HAIL DAMAGES CROPS ON EAST COUNTY LINE; BUT IN MOST PARTS RAINS PROVE BENEFICIAL

Cochran County got its first dip of bad hail, since the "replanting" by some farmers in the northeast sector of the county, as heavy hail raked the eastern border of Cochran County Monday night.

James Betts saw his crop wiped out, E. J. French suffered extensive damage, Willie Taylor suffered heavy losses on one labor of land in the same area (not on his home place), and a few others received damages.

According to the official weather gauge at the Soil Conservation Office, Friday's rain was measured at only .05 but the rain Saturday, early in the morning and again in the evening, deposited 1.02 inches of water.

Sunday .06 of an inch of rain was recorded and on Tuesday the official gauging was .60 of an inch. Through all the rains only light hail was received here, while nearby Hockley, Lamb, Lubbock and Hale Counties received bad crop damage due to hail and heavy rains.

There'll Be Some Changes Next Year In Election Procedure for Texans

Came next election year things will be different in the State of Texas. The Legislature has passed, and the Governor has signed, a bill which will be law moving the primary elections (Democratic and otherwise) and conventions from July and August to May and June.

Convention, according to the June Texas Democratic Newsletter. Another change bases all Convention delegation strengths on the votes for Governor in the preceding presidential election, but this provision isn't effective until 1962.

Something else new, a person's "ticket" for admission into next spring's Precinct Conventions will be a stamped poll receipt, or a certificate showing participation in the primary.

Right Candidate - But Wrong Employer Listed

The Morton Tribune owes an apology to David Rozell for having him associated with the wrong business last week in the sidewalk news story.

Phone Service Being Studied

Paul Farrar, Dist. Mgr. for General Telephone Company of the Southwest, was in Morton Friday, checking on improvements in the phone service. He said he had a few reports of poor service since the last meeting here. He said checks were being made of circuits and operators to see if there was any bottleneck in service which could be eliminated.

Industrial Page Begins This Week

You'll find a new advertising feature on page eight of this publication of the Morton Tribune. The page was developed by Wendell Holman, who was graduated from Morton High School this year, and is now associated with the advertising department of the Tribune.

4TH OF JULY HOLIDAY WILL BE OBSERVED BY MOST MERCHANTS

A poll of Morton merchants this week revealed only two grocery stores and three service stations planning to be open for business in Morton, Saturday, July 4th. Of more than 30 merchants polled by the Tribune, the overwhelming majority plan to take a holiday observance of the "4th." The cafes were not included among the businesses polled.

Father's Rites At Denver City, Monday, 3 p.m.

Funeral services were held at the First Baptist Church at 3 p.m., Monday, in Denver City, for D. T. Cox, 55, Denver City resident and father of Mrs. Francis Buchanan of Whiteface.

To Discontinue Scottie Stamps

"We will discontinue giving and redeeming Scottie Stamps after July 1," Mrs. Truman Anglin of the Ideal Gift Shop announced this week.

Optometrist to Be Out of Office

Dr. Elwyn E. Crume announced this week, he will be out of his office from July 2nd through July 14th pulling a summer tour of duty in the armed services.

OIL TAX HEARING FRIDAY

Perhaps the most important meeting of County Commissioners and oil company representatives is to be held here Friday as the County informs the oil firms what taxes are to be assessed for the year 1960.

The hearing with oil company tax men and the County's Oil Tax Evaluation Engineers, an annual affair, has taken on added importance this year with the fact that the county's finances are in bad shape and more taxes are going to have to be collected. The Court, as a tax equalization board, has recently completed a tax equalization drive, aimed at equalizing the taxes on oil property with that of other property.

Friday's all-day session. They have not released any information on their findings. If oil companies should protest payment of taxes, Friday, the resultant court action could put the county in a severe financial strain.

Washington Rejects Telephone Contract

RODEO TICKET SALE UNDERWAY

Plans are really stirring on Texas' Last Frontier Rodeo, set for August 13, 14, and 15 in Morton. Tickets had hardly rolled off the presses this week than President Herb Hillman announced five firms had already agreed to sponsor a "queen" contestant who will vie for rodeo queen honors by selling advance tickets.

Gore Services In Curry County Tuesday

Funeral services for Charles Wesley Gore, 72, resident of Curry County for 42 years, were conducted at the First Church of the Nazarene in Clovis, Tuesday, at 2:30 p.m.

JOAN CONNIE REEVES TO WED JULY 3RD

GOODLAND (Sp.) — Mr. and Mrs. R. L. Reeves of Goodland announce the engagement of their daughter, Joan Connie to Carl A. Anderson of Las Cruces, N. M.

The wedding will take place on July 3rd at 8 p.m. in the First Methodist Church at Fortales, N. M.

Miss Reeves is employed by the Western Union Telegraph Company and her fiance is employed by Foremost Dairy.

All friends of the couple are invited to attend the ceremony.

SANDRA BROWN, J. W. ALLEN ARE MARRIED IN DOUBLE RING CEREMONY AT BLEDSOE

In a double-ring ceremony in the bride and Ralph Caslew, cousin of the bride, attending the bridegroom as best man was Donald Don Jacey Don Brown, also a cousin of the bride, served as groomsmen.

The bride is the daughter of Mr. and Mrs. Jean Brown, Route One, Crossroads, New Mexico and Mr. and Mrs. Jim Allen of Pecos, N. M. are the parents of the bridegroom.

Centering the altar for the ceremony was an archway decorated with large blue-satin bows and wedding bells. Palm foliage and three seven-branched candelabra formed the background. On either side of the kneeling bench stood large vases of white Pom-Poms, white stock, and white Baby's Breath intermingled with Palm foliage and tied with large blue-satin bows. The aisle was decorated on either side with three floor-length candelabra holding Palm foliage, Baby's Breath and blue-satin streamers.

For Kay Almsworth, organist, provided the wedding music. "Love You Truly" was sung by Robbie Jean Caslew. Miss Caslew also sang "The Lord's Prayer" as the couple knelt at the altar.

