

**BOB GRAHAM, U. S. MARINE CORP. VISITED IN MORTON**

Bob Graham, stationed with the U. S. Marine Corp in North Carolina, visited here this week with his sisters, Mrs. Babe Vandingham and family, Miss Mary Graham and brother, George Graham and family.

Bob, a former member of the Tribune staff, will visit his parents, Mr. and Mrs. George Graham and sister, Jane, in Ruidoso, N. M., before returning to his station.

## Wheat Harvest Bulletin Report

A loss of approximately 3,000 acres by hail on the night of May 25 has been reported for Haskell County. Slight loss by high winds blowing down rank wheat has been reported in several counties.

Several of the first loads of wheat cut in Haskell County contained as much as 20 per cent moisture and several loads cut in Baylor County contained 19 per cent moisture, which as caused farmers to slow up in their cutting operations. The oat harvest in Clay County started several days ago and a small acreage of barley has been cut in Coleman County.

Adequate numbers of combines, trucks, and workers are reported to be on the ground in all counties ready for harvest. Several counties report a surplus of extra harvest hands. It will be several days before an accurate analysis can be made as to where any real shortages or surpluses may exist. A considerable number of combines are reported to have moved from towns on to farms, where they remain idle, waiting for fields to dry.

## Mary Helen Keith, Outstanding 4-H Club Member of Whiteface, Speaks At Soil Conservation Meeting May 23

Mary Helen Keith, outstanding 4-H Club member, Whiteface, outlined and explained soil conservation districts and benefits to be derived from such a program at a sub-district meeting held at Neely Ward, Monday night, May 23.

Miss Keith said, "Soil erosion is the No. 1 problem of Texas agriculture. It is damaging 94 percent of Texas crop land, 93 percent of Texas grazing land; 66 percent of Texas wood land 83 percent of Texas idle land."

"Assistance to landowners in controlling this damaging erosion is available through the U. S. D. A. soil conservation service. Its staff of technically trained conservationists aid the district to fulfill its technical obligations to assist those who wish to cooperate with it."

### The Cooperative Agreement

"The cooperative agreement is not a compulsory document. It is a written understanding between the farmer or rancher and his District Supervisors where the farmer or rancher states that he intends to carry out a conservation plan and the District supervisors agree to furnish him the technical assistance required in executing this plan."

### Some of the Assistance Available Through Districts

1. "Information on soil and moisture conservation practices.
2. Soil, slope, erosion, and range vegetative condition information on each farm or ranch.
3. Offers a medium through which erosion problems common to more than one farmer or rancher may be solved.
4. Offers facilities whereby groups of people can consolidate efforts and potential to bring about a stronger bargaining power in making custom or other equipment and materials available to members."

### The District Program Means To Farmers and Ranchers:

1. "Profitable land use and bigger yields.
2. Protection of their most vital investment—SOIL.
3. Security for future farm and ranch generations."

### To Industry:

1. "Preservation of farm buying power.
2. Protection of water supplies.
3. Insures a better community.
4. Adequate food to produce other goods."

### To All of Us:

1. "Maintains the tax base in rural areas.
2. Reduces tax dollars used for road maintenance.
3. Protects fish and game.
4. Increases the natural beauty of the countryside.
5. Strengthens our Community, State and Nation."

### Financial

"The ACA program of the Production and Marketing Administration assists the farmer and rancher financially on many of the conservation practices that he wishes to carry out. Its services have assisted soil conservation districts to carry out their locally adapted conservation plans of work by furnishing financial help to individuals who apply the work."

### Any Farmer or Rancher May Cooperate

"A district cooperator is any farmer or rancher who assumes the responsibility of carrying out a complete conservation plan of work on his farm or ranch. The process of becoming a cooperator is short and simple. Any farmer or rancher who wishes the technical or material assistance of the district in planning and applying a well-rounded conservation program on his land makes known his wishes by filing an application with his district supervisors. The supervisors then request the Soil Conservation Service to make a detailed conservation plan map of his farm or ranch. This map enables the applicant to identify his soil units and to select the necessary conservation treatment as recommended by the District Plan of Work as it applies to his own farming or ranching operations. He is assisted in this job of planning by a trained technician of the Soil Conservation Service who is thoroughly informed on both the District Plan of Work, and the soil capabilities of the farm. These farm or ranch plans are formulated to use the right combination of conservation practices to attain sound land use, economically sound conservation farming, and the maintenance or improvement of soil fertility."

