THURSDAY, JULY 14, 1966

## COURT SETS AUG. 2 DATE

# Precinct Two petitions for liquor election

The 33-year-old struggle to determine the legality of beer sales in Precinct 2 of Cochran County may finally come to an end as the forces of the "wets" and the "drys" square off at the polls in a local option election August 2.

The election was ordered by members of the Cochran County Commissioners' Court meeting in the courthouse here Monday morning following the presentation of a petition to County Judge J. A. Love requesting the action.

Approximately 60 signatures representing one-fourth of the residents of Precinct 2 legally qualified to vote in the last election for governor were required on the document which calls for an election for or against the sale of beer for off-premise consumption only.

The court later reversed its decision and ruled that such sales were legal.

An opinion aimed at settling the issue was released by the state attorney general's office June 22, but this "clarifying" opinion was itself reversed eight days later by a second opinion from the attorney general's office declaring void all beer elections on a precinct basis prior to 1935.

# Okays cable TV franchise

The Morton City Council approved a franchise for television cable service to local residents at its regular meeting in City Hall Monday night.

Don Hancock of Alamogordo, N. M., brought the franchise request before members of the council, saying that service could begin on the new system within six months after an agreement had been reached with General Telephone for use of existing poles to carry the cable.

A cable franchise was granted by the council in 1964 to Neal Rose of Morton for a five year period. To date, Rose has not begun construction of a cable service.

Hancock explained that the proposed enterprise would represent a \$50,000 to \$100,000 investment in the area and would require the construction of a permanent office in the city staffed by two or three full-time personnel.

Approval of the venture by the council cleared the way for the use of poles along the city's streets and alleys, pending negotiations by Don Hancock and Associates with the telephone company.

## Elliott wins 4-H Club cotton prize

LARRY ELLIOTT

Larry Elliott, the 13-year-old son of Mr. and Mrs. D. B. Elliott of Morton, was presented a check for \$100 as second prize in the District 4-H Club Cotton Production Contest at an awards banquet at noon Wednesday at the Plains Co-operative Oil Mill in Lubbock.

Larry topped all but one entry in the annual contest sponsored by the Plains Co-Op Oil Mill which drew competition from 14 High Plains counties in both dry land and irrigated cotton divisions.

His winning crop yielded an average of 594.6 pounds of cotton per acre, falling short of the first place winner in his division by 36.2 pounds per acre.

The contest was open to 4-H'ers from nine to 14 years old. Under the rules, only five acres could be entered, and applicants were required to own at least half of the crop.

His winning crop yielded an average of 594.6 pounds of cotton per acre, falling short of the first place winner in his division by 36.2 pounds per acre.

Larry Hale, also of Cochran County, placed ninth in the irrigated cotton division, narrowly missing an award.

Elliott was accompanied to the banquet by his parents and County Agent Homer Thompson.

The proposed cable will carry as many as seven stations including telecasts, from Lubbock and Roswell, N.M., and possibly Midland, Odessa, and Amarillo. Contract terms also allow for the transmission of closed circuit programs, pay television programming, locally originated telecasts, and F.M. radio broadcasts.

Hancock estimated the monthly fee for the service to be about \$6 per month. Ten dollars is the maximum fee under the contract agreement.

He pointed out that no home antenna is needed with the system, since all the signals are transmitted from large receiving towers along a cable network directly to the television set of the subscriber.

Don Hancock and Associates own and operate a similar cable system in two New Mexico cities.

Jim Fowler, a representative from the General Telephone Company, reported to the council that long-discussed attempts by the company to initiate extended area service between the Morton and Bula telephone exchanges have apparently failed.

In other action, the council voted unanimously to void the penalty and interest charged to Mark Kennedy of Morton on 1956 taxes of \$24 on the grounds that, due to clerical error, he had failed to receive a statement of the original debt.

## ★ Legion plans

Members of the Jesse R. Bond American Legion Post in Morton are now accepting dues for their 1967 membership drive, adjutant Walter Sandefer announced.

Sandefer also disclosed school for county service officials to attend an instruction on provisions of the new "Cold War" G. I. Education Bill to be held in Lubbock Thursday, July 14, from 8 a.m. to 4 p.m.

## George assumes new JC office

State Representative Jesse T. George resigned his position as external state vice-president of the Jaycees to assume the post of internal state vice-president recently vacated by Bob Honts.

Installation ceremonies were conducted by State President Glen Reed of San Antonio at a Jaycee state officer's meeting in Lubbock Sunday.

Hont's resignation became effective the same day. He plans to take a city managership in White Settlement near Fort Worth.

George explained that his new duties would involve working with individual members of Jaycee chapters across the state on leadership training, club membership, keeping club records, and generally improving the efficiency of the clubs themselves.

His new job has already involved him in visits to three area clubs. George talked with Jaycees in Shamrock Monday night and plans to attend chapter meetings in Sudan Friday night and Brownfield next Monday night.

Members also voted to pay the bills for the preceding month.

List prices from local businesses for a tractor and loader to be purchased by the city were reviewed and a plan to purchase \$225 worth of new pipe for natural gas lines were discussed.