Maid of Honor, was Sue Brooks, with Penny V. Moore, niece of the bridegroom as bridesmaid. Miss Brooks wore a blue cotton sheath dress and carried a nosegay of white carnations. Miss Moore wore a blue cotton dress fashioned in a full skirt, and she also carried a nosegay of white carnations.

Candlelighters were Marvin Brown, brother of the bride, who wore a white jacket over black trousers, and Marilyn Brown, cousin of the bride, who wore a dress made of pink silk organza. She had a wristlet of white carnations.

Ring bearers were Kathy Brown, cousin of the bride, who wore a blue nylon sheer dress over taffeta, and a wristlet of white carnations, and Jimmy D. Moore, nephew of the bridegroom, who wore brown trousers with a contrasting striped jacket. The rings were carried on white satin pillows edged with lace. Ushers were Donald Brown, uncle of

the bride, who wore a ballerina length befitting gown of white lace and net over taffeta. The fitted lace bodice was styled with a round neckline, complimented with applied lace blouses centered with seed pearls. The well-covered buttons fastened the sleeves which ended in points at the wrists. Lace daisies were repeated in applied medallion on the full skirt of nylon net. Her finger-ring veil of nylon net was bordered in lace and fell from a tiara of sequins and seed pearls. Her only jewelry was a single strand of pearls. She carried a white Bible topped with a lovely bouquet of garlands and stephanotis with white satin streamers tied in love knots, and miniature hearts made of tiny seed pearls.

The bride observed the traditional custom. For something old and good luck, she wore a coin minted in the year of her birth. Her wedding ensemble was new. She carried a white lace handkerchief borrowed from her grandmother, and she wore a blue garter given to her by her Maid of Honor.

Mrs. Brown chose a navy blue lace dress with white accessories for her daughter's wedding. She wore a pink carnation corsage. The bridegroom's mother was dressed in a lime green orlon dress, with white accessories. Her corsage was of white carnations. Immediately following the ceremony, a reception was held in the home of the bride's parents. The guests were registered in the white bride's book.

Forming a background for the serving table were tall vases of white pom-poms, stock, and Baby's Breath, used in the altar setting. The table was laid with a pink lace tablecloth over pink linen. Crystal and silver appointments were used. The three-tiered white wedding cake was decorated with blue roses and wedding bells, and was topped with a miniature bride and bridegroom. Delicate white napkins were inscribed in silver with the names Sandra and J. W. After the first piece of wedding cake was cut

by the couple, it was served to Mrs. Donal Brown, aunt of the bride, John Moore, sister of the bridegroom, served the fruit from the crystal service.

As a going away ensemble the bride chose an off-white suit with white accessories. The corsage was the white taken from her bridal bouquet.

Both the bride and bridegroom attended Tatum School, graduating with the class of 1943. After their wedding trip to Idaho and the Carolinas, the couple are at home in Morton. The bridegroom is associated with his father who is a building contractor.

ATTENDED ARMY SCHOOL

Lt. Col. Homer Thompson, commandant of a Military Government Reserve School at Lubbock, recently attended GAMC training school at McDon, Ga.

Chevy Gives You Smarter Style Today...

Don't take it from us—take it from independent experts and from facts and figures that are now a matter of record. POPULAR SCIENCE sums up Chevy's unmistakably modern style this way: "The fact is, in its price class Chevy establishes a new high in daring styling . . ." This is one more reason your new Chevrolet will bring a higher allowance at trade-in time, as Chevy has over the years. A look at last year's used car prices shows Chevrolet averaged up to \$128 more than comparable models of the other leading low-priced two.

PLUS 5 MORE BIG BESTS OVER ANY OTHER CAR IN CHEVROLET'S FIELD!

Best Brakes. Chevy showed the best brakes of the leading low-priced three in repeated highway speed stopping tests conducted by NASCAR. * No wonder. Chevy's brakes, built for up to two-thirds longer lining life, are the biggest in its field.

Best Engine. Every motor magazine has given Chevy's passenger car and Corvete V8's unstinted praise. As SPORTS CARS ILLUSTRATED puts it: "Indeed, this device is surely the most wonderfully responsive engine available today at any price."

Best Economy. No doubt about this: a pair of Chevrolet sixes came in first and second in their class in this year's Mobilgas Economy Run—getting the best mileage of any full-size car.

Best Room. Dimensions reported to the Automobile Manufacturers Association make it clear. Chevy's front seat hip room is up to 5.9 inches wider than comparable cars.

Best Ride. No doubt about this. MOTOR TREND magazine sums it up this way: "... the smoothest, most quiet, softest riding car in its price class."

NO WONDER MORE PEOPLE ARE BUYING CHEVROLETS IN '59 THAN ANY OTHER CAR!

See your local authorized Chevrolet dealer for the best buy on the best seller!

SENATOR ☆☆☆ Yarborough's Report

The Atomic Energy Commission is, I believe, acting too hastily in licensing the dumping of radioactive waste in the Gulf of Mexico -- Texas own backyard.

And I understand several other dump sites in the Gulf are now being considered.

Scientists themselves disagree on the amount of radioactivity to which a human body can safely be exposed. Several scientists have said too much radiation affects not only people alive today but their descendants for 100 or 200 years to come.

The barrels in which the low-level radioactivity waste are to be dumped have an expected life

span of 10 years. So we can figure that at least by '69 the matter they contain will be released into the waters and into the Gulf Stream, which flows along the eastern coast of the United States, through the Grand Fishing Banks, and over to warm the beaches of Europe.

Scientists say that more and more of our future food supply will come from the sea. We in Texas know what wide-use is already being made of the Gulf for both business enterprises such as fishing, and for pleasure. The scientist agree that when radioactivity is free in the water, it tends to concentrate to a very

high degree in fish and marine plants.

The Texas State Senate, many non-profit organizations in Texas which are interested in fish and wildlife conservation, and other interested persons have written to me opposing polluting the Gulf with these radioactive waste.

The license is for two years. And a great deal of radioactive material -- low level or otherwise -- can be dumped into the Gulf in that period, no matter how small the amount at any one time.

Our bodies and everything around us receives radiation from a great many sources.

In consideration of the amounts of radiation to which we are already exposed, I feel the Atomic Energy Commission is acting too hastily in granting a license to dump more radioactivity into the Gulf.