### Soil Conservation Districts

Districts and District Supervisors "Districts are civil subdivisions of our State Government. They are created by landowners for the benefit of the land that they own. The boundaries and names are determined by the people who create them. Two-thirds of

the voting resident landowners must vote in favor of the creation of a district before it can be formed. Districts are governed by five elected resident landowners who make their living from farming or ranching. These officials are called District Supervisors. They supervise the conservation activities within their district. Their salaries are determined by State law. They may receive a maximum of \$80.00 per year."

### The State Soil Conservation Board

"The creation of soil conservation districts was made possible by the passage of the State Soil Conservation Law in 1939. This law provides for the creation of a State Soil Conservation Board. State Soil Conservation Board members, like District Supervisors must be Texas landowners and must make their living from the land. Their chief duties are to assist farmers and ranchers in Texas in creation and operation of soil conservation districts. They are also privileged to advise and counsel with the district supervisors pertaining to district activities after the districts are under operation. The State Board has no authority over District Supervisors."

### Administration:

"The administration of this conservation program is strictly in the hands of landowners from the State to the District level. There is no National or State authority over Soil Conservation Districts. District Supervisors are in no way subservient to any agency, federal or state, neither are their activities confined to the administration of agency programs. They are not agency committees. The conservation "Program" and "Plan of Work" that they administer is written by and for the people of the District."

### Basis of Operation

"The conservation "Program" and "Plan" of the Districts is based on its agricultural assets and liabilities; land use problems as they affect its social, economic, and physical conditions; and a workable solution by which these problems may be solved for the betterment of the health, safety and welfare of the districts. This document in the legal constitution for the operation of the District. It is flexible, and may be changed as time and progress demand."

### District Aims

"Districts do not aim toward power or restraint. Their aim is to bring about a wide-spread understanding of the need for soil conservation and to instill in the minds of the people that it is their individual responsibility to do the job of conservation. Districts propose to help you and your neighbor to solve your soil and water conservation problems. They are assisted by both the Federal and State Government to accomplish this aim. Districts are given Federal and State aid, just like and other governmental subdivision of this State. As cities and counties are given federal aid to build streets, roads and parks. Districts are given federal aid on solving and correcting the technical problems pertaining to soil conservation operations. As school districts are given state aid in the operation of their schools, districts are given state aid to educate the people to the need and the ways by which they can best carry out soil conservation work."

### Educational

(1) "The Texas A. and M. College through its able staff of county agricultural and home demonstration agents assist the district to further its cause through their educational activities with the farmers and ranchers with whom they work.

(2) The Vocational Agriculture Department gives educational assistance through training of high school students in the public school systems.

(3) Veteran Agricultural Schools provide veteran farmers or ranchers with information and training on activities of soil conservation districts."

## Lubbock A-B-C Boys' Club Rodeo To Start June 8th

Participants and spectators from many parts of the Southwest are expected to throng Lubbock at 3:00 p. m. on June 8, for a tremendous parade, blocks long, which is to officially open the Lubbock ABC Boys' Club World Championship Rodeo, June 8, 9, 10 and 11. All performances will be in Jones Stadium, Texas Tech campus, starting at 8:00 p. m. nightly.

The Will Rogers Range Riders of Amarillo will set the parade gait, to be followed by some of the finest horses and riders in the West. Crowds at each of the four nightly rodeo shows will see five action-filled acts, plus a host of heated contests for the prizes of \$4000, plus entrance fees, in saddle bronc riding, bareback bronc riding, calf roping, steer wrestling, and bull riding.

The showmanship of the famed Hendricks family, Beeswax and the Moores, an 18 horse quadrille, and four feminine trick riders will highlight the World Championship Rodeo each night.

Checks, cash and money orders, made out to "ABC Boys Club Rodeo" for reserved and box seats are being received at the Rodeo Ticket office, 1118 Main, Lubbock, phone 3-3489. Prices are \$2.40, tax included, for reserved seats, and \$3.30, including tax, for box seats. General admission tickets will be sold at the gate only, \$2 adults, and \$1 children. All seats in Jones Stadium afford an excellent view of the performing area.

## —THIS IS AMERICA—

This is freedom, many religions, many races, living in harmony together. For freedom is more than a way of life. It is a state of spirit—and our richest asset.

Under freedom of religion, Americans attend more churches than any other nation. Under freedom of speech, we have more newspapers, more radio stations than any country in the world. Under freedom of opportunity, our children attend more schools, have more chances to succeed in life.

