Veterinary School Accepts 64 Pupils Each Semester

The School of Veterinary Medicine of Texas A. and M. College, one of 10 in the United States, accepts 64 new students at the first semester each year, it has been announced by Dr. George T. Edds, professor of Veterinary Physiology and Pharmacology.

Applicants before they are admitted to the school must first have had one year of pre-veterinary work.

A board, composed of Dr. R. C. Dunn, acting dean of the school; Dr. P. W. Burns, head of the veterinary physiology and pharmacology department; Dr. F. P. Jaggi, head of the department of veterinary hygiene and Dr. J. H. Milliff, head of the department of anatomy, passes upon the qualifications of each applicant.

The qualifications include scholarship, an aptitude test, as to whether the applicant plans to carry on the work after he finishes school.

More than 80 per cent of the students enter school with a better than B grade and there are "three or four times more applicants than we can take care of," Dr. Dunn says.

MR. and MRS. W. K. SMART and twin sons visited relatives in Albuquerque and Tucumcari, New Mexico, over the week-end.

Win National Model Building Honors

TWO of the nation's top model car builders are shown above talking it over with C. E. Wilson, president of General Motors. The youths are Charles Jordan, left, a Massachusetts Institute of Technology student who lives at Whittier, Calif., and James Mariol, of Canton, O., after they were declared grand national senior and junior winners, respectively, in the 1947 Fisher Body Craftsman's Guild competition in which they, along with eight other youths, won university scholarships totaling \$38,000.

Weekly SURPLUS NEWS WAA

With military aircraft originally costing \$100,000,000 already programmed for a quick clearance sale, the WAA's Southwest zone is again leading the country in the final disposal of all remaining planes. Last April the Grand Prairie office was one of the first to sell out of the airplane business. Recently acquisition of additional planes from the Navy has already resulted in plans: (1) to sell 29 trainer planes at the Dallas Naval Air Station to veterans and other buyers starting November 10; (2) price slash to \$5,000 each on 482 C-46 transports at Walnut Ridge, Arkansas.

North Camp Hood near Gatesville, Texas, was cleaned out of its last remaining surplus property recently by 135 buyers who submitted high bids on \$551,000 worth of assorted lots of materials in less than two hours. The sale disposed of laundry equipment, machinery, automotive supplies, clothing and 23,000 wooden bunk beds. The sale was conducted by War Assets Administration.

Ninety-eight surplus buildings at Camp Fannin, near Tyler, Texas, were purchased in two hours at a speedy War Assets Administration sale of the structures recently. Sales figures for the various structures which ranged from mess halls and storage rooms were consistently high, according to a report made on the sale. A preliminary tally of the prices paid indicated they were in line with those obtained at three similar offerings held in other parts of the state.

Municipalities doing road and street work might well inquire concerning a tandem road roller, a crawler type tractor and a towed type grader being offered to the priorities group at fixed prices until November 3 through WAA. These items are listed in a current catalogue issued out of the Grand Prairie WAA office through its Customer Service Center. The roller is located at the Amarillo Army Air Field and the tractor and grader are at the Red River Arsenal near Texarkana.

Planning Kitchen With Mixing Convenience

Counter space and convenience mean the same thing when it comes to planning a kitchen.

Size, height and location of the counter are what count, according to Mrs. Bernice Claylor, extension home management specialist of the Texas A. and M. College.

She adds that the Bureau of Human Nutrition and Home Economics people in Washington have made studies of kitchen work at counters of varying height. Some of the things they've found out are:

More counter space is needed for making bread and cookies than for any other food preparation job. About the least space you can get along with is 24 by 36 inches. And 24 by 42 inches will take care of all mixing jobs comfortably.

Tribune, Morton, Cochran County, Texas, Thursday, Oct. 30, 1947

Equipment manufacturers used to make most working counters 36 inches high—the common height for counters around the sink. But, on the basis of the USDA studies, they're now coming out with a counter at two levels, one 36 inches high for washing dishes, the other 32 or 34 inches for mixing foods. The most convenient height varies with the height and arm length of the woman who is going to use the kitchen.

The handiest place to keep baking pans is near the mixing counter, not near the oven as is done in most kitchens.

Bowls, beaters and other utensils used in mixing belong near this work center, too, as do flour, sugar, flavors and seasonings.

