Mrs. Lessie Bagley Mrs. Helen Kennedy and Mrs. Frank Peters.

Improvement to the school groands was continued when the Board voted to put a new roof on the junior high building, giving the contract to Jim Setser of Levelland; to refinish the gym floor on account of damage suffered during recent rains through a leak in the roof: and adding bleachers on the east side of the football field to accomodate 360 people.

During the summer a new manual training building was constructed, the junior high building and bus sheds were painted, and improvements were made to teacherages on the school ground s. New furniture has been added to four classrooms of the first and second grades, a new school station wagon and two new school buses were

August 29 has been set as the pening day and by that time the school grounds and buildings will be nea and ready.

The first general faculty meeting will be called for Friday morning August 26, 7:30 A.M. in the school cafeteria

As usual, the faculty meeting is arrangements for the opening day

School will begin on Monday August 29, with a general assembly in the high school auditorium to be on the decrease. at 9:00 A. M. At 9:30 the students will go to their varjous sections for enrollment during the morning, and regular classes will be held in the afternoon. The cafeteria will be open Monday. Students will be expected to come prepared to make a full days school

Superintendent Noah Cunningham reeased the following statement as the school year was about

to get underway: "In behalf of the school board and myself as superintendent of schools, we wish to express thanks second Repairman to the patrons of the Whiteface school district for the splendid cooperation given us during past ch of Lubbock, is the that that type of continued coopert in a revival series which ation will be appreciated by all & at the Maple Bap- it will help us to realize the sucand continues through cess of another good school year. Fair Rules Are Set Out

In Catalogue As plans for the Cochran County Fair moved into high gear this week with the closing of the rodeo, Elwood Harris, Fair director, began to distribute 600 mimeographed booklets containing the rules local appication for the assistant and regulations of the judging in

various business establishments in town so that anyone desiring to or in the subject he would have to check on any of the regulations,

Meanwhile Jaycees Bill Glassare going to want a booth at the midway. Each concession will be booked at the rate of \$15. The orriginal plans were depending on

Among the other business which toward the support of the show. the board took care of was the The Boy Scouts and the Camp redesignating of the First State Fire girls will both have duties at the Fair. The Scouts dressed in a service for the comin gyear with run errands or help out as needed, hoping to make enough money in tips to help their organization.

The Camp Fires, and their advis ors will run a nursery and will set an hourly fee forbaby setting, according to Mrs. M. C. Ledbetter, one of the advisors.

Most of the action this week is directed at two very important phases of Fair work. Publeity in the

Strict Tests Through Every Process Assure Safety of Salk Polio Vaccine

For the first time in history, a vaccine is protecting millions of human beings from paralytic polio. While the Salk vaccine will not work in every case, American children are being safeguarded against the dread disease, with no more risk than they would take in a vaccination against smallpox or a typhoid shot. The Salk vaccine must pass elaborate tests under the watchful eye of a government inspector at every stage of production. Then the final packaged vaccine is approved by the U.S. Public Health Service for distribution. Here are shown a few of the steps that assure American parents their children are being given a safe vaccine.

This technician is filtering dead cells and all other foreign matter from polio virus after it has grown on animal tissue in glass containers.

Virus is "cooked" in tank with formaldehyde (from bottle) until it is rendered harmless after which it must pass exacting safety tests.

Animal tissue in tubes is inoculated with vaccine and let stand. If any live virus remains, it will multiply here, hence can be detected.

after contact with vaccine, to determine absence of live virus.

It's all over and it didn't hurt a bit! Salk cine makes this little girl safer now from alytic pollo. And her parents feel better