A proposal to send a city employee to a 16-week welding class at South Plains College in Levelland was briefly discussed, but no official action was taken.

One application for a position on the city police force was presented to the council by Police Chief Curtis Cloud, but filing of the post was delayed pending receipt of additional applications.

Lee Ray Davis, son of Mrs. Davis, and her nephew James Stewart of Dodge City, Kan., were also riding in the car. They were treated at the clinic for very minor injuries and released.

Investigating officers D. E. Kaykendal of the Levelland Dept. of Public Safety and T. A. Rowland of the Texas Highway Patrol here reported the mishap occurred at 12:15 p.m. when a blowout of the car's right rear tire apparently caused the driver to lose control. The car rolled over at least once on the dry, straight road.

Mrs. Duvak was enroute to Lubbock when the accident took place.

A mailman's best friend . . .

POSTMEN and dogs are ordinarily natural enemies, but to local letter carrier G. F. Cooper, Jr., the face of Butch, show above,

is one of the friendliest on his route. The faithful stray comes seemingly from out of nowhere to follow Cooper from door to door each day.

# Variety offered

It's like the lady said: "Isn't it a glorious feeling to be among people you know and trust!"

This was overheard when a Morton customer returned after a city shopping trip where she encountered the hustle and bustle and "Don't Care" attitude of big city clerks.

Recognition, fellowship and trust are basic needs, and you'll find these attributes in Morton.

You can shop here with confidence, with friends and neighbors to help you find exactly what you need at the price you want to pay.

What does Morton have to offer? Here's just a few advantages — doubtless you can think of many more:

Convenient shopping facilities, accessible to a large trade area. Comfortable shopping quarters, manned by courteous, efficient salespeople.

A large array of assorted fabrics from all over the world, styled

by the world's best designers. Haberdashers, ladies' ready-to-wear and children's departments to dress anybody for any occasion.

Experienced cosmetologists and expert hair stylists to care for the well-groomed woman.

Professional florists to assist you with your floral arrangements.

Skilled physicians and surgeons, fine hospital and clinic facilities and well stocked pharmacies to safeguard and maintain your health.

Supermarkets and neighborhood grocery stores stocked with foods that will satisfy any gourmet — and fit any budget.

The most modern machinery and gadgets that will save you both time and money in your farm and household duties.

parts, and skilled mechanics and lubricant technicians to service all makes and models.

Contractors and building supply people to erect and maintain any type of structure.

Furniture dealers and paint contractors who can satisfy every every homemaker's taste.

Recreational facilities to keep you entertained and amused.

All these above essentials can be found at everyday low prices from your friendly and dependable Morton merchants. Shop the stores displaying "Salute of Values" posters for all your family needs:

Forrest Lumber Co., Allsup-Reynolds, First State Bank, Truett's, Luper, Doss, Wigwam, Popular Store, New York Store, Jones Ford, Hanna's, St. Clairs, Ben Franklin, Flower & Gift Shop, Johnny's 66, Burkett, Seaney Food Store, Morton Drug, Connie's Gulf, White Auto, Morton Tribune.

ing the facts . . .

CHAMBER of commerce members huddle around a table as they study documents during a meeting of the Morton Chamber of Commerce here Monday morning, July 7, to determine ways and means of establishing a cotton spinning mill in Morton.

Standing, from left are Ray Wells, Carl Ray, Chamber President Joe Seagler, T. F. Lynch, Rusty Reeder, J. C. Reynolds, and Bud Thomas. Seated with Crumley are, from left, Jesse T. George, chamber manager and Gene Benham.

# Cochran County is likely site for cotton spinning mill, Chamber told

Members of the Texas Tech Chamber of Commerce here Monday morning, July 7, recommended a cotton spinning mill in Morton.

He estimated that a 30,000 square-foot building would be necessary to house the facility and recommended a metallic structure because of its adaptability to the humidity requirements of the mill and because of the speed with which it could be constructed.

Very interestingly, the mill was not to be a success here," he said at the outset of the two-hour session.

He also agreed to investigate markets for the proposed mill and look for a qualified superintendent to run it.

## Services held for W. E. Angley, long-time teacher, former sheriff

W. E. ANGLE

Funeral services for W. E. Angley, 71, pioneer teacher in the West Texas Plains and resident of Cochran County for the past 42 years, were held at 4 p.m. Monday in the First Baptist Church in Morton.

Rev. Fred Thomas, pastor of the church, officiated. Burial was in the Memorial Cemetery under the direction of Singleton Funeral Home.

Angley was dead on arrival at Morton Memorial Hospital at 6:30 p.m. Thursday, July 7.

See ANGLE, Page 2

See BABE RUTH, Page 2

**T**hru the telescope by Truck

Hottest topic in town right now is the weather. But Morton is fortunate to be located in the high plains area, where the humidity isn't usually so high. The entire nation is sweltering right now and some of the cities are reaching double digits now when they count how many consecutive days they have been 100 or more. Fans at Tuesday's All-Star baseball game in St. Louis dropped by the hundreds from heat prostration while we were in the middle 90's.