I think the AEC should withhold granting this license until scientist have carefully explored every possibility which might someday cause us to regret this move.

Senator Clinton Anderson of New Mexico, the able chairman of the Joint Committee on Atomic Energy, has told me on the Senate floor, when I protested the AEC's licensing decision, his committee will take the matter up and hold hearings or conduct an investigation as soon as practicable.

THIS WEEK IN AUSTIN

In Texas drama of taxation, there is an unseen but very real character playing a very important role.

In addition to the cast of representatives, senators, conference committees, lobbyist and the "taxes back home," this new character comes dressed as "a new method of taxation" which many foresighted legislators predict will come in the near future.

Arguments thus far during the regular session and the first special session have been focused on selective taxes. Industrial groups, professional men and others affected by such taxes have raised loud, convincing objections at each tax proposal.

The Governor, Speaker of the House and Chairman of the Senate have all respectively declined to pinpoint that period ahead when Texas has no other choice but to depart from the present pattern of taxation.

There are many legislators here who believe it is time now to launch a broader field of taxation instead of continually increasing the load on selected industries and businesses.

However, there seems to be a slight possibility that such a broad base will be established this session, in spite of growing support of general sales tax programs and other base-broaden-

ing tax measures. The reason, of course, is because a majority of members came to the legislature pledged against a general sales tax. Their hands are tied. Hence, there have been frustrating delays in the tax business of the state.

Any tax bill that comes out of this legislature will not have settled differences in tax philosophy that have been generated here during the past six months of frustration. Meanwhile, the "new tax pattern in Texas" future is being developed through the arguments now going on here in Austin.

Legislature Gives Welcome to New Industry In State

AUSTIN June -- The Texas Legislature paused in its deliberations over sparing industry from undue taxation to welcome a brand new industry to the Lone Star State.

By action of Representative Max Smith of San Marcos, the senate adopted a resolution citing Luling's watermelon-on-a-stick confection plant now being readied for the 1959 melon crop.

"The North Star State of Minnesota," stated the resolution, "has made a great and lasting contribution to the Lone Star State of Texas, more particularly to the City of Luling, and to the watermelon growers."

"This has been made possible," it went on, "through the resourcefulness and inventiveness of one of its citizens, Mr. Leroy Nelson of Minneapolis, who has developed and patented a process of making pure frozen watermelon on a stick, known as MULL-O-NICE, there-

by preserving the delicacy for year-around pleasure for watermelon lovers everywhere."

Rep. Smith's resolution stated "this enterprise will stimulate the demand for the products of our tenacious watermelon growers whose sheer existence is so sensitive to the vicissitudes of supply and demand."

Highlights and Sidelights FROM YOUR State CAPITOL

AUSTIN TEX -- When tax bills would have required banks, oil and gas companies, insurance companies and others to turn over to the state any property belonging to persons who have been missing for more than seven years.

Bank lobbyist were blamed by Daniel for defeat of the bill. He said they must accept responsibility for the state's having to raise, through new taxes, the \$25,000,000 the bill would have produced.

Bankers have contended the escheat procedure would undermine depositor's confidence in the safety of their deposits.

Historically the state has issued licenses annually. There's now some thinking that a lot of the licenses could just as easily be issued permanently, subject to cancellation for cause. Fees would still be collected annually, but a lot of time and money possibly could be saved by not having to type out and mail a new document each year.

Named to a free conference committee to adjust differences were Sens. R. A. Wienert, Seguin; Dorsey Hardman, San Angelo; Charles F. Herring, Austin; Jimmy Phillips, Angleton; Bruce Reagan, Corpus Christi; Also Reps. V. L. Ramsey, Beckville; W. T. Oliver, Port Neches; Don Kennard, Fort Worth; Alonzo Jamison, Denton; George Cook, Odessa.

HOW THEY STACK -- These items were hit, in varying degrees, by the House and Senate bills that went to the conference committee.

CORPORATIONS -- The Senate, raise \$10,800,000 by hiking franchise tax from \$2.25 to \$2.75 per \$1,000 capitalization. The House, raise \$12,000,000 by a new two-factor tax on interstate corporations.

NATURAL GAS -- The Senate, raise \$8,000,000 by increasing the production tax to 5 per cent and adding a 5 per cent severance beneficiary tax.

MOTOR VEHICLE SALES -- Both houses agreed on increasing sales tax from 1.1 to 1.5 per cent to bring in an additional \$7,000,000 to \$8,000,000.

CIGARETTES -- Senate, raise \$31,000,000 by boosting tax three cents a pack. House, raise \$10,500,000 (estimated) by a one cent a pack increase.

UTILITIES -- Senate, increase the tax on water, gas and electric utilities by twenty per cent, for an estimated \$2,900,000. House, increase all other utilities to the telephone company rate of 2.3 per cent, for an estimated \$8,000,000.

ALCOHOLIC BEVERAGES -- Senate, increase liquor tax from \$1.40 to 1.65 a gallon, to raise \$2,000,000. House, increase it to \$2.25 a gallon for \$7,000,000.

Wine, Senate increased tax by 20 per cent, for \$201,000. The House doubled it for \$1,000,000.

The Senate also tripled fees for selling beer and wine, doubled permits for liquor selling, for an estimated \$1,600,000. The House bill does not include this.

TOBACCO PRODUCTS -- The Senate would tax such products, except snuff, by 12.5 per cent, to raise \$5,400,000. House tax is twice this.

SULPHUR -- The Senate voted to retain present rate. The House would reduce from \$1.40 to \$1.03 per ton. There is a disagreement as to whether production increase would offset the tax-increase in total revenue received.

THEATER ADMISSIONS -- Both, the Senate and the House lopped this by about \$129,000 a year.

SOUND EQUIPMENT -- The Senate added a 2.2 per cent sales tax on radios, televisions, high fi and stereophonic sets for an estimated \$32,000,000.

BOATS -- The Senate added a 1.5 per cent sales tax on boats and motors for an estimated \$5,000,000.

PROPERTY BILL NIXED -- For the second time this year, the House of Representatives has refused to sweep unclaimed property into the State Treasury.