Swing Of Southwest Farm Markets

Late losses on grain and cotton markets pointed up generally unsettled conditions on southwest farm markets last week, according to the Production and Marketing Administration, U. S. Department of Agriculture.

Spot cotton sales again topped all previous weeks of the current season, as farmers sold more freely. Prices rose early but lost Friday to close \$3 a bale up.

Dry weather in winter wheat areas and heavy buying for overseas shipment raised wheat early, and Friday's break left a week's gain of 5 cents. The same

dry weather hastened maturity and drying of the corn crop, and marketings increased. Late-week corn losses erased early gains, while oats, barley and sorghums also closed lower.

Egg prices held up well in the Southwest, but hens and young chickens weakened at most markets. Fryers ranged generally from 31 to 36 cents per pound, and heavy hens mostly 22 to 28 cents except at New Orleans which paid 30 to 31. Seasonally light receipts of turkeys sold mostly at or near government support prices.

Most cattle markets closed the week about unchanged, but Oklahoma City gained strength, while weakness developed on slaughter classes at Denver and on Brahman stocker calves at Houston. Denver sold low good to average choice steers at \$25 to \$32.25, and Wichita moved medium and good steers at \$19 to

Agricultural Notes of Interest

Over 94,000 Texas farmers are members of groups organized under the Smith-Dooley Act of 1937 to promote the improvement of cotton.

Farmers Home Administration made new adjustment loans to 23,654 veterans, amounting to \$30,159,937 during 1947.

Americans are eating more nuts. In 1909, the average consumption was four-fifths of a pound; in 1945, one and two-fifths pounds.

In the first four months of 1947, 124 million pounds of peanuts were exported by the United States.

Texas farmers bought 252,098 tons of fertilizer in the first six months of 1947, as compared with 212,858 tons for the same period in 1946.

Approximately 396,000 farm families and other rural consumers in 44 states and Alaska will get electricity as the result of loans approved by REA during 1947.

In 1947, 19.5 million pounds of meat at retail weight were consumed in the United States at an average price of 55.5 cents per pound in comparison with 14 million pounds at an average price of 29 cents per pound in 1937.

BIRTH ANNOUNCEMENT

Born to Mr. and Mrs. Johnnie Sullivan on October 9 at West Texas Hospital in Lubbock a boy, weighing 6 pounds and 8 ounces. He was named Bobby Lewis.

\$24.50. Common to medium steers and yearlings brought \$13.50 to \$18.50 at Houston, \$15 to \$19 at San Antonio, \$13 to \$20 at Fort Worth, and \$17 to \$24 at Oklahoma City.

Hog prices slumped around \$1 per hundred pounds during the past week. Good and choice medium weight butcher hogs sold late in the week around \$27.75 at San Antonio, \$28 at Fort Worth, \$28 to \$28.50 at Oklahoma City, \$27.25 to \$27.50 at Wichita, and \$27.50 to \$27.75 at Denver.

Another Scientific Fashion Survey

Attention buyers for women's ready-to-wear shops—here's another scientific fashion survey. Only this one is different. It discloses what college girls are actually wearing on the campus, rather than telling what they "say they want" or what the "general public says they should wear."

The "average" coed at Texas Technological College this fall is failing to follow Paris dictates, and is comfy in a sloppy Joe sweater and a straight plaid skirt that reaches just a little below the knee. And this without benefit of an organized LBK club. The most popular color is gray, with brown, blue, green and red following in that order.

These facts were discovered by a Home Economics class in merchandising whose members took fashion counts in campus buildings during class hours.

However, the scene is changing. Slightly more than one-fourth of the Texas Tech girls have dropped hemlines to midcalf or even longer for daytime wear, and almost one-third are wearing the new flaring skirts. Almost one-fourth of the coeds have adopted tailored dresses for classes, rather than the traditional skirts and sweaters. Fourteen per cent choose suits.

And here's something that may come as a surprise. While no one predict that bobby socks are on the way out, still it was noted that eight per cent of the Texas Tech girls wear hose, and 61 per cent attend classes wearing neither hose nor anklets.

WILLARD COX

Colored Laborers Expected Soon Due To Appeals Of Local County Agent

Last week county agent Homer E. Thompson corresponded with 5 colored county agents of East Texas and 6 white county agents appealing to them for cotton pullers for Cochran county. This fact, coupled with visits to important labor reception centers at Abilene, Brady, Colorado City, Snyder and the state wide meeting of labor center directors of county agent Thompson appealing to them to direct more laborers to this county will likely bring many cotton pullers here in a short time.