We are only 7% of the world's people, living on 5% of the world's land. Yet we in America have the

highest standard of living the world has ever known.

Under freedom of enterprise—you may call it Democracy, or Capitalism—we make just about one-third of the world's goods, mostly for our own use. We drive three-fourths of the world's autos, use about half the world's electricity. Our homes are unrivaled for comfort and labor-saving devices. We eat more meat, buy more clothes, see more shows, own more insurance. We even save more money.

Yes, freedom pays—in the coin of tolerance and understanding, and in the coin of progress and prosperity.

## State Medical Assn. Receives Many Requests

Requests for everything from how to remove tattoos to the electrocardiogram of a horse are received in the library of the State Medical Association of Texas. And the literature solving those queries is sent post haste to the requesters.

This library, supported by the members of the association, offers one of the few package services on medical topics in the country. The bulk of requests are naturally for the latest information on the treatment of undulant fever, complications of peptic ulcers, ovarian tumors and the like, but some out-of-the-ordinary requests are received and answered with the promptness which is a source of pride of the library.

Over 2000 items from the library were consulted and loaned last month by members of the profession and laymen. The biggest demand today from lay persons for literature in the library, according to Mrs. Estelle Parnell, librarian, is on sterilized medicine.

The film library also serves the public as well as the medical profession with about one-third of the 200 films suitable for lay groups. During the cancer drive, the film on cancer titled "Time Is Life" was most in demand. This film library is the only one in the country operated by a state medical society.

Both the package service and the film service are conducted at no charge, other than postage fees. The package service literature is sent in answer to requests on a two-week loan, with renewal upon further request.

Seasonal afflictions bring many demands for the most recent information on detection and treatment; West Texas doctors are now writing for literature on tick fevers, and the demand for polio literature is expected to increase as the summer advances.

Though most of the requests are sporadic, there are some physicians who are habitual users of the vast resources of the library. In particular, a doctor from a small town in the Valley outlines his year's study and sends a schedule of releases he would like on specific medical topics at two-week intervals, and thus keeps up to date on all phases of his practice.

## A FAIR QUESTION

## "One Sunday Afternoon" to Show at Home Theatre, Whiteface, Sun.-Mon.

Romance, music, drama and laughs accent Warner Bros.' new Technicolor musical, "One Sunday Afternoon," starring Dennis Morgan, Dorothy Malone, Don DeFore and Janis Paige, which comes to the Home Theatre in Whiteface Sunday matinee and night and Monday night.

"One Sunday Afternoon" is a comedy romance. The appeal of this film recalls the days when the bicycle-built-for-two was being pushed over to the right hand side of the road by the new, fangled contraption called the automobile. Ralph Blane is responsible for the music scores on this entertainment, which blends story with songs in the new Broadway manner.

"One Sunday Afternoon," a comedy drama with its well spring of popularity in true and understandable characterization, was considered the perfect vehicle for Warner Bros. to utilize this new idea in film musicals. No sudden solos break up the

continuity, nor is the usual accepted formula for introducing lines of dancing girls seen. Raoul Walsh has followed this new pattern closely in his direction, which is reported to strike fresh fields for Hollywood musicals.

Morgan leads off the bright cast, which in addition to the other trio of personalities, including Miss Malone, Miss Paige and DeFore, also has Ben Blue, Dorothy Ford, Alan Hale, Jr., Oscar O'Shea and Richard Walsh. LeRoy Prinz staged the dances, with Ray Heindorf in charge of the musical frame.

### RECENT GUESTS IN HOME OF LLOYD C. MILLER AND FAMILY

Recent guests in the Lloyd C. Miller home were her father, C. A. Mebus, and aunt, Mrs. C. R. Brownlee and Mr. Brownlee of El Paso. Mr. and Mrs. Brownlee returned to their home last weekend and Mr. Mebus continued on to North Dakota, where he will visit a son.

## Cotton Research Congress to be Held in Dallas

More exhibitors, greater variety of equipment and better display facilities are assured for the 1949 cotton mechanization session of the Cotton Research Congress through plans made by members of the Dallas Hardware and Implement Club and the Statewide Cotton Committee of Texas, Eugene Butler of Dallas said today.

Butler, chairman of the program committee for the mechanization session, announced that the machinery, including equipment for soil conservation practices related to cotton production, will be displayed Saturday morning, July 30, in the Automobile Building of the State Fair of Texas. Saturday's program is the concluding session of the three-day Congress, opening Thursday morning, July 28, at the Baker Hotel.

