epidemics of insects and diseases, which cause even greater timber losses than does fire, mainly because there has been far less effort to control them.

C. W. Simmons, farm forester of the Texas A. and M. College Extension Service, points out that Texas farmers have a big stake in cutting down timber losses in the state.

Besides the prevention of destructive forest fires, a good conservation practice, says the forester, is treating more of the non-durable wood with preservatives if it is to be used where decay and termite trouble is prevalent. And farms and ranches have an abundance of strong and durable hardwoods that could go into strong, lasting farm buildings. The use of more hardwood lumber and posts could mean longer-lasting construction, thereby helping to relieve the big yearly drain on the national softwood timber supply.

### BOYCE HOUSE 'Gives You Texas'

People are always writing, phoning or dropping by to ask advice about a book they are planning to write. Almost without exception, they are seeking a short cut, a magic formula whereby one can get ahead in writing. Their faces fall when they are told that the only recipe is hard work, which is the recipe in just about any other field.

Hard work plus patience. For example, "Cub Reporter" is based on experience and observation of this chronicler while breaking in to the newspaper game back in 1916, and the two years which followed.

The idea of writing the book came about 1927. My mother had written a letter from Memphis, Tenn., and enclosed clippings telling of the death of C. P. J. Mooney, editor of the Commercial Appeal.

After the work of getting out the Eastland Daily Oil Belt News was done, I sat at my desk, slowly read the clippings and then mused as twilight descended. The determination came to write a book about Mr. Mooney, my first editor, and the glorious crew of reporters of "the old C. A."

Years went by. Slowly, subconsciously, the project took form. Frequently, I thought of the undertaking but it had not matured. This, like the aging of certain beverages in the wood, is a process that can not be hastened. There is no substitute for time, its sifting, its mellowing, its hal-  
lowing.

One day, a pen was dipped in to ink and the writing began. The slower method of pen-and-ink gave a thought, a scene, an individual the full chance to unfold; it is the details which make a man or an event come to life on paper.

Nearly 50,000 words in ink—then revision, then typing it off on the machine, with changes of words, adding of touches as the task went along—and task it was, slow and hard.

And so "Cub Reporter" was written—30 years after the happening had taken place, 20 years after the idea of writing the book was born.

The whole project was done without a thought of whether the book would sell a single copy. It was something I had to do—something I wanted to do, a tribute to the memory of a great man, a salute to the forever perished days of glorious youth.

### Pint Of Milk A Day Is Must For Older People

A pint of milk a day is a must if older people are to keep healthy and active, say food specialists of Texas A. and M. College Extension Service. Men and women in their fifties, sixties, and seventies often overlook milk in their diets, a neglect that deprives bones of necessary minerals.

To help furnish enough calcium, protein and phosphorus for the proper upkeep of their bodies, a daily pint of milk is the minimum, say the specialists. A condition of demineralization of the skeleton may come from too little calcium in the diet and often leads to broken bones in later years. Some investigators have suggested that many a fall, which supposedly results in a bone break, is actually due to weakened bones which break and cause the person to fall.

Relatively little is known of the nutritional needs of the older age group, the specialists report, and state experiment stations are making studies aimed at correct dietary recommendations. Recent studies do show that older people have not lost their ability to store calcium and other minerals and that their diets should include milk.

### TEXAS TECH ADDS RADAR AND RADIO EQUIPMENT

Radar and radio equipment used by the Army in the war has been added to the Texas Technological College Division of Engineering for instructional use, college officials have announced. Included are two radar transmitters, a radar receiver, 50 radio transmitters and receivers, and three mine detectors.

In North Africa and Tibet blacksmiths are often considered low caste or outcaste.

## THREE-MINUTE SERMON

By T. L. (Jack) Bullard, Pastor  
Missionary Baptist Church

### "I WILL"

In this short statement we find many things of interest to the individual. There is an "I will" of God and an "I will" of man. When the I will of God and the I will of man meets there is a change in the life of the man. In the 8th chapter of Matthew, we find that there was a leper that had an I will and he went to the Lord for his I will. When they came together the leper said to Jesus: "Lord if thou wilt, thou canst make me clean." Jesus put forth his hand and touched him and said, "I will be thou clean." Here we find the two I wills coming together and just think of the results. A man that was a leper is now healed and he goes out a different man.