Most of the cafes in Morton are cooperating fully with the farmers thereby eliminating race discrimination with the Latin American laborers by serving them jointly with the whites. The primary objective is to build up good will; so farmers will not be suffering during critical labor periods for want of help. This is a fine gesture on the cafe's part because the farmers problems are the business men's problems. What affects one adversely, affects the other, says the county agent.

The Reception Center directors advised the county agent on his tour last week that towns with a good reception center and where there is little race discrimination, that those places have plenty cotton pullers. More towns each year in Texas are building centers to be operated by Latin Americans. Providing facilities such as housing, shower baths and pit toilets on the grounds, parking space occupying an entire city block all weather surfaced with a cafe erected in the center. In Ballinger, Texas, for

-annegrams— —by ann england—

Mrs. W. E. Angley, one of our favorite people but one we do not see nearly often enough, called on us last Tuesday evening. We were so happy to have Mrs. A.

We certainly felt flattered when she told us that her daughter, Mrs. I. L. Folger of Yakima, Washington had expressed a desire to meet us.

Despite having been in extremely poor health for a number of years, Mrs. Angley keeps up her physical appearance, does a tremendous amount of hand work as well as her own house work. She keeps up with everything that is going on by reading.

Mrs. Charles Dean is very busy getting ready for the opening of her gift shop on Friday of this week. Mrs. Dean isn't as big as a minute but is certainly full of pep.

Met Lynda Strickland, the newest R. C. Strickland grand daughter and she is a darling. Lynda is only two months old but has been on a trip with her mummy and dad to Minnesota where she visited her maternal grandparents.

Inez Culpepper, the newest addition to the staff at the Modern Beauty Shop, is a tall slender and very pretty girl. She and Dorothea Weeks are so busy over there that Mrs. Faulk is trying to get more help.

Ford Hawkins told us he had worlds of cotton but no pullers. There is no point in telling us that as we are sure a cotton sack wouldn't be at all becoming to our particular type of beauty.

For the first time in at least three months we saw D. E. Benham and he was very complimentary. Can't figure out whether these Arkansawyers are born with tact and diplomacy or whether they acquire it.

Gene has excellent taste we know because he picked himself one of the cutest girls in these parts for a wife.

Last week Arlee Bernard was running around in a tall spin because he had lost his wallet containing over \$100 in cash. The wallet was found at his home. We wonder if Elsie collected the "cash reward" Arlee offered to the finder.

Our friend, Brunette Louder, who visited us last Wednesday took home roses from our garden and chrysanthemums from the L. W. Ray's to be used in decorating for the Federated Music Club convention held in Seagraves last Friday and Saturday. We were glad to be able to furnish part of the flowers for the occasion.

Joyce Gillman wearing a new diamond on THE finger. Joyce is the pretty, brown eyed surgical nurse at West Plains hospital. Her parents live at Crepe and she took her nurses training at John Sealy in Galveston.

Remind the spouse telling Bill, "You can run into debt, but you have to crawl out."

The park around the city hall looks very inviting for picnic purposes. The grass has been cut and the premises cleaned up in general. Right in front of the hall there is a bed of bright zinnias in the most beautiful fall shades of orange, yellow, orange-red and so on.

In speaking of the new fashions everyone agrees that there has been an awful let down.

Rabies Prevalent More In Winter Than Summer

—Contrary to popular belief, rabies is more prevalent in the so-called "dog-days" of the hot summer months.

In a statement released this week by Dr. Geo. W. Cox, State Health Officer, it was disclosed that all animal brains submitted for examination by the Laboratory in January, 1947, were found to be positive for rabies. In the mid-summer months of July only 18 per cent were positive.

All stray dogs were destroyed and all pets vaccinated for rabies.

ies, it would go far toward stamping out this justly feared, and always fatal disease," Dr. Cox said.

The doctor stressed that dogs suspected of having rabies should not be killed immediately, but should instead be confined ten days for observation to see if the disease develops. If a dog sickens and dies during the observation period, the head should be packed in ice and sent to the State Health Department for examination. Freezing the brain, or killing the dog prematurely, or in such a manner as to injure the brain may make correct laboratory findings uncertain, if not impossible.