A. M. Pendleton, U. S. Department of Agriculture, Dallas; Wm. E. Meek, Delta Experiment Station, Stoneville, Mississippi; H. P. Smith, Texas Experiment Station, College Station; Rex V. Lentz, Mercantile National Bank, Dallas; and C. B. Spencer, Texas Cottonseed Crushers Association, Dallas, are members of the Congress committee planning the event.

Representing the Dallas Hardware and Implement Club is a committee composed of F. R. Shultz, B. I. Toline and R. J. Kupper.

Several thousand cotton growers and agricultural workers are expected at the session, according to Burrell C. Jackson, Hillsboro, General Chairman of the Statewide Cotton Committee of Texas.

### WEEK-END GUESTS

Mr. and Mrs. Earl Louder of Seagraves, Texas were week-end guests in the Carl England home. Mr. and Mrs. Milton F. Brown, their daughter, Mrs. Hugh Johnson, all of Dallas and Mr. and Mrs. Milton F. Brown, Jr. were Sunday afternoon visitors in the England home.

MR. and MRS. M. MAROWITZ visited in Whiteface Sunday.

Tribune, Morton, Cochran County, Texas, Thursday, June 2, 1949

## Availability of Medical Reserves for Short Duty Tours Being Determined

Reserve officers of the Army Medical, Dental, and Veterinary Corps have been asked by Major General R. W. Bliss, The Surgeon General of the Army, to signify their availability for short periods of service ranging from one to 29 days a month, in order to help relieve the Army's critical shortage of these professional personnel, Colonel Oscar B. Abbott, Executive for the Texas Military District, announced.

If response to the questionnaires is sufficiently encouraging, reserve officers may volunteer for such short terms of service and perform professional duties at Army or Air Force hospitals and medical installations located in their geographic area. If 5,000 Reserve officers volunteer for only three days a month for a year's time, the man-hours

thus contributed would be equal to the full-time service of 609 physicians, dentists, and veterinarians.

"The Army Medical Department is faced with an unparalleled peacetime emergency requiring out our medical requirements satisfactorily," General Bliss stated. "In time of military emergency, it is the Reserve of officers upon whom the great burden of effort and sacrifice has fallen. Today, we are again turning to Reserve officers of the Medical Department for help."

Medical officers can obtain further information and applications at their Organized Reserve Corps Instructor's Office at Room 255 1005 1/2 13th Street, Lubbock, Texas, or by writing direct to The Commanding General, Brooke Army Medical Center, San Antonio, Texas.

## Watsons Move to Lubbock; Formerly Lived in Morton

Rev. and Mrs. J. W. Watson, formerly of Morton, and more recently of Happy, Texas, where he was pastor of the Methodist Church, are now making their home in Lubbock.

Rev. Watson, retired from the ministry at the last session of annual conference.

The Watson's new home in Lubbock was built and furnished for them by their children.

Wendell Watson, Morton High school principal, is a son of the Watsons.

In writing the Tribune Mr. Watson said, "You will like your new minister very much. I have known him for several years and know him to be a real chap. He is friendly and will soon know all the people in the community; and most excellent is his wife... you will like them both."

Mr. Watson referred to the Rev. and Mrs. C. C. Armstrong, who are moving to Morton where Rev. Armstrong will assume duties as pastor of the First Methodist Church.

Rev. A. A. Kendall, pastor of the church here for the past three years left Tuesday for Canadian, Texas.

The community regrets losing Rev. Kendall but extends the hand of welcome and fellowship to Rev. and Mrs. Armstrong.

## MAPLE NEWS

Mr. and Mrs. C. W. Chism of Las Vegas, N. M., visited Sunday and Monday with Mr. and Mrs. C. B. Caplinger and Mr. and Mrs. O. H. Horton.

Mrs. O. H. Horton and La Velle Harlan made a business trip to Tucumcari, N. M. Saturday night. Mr. Horton, who is employed at Tucumcari, returned with them Sunday.

La Velle Harlan of Skelley Town, Texas, is visiting in the O. H. Horton home. She left Monday to accompany her father, O. H. Horton to Tucumcari.

Elsie Curlee is visiting her sister, Mrs. C. B. Caplinger this week.

Carroll Eubank left last week for the wheat harvest. Mr. Eubank is the son of Mr. and Mrs. J. C. Eubank of Pep.

