New Faces Dot Area School Boards Following Elections Last Saturday

Morton was the exception, rather than the rule, Saturday when an unusually heavy number of voters turned out to re-elect O. B. (Buck) Huckabee and C. W. (Babe) Vandlandingham to the Morton Independent School Board.

A total of 610 persons braved the worst sandstorm seen here in a good many months to cast ballots in the Morton election. They gave incumbents Huckabee and Van, a total of 332 votes and 328 votes respectively to 279 votes for Lloyd Miller and 274 votes for Bill Wood.

That was nearly two thirds more than ever cast here before according to a quick check of recent year's voting. The previous high since 1948 was 374 ballots cast in 1954.

Only 78 of the 610 voted in the County Trustee race, held at the same place and time, on a separate ballot. They gave the only listed candidate, J. D. Hawthorne, also an incumbent, 74 votes.

But around the area it was a slightly different story in other Texas' Last Frontier school districts.

THREE WAY GETS THREE NEW SCHOOL TRUSTEES

THREE WAY — Local School patrons elected three new members to the Three Way school Board of Trustees in voting Saturday at Three Way.

With one of the largest tickets of candidates in the area, Three Way voters gave the majority of approval to George Tyson, Jack Ferguson and A. G. Taylor.

The voting was exceptionally heavy with 60 persons casting ballots in the small district. The total vote also was well split up. Ferguson got 29 votes to poll the majority vote by one over Taylor and Tyson who each drew 28 votes. Next in line was Pollard with 25, W. L. Welch, 18; Horace Hutton, 21; Tunnell, 17; and Tarleton, 11.

Terms expired for Carl Pollard.

WHITEFACE HAS NEW SCHOOL BOARD MEMBERS

SOIL SAMPLES

There is still time to take soil samples and send them to the soil testing laboratory at Texas A & M before most 1955 crops will be planted. If the samples are submitted in the very near future they can be processed and recommendations returned in time for use this spring, says W. F. Bennett, extension soil chemist.

Boxes for soil samples and the report sheet for each sample may be picked up at the County Agent's office.

PLANT CERTIFIED SEED

In your rush to get that crop in this spring, don't overlook the value of planting good seed. Lee Coffey, who is in charge of the foundation seed program at Texas A&M College, points out that Certified Seed are guaranteed for purity and have been tested for germination. And he says, it's just good insurance, to know what you are buying in the way of seed, and you can do that with Certified Seed.

So when you buy seed, check the tag on the bag for information that you want to know about the seed you buy. You can tell Certified Seed by the Blue Tag and the State of Texas seal on the bag.

RAT CONTROL

Farmers are still coming by the Agent's office requesting information on Rat control.

I would like to encourage that each neighborhood, community or a county campaign be conducted. It does very little good for one farmer to control rats and his neighbors to not control.

Non-Chaudant poison bait can be purchased at the Court House. This bait was purchased from the Rodent Control Service. It should be put around several places on the farm. Preferable in 1/2 to 2 round bags. Would suggest you use paper bags to put the bait in and when it is placed in the barns and runways take a knife and slit the bag so some of the bait will run out on the floor. This way the rats will begin eating it immediately. If possible, place this bait where other animals will not have access to it. Change the bait weekly and put out new bait in new bags following the same procedure.

The bait is non-poisonous to cats and dogs but will cause internal hemorrhaging if eaten regularly for a period of 4 to 6 days. This bait is a slow killer and rats and mice must eat it 4 to 6 days before it will cause internal hemorrhaging and they will bleed to death.

I suggest that each farmer purchase from 25 to 30 pounds of bait and put it out from 5 to 10 lbs. at each time. Repeat this weekly until the poison has been out 3 weeks on each farm.

The guide analysis the Plains cotton situation and sets forth steps to help producers in the production of higher quality cotton that has more uniformity and good character and in the marketing of such quality cotton for greater profit.