Tie vote of 66-66 killed efforts in the special session. The vote that killed the bill earlier in the regular session was almost as close.

Gov. Price Daniel had urged the measure as a means of raising an estimated \$25,000,000 for the State's ailing general fund. It

Cards of Thanks
CARD OF THANKS
 We wish to express to all our neighbors and friends, the doctors and nurses, our sincere appreciation for all the kindnesses shown during the illness and passing of our beloved father, J. M. Waller. Especially do we extend our "thanks" to you who brought food, served it, and sent flowers.
 May God bless each of you.
 Mrs. J. M. Waller and Family 18-1tp

CARD OF THANKS
 I wish to thank all my friends and express my appreciation to those who were so thoughtful and sent cards, flowers and visited me during my illness and stay in the hospital.
 I shall never forget all of the kindnesses shown me.
 God bless each one of you.
 Tommye Hans 18-tfc

With Your... COUNTY AGENT
 By HOMER E. THOMPSON
 1959 COTTON CROP
COTTON PURCHASED BY CCC TO BE SOLD BY LOCAL SALES AGENCIES
 Choice "A" upland cotton purchased by CCC under its 1959 crop price support will be offered for sale by approved local sales agencies as well as by New Orleans Commodity Stabilization Service Commodity office. An agency must have had recent experience in merchandising cotton and must have entered into cotton sales agency agreement with CCC to be approved.
 Cotton will be sold by local sales agency at highest price offered, but in no event at less than 110 percent of choice "B" support price plus carrying charges. Carrying charges will begin at 10 points in October, 1959, and will increase 15 points per month through July, 1960. The 110 percent of choice "B" support rate will be applied to a particular quality and storage location of cotton being offered for sale.
THRIPS IN COTTON
 Thrips are continuing to take their toll of fruit damage in the young cotton. It won't be long until July 7 and early season control should be finished by or before that date. In other words by spraying 3 applications at weekly intervals will require two weeks time. During this period you should set your early cotton fruit. Let the control measures be dropped for a period of several weeks if possible after July 7; so the beneficial insects can build up. Do not apply late season control measures unless necessary.
 The first fruit will make your early cotton bolls. This will assure you of an early crop and make better quality cotton. Besides increasing your cotton yields, you should receive a better price by following this practice.
BEEF CATTLE PRODUCERS
 Here is a program for you to follow in the control of cattle grub. Some materials have systemic action while others do not. Only two compounds have systemic action. These are Trolene and Korlan. Ronnel is the accepted common name for Trolene and Korlan. It should be emphasized that the trade name Trolene refers to the purified grade of ronnel and may be administered as a bolus or drench for cattle grub control, and the trade name Korlan refers to the technical grade (not purified) of ronnel and may be used as a spray for control of certain external parasites and must not be given internally to animals.
 Both CO-RAL and RONNEL (Korlan) are formulated wettable powders. In mixing these chemicals with water the concentration should be figured on a weight basis.
 RONNEL (TROLENE) may be purchased as 40 percent concentration on a bolus. For cattle grub control on beef cattle, one 37.5 gram bolus per 300 pounds of body weight may be given with a balling gun or dissolved in water and used as a drench. Treatment should be made between May 1, and August 1. In other words, late spring or early summer. The animals

ON VACATION
 Mr. and Mrs. Burnie Haley and daughter of Morton are expected home this week from a short vacation in Central - West Texas. He is manager of the Wallace Theatre here.

NEW SALESMAN FOR AVALANCHE - JOURNALS
 As of July 1st, Roy Dean Hill is to become Morton agent for the Lubbock Avalanche-Journal, according to Winston Jerden, present agent.

MOVE TO LUBBOCK
 Mr. and Mrs. L. F. Russell have moved to Lubbock. "Snooky" is now selling insurance for a Lubbock firm, "Investor's Security."

RIGHT FAMILY - WRONG MEMBER IS LISTED AS SICK
 The Tribune erred last week in reporting that Ed Howell was in the Cochran County Hospital. It was Mrs. Ed Howell who was hospitalized.

RECOVERING
 Sam Proctor of Morton, who recently underwent surgery, is able to be up and around again.

Picnic Set for Area Ministers And Families
 Members of the area Ministerial Alliance and their families will meet Tuesday, July 7, in the Cochran County park. It was announced this week by Rev. H. T. Clarke, president of the group.
 The meeting has been called for 10 a.m.; election of officers is planned prior to the serving of a picnic lunch.
 At the last meeting of the group reports were that vacation Bible school attendances were generally up in area churches this year as compared to last year. Credit was given the parade sponsored by the Alliance.

Beck's '66' Gets Award for Driveway Service
 David Beck and Joe Encinas of Beck's 66 Service Station, Morton, Texas, recently received another \$50 award from Phillips Petroleum Company for giving perfect driveway service to a Phillips "Mystery Motorist." For the second time the award was made when the "Mystery Motorist" paid an unheralded visit to this Phillips 66 service station recently.

VACATIONING HERE

Eddie Julian of Cortez, Colo.

TRAVEL TO DALLAS

Rev. and Mrs. Hardgrove are in Dallas this week where their son will undergo minor surgery.

Local Girls Attend Hockley - Cochran FHA Meeting

Future Homemakers of America and their teachers from Hockley and Cochran Counties held a one-day workshop at Levelland, in the Women's Building of the Hockley County Fairgrounds, last week.

The girls studied 48-hour work in the afternoon following work on office qualifications in the morning. In the evening session, officers of the association conducted opening ceremonies and the 85 girls who attended heard short talks from Miss Kathy White and Mrs. Wilburn Talley.

Miss White, a Texas Tech student working with FHA groups this summer under a scholarship, spoke to the group on "What is FGS FHA?" Mrs. Talley talked to the girls on parliamentary procedure.

Every school in Hockley County and Morton, were represented. Linda Benham was Chairman of the group for the day and led the group interested in Presidents Qualifications.

Judy McCuiston led group discussion on what one must do to earn a State Degree of Achievement in FHA work.

Morton girls attending were: Judy McCuiston, Linda Benham, Sue Ramsey, Judy Huebner, Glenda Chessier, Viola Smith, Dorothy Blackstock, Myraene Hoffman, Shirley McMasler, LaVell Benham, a freshman Home Economics Student from Oklahoma State University, and Mrs. A. E. Sanders, local adviser.