Helen Horton visited Mr. and Mrs. Bobby Burns of Pep last week.

Lillie Faye Caplinger is visiting in the O. H. Horton home while attending Bible School at the Morton Church of Christ.

Mr. and Mrs. Cecil Caplinger visited Sunday with their daughter, Mrs. Robert G. Burns of Pep.

David Horton was a recent guest in the C. M. Caplinger home.

Adding machine paper at the Tribune Office Supply Dept.

## Morton Rebekah Lodge Meeting Held Thursday

The Morton Rebekah Lodge, number 39, met for regular session Thursday evening, May 27, at the Odd Fellow Hall.

The hall was decorated with lovely pink and red roses and other flowers from Mrs. Myrtle Rays' flower garden.

There was a large number present. All members having birthdays during the month of May were honored. Mrs. Bea Baker baked and decorated a beautiful birthday cake for the occasion.

The Lodge presented the outgoing Deputy, Mrs. Lola Harris, who has served the Lodge faithfully for the past two years with a lovely fifty-three piece silver-ware set.

All members present and one visitor, Mrs. L. B. Kelso of Ft. Tarrant, N. M., were served coffee and punch.

The Lodge will have its regular meeting again Thursday, June 2. All members are urged to attend and all visiting Rebekahs are welcome.

## Mrs. Morrow Honored Guest at Auxiliary Luncheon, Banquet

Mrs. Albert Morrow shared honors with Mrs. O. E. Dewey, department president of the American Legion Auxiliary, at a luncheon given by the Lamesa Auxiliary in Lamesa last Friday noon.

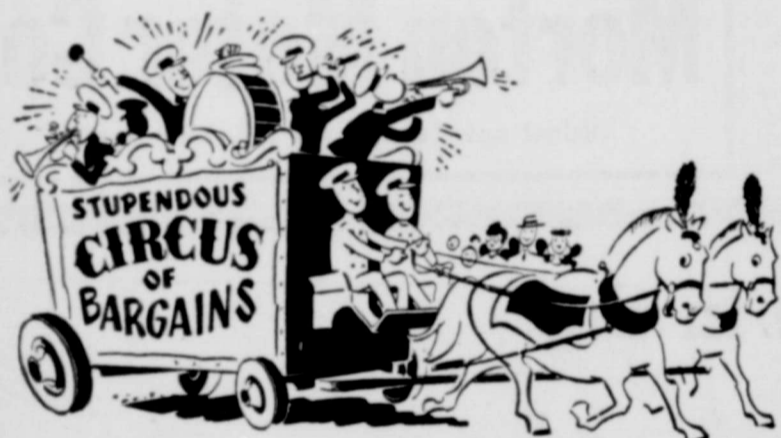

From Lamesa Mrs. Morrow and Mrs. Dewey went to Big Spring, Texas, where the Big Spring Auxiliary entertained with a banquet in the Settles Hotel, honoring the department president, Mrs. Dewey and immediate past president of 19th district, Mrs. Morrow.

### MONDAY NIGHT GUESTS IN FRANK BARKER HOME

Mr. and Mrs. E. R. Chamberlain and two daughters, Cassie and Ruth Ann, of Oklahoma City were Monday night guests in the home of Mrs. Ch. M. Barker and family. The Chamberlains left Tuesday for a California vacation.

### VISITING IN ABILENE

Barbara Kendall left last week for Abilene, Texas, where she will visit her mother, other relatives and friends.

## Diphtheria Cases In Texas at New High Says Cox

With 14 reported cases of diphtheria within the past week, and a total of 397 cases reported in the first 19 weeks of this year, Dr. Geo. W. Cox, State Health Officer, is urging Texas parents to have their immunized children Shick tested to determine immunity, and if inoculation is necessary, to have it done immediately.

"There is a widespread belief that once immunity is established, it lasts forever," the State Health Officer said. "This is not always true. In some cases it diminishes and finally dies out, and reinoculation is necessary in order to protect the child.

"Every child who will enter school next term should be inoculated or Shick tested now, because it takes from three to nine months for immunity to be completely established after the injection is administered."

As long as cases of diphtheria occur, a child is in danger unless protected by immunization. The germs throw off a powerful poison which goes all through the body. It is particularly harmful to the heart, blood vessels, nerves and kidneys, and serious complications often accompany the disease. Some of the more dangerous complications are bronchopneumonia, to which the patient is particularly susceptible; paralysis, which may last for days or for as long as 3 or 4 months; or permanent injury to heart, nerves or kidneys.