"For many years the personnel of the Lubbock Experiment Station have worked on problems to give better quality cotton. However, sometimes these farming tips and suggestions are not as widely publicized as they might be and too many farmers do not know of their importance. In our educational program we hope to spread this type of information throughout the area and help our farmers in producing better quality cotton." W. C. Fostenberry, PCG president explained.

Directors of the PCG approved the educational and promotional program at the last Board meeting and appropriated necessary funds to carry out such a program.

By cooperating with the Extension Service personnel and members of other organizations we hope to eliminate duplication of effort and help one another in an overall educational program. George W. Pfeifferberger, executive vice president of the PCG, said.

W. H. Jones, District Extension Service Agent, Lubbock, pointed out that production practices in general govern the quality and yield of cotton. Processing procedures are problems of the farmer in harvesting and of the ginner in ginning cotton.

"The cotton farmer has a greater opportunity to improve his production and harvesting practices than to better the ginning and marketing procedures," but an understanding of how cotton is processed and marketed may enable him to realize more net return from his investment and labor," Jones said. Earl Hobbs, New Deal, president of the Plains Ginner's Assn., sat in on several planning sessions and urged the cooperation of ginner with the farmers in this united effort to raise the quality of Plains cotton.

The new cotton guide was printed by Texas A. & M. College and 50,000 copies are to be distributed to farmers and others in the area.

Eleven of the top cotton officials in this area and in Texas assisted in drafting the Cotton Guide and have approved the information it contains.

These include Charles Fisher, Don L. Jones, Dr. J. D. Billie, all of the Lubbock Experiment Station; Ernest Thaxton, formerly with the station here, now project

leader at a new experiment station at Pecos; Bill Taylor, Leveland, Hockley County Agent; Bill Kimbrough, Littlefield, Lamb County Agent; Ollie Limer, Hale County Agent; Lee McLeroy, Lubbock County Agent; John Box and Fred Elliott, both of the Extension Service, College Station; Dr. Tom Richmond, who has charge of cotton research at College Station; Dave Sherrill, District Extension Service of Lubbock; Jones and Pfeifferberger.

The guide was edited by Conrad L. Lohoefer, Director of Public Relations for the PCG, and Tad Moses of the Extension Service information office, College Station.

Copies of the guide will be available from the Plains Cotton Growers, Inc., office, 220 Lubbock National Bldg., Lubbock, or any County Agent.

Hereford, Tex., Man Reports— 2 Bale Per Acre Cotton Using Phillips 66 Ammonia

F. Martin, who farms 1,720 acres near Hereford, Tex., says: "I put down Phillips 66 ammonia pre-plant on my irrigated cotton and made 2 bales to the acre. I also used Phillips 66 Agricultural Ammonia on my wheat and maize and with good results."

Other Southwestern farmers have discovered that 82% nitrogen from top quality Phillips 66 Agricultural Ammonia helps them get more profit per acre through higher yields. They get more cotton that classes higher at the gin. Yields of sorghum grain and ensilage are increased. More marketable vegetables are harvested. Profits in wheat are increased through better forage and higher yields of grain.

Phillips 66 Agricultural Ammonia contains 82% nitrogen and gives you more nitrogen per dollar than any other form of commercial fertilizer available.

SOIL CONSERVATION DISTRICT NEWS

OUR SOIL ★ OUR STRENGTH

Several Cooperatives with the Cochran Soil Conservation District have already made preparations for planting windbreaks around their farmsteads this year. A good windbreak is very beneficial in reducing wind velocity and damage from blowing sand around the farmstead, barn and feed lots. A well planned windbreak will also add to the beauty of a homestead.

Observation and experience indicates that windbreak plantings are not as successful on dryland as they are where they can be supplemented with irrigation water. Where extra water is available, however, a very effective windbreak can be grown.

For best protection around a farmstead, trees should be planted at least 100 feet and not more than 200 feet from buildings.