Tip Windom and Neal Rose said Tuesday afternoon they were going out east to collect some accounts. But this turns out to be their code phrase when they head for the golf course. Neal said the country club was doing nicely and reminded those who want to join that the deadline is July 20. After that time, the \$50 membership will be increased. Rose or any club director will be glad to explain the projects and fill out your application.

This is the All-Star baseball season for Little League and Babe Ruth League players. The Frontier Babe Ruth League, which includes teams from Morton, Sundown and Whiteface, will swing into action about 8 p.m. Monday, July 18, in Denver City. The Little Leaguers play their opening tournament tilt at Littlefield against Anton at 4 p.m. Thursday, July 21. The Babe Ruth players have two chances, as all of their tournaments are double-elimination affairs. But the Little Leaguers have just one chance, as all their play-off engagements are single eliminations. We hope both teams go far this year along the tournament trail.

This is the time for summer clearance sales. Minnie's is just finishing up her July sale, while Hanna's and St. Clair's begin theirs this week. There are also a lot of extra-special bargains to be found through the merchants advertising on the Salute to Valves pages.

The kids enrolled in this summer's recreation program are having a good time and learning the fine points of several sports. Ernest Chesher is director this summer and seems to be enjoying his coaching of the small fry.

Whiteface and the rest of Precinct Two apparently will have a go at approving the sale of beer in that part of Cochran County. The election was called this week for August 2, after the Commissioners' Court was petitioned. Perhaps this will be the last of several steps that have been taken since the Attorney General first ruled that Whiteface was "wet", then reversed this and declared it was "dry."

**AMARILLO DRAGWAY**  
AMARILLO, TEXAS 7 MILES SOUTH ON WASHINGTON. CHILDREN UNDER 12 ADMITTED FREE WHEN ACCOMPANIED BY ADULT

But this is typical of the South Plains area — either it's too wet or too dry most of the time.

There have been a large number of field hands drifting into the county during the past few days, but few of them are finding steady work. Some of them are doing some boring, but most of the weeding was done this year through a single application of chemicals.

Chamber manager Jesse T. George tells us that Cochran County can have a cotton spinning mill if it wants one. Financing will be the only problem, and not one to be taken lightly, but money should be available locally for a mill. There apparently has been some talk about a public bond issue election to finance the plant, but I don't believe this would be the proper route. It ought to be a private enterprise operation from start to finish.

Kenneth Wyatt, the new Methodist minister in Morton, was just a little "shook" last week when he wandered into Morton Drug. I was sitting in a booth with Dot Irwin, Gene Snyder and Margaret Haggard. I introduced Kenneth to the group. Gene Snyder, publisher of the Tribune, volunteered, "Yes, I live in Denver City and I've heard of you." Mrs. Haggard then added, "So have I, and I live in Houston." Taken aback, Kenneth finally said, "Come on now, even my reputation hasn't spread that fast!" Then Gene and Margaret confessed they were former Morton residents and members of the Methodist Church here. Kenneth still looked a little dubious when he left. Gene and Margaret both thought it was amusing.

A holiday atmosphere will be felt in Morton next week when the Retail Trade Committee of the Merleota Area Chamber of Commerce sponsors the Sunny Stafford Shows July 18-23. The last show was well-attended and this one should be equally as good.

One of the funniest stories I've heard lately is about a woman riding a commercial airline with her small baby. A drunk passenger staggers up the aisle, peers down and announces, "That's the ugliest baby I've ever seen." Furious, the woman calls a stewardess, says she's being insulted and watches while the stewardess gets the man seated in another part of the plane. Then the stewardess returns and smoothly announces to the woman, "That man won't bother you any more. And if you'll wait just a moment, I'll go hunt up a banana for your monkey!"

Air conditioning we do seek. Least temperature make us weak. For relief, homeward we go. Saggy we arrive, met with: "Today, the lawn you must mow!"

**Court**

from Page One

In other action, the court accepted a bid of \$27.50 from Walter Hutchins of Clovis, N.M., the highest of four bids received for a 1957 Ford tractor belonging to Precinct 4.

The commissioners also heard progress reports from Home Demonstration Agent Jennie Allen and County Agent Homer Thompson.

Thompson reported several demonstration projects with grain sorghums, cotton, seedling disease and external and internal parasite control in cattle now underway by various farmers and ranchers throughout the county. Miss Allen detailed recent programs sponsored by the office, including food classes, adult grooming classes, and the upcoming 4-H District II Electric Camp.

The commissioners recessed until next Monday at 10 a.m. when they plan to discuss a date for a road tax election.

Ready for inspection . . .

RANDY JONES, 13, sponsored by the Morton Tribune, sits in his first derby racer prior to an inspection of brakes and body work by judges in Lubbock Saturday, July 9. Cars will be returned to Lubbock next Saturday for final examination and kept locked in a warehouse with other entries till the day of the race. Randy is the son of Mr. and Mrs. J. P. Jones of Morton.

**July is Land Bank Month, saluting 626 area farmers with FLB loans**

For some 626 people who make their living from agriculture in Cochran, Hockley, Terry and Youkum Counties, July will be a month - long testimony to the fact that they — and most other farmers — have turned out to be good businessmen.