One of the great problems in life is for the individual to have the courage to go to the Lord with his I will. This is a thing that takes courage to do. It takes faith on the part of an individual and anything short of courage and faith will not do. If only the individual sinner could see himself as God sees him the task would not be so great. As long as we are not able to do that, then the task becomes harder day by day. Often times we have to come to want, or great sorrow before we can have the courage and faith to go to the Lord for help. When we reach that point and realize that we have gone to the end of our strength, then we are willing to do most anything.

The Prodigal Son that we read about in the 15 chapter of Luke,

had to come to this point. After his father had given him the portion of goods that belonged to him, he had no thought of coming to want. Soon his money was all gone, no place to stay and nothing to eat. One day he came to himself and thought of the many things that servants had at his fathers house. Those things would not have done him any good had he not had an I will to put into action. His conviction put into action. His conviction became so deep and his faith grew strong and his courage ran high, then he was willing to do something about it. His father was willing but he did not know

it, until he put his I will to action. When his I will and the father's I will met they went into each others arms. Friend will you give this a trial? Will you put your I will into action? God will save you if you will give him a chance.

### Harrison-Cochran Vows Read In Lubbock August 22

Mr. and Mrs. L. A. Cochran are  
announcing the marriage of their  
daughter, Sue, to Bill Harrison,  
son of Mr. and Mrs. Cleve Harrison,  
on Friday, August 22.

The marriage was performed  
at the Methodist parsonage in  
Lubbock.

Immediately following the  
ceremony the young couple, her  
parents and younger sister, Iva  
Jean, left for a trip to Oklahoma.

The group were accompanied  
back to Morton by Mrs. Homer  
Murray and three children of  
Granite, Oklahoma. Mrs. Murray  
and Mrs. Cochran are sisters.

Mr. and Mrs. Bill Harrison are  
at home on the Harrison farm  
west of town.

#### CARD OF THANKS

I want to thank all the people  
of Morton who were so kind and  
thoughtful of me, a stranger in  
your town, and I deeply appreciate  
the interest and goodness  
shown me at your hospital by  
your doctor and his wife,  
Mrs. J. R. Sebastian,  
St. Louis, Mo.

### -- annegrams

— by ann england —

Home again after a cooling off  
period in the mountains of New  
Mexico.

Sometimes we fancy that our  
friends (if any) watch us take  
off in old inroads (our battered  
up 11 year old car) in fear and  
trembling. However we just strap  
ourselves in and away we go  
(the doors fly open at the slight-  
est provocation). So far we have  
made every trip without any dif-  
ficulty.

Before we left on this trip the  
spouse did spend a dollar on a  
spark plug as he thought old  
inroads didn't have the proper  
amount of power.

But it was grand to get home  
again and especially to find that  
this area had had some rain. Our  
yard looked green and fresh and  
the rose bushes had grown and  
were covered with roses.

While in Taos we indulged in  
a stage coach trip to the Indian  
Pueblo. Taos Pueblo never fails  
to fascinate us and the Indians

seemed especially cordial this  
visit.

One old wrinkled Indian all  
wrapped up in a blanket and  
braids said, "Where you from?"  
When we told him Morton, Texas,  
he said, "I know where that is."  
How he happened to know where  
Morton is located is still a puzz-  
le. He also said, "We have lots  
of visitors from Texas out here."

The little round, brown Indian  
lads seemed very uninhibited  
running around in scarcely more  
than their birthday suits.

We paid our dollar for picture  
taking privileges—now we are  
looking forward to seeing the  
finished colored movies.

Santa Fe was crowded. Believe  
the Chamber of Commerce gives  
the permanent population as 27,  
000 and there must have been  
an equal number of tourists with  
9-10 of them Texans.

And wouldn't you know, the  
Chamber of Commerce Manager  
at Santa Fe is a Texan. He is  
Glenn Burgess, formerly of Al-  
pine and Lufkin, Texas.

We take off our hat to those  
folks over there in that they  
publicise their state. And of  
course despite the fact that we  
never fail to mention things we  
dislike about the state we are  
really very fond of the Land of  
Enchantment, else we would go  
somewhere else for our vacations.