Dr. Cox declared that after a dog is confined ten days and then killed, there is still a safe margin of time for a victim of his bite to be treated for rabies prevention, but he cautioned that if the disease is found to be present in the dog, the victim should then begin treatment without further delay.

MR. and MRS. ROY SHIREY of Mulleshoe spent the week-end with MR. and MRS. BILL HARRIS.

"SELLING OUT CHEAP"

What shall it profit a man if he gains the whole world and loses his own soul? Or what shall a man give in exchange for his soul? The day and age in which we are living today seems to be so different to all other. The soul of man has always been very cheap in the eyes of lots of people but the depreciation is getting greater every day. Every thing we have today is subject to vanity except the soul. It must

live on and on regardless of the price that is placed upon it.

Esau sold out very cheap when he became faint from hunger. He had been receiving the blessings of his Father but when this period came in his life he concluded that it would not be worth anything to him, so he sold out for a bowl of porrage and bread. In just a short time he regretted very much that he had sold out so cheap but there was nothing he could do about it. Jacob of course received great profit when he bought Esau's birthright. Brother the devil will make big profit when he is able to get you to sell to him, but you are the one that is looser.

FROM LEVELLAND

Mr. and Mrs. Leroy Flinn of Levelland were Sunday guests in the Carl England home.

Mr. and Mrs. Flinn were married in Slaton on October 17. Mrs. Flinn is the former Allene Curry of Snyder.

CATHY HUGGINS RECEIVES TONSILLECTOMY LAST WEEK

Cathy Huggins, daughter of Mr. and Mrs. L. E. Huggins, is convalescing at her home here after a tonsillectomy performed at a Lubbock hospital last week.

MISS NORINE FRAZIER spent Saturday night in Sudan with her parents.

FARM FACTS WORTH KNOWING

Q. Is there any effective treatment of fowl typhoid?

A. No. Efforts at medication for fowl typhoid have been generally unsatisfactory. Vaccination against fowl typhoid has been rather extensively practiced. Although results are variable, vaccination in some instances may give beneficial results. There is one precaution to keep in mind after a flock has been injected with typhoid bacterin and that is that these birds will show a positive reaction to the agglutination test for pullorum for 30 to 60 days following the injection. Therefore, no pullorum testing should be done for at least 90 days after vaccination for fowl typhoid.

Q. Do you know of any Holstein heifer calves that have weighed over 350 lbs. at four months of age?

A. Yes. At the Research Farm of the Ralston Purina Company a new record for this farm was made recently when a Holstein heifer calf tipped the scales at 372 lbs. at four months of age.

Q. In mating rabbits, should the buck be brought to the doe, or should the doe be placed in the buck's hutch?

A. The buck should be kept in his hutch and the doe brought to him because most bucks are slow in performing service in a strange hutch. Furthermore, the tendency of the doe is to object to the buck being placed in her hutch and she may viciously attack and injure him.

Q. What is the semi-scald method of picking broilers?

A. After the birds are bled and killed, they should be plunged into water at a temperature of 125° to 130° F. and held there for about 30 seconds. Then hang the birds on racks and begin picking immediately. Extreme care must be taken to avoid tearing or breaking the skin, as such unsightly marks detract from the appearance of the dressed birds and lower their sales value. A thin-bladed, dull knife should be used for removing the pin feathers.

Send your questions about livestock or poultry problems to FARM FACTS, 813 South Eighth Street, St. Louis 2, Missouri. Questions will be answered without charge, either by mail or in this column, at a service of this newspaper.

Celebrated 48th Anniversary

Mr. and Mrs. W. A. Lindsey celebrated their 48th wedding anniversary Sunday with a family dinner. All of the children were at home with the exception of M/Sgt. Floyd Lindsey, of Roswell, New Mexico. Twenty-one guests were present for dinner.

Those coming from out of town for the occasion were: Mrs. Leavre Lindsey and daughter, Sue of Silverton; Glen and Raymond of Anton; Miss Lillian Brooks, Anton; Mr. George Criswell, Lubbock; Hyrtle Feazell, Lubbock; Mrs. Lucile Jones and daughters of Clovis, New Mexico; Mr. and Mrs. Virgil Humphreys and children and Mr. and Mrs. Vincent Vialle and boys of Levelland.

Mr. and Mrs. Amel Glaser of San Francisco, California; Mr. and Mrs. Cecil Lindsey and boys of Morton.

Pictures were made and a happy day enjoyed by the family get-together.