It will be "Land Bank Month", the 50th Anniversary of the Farm Loan Act which helped put farming on a business basis in the U.S. for the first time in history. Farmers at last were able to borrow money on reasonable terms and put it to work as a production tool.

Joe Breed, manager of the Federal Land Bank Association of Levelland, said that farmers at the turn of the century were regarded as poor business risks. "No one would lend them money to operate the way a businessman must if he is going to grow and contribute to his community," he said. "Interest rates for farmers were twice as high as for city businessmen, and the loans were for very short terms.

"Three Presidents — Theodore Roosevelt, Taft and Wilson — studied the problem, and finally the Farm Loan Act was signed by Woodrow Wilson on July 17, 1916. This Act created the Federal Land Bank System, through which the farmers could make long-term, low-cost real estate loans from their own organizations."

The Federal Land Bank Association of Levelland was created in 1933. It is one of seventy-three associations in the Federal Land Bank district of Houston which in turn is one of the 12 Federal Land Banks that serve the 50 states.

"Altogether," Breed said, "the Federal Land Bank System nationally has loaned its farmer-members more than \$12 billion. The Land Bank of Houston has loaned Texas farmers more than 1.1 billion dollars. Our own association has outstanding over \$6,000,000 in loans."

Not only have farmers proved to be outstandingly good loan risks — Land Bank foreclosures are almost unheard of today — but, given money to work with, they have proved to be productive geniuses of a quality rarely found anywhere in American business. Mr. Breed said, "There are half as many farmers today as there were 50 years ago, and they're feeding a population that has doubled in this century," he said. "They rank among the greatest users of technology the world has ever known. Anyone who doubts it should visit a modern farm today.

**Chamber**

from Page One

tect the future prosperity of the mill.

Crumley pointed out that the giant Eastern mills, constantly modernizing and expanding, may soon totally absorb the large market that now exists in that half of the country. Morton's nearness to the Western states, he said, would make competition improbable.

He also mentioned building a weaving and dyeing plant at some later date as another safeguard to the investment. The two facilities would make it possible to sell unfinished cloth — gray goods — directly to large industries.

Crumley eased the minds of some members present when he ruled out a railroad spur into the city as a necessity for profitable operation of the mill. The yarn could easily be trucked to the railroad line only nine miles away, he said.

His final recommendation to the group was that personnel be enrolled in the federal government's three-month training program in mill operation.

"Let's go first class on this thing and try to vote a million dollar bond," said Gene Benham, president of the First National Bank, after hearing Crumley's suggestions. "This is something that would help the entire area and put Morton back on the map. I'll go to bat to get something like this."

Others voiced similar opinions, observing that the money required would be a small price to pay to aid the area as a whole and keep the county from "dying on the vine."

The chamber authorized Crumley to seek out a qualified superintendent and to examine machinery for possible future purchase. It also moved to appoint a three-man committee to sound out local interest and support for the proposed project and locate possible construction sites.

The necessary arrangements for handling will be made by her. If anyone would like to make a memorial donation, please contact Mrs. Harris at 502 East Hayes.

**Ten for August draft call and 30 for pre-induction**

State draft boards will be called upon to furnish 1,585 men for the armed forces in September, Colonel Morris S. Schwartz, state Selective Service director, said Friday.

Colonel Schwartz also announced that the August quota for Texas had been increased from 1,636 to 1,837 and the July call from 1,284 to 1,381.

Local draft board officials headquartered in Muleshoe plan a July induction call for 10 men. Pre-induction physicals for 30 men are scheduled for August 3.

These monthly quotas compare with 878 for June, 1,927 for May, 979 for April, 1,068 for March, 1,372 for February and 1,475 for January.

The state director of Selective Service said that Texas local boards would probably be called upon to send between 4,000 and 5,000 men for pre-induction mental and physical examinations in Sep-

After the mishap . . .

TWO Morton residents were hospitalized in Levelland Thursday afternoon, July 7, when a fire blew out on this car in which they were riding, causing it to overturn on highway 116 five miles east of Levelland. Two passengers in the auto were treated for minor injuries and released.

**Rita Jean McMinn is a consolation winner in annual baking contest**

Rita Jean McMinn, a 14-year-old Morton High School freshman and daughter of Mrs. Mart Bass of Morton, has been judged a consolation prize winner in the annual Adams Extract Teenage Bake-Off. Her prize, consisting of a gift pack of Adams products, was won in competition with over 400 local contest winners from high schools across the state.

Rita Jean's winning recipe, an original creation, was prepared under the supervision of high school vocational home economics teacher Mrs. Murray Cronie and submitted to the Adams Company in Dallas for consideration in May. Rita Jean was the only entry from the local school.

Finals in the state-wide contest were held in Dallas June 27 and 28. Her recipe was the following:

- Jeanie's Corn and Rum Pie, number of servings — 8. 1 t. cornmeal 3/4 c. sugar 3/4 c. light corn syrup 2 eggs (slightly beaten) 1 t. Adams Vanilla 1/4 t. Adams Rum

- 1/2 t. Adams Butter Flavoring 1 t. vinegar 1 c. broken pecan meats 1/2 c. coconut 1/2 c. margarine (melted) 1 T. milk 4 T. flour Step 1. Beat eggs slightly. Step 2. Mix cornmeal and flour into sugar. Step 3. Add cornmeal and sugar mixture to eggs. Step 4. Add all other ingredients to egg and cornmeal mixture. Step 5. Pour into uncooked pastry shell and bake at 350 degrees for 40 to 45 minutes. Step 6. Cool and serve.