Another delightful surprise  
was encountered while talking to  
a charming lady from Dallas in  
the La Fonda hotel. She also ask-  
ed where we were from and when  
told said, "Oh, yes I know about  
Morton as my nephew married a  
lovely girl from there." She was  
Frankie Watson and her niece by  
marriage is our own Jean Lively.

Altho we are extremely proud  
of Morton it is a comparatively  
new place and considerably off  
the beaten path. We had never  
heard of the place until we mov-

ed here. So we are always plea-  
santly amazed when other people  
know the town.

Louise C. Allen, Lubbock, au-  
thor of Lipstick Logic, a syndi-  
cated column, and her husband  
visited us last Saturday after-  
noon. She is a lovely person. We  
thoroughly enjoyed having both  
the Allens in our home.

Mrs. Allen is a journalism in-  
structor at Texas Tech. Don't  
know what Mr. A. does but we  
were enchanted with him.

Miss Mattye McKeel of Colo-  
rado City, a dear, dear friend,  
sent us two boxes of bulbs for the  
yard at Vagabond house. They  
are planted and we can hardly  
wait for the blossoms. She pro-  
mised that some of the lillies  
would bloom in September.

We met the Weimholds of Lev-  
elland in New Mexico. They were  
also vacationing in the moun-  
tains. Ruth was as brown as a  
berry and resembled a Fiesta  
queen in her very becoming red  
and blue peasant dress.

"La Villa Real de Santa Fe,"  
began last week-end to restore  
the annual fiesta, interrupted by  
the war years. The festivities get  
underway with the burning of  
Zozobra Spanish for "The Gloomy  
One."

Fiesta is the right name—as  
fun is given away. There are  
dances, parades and more dan-  
ces; processions, music, spectacu-  
lar and also simple costumes,  
and more dances.

One of the grandest features of  
Fiesta is the setting of La Villa  
Real, ancient city. On approach-  
ing Santa Fe by car one is thrill-  
ed by: The abrupt hills, the rag-  
ged cliffs, the stony dells, the  
water-carved soil.

One notices too: The scant yet-  
low grass—yellow in places; rich  
green in water-fed lawns. The  
diminutive herbage in the un-  
watered regions. The stunted ce-  
dars. The scraggy, low pines,  
with their never-ending perfume.  
The pretty manzanita. And with-  
in Santa Fe the forest of trees,  
the rich green orchards.

Crossing the desolate miles.

Tribune, Morton, Cochran County, Texas, Thursday, Sept. 4, 1947

you breathe the pungent aroma  
of sage. Your eyes feast on the  
miles of faint, grey plain, on the  
rampart of vague blue moun-  
tains. You see the peaks, brushed  
by half hiding clouds.

And a wide, far horizon of ser-  
ried heights, draped in purples  
and violets of almost unbeliev-  
able beauty. Most often bathed  
in tender mist.

Not the least of Santa Fe's at-  
tractions are the churches and  
monuments especially Cristo Rey  
Church with its stone carvings  
and perfumed cedar ceiling; its  
Old Palace of the Governors. And  
its countless "huts" and palaces  
of unburned brick, called "a-  
dobe" a word from the Arabic.

We walked everywhere to  
breathe the spirit of the houses  
and streets that show the wear of

centuries.

Soon after our arrival home we  
had a little seige in the West  
Plains hospital but everyone was  
so nice to us out there that we  
didn't mind being hospitalized.

James St. Clair and Paul Good-  
man over at St. Clair's Depart-  
ment Store have established a  
worry room in the back. They as  
well as the rest of us are having  
construction difficulties.

Brother Bullard acquired a new  
automobile and a new grand-  
daughter while we were away.  
Can't tell by his talk and actions  
which he is proudest of.

Wouldn't it be better to be a  
bore and talk about the weather  
—than to gossip?

## Estimates of Corn Crop Decline 223 Million Bushels

The Agriculture department reported the drought-hit 1947 corn crop prospects declined another 223,000,000 bushels during the first 15 days of August.

The department estimated this crop at 2,437,000,000 bushels. This compared with the Aug. 1 prediction of 2,658,949,000 bushels.

The department goal is 3,000,000,000 bushels. The forecast was far below last year's record corn yield of more than 3,287,809,000 bushels.

**Grain Scarcity Seen**  
The report heightened the possibility of a grain scarcity which would mean high livestock feed prices followed by increases in retail meat prices. A critical corn shortage also would have an important bearing on this country's export program.