"The best thing to do with diphtheria, is to stop it before it starts," Dr. Cox said. "When toxin is injected under the skin, the system manufacturers a disease-fighting antitoxin which can successfully resist the disease. Children of school age should be inoculated or Shick tested now, so that immunity will be established or nearly so, before the opening of the next school term."

### WHITEFACE PASTOR ATTENDS METHODIST CONFERENCE

Rev. Roy Patterson, pastor of the Methodist Church, Whiteface, attended the Methodist conference in Amarillo from Wednesday, May 25 through Sunday, May 29. Mr. Herb Lindsey was the lay-delegate to the conference.

## Protein Adds to Value of Ration and Plant Food in Manure on Soil Building

Feeders who use livestock as their most valuable piece of soil conservation "equipment", as well as their best method of marketing feeds, get a bonus value that will be of increasing importance in the future, livestock authorities say.

"The amount of profits made by livestock producers in the years just ahead will have more to do with the success of soil conservation than any other factor," Dr. A. D. Weber of Kansas State College recently predicted.

Records show that when cattle are fed home-grown feeds, a farm loses only one-seventh as much nitrogen, one-fourth as much phosphorus, and one-twentieth as much potash as when the grain is sold off the farm.

When a purchased high-protein concentrate, such as cottonseed meal, is added to the home-grown grain and roughage, there may even be a net gain in soil fertility. Professor F. B. Morrison points out:

"When such protein-rich feeds as cottonseed meal, linseed meal and tankage are purchased and fed to stock and proper care is taken of the manure produced," he comments in "Feeds and Feeding," "a double return is secured. The first return comes from the high feeding value of these protein supplements, and the second from the fertility added to the soil."

Because of its higher nitrogen and phosphorus content, a ton of cottonseed meal has approximately 10 more manurial value than a ton of carbohydrate feed, such as corn.

Properly handled, a ton of manure is about equal to 100 pounds of fertilizer of 10-5-10 analysis. Since a steer or dairy cow usually will produce 1,000 pounds of manure, or more, monthly, this means that the animal is

contributing \$10 to \$20 yearly toward improvement of the soil on the farm where it is fed.

In addition to its plant food value, manure provides humus, or organic matter, to increase the water holding capacity of soil, improve soil texture and reduce wind erosion. Acids and bacteria in manure also help to release plant food from insoluble compounds in the soil.

Feeding of a protein concentrate, such as cottonseed cake or pellets, on the range also is an important conservation practice. Supplemental feeding and moving feeding grounds regularly aids better distribution of grazing, and helps to prevent overgrazing.

Manure has a higher value if promptly spread on fields or pastures. If stored, it should not be allowed to become dry, overheated or leached by rains. Adding 100 pounds of superphosphate to each ton of manure increases fertilizing value and helps to prevent loss of nitrogen. Other factors influencing manure's value include the age and kind of animal, and the kind of feeds used.

### WHITEFACE LION DELEGATES

Herb Lindsey and W. Garrett were delegates from the Whiteface Lions Club to Lions convention held in Lubbock last week.

### CALLED TO DENVER, COLO.

H. P. Clemmons, school superintendent of Whiteface, was called to Denver, Colorado last week because of the serious illness of his mother.

## Whiteface Lions Entertain Wives

Members of the Whiteface Lions Club entertained their wives at a chicken dinner, Thursday night, May 26. The affair was held at the Methodist Church, Whiteface.

Lions and lionesses present included Boss Lion and Mrs. Snodgrass, Mr. and Mrs. Flowers, Mr. and Mrs. Fred Overman, Mr. and Mrs. Berry Lyons, Mr. and Mrs. A. Rankin, Mr. and Mrs. H. Elliot, Mr. and Mrs. T. J. Capps, Mr. and Mrs. H. D. Galvin, Mr. and Mrs. Garrett, Mr. and Mrs. Joe Taylor and Mr. W. Walker.

Plans were completed for a clean-up drive and DDT spraying of the town of Whiteface, sponsored by the Lions Club. The club has issued an appeal to all property owners to clean-up around their own premises.

Committee appointed to handle details of the drive is composed of W. Garrett, chairman, H. Elliot and B. Lyon.

Concluding the dinner and business session guests enjoyed games of Bingo.

## Agricultural Short Shots of Interest

Watch late-hatched chicks closely for symptoms of coccidiosis. If the disease is suspected, immediate treatment is necessary.