- Crisp Pastry 1/2 t. Adams butter flavoring 1 c. flour 1/3 c. shortening 4 T. water Step 1. Mix flour and shortening together until size of small pea. Step 2. Sprinkle water over mixture and work quickly to form smooth ball. Step 3. Roll to 1/4 inch thickness. Step 4. Shape to pie pan and flute edges. Step 5. Pour in mixture.

### ★ Swim club

A ladies' swimming club is being formed, Thursday night at 6:45 p.m. at the local pool. A minimum of 10 members are required but the membership is unlimited. Ladies of all ages, all sizes, and all shapes are invited to bring their suits and join the fun.

### Timing is crucial in irrigation and fertilizer uses

"Proper timing of irrigation in balance with the correct fertilizer level, appears to be one of the answers to maintaining and increasing income from grain sorghum with reduced amounts of irrigation water in the High and South Plains of Texas" according to James Valliant, Water Engineer at the High Plains Research Foundation. The more definite periods of moisture need are fairly easily seen at different stages of plant growth. They are pre-boot, (about 7 leaf-stage), boot, flower, milk and in some cases soft dough stage. The approximate twenty-day period beginning with pre-boot and ending with head emergence is the most critical growth stage, foundation officials report. During this period, the producer should watch soil moisture and signs of plant wilting, closely to determine when to irrigate. The flowering period is also of great importance.

The amount of fertilizer to be applied to grain sorghum is dependent upon the method of irrigation used. 40 to 80 pounds of nitrogen are usually sufficient when irrigating only twice during the summer. Three summer irrigations require 80 to 120 pounds of nitrogen per acre.

Phosphate showed response in the tests at the Foundation under high nitrogen and high irrigation. In rotation with cotton there is quite often a phosphate carry-over. Valliant stated that phosphate may be required on farms which have not had an application of phosphate during the past few years and do not have a residue build up.

Testing the needs for trace elements in the fertilization of grain sorghum are underway at the Foundation.

The Grain Sorghum Irrigation fertilizer test is designed to determine the combination of timing of irrigation and the fertilizer level that will produce the greatest net return and highest irrigation efficiency in grain sorghum production.

Yields have tended to be higher with three summer irrigations in the past years. However, when considering profit, the pre-plant, pre-boot and flower irrigation gave the greatest "practical efficiency" in

also contributing funds for the impartial well checks, according to Harbin. He expressed the hope the program results will cause a new determination on the part of the pump industry and the customer to work for the most efficient pump for the given job and, thereby, conserve water.

County Agent Homer Thompson estimated that farmers in Cochran County could save thousands of dollars if they would adopt this attitude. "Now," he pointed out, "most of them don't know what the efficiency of their well is, so they don't even know how much water they're putting out."

### Cotton conference . . .

AN INSPECTION team of cotton and fungicide specialists were on the farm of Earl Polvado north of Morton Tuesday afternoon to determine effects of a variety of fungicides and application procedures in combating wilt on the experimental cotton crop. Shown

above, from left, are Dr. Earl Minton, plant pathologist from the experimental research farm near Lubbock; Harry West and E. P. Broadus from the Niagara Chemical Division of the FMC Corp. of New York; and Cochran County Agent, Homer Thompson. TRIBPix

## Cotton specialist views results of testing plots

Seven men tramped through Earl Polvado's cotton field north of town Tuesday afternoon. Periodically, one of them would stoop down and pull a leaf from one of the young plants and occasionally uproot a plant entirely. Obviously, they were looking for trouble.

The leader of the group was Dr. Earl Minton, plant pathologist at the experimental research station in Lubbock, and the kind of trouble he was looking for was evidence of deadly fusarium and verticillium wilt on the cotton.

Polvado's field, like more than a dozen others across the state, is

the Foundation test. The test was conducted on the Triplett Research and Demonstration Farm of the High Plains Research Foundation which is eight miles west of Hale Center and five miles north of Cotton Center, Texas.

Complete details of the irrigation-fertilizer tests on grain sorghum are in report no. 165 of the 1965 research report of the High Plains Research Foundation. The tests were conducted by James Valliant, Water Engineer, Loyd Langford, Associate Agronomist and Dean Howard, Assistant Agronomist, respectively of the Foundation staff.

The Key family held their annual family reunion Sunday at the McKenzie Park in Lubbock. Those attending from Morton were: Mr. and Mrs. W. C. Key, their grandson, Ronnie Ailsup and his friend, Butch Davis; Mr. and Mrs. W. R. Key and daughter, Linda; Mr. and Mrs. Robbie Key and family; Mrs. A. S. Key and daughter, Cova; Mr. and Mrs. Wylie Hodge and family.