This year's corn crop, unless it shows unexpected improvement in the next few weeks, would be the smallest in seven years.

Agriculture department officials have said that the corn crop must hit at least 2,800,000,000 bushels to meet this country's minimum needs. This would not allow for any exports or any in-

## Tech To Display Livestock At South Plains Fair

Texas Technological College will again have an exhibit of representative livestock at the Panhandle South Plains Fair which will be held in Lubbock, September 29 through Oct. 4. The last such exhibit by Tech in 1941 was one of the biggest drawing cards of the Fair.

From 36 to 40 representative animals will be shown, according to Dean W. L. Stangel, head of the Department of Animal Husbandry at Tech. These will include Aberdeen-Angus, Hereford, Jersey, Holstein-Friesian, cattle; Duroc, Hampshire, and Poland China hogs; Hampshire, Rambouillet and Southdown sheep; and Angora goats; quarter horses, American Saddle horses, American jacks, Percherons and mules.

The entire exhibit will be housed in the Livestock building on the Fair grounds. None of the animals will compete for prizes.

Other features of the Fair are a giant balloon parade opening day, the Buck Steiner rodeo, mid-gate auto racing and the Bill Hames Shows on the Midway.

increase in the carry-over, now dangerously low.

### Prices Near Record

The new report was drawn up on the basis of Aug. 15 crop conditions in the 12 most important corn states. These states produce about 75 per cent of the nation's crop. Production estimates for Aug. 1 were used for the smaller producing states.

The department's bureau of Labor Statistics said that average wholesale prices for some 900 basic commodities now were only 8.5 per cent below the all-time high set in May, 1920, immediately preceding the sharp business recession of 1920-21.

## Diphtheria Immunization Very Important

AUSTIN—Education of the public to the value of diphtheria immunization has resulted in lowering the incidence of this dread disease, but Texas still had over 1500 cases of this preventable disease last year according to records in the Texas State Department of Health.

"It is a generally accepted fact among public health authorities," Dr. Geo. W. Cox, State Health Officer, said, "that any community may control its death rate from diphtheria. Immunization has been proved a safe and effective measure. Wherever immunizing treatment has been extensively used, diphtheria has steadily decreased.

"The most forceful weapon in the control of diphtheria is prevention through immunization, rather than cure of the disease after it has developed. Children can be protected against diphtheria by the use of what is known as toxoid. Young children are particularly susceptible to the disease. Accordingly, as soon as a baby is six months old, the parents are advised to take it to the family physician and have it immunized—protected, by the use of toxoid. Older children in the family who have not had the protective treatment, should be immunized also, and this should be attended to now before the school season begins. This immunizing agent is absolutely safe to administer; there is only a slight local reaction, and practically no constitutional or troublesome after effects. It confers a life time immunity in the majority of cases. To be certain that immunization is complete, however, the child should be taken back to the physician six months after the toxoid was administered, and given the Schick Test.

## South Plains Fair Catalog Will Be Ready This Month

The catalog and premium list for the 30th Annual Panhandle South Plains Fair, which will be held in Lubbock, September 29 through October 4, is now in the hands of the printer and fair officials expect to have copies in the mail before the end of the month.

The 128-page booklet contains full information on all departments of the Fair, including names of superintendents and judges, awards to be made winners in all divisions, and rules and regulations for making entries.

The catalog goes to all last year's exhibitors, county agents, superintendents and judges for the Fair, vocational agriculture teachers, home demonstration agents, home demonstration club presidents and chairmen, and Chamber of Commerce secretaries.

Extra copies of the catalog will be available in the offices of the Lubbock Chamber of Commerce.

## Advise Immediate Steps To Protect Fall Pig Litters

With the farrowing season just a few weeks away, livestock health authorities are urging swine producers to make preparations now for the care of fall litters—in order to prevent another "baby pig blitz" like the one of last spring.

According to these authorities, swine growers can save themselves a lot of headaches this fall by looking after the following things at once.

"Provide pig brooders or a means of artificial heating to prevent chilling—sometimes a cause of extensive losses;

"Construct guard rails to prevent overlaying or crushing of pigs by the sow;

"Feed the sow a nutritionally balanced ration that contains 15 per cent of alfalfa;

"Supplement the ration with nicotinic acid if a large amount of corn is being fed."

