no other low-priced car. And that's true whether you're driving a Ford V-8 or "Six". But this highstepper is a low spender when it comes to costs. You can own a V-8, for example, for hundreds less than most "Sixes"-and a Ford "Six" for even less.

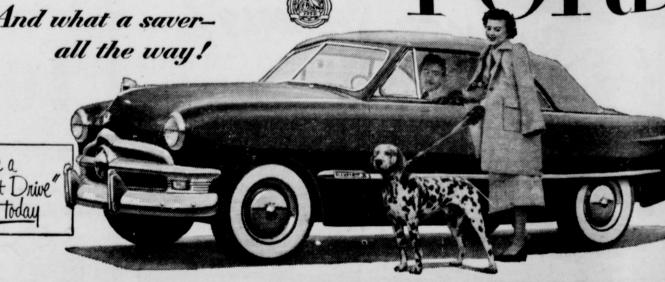

What a stopper!

This '50 Ford actually helps you apply the brakes. They're 35% easier-acting King-Size Brakes that use car momentum to help you stop. Like Ford's extra-rugged "Lifeguard" Body, they give you the kind of protection you'd expect only of costliest cars. And for added safety and comfort, you ride low and level in the "Mid Ship" section of the car, between the wheels-not over them. You're cradled in comfort on "Hydra-Coil" front springs and "Para-Flex" rear springs that give a road-hugging smoothness truly amazing.

What a looker!

Yes, again in '50, Ford received the Fashion Academy Gold Medal as "Fashion Car of the Year." And Fords stay good looking because their baked-on finish is "made to live outdoors." That means high resale value which, together with Ford's low running costs, puts Ford further out front as America's

Reynolds Drops 3rd Straight Decision To Maple Sluggers

Maple's heavy hitting softball nine pushed the fast fading Reynolds Tiremen a little lower in the team standings Thursday night with a 13 to 3 whalloping. Guided to the victory by the steady four hit pitching of Bill Sowder, the Maple men pounded two Reynolds hurlers for 12 hits including a pair of doubles. They used to good advantage 6 Reynolds errors that gave them 7 unearned runs.

Reynolds found the slants of Bill Sowder extremely puzzling and no batter collected more than one hit. Garland Beard's home run was the heaviest blow of the tilt.

Dear Mrs. England: I read with interest the Morton Tribune. Your article about the M. D. Anderson Cancer and issue interested me to look up Clive Howard's article on that subject in the Woman's Home Companion for June.

In Fort Worth we have an alert group of doctors who are very interested in keeping abreast of the latest developments in the diagnosis and treatment of cancer in order to provide for our patients the best possible care. We have the greatest respect for the M. D. Anderson Hospital and for the good work it is doing. We feel, however, that there are several points in Clive Howard's article that tend to create the wrong impression.

The article implies that patients suffering from cancer cannot be treated adequately except by cancer specialists in a cancer center. There are only about ten of those centers in the country. The truth is that any good general hospital in any of our communities is fully equipped to diagnose and treat

It implies also that few sureons and x-ray specialists and pathologists outside of these few cancer centers are competent to recognize or to operate on or to reat the more complicated cases of cancer. In reality there are many surgeons and radiologists in private practice throughout the country who are treating cancer every bit as well as it can be treated anywhere in the world. It is important for the public to know that first class treatment is available close by and not in

Take Your Choice

Sitting around last Friday evening, the talk turned to the best way of getting to sleep when it seems you just can't. "The way I always do," says Sandy Johnson, "is to breathe deep and make believe I weigh a ton."

"Just throw away the pillow-it works every time," says Buzz Ellis. When counting sheep came up, right away was the question: What kind of sheep?

From where I sit, you could argue 'til Doomsday and never get complete agreement on a lot of things. Now, take me. I'm all for

having a glass of beer or ale on occasion. Your "sociable beverage" may be a "Coke"-or buttermilk or maybe a cup of hot coffee.

But enjoying our preferences is a right in this country and each of us is entitled to his own. The important thing is to respect that right in the true democratic spirit of understanding! As a matter of fact, what a tiresome old world this would be if we all did have the same likes and dislikes!