### ★ Church meet

The Levelland Deanery Council of Catholic Women's Board meeting will be held on Tuesday, July 19, at 10 a.m. in St. Ann's Parish Hall in Morton.

Mrs. Robert Greener, president, will preside. She will give a report on the DCCW board meeting that she attended in Amarillo.

Coanery officers, deanery chairmen, and parish presidents are invited.

Ladies of St. Ann's Alter Society will serve lunch.

## 100,000 in U.S. have active TB

One hundred thousand Americans are walking the streets today with active infectious tuberculosis who don't know they have it, says Today's Health, the magazine of the American Medical Association. By the time symptoms appear—fever, weight loss, coughing, and perhaps blood spitting—the disease has reached a point at which control is difficult. Some won't recover; 10,000 victims died from tuberculosis in a recent year, Today's Health reports.

Everyone is susceptible. TB is contracted from someone who has it, mainly by breathing air contaminated with TB germs. These are spread by coughing, sneezing, and spitting. Sometimes a person becomes infected when germs enter his mouth from contaminated fingers, food or eating utensils, or from kissing an infected person.

If active tuberculosis is diagnosed, your physician has a choice of a variety of drugs, such as streptomycin and isoniazid, which effectively suppress the germs while the body builds up its own immunity.

Children under five are a "high risk" group because of the frequent and close associations with their parents, relatives, household help and baby sitters, any of whom may be carriers.

Skin tests and x-rays are available free in most areas any time of the year. Local public health officers and the local chapters of the National Tuberculosis Association will direct you to TB detection centers in your area. The skin tests are simple and painless. If one of these indicates TB germs are present, it doesn't necessarily mean the germs are doing damage. It takes an x-ray and sputum test, along with blood and urine studies, to determine accurately whether the bacilli are active.

## PCG directors adopt new budget of \$231,750

Hickman, Plains Cotton Growers farm director for Cochran County, joined directors from other High Plains counties in voting a \$231,750 budget for the fiscal year at a PCG meeting Thursday night, June 30, in

the coming year will be derived from dues paid on the 1965 crop but noted that "the 1966 crop dues, from which the 1967-68 expenses will have to be paid, are almost certain to be down something like 20 percent due to the reduction in planted acreage this year."

Directors were also told that care was exercised in making research budget estimates to support only those projects which could not or would not be carried out without PCG funds.

research service and other activities aimed at improving production and increasing utilization of Plains cotton are top priority in next year's spending program. Items directly concerned with cotton growing and cotton utilization accounted for \$70,750, more than 30 percent of the total. They include production research with emphasis on cost reduction and yield improvement, \$36,250; utilization research in the form of fiber analysis and spinning tests, \$10,000; survey and reports on cotton qualities, \$4,000; non-cotton market development, \$1,000; and advertising of area cotton national and international publications, \$9,500.

Donald A. Johnson, executive vice president, stressed that the budget is also in line with the program of upgrading the cotton which High Plains counties grow and marketed.

He added that the budget reduction for the coming year does not mean a shortage of funds for the program.

"It is a matter of tightening the belt a little year to assure that the PCG program can be continued at a high level in the years immediately ahead when it looks like both production and PCG income will be reduced," Johnson explained that funds for

## Irrigation wells checked for accurate water output

Reports from the Soil Conservation Service clearly reveal that water is without a doubt one of the most vital factors in the economy of this entire region and that the available supply of the already scarce resource decreases in the area every year. But Albert Sechrist, research associate with the agricultural engineering department at Texas Tech estimates that most local farmers are wasting their water supply without even being aware of it.

The problem, he points out, often lies with the pump used to draw water from wells to the crops. His recent studies of the efficiency of wells in this area lead him to believe that many of them are operating at only about half the efficiency they should.

In an effort to prevent this vast misuse of machinery and water, Sechrist, and men like him, are conducting free efficiency checks on wells in the area. The three-year project, which covers Oklahoma, New Mexico and Texas, was financed by electric cooperative companies and other firms and individuals affected by the situation.

Results of the entire study are to be published upon completion of the present testing program sometime in the future.

The efficiency of a well is determined by calculating the amount of power required to run the pump and move the water to where it is needed in proportion to the amount of water that is obtained from the well. Sechrist noted that the process of calculating the efficiency varies with the type of pump used.

"In the case of a turbine pump he explained, "we measure the power input in terms of watt hours, volts, and amps and compare it with the number of gallons of water per minute the pump will put out."

The efficiency of a turbine pump should be approximately 70 percent, he said, but added that too often it was reduced to 30 percent due to improper pump design or deterioration of equipment.

Other measurements needed to determine if the proper design is being used are drawn down of the water level with the pump in operation, position of the water level when the pump is off, and several others.

"This program will give us the first information we have ever had from actual field test," said Joe Harbin, educational director for Bailey County Electric Cooperative, as he watched Sechrist at

## Rules simple on filing estate tax

What are the requirements for filing an estate tax return?

This question bothers many taxpayers, but the rules are fairly simple. Your administrator will have to file an estate tax return if the fair market value of your estate is \$60,000 or more on the date of your death. However, if there is a surviving spouse and the estate is community property, you do not have to file unless the estate exceeds \$120,000, since 50% of the community property belongs to the surviving spouse.