In the last item on the agenda, the election of officers of the two county association was held with Martha Barker of Anton being named president.

Morton girls elected to office in club: Glenda Chessier, fifth vice-president; Linda Benham, secretary and Viola Smith, historian.

HOME FROM OKLAHOMA — Mr. and Mrs. J. L. Merrill returned this week from a visit with Mrs. Merrill's parents, Mr. and Mrs. F. N. Norris of Atoka Oklahoma, her sister, Mrs. R. E. Gruesser and family of Midwest City, Oklahoma, and her brother, F. G. Norris and family of Altus, Oklahoma.

retain more squares and blossoms.
Get larger bolls and increased yield on COTTON!

PX-1 SPECIAL-Z

FOLIAR NUTRIENT

The benefits derived from leaf feeding phosphorus, in the form of PX-1, have been thoroughly established. Now, to meet needs of many areas, a companion product has been developed which provides both phosphorus and zinc! It's called PX-1 Special-Z. It has been definitely determined that minute quantities of zinc are necessary to trigger certain growth processes, and in the development of normal growth regulating substances in any plant. Cotton growers, in particular, will find the use of PX-1 Special-Z beneficial, as many of the cotton growing regions of California, Arizona and the Southwest have soil conditions in which zinc is not available in sufficient quantities to promote optimum development of the cotton crop. Field tests in these areas have shown that PX-1 Special-Z, applied at the onset of the reproductive phase of the cotton plant aids in holding more squares, blossoms and bolls, resulting in decidedly increased yield!

TAKES PART IN RECENT OPERATION IN JAPANESE WATERS
JAPAN (FHTNC) — Marine Pfc. Leonard R. Newman, son of Mr. and Mrs. Lanzo T. Newman of Morton, Texas, serving on the staff of the Commander, Carrier Division One aboard the attack carrier USS Ranger, participating May 25-31 in Operation "Granite Creek" off the coast of Japan.

The operation involving units of the U. S. Seventh Fleet, was mainly an anti-submarine exercise designed to test the overall readiness of the fleet units.

VISIT HARRELLS
Mr. and Mrs. R. K. Hall of Oklahoma City, Okla., were visitors Saturday in the home of Rev. and Mrs. James E. Harrell, Morton. Hall is a cousin of Rev. Harrell.

Friendly Service, Quality Products
Beck's 66 Byword

Dave Beck, owner of "Beck's 66 Service" on South Main, Morton, believes that service, friendliness, and quality products are the best recommendations a merchant can have — and Beck offers just that.

"Beck's 66 Service" has been awarded two \$50 certificates, recently, given by the Phillips 66 Company for giving perfect drive-way service to a Phillips "mystery motorist." This attests to Dave's interest in the above mentioned theory.

Dave has lived in this area since 1947. He attended the Three Way schools, from which he graduated as valedictorian of the Class of 1951. In high school he lettered in basketball, boxing and track. He also won the championship in the Amherst 120 lb. class, Golden Gloves Boxing. He was "class favorite" and "best all around boy" in his senior year.

Dave attended Draughan's Business School at Lubbock in 1951 and 1952.

Prior to the opening of his "66 Service," Dave taught dealer development in a Phillips Petroleum school.

Dave opened his station on Nov. 9, 1957.

Dave and his wife, Betty, were married in 1952 and now have two children, Deborah Kay, 6, and Dennis Ray, 3.

Dave's favorite sports are basketball and swimming. His hobby is reading.

Dave, Joe Eneimas, and Shelby Chancey promise to give you the best service, the friendliest smile, and the finest quality product available at "Beck's 66 Service."

JAYCEES HEAR OF RODEO PLANS FROM DIRECTOR

The Morton Jaycees heard a report from Roy Gentry, one of the Last Frontier Rodeo Association Directors, as their program at the regular weekly luncheon meeting on Monday.

Gentry traced the plans as made for the 1959 Rodeo thus far and said other help will be needed to put on the three day show August 13, 14, and 15.

President John Barnes was on hand to conduct the meeting.

Brake, Front End, Is Specialty at P&B Automotive

Brake and front end service is a specialty at P&B Automotive, located on Southeast First Street, a half block southeast of the Cochran County square.

"Of course," the partners say, "we do all types of general auto repair."

The firm is owned and operated by W. G. Baker and Wayne M. (Tom) Rowden.

Prior to opening their own garage, Baker was a mechanic at Alsup Chevrolet for nine years, and Tom was associated with the Chevy firm as a mechanic, parts man, and service manager over a period of ten years.

Together they have racked up more than a quarter of a century of experience.

P & B Automotive was opened here, at the present location, by Baker and Parnell Sehon — that's where the "P" comes into the firm's name.

In 1957, Sehon sold his interest to Rowden and moved to Oklahoma and entered the grocery business there.

Mr. and Mrs. Baker (W.G. and Reba) have been married for 21 years. They have five children: Odell, Max, Ruth, Billy, and Gerald Wayne.

Three are married: Odell, who lives at Denver City; Max, at Lovington; and Mrs. Ruth (Baker) Poor, who lives at Snyder.

The Bakers moved to Morton first from Clarksville in 1943.

Mr. and Mrs. Rowden (Tom and Eva) moved to Morton from Brownfield in 1946. Married 13 years, they have three children: Jeanette, Rusty, and Susan.

As for hobbies, Baker says he enjoys fishing — especially in this kind of weather, while Tom indicates he had rather lean back in a soft chair and watch a baseball or football game.

One thing the partners agree on completely is service. They say, "the customer expects and should get, the best service available."

**EFFICIENT FEEDING
AND LIVESTOCK MANAGEMENT**

By Dr. Gustav Bohstedt
Emeritus Professor of Animal Husbandry
University of Wisconsin

Trust A Hog For Balancing His Ration

Pigs are the most food-wise animals on the farm. Hundreds of feeding tests in which pigs could select their feeds cafeteria style have shown that they pick a remarkably correct proportion of protein and carbohydrates. Give them access to, separately, ground limestone, steamed bone meal, and salt, and again these smart pigs, guided by a physiological hunger select about the right amount of each to avoid nutritional deficiencies.