It is very important that trees be spread properly. Trees in a one-row windbreak should not be spaced more than 8 feet apart. Trees in a two row windbreak should not exceed 12 feet spacing in the row within of more than 36 feet spacing between the two rows. The two rows should be staggered.

Trees coming out of greenhouses should be handled very carefully before planting. It is very easy to cause injury to a small tree such as Arizona cypress before or during the process of planting. Before trees are planted they should be kept in the shade and out of the wind. Small trees should be kept watered by sprinkling. On hot days the trees may require 2 or 3 waterings daily while they are still in pots. After the

small trees are set out, they should be protected from the wind by placing a single or board by the tree. Cans with the bottom cut out are not recommended for protection because of the heat reflected on hot days.

Mr. Farmer... The New Plains Cotton Guide

Recommended By

Plains Cotton Growers Inc., Agricultural Experiment Station & Extension Service

CAN MAKE YOU MONEY WITH HIGHER QUALITY COTTON IN 1958

Production practices govern quality and yield. Do your best to see that your land preparation is adequate. Check your soil fertility needs now so that maximum production of quality cotton will not be hampered by lack of nitrogen, phosphorus, potassium or organic matter. Sub soil moisture may be adequate — but check to be sure.

Planting time is almost here. Optimum planting dates on the High Plains are May 5-20. Later planting usually results in lower quality. Before planting be sure the minimum soil temperature averages 60 degrees for 10 days at an 8-inch depth from the top of the bed. Use delinted, treated seed and check for germination. A uniform stand of approximately four stalks per foot in 40-inch rows is recommended. The method of harvest to be used should help determine the variety planted.

Johnny Hawkins Finally Receives "Walking Papers" from Local Hospital
 One of Cochran County Hospital's longest residents, Johnny Hawkins, a fire on the J. D. Thomas place early in December, went home to Muleshoe where his family awaits. Johnny was burned so extensively, that doctors almost gave up hope for him when he was brought in. He was severely burned from the waist down and Dr. Dan Brown and Dr. Bill Lee spent several long sessions in skin grafting.

The treatment and repair work on Johnny, who aroused the respect of everyone around the hospital for his courage, was far more extensive than is usually undertaken in a smaller hospital. Two pieces of equipment were added just to enable doctors to better treat Johnny.
 It'll be several months before he can go back to any kind of work, but Johnny is walking now and no one around the hospital who has seen him say they never expected to see him walk again.

CANCER —

(continued from page one)

8:00 p.m. meeting Monday night in the Activities Building to set the final plans for this House-to-House drive.

S. M. Monroe was named treasurer of the drive at the organizational meeting held on Friday, March 28th. Mrs. Kenneth Watts was named secretary. Nathan Tubbs of Whiteface and J. E. Roane of Bledsoe will be in charge of the drive for these communities.

By Friday of last week the fund reported \$145 in the till.

Roy Hickman and Willard Cox are on the solicitation committee to canvas the merchants for donations.

Not is all the drive concentrated on the one effort next Tuesday night. Films have now arrived and are available for showing to any clubs or groups for the next three weeks. If you would like to have them shown, please contact Mrs. Denny or Dr. Dan Brown or Dr. Bill Lee. While the films are in town, this is a good time to have them shown.

Another phase of the program is for clubs to pass out literature on Cancer, at every activity in the County Activity Building during the month of April.

The Jaycette had that task for this week through next Monday night; the Lions have it the week of April 15 through 21 and the YM Study club has it the week of Apr. 22nd through 28th.

The Morton Student Council had the job of covering the town with posters, etc., advertising the Cancer drive.

Some of the clubs and organizations represented at the March 28 meeting were: The Garden Club, the Young Matrons, the Jaycees, the Jaycettes, the Lions Club, the Student Council and the Town and Country Study Club.

Any group interested in helping with Tuesdays House - to - House campaign should contact Mrs. Lee or be sure to attend the Monday night meeting.

The slogan for this year's cancer drive is "Fight Cancer With A Check-up and A Check."