Getting the correct evaluation on your estate is important since this evaluation affects all future tax transactions on the property.

## Efficiency check . . .

ALBERT SECHRIST, research associate from Texas Tech, takes a reading of the amount of water being pumped from a well on the farm of E. C. Hale near Morton to help

determined the system's efficiency. Checks like this one are part of a three-year program to improve well operation and reduce water waste. TRIBPix

## Bledsoe church wedding scene for Miss Brown - Mr. Buchanan

Marilyn Brown became the bride of Larry Buchanan in a double ceremony read at 7 p.m. on June 25, at the First Baptist Church in Bledsoe. The bride is the daughter of Mr. and Mrs. Donal Brown of Crossroads, and groom's parents are Mr. and Mrs. C. E. Buchanan of Route 1, Morton.

Rev. C. R. Smelser officiated at the wedding. Vows were exchanged and a prelude of nuptial music accompanied Mrs. Edsel Brown as she sang "Whither Thou Goest" and "Wedding Prayer." The bride, given in marriage by her father, wore a floor length gown of white satin with a fitted bodice and petal point sleeves. The skirt and skirt were trimmed with French lace and accented with pearls. Her veil was of silk and was attached to a tiara of pearls. She carried a bouquet of pink roses encircled with feathered carnations and accented by pearls and white streamers.

Nancy Brown, sister of the bride, was maid of honor. Miss Edsel Buchanan, sister of the bride, was bridesmaid. They wore length dresses of pink linen accented with deeper pink roses and wore matching pill box hats with short veils. Each carried a long stemmed pink rose and silver streamers.

Mr. Buchanan, brother of the bride, was best man. Billy Byrd was groomsmen and ushers. Arnie Bailey and Milton Jones were bridesmaids.

After the ceremony, a reception was held in the home of Mr. and Mrs. J. M. Brown, grandparents of the bride.

The table was laid with a white cloth over pink. The wedding cake was three tiers and topped with pink roses and bride and groom. The bride's gift was used as a centerpiece. Crystal punch bowl, crystal canisters with pink tapers and a small mint dish accented the rest of the serving table.

Mrs. Alvonna Watson and Nelsonson presided at the reception.

The bride changed to a two-piece pink linen suit with white accessories.

The bride is a 1966 graduate of Bledsoe High School, and the groom is a graduate of Bledsoe High School. They are residing in Bledsoe for the summer. Both plan to attend South Plains Junior College in Levelland beginning with the fall semester.

Mrs. Larry Buchanan  
... nee Miss Marilyn Brown

## Carolyn Houston in Tech study group in Mexico

Carolyn Houston of Morton is among a group of 54 Texas Tech students who will spend the second summer term in Mexico studying the Spanish language, the history, literature and culture of Mexico.

Individual members of the party assembled Tuesday (July 12) in San Antonio, traveling from there by train to San Luis Potosi where headquarters for the field course will be set up under direction of Foreign Languages Department headed by Harley D. Oberhelman and Language Professor Dr. Scottie Mae Tucker.

The special course of study is designed to perfect the student's fluency in Spanish and to explore various phases of Hispanic and pre-Hispanic civilization. Dr. Oberhelman explained.

Class members will speak Spanish only during their stay in Mexico. They will be lodged in a hotel in San Luis Potosi and during the week will attend class, visit places of interest in and near the city and will be given an opportunity to attend operas, concerts, plays, lectures, exhibitions and bullfights.

Early in August they will visit Mexico City. They will return to Texas Aug. 20.

The field course, offered in alternate years by Tech, may be taken for six hours of advanced

undergraduate or graduate credit. This will be the 16th field course in a program inaugurated more than 30 years ago. Dr. Oberhelman noted, making it one of the oldest programs of its type in U.S. college curriculums.

## TOPS club has regular meeting

Members of the Lighter-Later TOPS Club met Friday, July 8, for their regular meeting. Mrs. Lee Sullivan and Mrs. Ray Bridges both lost 2 pounds to tie for the honor of being Queen of the week.

Mrs. Roy Davis presided over the business meeting in which Mrs. M. L. Abbe read the minutes. A By-Laws committee was elected with Mrs. Willard Henry, chairman, and being assisted by Mrs. Ray Bridges, Mrs. M. L. Abbe and Mrs. Roy Davis. Mrs. Courtney Sanders was elected to be the Program chairman, with the assistance of Mrs. Jesse Clayton, Mrs. Elra Oden, Mrs. Bobby Adams, and Mrs. Roy Davis.

All members are urged to create TOPS post cards, poems or songs to be used in the club.

A door prize will be given at the close of the next meeting. Members must be present to win; if their name is drawn and they haven't lost weight that week, they forfeit the gift.

Mrs. Lee Sullivan served refreshments to Mrs. E. R. Fincher, Mrs. Elra Oden, Mrs. Ray Bridges, Mrs. Roy Davis, Mrs. Roy Hill, Mrs. Courtney Sanders, Mrs. M. L. Abbe, and Mrs. Bobby Adams.