What's more, a pig when self-fed, is not apt to suffer from founder, colic, or other digestive upsets. All this cannot be said with the same assurance of horses, sheep, or cattle.

But while a pig is a good nutritionist, he is not necessarily a good economist. By that is meant that if sugar tasted better to him than corn, he would pay no attention to the price but eat as he felt like doing. The same with dried skim milk as compared with tankage.

Also, it has been found that when having free access, along with corn, to straight soybean oil meal of the toasted or roasted kind, a pig will like it so much as to eat much more than is necessary to balance his ration.

So it has been found necessary to mix an inhibitor with the oil meal which at the same time will add essential nutrients to the ration as a whole. Thus ground limestone and a

suitable phosphate, also salt, serve this purpose. Usually trace mineralized salt (in case of special need, high-zinc trace mineralized salt) completes the necessary minerals. The entire mineral mixture may amount to five or six per cent of the oil meal.

Another helpful and even necessary ingredient where pigs are off pasture, is alfalfa meal, or finely ground lealess alfalfa hay, perhaps 15 to 20 per cent by weight mixed with the oil meal. This supplies carotene or provitamin-A, also other vitamins and nutritional principles that greatly improve the nutrition of the pig.

If this should be sun-cured hay, it will have the rickets preventing vitamin D. In any event, for indoor or dry-lot feeding it may be desirable or necessary to add from one to two pounds of irradiated yeast to a ton of the mineral-alfalfa meal fortified soybean oil meal that is to serve as a supplement to corn or other farm grain.

Modern hog rations also make use of antibiotics, more during early life of the pig than later. Manufacturers furnish their own directions as to dosage.

Question: Where cows are chewing boards and lick soil at this time of year, what does it indicate?

Answer: It may not prove anything but that they like a bit of variety in their diet after a long winter. But again it may mean that they crave certain minerals, whether phosphorus or cobalt, or salt. Hence it is good practice to provide bone meal or other phosphate, and trace mineral salt.

**1959 OFFICIAL TEXAS HIGHWAY MAP
NOW AVAILABLE FOR DISTRIBUTION**

AUSTIN, TEXAS MAY 19 — The new 1959 Official Highway Travel Map will be available for distribution Monday by the Texas Highway Department. Copies of the "travel encyclopedia" of Texas, as it has been called, may be obtained by writing the Texas Highway Department, Austin 14, or at the highway district offices and travel information bureaus. County tax offices have map cards available for requesting copies of the map.

The new map is the answer to today's demand for more and more travel information. The steady growth of Texas from a state with a population of slightly over seven million just ten years ago to its present population of more than nine million is reflected by the information appearing on the 1959 map.

Nine more cities and towns are shown than on last year's map, making a total of 1,821. The increased mileage in U. S., state and farm-to-market roads is much in evidence. The map reflects some 1,600 miles of multilane divided highway now completed in Texas, including the complete sections of the National System of Interstate and defense highways located in the state.

The map now shows approximately 61 major lakes and reservoirs, and includes countless rivers, creeks and streams. Roadside parks, long cherished as rest stops and picnic areas by Texans and tourists alike, now number 1,046 as compared to the 1,026 shown on last year's map.

City route maps are provided of the state's 12 largest cities: Amarillo, Austin, Beaumont, Corpus Christi, Dallas, El Paso, Fort Worth, Houston, Lubbock, San Antonio, Waco, and Wichita Falls.

The reverse side of the map, with a theme of "Texas, Land of Contrasts," reflects, in 20 full color pictures, some of the outstanding scenic, historical, and re-

creational attractions in Texas. A section entitled "Facts About Texas" gives facts and figures about Texas' natural resources, recreational opportunities, state and national parks, historic points of interest, flora, farming and ranching, terrain features and climate.

The Official Highway Travel Map is used by all governmental and state agencies in the state for determining high-way distances, mileage, zones and like information. The same map is equally as useful to tourist seeking roads leading to good times in Texas.

usually as useful to tourist seeking roads leading to good times in Texas.

2.25-Bale Cotton

James B. Cox, successful young Swisher County farmer, says: "By side dressing my cotton with 80 pounds of Phillips 66 Ammonia the latter part of June, we picked an average of 2 1/4 bales of lint per acre. "I also averaged 5200 pounds per acre of maize grain, after applying 130 pounds of Phillips 66 Ammonia. I am putting down 100 pounds of Phillips 66 Ammonia on my cotton this year, and 140 pounds on my maize."

acre, using Phillips 66 Ammonia. They get more cotton that classes higher at the gin... yields of sorghum grain or ensilage are increased... profits on wheat and small grains are increased through higher grain yields and improved forage... more marketable supplies are harvested. Phillips 66 Ammonia can be easily applied either by you or your distributor. See us today about Phillips 66 Agricultural Ammonia... it gives you more nitrogen per dollar than any other form of fertilizer—a full 17%.

**CLAY, SILT PARTICLES POSE MAJOR OBSTACLE TO PLANS
IN WET-WEATHER, ARTIFICIAL RECHARGE PROGRAM**

Lubbock, Tex. — A major problem in using wet-weather lake water for artificial recharge results from the high percentage of clay and silt particles suspended in the water. When raw lake water is drained into a well and subsequently into the underground aquifer, the coarse-grained suspended particles are filtered from the water by the sand and gravel but the fine-grained particles move with the water into the underground formations.

Periodic pumping of the recharge well for an hour during a recharge cycle recovers a large percentage of the coarse particles but only a small percentage of the fines. Consequently, it may be assumed that permanent clogging ultimately might be the outcome.

In an attempt to overcome this major recharge problem, the High Plains Underground Water Conservation District is presently conducting tests at several southern High Plains lakes to determine the practicability of various distribution methods used in introducing a flocculating chemical to the water in the lake before recharge. The chemical when properly mixed with the lake water causes the ever present suspended clay and silt particles to adhere to each other and the large masses drop to the lake bed. In a relatively brief time, normally about twenty-four to forty-eight hours, approximately 85 per cent to 90 per cent of the particles originally suspended in the water have combined and dropped to the bottom of the lake, leaving the water in a more desirable condition than it was originally for recharge into underground storage.