They also recommend routine blood testing of herds to detect swine brucellosis.

### Swing Of Southwest Farm Markets

Most southwest farm products gained enough strength late last week and closed steady to some higher, according to the Production and Marketing Administration, U. S. Department of Agriculture.

All cattle classes advanced 50 cents to \$1.00 per hundred pounds at most southwest markets last week. Choice steers at Denver reached \$32.50, a new all-time high, and the bulk of good fed kinds brought \$27 to \$30. Wichita paid \$26 to \$30 for good and choice club yearlings. Good fed steers and yearlings sold at \$26.50 to \$27 at Oklahoma City, and \$23 to \$24.50 at Fort Worth. Common and medium grades turned at \$17.50 to \$22.50 at San Antonio, and \$15 to \$21 at Houston.

Late-week gains largely made up for early losses at southwest hog markets. Closing top was \$26.75 at San Antonio; \$27.75 at Fort Worth; \$28.25 at Oklahoma City; \$28 at Wichita; and \$29.50 at Denver. Sows and pigs sold up to \$24 and \$25.

Eggs and poultry sold generally at firm prices last week, and top quality eggs strengthened at some markets. Best white eggs brought 50 to 55 cents per dozen at most places, best mixed 45 to 50, and medium grades 40 to 45. New Orleans bought heavy hens at 29 to 32 cents per pound, and spring chickens at 39. Most other

markets took heavy hits at 22 to 26, and fryers and broilers 35 to 37.

Rains in the corn belt checked deterioration of the crop and weakened corn prices; but other grains sold strong. Wheat, oats, barley, and grain sorghums each advanced 5 to 8 cents on southwest cash markets. Wheat futures reached new high levels, and oats rose to record high prices at Chicago and Kansas City.

Spot cotton prices declined \$3.00 to \$7.50 at southwest markets last week. Demand continued good for the better grades but offerings were light. Widespread rains damaged open cotton and delayed picking but benefited poung growing cotton.

#### IT ALWAYS HAPPENS

Smithers was packing to take a solo jaunt into the mountains when Jake, the old camp guide, stopped him to check his supplies.

"You gotta map an' a compass?" asked Jake.

"Certainly," replied Smithers.

"Have you got a deck of playing kerds?"

"Why, no," rejoined Smithers.

"What do I need with playing cards?"

"It might save your life, son," old Jake replied. "I always carry a pack with me. If you get lost, son, jest set down and begin playin' a game of solitaire. Next thing you know some fool will pop up behind you and begin telling you what to do next."

There is always something wrong with a man, as there is with a motor, when he knocks continuously.

"How long was your last cook with you?" "She never was with us. She was against us from the start."

### Changes In Title And Registration Laws On Vehicles Made By 50th Legislature

Changes in title and registration laws made by the Fiftieth Legislature will sooner or later affect all owners of motor vehicles, Texas Highway Department spokesmen say.

A number of these new laws become effective September 5.

After that date, for example, the Texas Highway Department will be required to charge a fee of \$1.00 for assigning numbers to new or reconditioned motors. A similar fee was ordered for serial numbers on house trailers.

The growing practice of installing new and rebuilt motors, some bearing no identification number, demands a strict accounting of both motor and serial numbers on vehicles to assure valid titles in the name of rightful owners.

New laws outline a procedure giving maximum protection to legal owners of all motor vehicles. When motors are exchanged, the vehicle owner must apply promptly to the Texas Highway Department for a corrector of his certificate of title. Otherwise the title to his vehicle is clouded because its motor number does not correspond to his title, an awkward situation to handle when he tries to sell his car.

If the new or reconditioned motor bears a manufacturer's number, it should be used. If it is blank, as many are nowadays, the purchaser must apply direct to the Texas Highway Department at Austin for an assigned number. Forms for this application may be obtained from any County Tax Collector's office. It is illegal to stamp any number on a motor other than a number assigned by the Highway Department.

A new service has been provided for Texans who wish to take delivery on a new vehicle at the factory or from a dealer in another state. Temporary license plates for the exclusive use of buyers while driving their new car back home are now issued under another of the Fiftieth Ses-

### Health Officer Issues Warning On Danger of Malaria

AUSTIN — Dr. Geo. W. Cox, State Health Officer, today issued a warning against the danger of malaria following the heavy rainfall, which has finally broken the drought in many sections of the State.