The newest orange juice to make its bow on the market is fresh bottled juice which holds its fine flavor and full vitamin C content for at least two weeks under refrigeration.

The cost of operating farm machinery is more than one-third the expense of operating farms in Texas.

Meringues baked on hot fillings cook more evenly and are less likely to "weep" than those baked on a cold pie, according to recent tests made by the New York State Experiment Station.

A bucket spray pump, equipped with a four-foot extension rod and at least 15 feet of hose, is satisfactory for a few fruit trees around the home, but for spraying orchards up to 300 trees, a barrel spray pump which develops from 125 to 150 pounds pressure is more practical.

## Belgians to Have Display at 1949 Texas State Fair

Participation of the Belgian Government in the 1949 State Fair of Texas has been assured by cable from Brussels, authorizing contract for 1600 square feet of space in the General Exhibits Building, David A. McMinn, State Fair manager of sales and promotion, has announced.

Strong possibility of additional foreign exhibits from Britain, France and Holland indicate that the 1949 Fair will be the first truly international fair of Texas since the Pan-American in 1937, McMinn said. Representatives of all these governments have been in Dallas recently, conferring with McMinn and Ray L. Miller of the U. S. Department of Commerce, regarding the opportunities offered to foreign exhibitors in Texas.

The Belgian exhibit at the Fair will show baby carriages, handsome period desks, original handmade ceramic pieces, rich blankets, mirrors, objects d'art, world-famed Belgian laces, hand-carved shotguns, fine linens, rugs, draperies and upholstery materials—petit point, damasks and brocades—treated glass pieces, gloves, fine rabbit skins, picture frames and mouldings, and other quality products by Belgian manufacturers.

# Who said so? And why are they the most wonderful tires ever built?

For more than two years these great tires have dominated the automotive scene, written themselves into the design of the new motor cars, fixed themselves in the enthusiasm of countless thousands of motorists.

What is all this? What's going on? Why should a couple of new tires create such a startling revolution? Why were they followed by a host of attempted imitations—why were they never successfully equalled or duplicated?

Yet here they are—just a couple of nice looking tires. What's inside of them? What do they do that other tires won't do? Why should you prefer them, insist on them, buy them? Why do millions insist on them and buy them?

### The answers are very simple

The answer starts with the simple fact that they are the exclusive and original U. S. Royal "Air Ride" tires. They take more air than ever before because there's more air room inside them—yet they ride you and cushion you on less air pressure. That's point number one.

Point number two is that they steer magnificently, easier than former tires, because their treads were especially designed for steering. Their treads are for sure and easy steering as well as safety.

Point number three is that by combining lower air pressure and faultless steering you get a tire that provides complete vehicle control around the turns, in parking maneuvers, on the straight-a-way at any speed—yet they are tires that also ABSORB THE ROAD. They cushion you and your vehicle from every shock and discomfort. They are tires that pave their own highways as they go along.

### The difference between them

What's the difference between these two U. S. Royal tires? The difference is quantity. You get a bigger tire in the Royal Master, one with much deeper tread rubber; one whose traction and stopping tread may be renewed by regrooving time and time again. And the U. S. Royal Master costs more because it's a bigger tire with a proportionately greater capacity and span of life. Both tires are the finest net value in the world.

They are not luxury tires. They are not cut-price tires. They are pure value—the greatest value in tire history.

## The tires that revolutionized automotive riding and driving

1. The tires that perform with more air and less air pressure
2. The tires that absorb the road they travel on
3. The tires that fully cushion every shock and road strain
4. The tires that radically influenced modern automotive engineering and design
5. The tires that have been copied and imitated but neither equalled or duplicated
6. The only tires of low air pressure with especially designed steering tread
7. The tires without any excess (lazy) rubber—run cooler and, therefore, wear much longer
8. The tires exactly designed to fit your present wheels
9. The tires chosen as original equipment on the finest of the new cars
10. The tires that make old cars feel like new
11. The tires that pay for themselves in pleasure, protection and long wear

These are the tires whose revolutionary qualities and sensational performance established today's highest standards of riding and driving comfort, safety and economy. Sold by U. S. Royal Dealers everywhere at fair and stable prices representing the highest tire value in the world. You may act with complete confidence on these facts today or any day.

### Arch Huddleston Dies Suddenly Thursday Night

Arch Huddleston, 44, eleven year resident of Cochran county, died Thursday around mid-night, and only about two hours after complaining of "weakness."