Methods of application that are being used to introduce the chemical to the lake water are:

1. Dusting the chemical onto the lake surface by air plane.
2. Dusting the chemical onto the lake surface, using a mechanical hand broadcast spreader, while walking in shallow water, and while riding in a boat.

Extensive experimentation has been carried into Castro County by the water district under the direction of W. L. Broadhurst, Chief Hydrologist. This work was centered on the Bill Sutton farm near Dimmit. The same flocculating chemical was used in these

tests except in solution. Although diluted to one-half per cent strength the solution was exceedingly thick like honey. The chemical was pumped in varying proportions to a point in the lake where the water entered a concrete pipeline and flowed into a large earthen settling pit. The chemical commingled with the lake water before reaching the pit; however, no flocculating action took place until the water reached the pit and slowed in velocity. From the pit, the water, relatively free from silt and clay, then moved on into the recharge well.

Continuous sampling of the raw and of the treated lake water at the Sutton lake was maintained to determine the results obtained through treatment.

Results from various methods of treatment together with the costs involved will be released by the Water District when all data has been compiled and analyzed.

Latest estimate of the world cotton crop for '58-'59 indicates a new production record... estimate places growth at 44.7 million bales (that's figured at 500 pounds gross)... this is 3.0 million bales greater than the preceding season and 1.2 million bales over the previous all-time record of '55-'56... two significant facts stand out: the cotton was grown on fewer acres and foreign production set a new high... the second time in two successive years... also, Communist countries can claim a large portion of the increased foreign production.

World acreage for the past season was nearly 80 million... this is down about 2.7 million from the previous record crop of '55-'56... of course, the U. S. acreage harvested was only 11.8 million... that is the smallest since 1876... but there were 11.5 million bales ginned in the U. S. ... this means a record yield of 466 pounds per

acre, as you have heard many times... world average was something over a half-bale per acre... total foreign production was 33.2 million bales on 67.9 million acres... both of these figures are new highs.

The U. S. Department of Agriculture reports that the domestic crop was "generally good"... figuring middling white at 100, the grade index for the 1958 crop was 95.5... the 1957 index was 91.7 and 1956 was 96.0... the USDA also announces that the average staple length of the upland cotton was a record 32.8 thirty-seconds inches (that's about 1-1/32)... cotton 29/32 and shorter was less than 5% of the crop... this is the smallest proportion the department knows about.

Exchange Data
The U. S. has agreed to exchange cotton data with other cotton countries through a study group that will meet regularly... move came when Latin American countries asked for it.

Exports
Exports seem to look good... new season registrations were topping 300,000 bales by the first of this month... seems to support belief that the eight cents subsidy will realize a fair share of the market... and the U. S. has never increased a subsidy once the Program has been announced... although the law does give the Secretary of Agriculture that power if he deems conditions warrant it.

ELEMENTS, ETC., COMBINE TO FORESTALL VACATION TRIP FOR THE DRENNANS

The "roof", figuratively speaking, and in actuality, "caved in" on the Harold Drennans this week, forcing postponement of their planned trip to Cleburne, San Antonio, Corpus Christi, etc.

But it took a chain of circumstances, not just one, to stop them from the trip to visit his parents at Cleburne.

For the past couple of weeks Harold was "standing - in" for County Treasurer, Bill Crone, as he took his wife on a trip to Washington, D. C. Harold and wife, meanwhile, were making plans for their trip.

Rains received here a couple of weeks ago, suddenly poured water into the home of the Drennans, damaging walls, carpet, etc. They contacted a roofing firm. Last week, the repairman came out, patched the roof, and once again, Harold made plans for the trip. After all, he still had had little over a week, before it was time to start.

Then came more rains -- a good test, Harold thought, -- to see how the roof holds out. It didn't. There were other holes in the flat-top roof, and Harold quickly sent out a call for a return visit by the repairman, and silently sighed in relief that the rainfall hadn't been as hard as previously.

He called his mother, told her plans had been changed, that it would be Wednesday of this week before they could make it -- had to wait for the roof repairman.

After a good visit, via telephone, he hung up the telephone and found that his wife had been trying to call him. "Sis has the measles," was her message.

So, used to the complications, Harold wrote "Mom" a note in which he figured up the amount of time it would take to get their girl over the measles, and add another period of time for little Danny to also catch 'em and get over them.

Still he maintained his good spirits Monday morning when he was casually asked if the roofers had arrived yet. He explained his predicament, and added that the roof repairs weren't expected that day.

Monday afternoon, and again Monday night, the floor of the sky opened up over Morton and the rains poured long and hard.

Somehow, the reporter hasn't had the heart yet to contact Harold and find out if they've given up their trip south. But if the roof hasn't fallen in yet for the Drennans, chances are it never will.

OUT OF HOSPITAL

Mrs. Tommye Hans was released from a Lubbock Hospital, Friday after a several day stay while receiving treatments for a back injury suffered some time ago.

WEEKEND AT CONCHAS DAM

Mr. and Mrs. J. R. Kuykendall and Mr. and Mrs. C. A. Moore and girls spent the weekend at Conchas Dam fishing.

TO SOUTH AMERICA

Mrs. Presley Sharp and children of Odessa left Saturday after spending three days with her parents Mr. and Mrs. Cecil Lindsey. Mrs. Sharp and children, Brenda and Allen, expect to leave Odessa about July 1 to join their husband and father, Presley Sharp in South America. Presley has been in South America since last November with an oil company crew.

BACK ON DUTY

City Clerk Joe Seagler was back on duty Friday after a short stay in the hospital.

Home Demonstration Agent

by Leila Petty

THRIPS ON ROSES

There are several species of thrips, which vary from yellow to dark brown or nearly black. Their feeding causes tips of leaves to wither, curl up and die, and failure of buds to open normally.

The injured buds and flowers of plants should be removed and burned. Re-infestations of thrips are common on flowering plants. Repeated applications of insecticides are often necessary. Chrysanthemums, asters, dahlias and other flowering plant may be infested with thrips.