"Malaria will remain a major public health problem as long as breeding places are accessible to the female Anopheles mosquito," Dr. Cox said. "Every householder should make sure that there are no tin cans, broken bottles, or other types of rubbish on his premises that will hold water and offer breeding places to this enemy of good health."

Dr. Cox pointed out that in our practice of mosquito control, we are sometimes like the man who locked the stable door after the horse was already stolen; we are content to wait until all our premises are swarming with mosquitoes before we bring ourselves into active warfare against these recognized agents of malaria transmission.

Dr. Cox further stressed the importance of conserving the public health and preventing the spread of disease in our present crowded housing condition, and he also emphasized the fact that malaria is one of the more debilitating diseases, often causing its victims to lose weeks or even months from his regular employment or from school attendance.

Said Dr. Cox: "The best cure for malaria is prevention. Make sure your premises are free from any stagnant waters, in which may breed the female Anopheles mosquito that transmits the disease."

Son to father helping him with home-work. "If it takes you this long on fourth-grade stuff—what'll I do next year?"

You can lead a boy to college but you can't make him think.

**Homemakers Club Meeting Held In Ted Bryant Home**

The meeting of Aug. 27 was called to order in the home of Mrs. Ted Bryant.

Mrs. Rex Faulkner read the minutes of the last meeting in the absence of the secretary. Also called the roll which was answered with an idea to enroll new members in the club.

Mrs. Bo Tisdale gave a very interesting report on home markets to help the family income. Club voted to have a social soon for the members and their families.

Delicious refreshments of punch and cookies were served to 5 members.

The next meeting will be Sept. 10, with Mrs. Rex Faulkner.

**Wesleyan Guild Meeting Held In P. B. Ramby Home**

The Wesleyan Service Guild met August 25 in the home of Mrs. P. B. Ramby.

Business was dispensed with in a short session in order to permit the members to attend the Methodist Revival.

Refreshments were served by the hostess to the following members: Mesdames L. W. Ray, Raymond Ross, Carl Alexander, W. P. Houston, Gayle Bishop, J. D. Hawthorne, Arthur Kendall, Courtney Sanders and Miss Geneva Famuliner.

The Guild will meet with Mrs. L. W. Ray on September 8. The study course "The Christian Motive and Method in Stewardship" will be under the direction of Mrs. Gayle Bishop.

**VISITORS IN MARKHAM HOME LAST WEEK**

Visitors in the C. B. Markham home last week included three daughters: Mrs. Ratcliff, Pharr; Mrs. Proctor and sons, Jim, Tom and Bill, Odessa; Mrs. A. D. White and son, David, Ft. Worth. Also visiting were: Mr. and Mrs. C. B. Markham, Jr., and daughter, Mrs. J. B. Nordan and children, Donna and Royce Dean, Tatum, New Mexico; Mr. and Mrs. Jack Markham and son, Rod, Lubbock.

MRS. H. D. BELLOMY, Clayton, Texas, is visiting her mother, MRS. L. L. WEDGEWORTH.

**NOTICE TO BIDDERS**

Entered at the Post Office at Morton, Texas, for transmission through the mails as Second Class Matter, according to an Act of Congress, March 3, 1879.

Any erroneous reflection upon the character of any person or firm appearing in these columns will be gladly and promptly corrected upon being brought to the attention of the management.

**LOOKING AHEAD** By George S. Benson, President, Harding College, Searcy, Ark.

**WHAT HAS HAPPENED THERE**

Most of us thought it would never happen. But it has. According to the Associated Press, the House of Commons on August 3 passed a bill giving the British government authority to tell people where they must work and what they must do. This is the first time that the government may tell men and women to do a particular job it pleases: coal mining, farming, fishing, anything. Moreover, it means the government may choose the place where any man or woman must work.

**Crisis Upon Crisis**  
The socialistic government rests upon nationwide sympathy and cooperation. However, this sympathy is lagging, the whole system is bogged down. The crisis came last winter, when a terrific famine came to that country because of coal under ground. Socialism, crisis thrives on and there were more than 100,000 deaths in these crises, it is easy to accept disaster, if they

think it will prevent more disasters. This is what has happened. In an apparent final resort to keep government management of industry from becoming a complete failure, the British are taking this most drastic step. Yes, in peace-time one of the greatest liberty loving countries in the history of the world has given its government authority to draft labor, and to tell each man and woman where to work and what to do.