Mr. Huddleston had been employed by Byron Willis at Byron's Auto Store for the past nine months.

Funeral services were conducted Saturday afternoon, May 28, at the First Baptist Church with A. L. Beggs, Assembly of God pastor, conducting. Interment in Morton Cemetery under direction of Singleton Funeral Home.

Survivors beside the wife include his mother, Mrs. Viola Huddleston, a daughter, Mrs. Vernon Pierce and grandson, Darrel Pierce of Lehman; one sister, Mrs. J. R. Pinkerton, Snyder; and five brothers, J. J. Ballinger; R. R. Ft. Worth; H. E., Brownfield; O. C. and M. H. Huddleston, both of Baird.

### Reserve Officers Must Report Address Changes

Instructions contained in letters of appointment to the Officers Reserve Corps make it the responsibility of reserve officers to report changes of address and other changes in status to the Adjutant General's office in Washington, Major James R. Samsel, Instructor for the Lubbock District, reminded today.

Members of the ORC must report both temporary and permanent changes of address, Major Samsel said. In addition, travel or residence in foreign countries, enlistment in the regular armed forces and employment by the Federal Government must be reported.

"In spite of the above instructions in letters of appointment," he said, "increasingly large numbers of reserve officers are failing to render reports of changes, especially changes of address."

Such laxity is hazardous to their own interests, he pointed out. Applications for promotion, active duty training, new assignments, inactive pay and other matters of importance cannot be given prompt attention if correct addresses are unknown or in doubt.

"Full cooperation of every reserve officer is enjoined to the end that instructions concerning the above matters be carried out," Major Samsel continued. "Efforts are being made to bring this matter to the attention of all reserve officers in this area."

MR. and MRS. J. C. KEYSER have been vacationing in Dallas and the Texas Gulf.

### 'Gives You Texas' BOYCE HOUSE

A ride on a train is as good as a show.

Recently, on a journey from Louisiana to Fort Worth, your observer saw an elderly man who was (nominally) in charge of two small boys. They got on at Shreveport. The pair were brothers. One was five; the other was a year younger. The four-year old outweighed his brother by a pound but the elder was the leader.

The man was their grandfather. They called him by his first name, which was George. The boys had been visiting their grandparents and were returning home.

The journey had hardly begun when they announced they were hungry. So George produced a big paper sack and drew therefrom some cookies. Of course after that, they were thirsty. Then they were hungry again and, this time, they were given a banana.

They bounced on the seat until this proved too tame, then they turned somersaults from one seat across to the other. (The group was occupying a double seat facing each other.)

Then they did a real acrobatic act. The younger stood in the seat and his brother climbed on his shoulder, his purpose apparently being to clamber into the baggage rack overhead.

George induced them to desist by the offer of more food. In the course of the journey, each boy ate four bananas and a dozen cookies.

Grandpa left the seat for a little while and, when he returned, the boys had disappeared! He looked alarmed for a moment, then they poked their heads out from under the seats.

By the time Dallas was reached, the brothers were still going strong but George looked like a fighter who was hanging on for the final bell.

Their father was an overseas veteran and is now a coach and military instructor. He no doubt keeps in practice at home for his work at school for those were two typical boys, full of energy, restlessness and fun.

CHEVROLET ADVERTISING

Chevrolet began advertising in 1919 with a campaign in 13 newspapers in six cities. Today, the company uses approximately 7,500 newspapers in 6,000 cities.

### Application Filed To Drill Outpost in Landon-Devonian

Outpost to the one-producer Landon-Devonian field in South-Central Cochran county has been staked by Texas Pacific Coal and Oil company. It will be the concern's No. 5-D J. F. Edwards.

The drillsite is 660 feet from north and 526 feet from west lines of the lease in section 13, block L, psl survey.

The Devonian is expected to come in above 11,000 feet. Drilling with rotary tools was scheduled to start first of the week.

Also flanking the Landon-Devonian field, Stanolind Oil & Gas company No. 2 Holt was drilling ahead from 8,553 feet in lime.

It is 660 feet from south and east lines of section 3, block L, psl survey.

In the southwest part of Cochran county, Humble Oil & Refining company was making hole toward the Devonian with its No. 1 Masten, wildcat six miles southwest of Lehman.

Last report had it below 6,540 feet, penetrating lime. Location is 660 feet from north and west lines of labor 18, league 135, Armstrong CSL survey.