Plants may be sprayed with DDT, Dieldrin, Lindane, or Toxaphene. For one gallon of DDT spray use 4 teaspoons of 25 percent emulsion concentrate or 2 teaspoons of 50 percent wettable powder to a gallon of water. Dilution charts for the other insecticides may be found in the "Texas Guide for Controlling Insects on Ornamental Plants" available from this office.

If dusting is preferred, use 5 percent DDT, 2 1/2 percent Dieldrin, 1 percent Lindane, or 10 percent Toxaphene.

TALENT SHOW

Plans are going forward for the Talent Show on Saturday evening, July 25, in the Auditorium of the County Activity Building. The show is being sponsored by the County Home Demonstration Council and will feature Bill Mack, Lubbock radio and T.V. star. First prize on the talent show will be an appearance on Mr. Mack's T. V. Show. Local merchants have donated other prizes for the talent winners.

Mrs. Edward Brownlow is chairman of the Show Committee. It will be necessary for those participating in the show to register with Mrs. Brownlow as soon as possible.

GIRLS' 4-H DRESS REVUE

The girls' 4-H Dress Revue will be Tuesday, July 21, in the County Auditorium. This is a change from the date first announced.

Girls will compete in the revue according to age groups. Entry prizes will be given all competing, and in addition the first place winner in the age 14 and over group will compete in the district contest, July 30 and 31. The state winner will receive a trip to 4-H Congress in Chicago.

This year the highest scoring girl under 14 years of age will also compete in the district contest. This is the first year the girls of this age have had the opportunity of being in a district contest.

COTTAGE CHEESE MAKES THRIFTY, ELEGANT DESSERT

Call it Dutch, call it baker's or call it pot. By any name, cottage cheese is still the same fine milk product it was in Colonial days.

Settlers from Holland and Ger-

many introduced the art of making cottage cheese to this country. Their skill for making and using "Smearcase" has been passed down from generation to generation.

Here's one of their recipes that has become famous. It's called Dutch cheese cake. It's an inexpensive, but elegant dessert, calling for 1 pound cottage cheese, 1/4 cup milk, 1-3 cup sugar, grated rind and juice of 1 lemon, 1/4 teaspoon salt, 1/2 cup chopped raisins, 3 eggs beaten, 2 tablespoons melted butter or oleo, and 1 pie crust.

Bake the crust in a deep pan until a delicate brown. While it's baking, press the cheese through a fine sieve. Add first the milk, then the sugar and salt and the raisins; next the beaten eggs, melted fat, lemon juice and grated rind.

Stir until mixed well. Fill the baked crust. Bake in a moderate oven until firm in the center -- about 15 or 20 minutes.

4-H DEMONSTRATIONS

Drewcilla Rawls, Mary Beth Glasscock, and Judy Reaves gave Dairy foods demonstrations in the Halfway Home Demonstration Club June 18. Drewcilla made a Banana Milk Shake and Judy made Hot Cheese sandwiches which were later served to the club members. Mary Beth gave an illustrated talk on the nutritional value of milk. The girls also led songs and games for recreation. The meeting was at the home of Mrs. Ross Reaves.

Drewcilla, Judy and Mary Beth are all members of the Bledsoe 4-H Club.

Juanice Skaggs, member of the Morton 4-H Club, made a Banana Milk Shake as part of the program in the Friendly Circle Home Demonstration Club at their meeting June 5. Mrs. J. W. Jeffcoat was hostess.

Kay King made Cream Cheese cake icing as her dairy foods demonstration for the Whiteface Home Demonstration Club on June 11. Mrs. Maude Lisenbee was hostess.

MRS. LEM CHESHER USES GARDEN FLOWERS IN RECENT ARRANGEMENT DEMONSTRATION

Mrs. Lem Chesher used garden flowers in a demonstration on "Flower Arrangements for the Home," Friday June 19. She did eight simple arrangements that any homemaker could follow in arranging flowers for her home using the common everyday flowers from the family flower garden.

Mrs. Chesher made eight arrangements. She used a low white rectangular bowl for an arrangement of gladiolus, a green round bowl for an arrangement of leaves, a low pillow vase for an arrangement of pink and blue larkspur and peace roses were arranged in a wine snifter, and a low white bowl was used in arranging a crescent of white daisies and broom. For her Christmas arrangement she chose juniper, a large red candle, and vari-colored Christmas balls.

The school cafeteria was the scene of the demonstration. Those

CONTINUE WORK ON CAMP SITE NEAR FLOYDADA

Members of the First Baptist Church, Morton, were continuing their work this week on their camp building at the Plains Baptist Assembly near Floydada.

Rev. Houston Walker, pastor, has announced the following schedules for camping: Baptist Brotherhood, June 29. Youth Camp, July 2-3. Family Camp, July 4. Girls 9 to 10 years, July 6-8. Girls 11 to 12 years, July 8-10. Intermediate girls, July 13-15. Intermediate boys, July 15-17. Boys 9 to 10 years, July 20-22. Boys 11 to 12 years, July 22-24. Music Camp, July 27-29.

NO. 175 TO THE QUALIFIED VOTERS OF MORTON, COCHRAN COUNTY, TEXAS

YOU are hereby notified that a special election held on Tuesday, May 26th, 1959, at which election the voters of Morton, Cochran County, Texas, by a majority vote adopted the Aldermanic form of government, thereby creating vacancies for three aldermen, for the unexpired terms, which will expire in 1960, when a general election will be held, in said city for the election of a new city government.

NOW THEREFORE, by virtue of the authority vested in me, by law, I, Roy Tarver, Jr., Mayor of the City of Morton, Cochran County, Texas, DO HEREBY call a special election in above said city, for Tuesday, JULY 14th, 1959, for the purpose of filling the offices of three aldermen for said City of Morton, Cochran County, Texas, for the terms of said offices which will expire at the next general election to be held in 1960.

The original of this notice shall be posted by the city marshal in a conspicuous place in the city hall where the city elections are held and a copy to be delivered to the Morton Tribune for four consecutive weeks, commencing on June 4th, 1959 and ending on Thursday, June 25th, 1959.

Roy Tarver, Jr. Mayor 14-4c