**Our Forewarning**  
That England takes this most fatal step means forewarning plenty to the American people. The heritage of modern Britain is also our own heritage. Our common forefathers loved freedom. Because England enjoyed the greatest measures of freedom compared with any large country in Europe, she became an influential power. English influence has done much to make men free the world around.

But despite their great love of liberty, the British people have now found that loss of individual freedom follows adoption of a government managed economy, just as night follows day. It leads to this every time. It is sad to see this great country, like others that have accepted the blandishments of socialism, willingly give up the freedoms for which her people have shed blood through the centuries.

**Let's Have Freedom**  
A considerable number of our people are evidently inspired by foreign ideologies, and some are asking for government control of American industry. This step England is now taking is a real warning to all American workers that with government management of industry there must surely come government dictation to workers. The workers, in the face of constant crisis, are told where to work and what to do. Seeing that these things point in every direction toward a totalitarian government, out people should make up their minds now that we do not want government managed economy. What is happening in liberty loving England is proof that such dictation cannot be avoided once government management is adopted. Let us determine now that such a blight shall not fall upon the freedom loving land of America.

**Kidneys Must Work Well**

**For You To Feel Well**  
At least every day, 7 days every week, every month, every year, the kidneys filter the waste matter from the blood. If these people were aware of how the kidneys must constantly remove uric acid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be a better understanding of why the kidneys are upset when they fail to function properly. Drinking, eating or too frequent urinating, the medicine warns that something is wrong. You may suffer nagging back-ache, headache, dizziness, rheumatic pain, getting up at night, swelling. Why not try Doan's Pills? You will find a medicine recommended the world over. Doan's stimulate the function of the kidneys and help them to filter out poisonous waste from the blood. They contain nothing harmful. Use Doan's today. Use with confidence. At drug stores.

**Texas Highway Patrol Seeking Qualified Men**

The Department of Public Safety is now accepting applications from qualified young men to fill the 200 additions to the Texas Highway Patrol made possible under new appropriations voted by the recent Legislature.

Examinations will be given sometime in September, Director Homer Garrison said. The first of four schools of 50 men each will begin about Dec. 1. "We are already receiving a lot of applications," Garrison said, "but many of the applicants cannot qualify. Our standards are high, as they necessarily must be."

Garrison said prospective Patrolmen must be between 21 and 35 years old, not less than five feet eight inches in height, weigh not less than two nor more than three pounds for each inch of height, and be in perfect physical condition. Candidates also must have lived in Texas at least a year and have not less than a high school education or its equivalent. These tentatively accepted on the basis of competitive examinations must stand thorough character

Tribune, Morton, Cochran County, Texas, Thursday, Sept. 4, 1947

investigation before being appointed. Garrison urged qualified men to write him at Austin for application forms.

The Department of Public Safety also announced that examinations are being given in Austin each Tuesday and Friday until Sept. 1 to fill about 20 office positions.

**South Plains Fair Prizes-Premiums Slightly Increased**

Prizes and premiums for the six-day 30th Annual Panhandle South Plains Fair, which opens Sept. 29 with a giant balloon parade, have been slightly increased, Fair officials announced recently.

The catalog and premium lists, just off the press, show most of the increase results from the addition of a rabbit division this year for the first time since 1934. Prizes in this division amount to approximately \$400. The cattle divisions and the swine division carry cash awards of well over \$1000 each. County and community exhibits retain the gains they made

last year in the premium list and will receive nearly \$750. Premiums in the women's department are the same as last year, also. Nearly \$500 will be awarded in the junior agriculture and livestock division.

Fair officials also announced names of some of the judges for the 1947 Fair. George Samson, Post, will judge county exhibits, and R. N. McClain, Brownfield, community exhibits. Judge of individual exhibits will be Cecil Ayers, agronomy instructor at Texas Technological College, A Texas A. and M. professor, Dr. I Walker Rupe, will pass on the merits of the dairy cattle, and C. L. Franz, hog breeder from Turkey, on the swine. Rabbits will be placed by the only out-of-state judge, Marion Stoner, nationally known rabbit breeder from Wichita, Kansas.