Visiting in the home of Mr. and Mrs. Roy Allsup were Mr. and Mrs. Ot Reed from Fresno, California and Mr. and Mrs. Lonnie Allsup from Clovis, N.M.

Visiting in the home of Mrs. A. S. Key is Mrs. Mildred Nash from Floyd, N.M., and Malcolm Key from Eastland, Texas.

MORTON TRIBUNE, THURSDAY, JULY 14, 1966

## Miss Linder will marry on Sept. 9

Mr. and Mrs. D. L. Linder of Route 1, Morton, announce the engagement and approaching marriage of their daughter, Brenda Diane, to Everett Roma Jones, Jr., son of Mr. and Mrs. Everett R. Jones of 704 E. Buchanan, Morton. The wedding date has been set for September 9th.

Miss Linder is a 1966 graduate of Whiteface High School. Mr. Jones is a 1964 graduate of Morton High School and attended Texas Tech.

MISS BRENDA DIANE LINDER

MISS LINDA GRUSENDORF

## Miss Grusendorf to wed July 29

Mr. and Mrs. Donald C. Grusendorf of Route 2, Morton, announce the approaching marriage of their daughter, Linda Alice, to Mr. Sammy Joe Nichols of Enochs. The wedding will be July 29 at 7:00 p.m. at the First Baptist Church of Enochs.

All friends and relatives of the couple are invited to attend.

## Swinging Teens visit on Friday

The Swinging Teens Square Dance Club visited the Texas Teens Square Dance Club, Friday night. Those attending were: Pat and Roy Pierce, Virginia McClintock, Steve Pierce, Larry and Roger McClintock, James Cunningham, Karan Davis, Zodie Ledbetter, Kay Davis, Debbie Keuhler, Treva Kelley and Ronnie Bell. They also attended the Buttons and Bows Square Dance Club in Morton, Saturday night.

The Club met Tuesday night, July 13, for a business meeting. They voted to send plants to Mrs. Opal Grimes whose mother-in-law has recently passed away. It was planned to take a square of teens to Robert's Nursing Home. A swimming party was also planned.

The Swinging Teens will square dance at the Activity Building Saturday night, July 16. Guests are welcomed.

## ★ Gospel meeting

Cecil Williams of Plains will be the guest evangelist at a gospel meeting slated for July 18-24 at the Eastside Church of Christ in Morton.

Services will begin at 8 p.m. each night of the week-long program.

## Study club book placed second at state meet

The L'Allegro Study Club of Morton has won second prize in the Individual Senior Club Class A-2 for their 1965-66 yearbook in competition at the state meeting of the Texas Federation of Women's Clubs held at Lubbock in May.

The announcement appeared in the latest issue of The Texas Clubwoman magazine.

The club's yearbook captured a first place at the district convention at Brownfield in competition with 98 other clubs of the Caprock District.

Selection was made by an independent panel selected by the state federation president. Yearbooks were judged on the basis of format, program originality, etc.

## Senior 4-H'ers attend electric camp this week

Eight Cochran County senior 4-H Club members will be bound for Scott Abel, New Mexico, Monday to take part in the annual five-day District II Electric Camp.

The local group, including Ronald Hale, Richy Lemons, Richy Bennett, Ronnie Bell, Marilyn Cade, Cheryl Fincannon, and Jan Thomas will join with 4-H'ers from 13 other High Plains counties in planning a variety of special demonstrations and recreations.

Next week's camp will end over two months of preparation for classes in home lighting, motors, and making power plugs and wiring, all organized by youngsters from Cochran, Bailey, Lamb, and Hockley Counties.

In addition, representatives of the local club are charged with providing entertainment for the entire camp Tuesday night. They plan to present a "Beach A' Go Go" party at which they will wear clothing from the era of the Gay '90s.

Other activities at the camp will include Tournaments in table tennis, volleyball, shuffle board, and an all-girl baseball game as well as hikes and at least one outdoor meal. Each of the 14 clubs will be in charge of raising and lowering ceremonies and vespers one night.

County Home Demonstration Agent Jennie Allen and County Agent Homer Thompson will serve as adult sponsors from this county.

## Gene Huff leaves Morton to take Deer Park post

Gene Huff, assistant manager of the Forrest Lumber Co. in Morton for the past four years has resigned his position to become manager of the Deer Park Lumber Co. in Deer Park, Texas.

Huff left Morton Saturday with his wife Sue and two daughters, Teresa, 6; and LaDonne, 4. He assumed his new duties in the East Texas town July 11.

No replacement has yet been named to take his old post here.

## Beauchamp baby buried in Slaton after rites here

Funeral services for Steven Chad Beauchamp, the month-old son of Mr. and Mrs. Norman P. Beauchamp of Morton, were conducted Tuesday at 2 p.m. in the Assembly of God Church in Morton.

Rev. Don Murray, pastor of the church, officiated at the services. He was assisted by Rev. Kenneth Wyatt, pastor of the First Methodist Church in Morton.

Burial was in Englewood Cemetery in Slaton under the direction of Singleton Funeral Home.

Steven died July 10 at the University of Texas Medical Branch Hospital in Galveston following complications after his birth June 12.

Survivors include the father, Norman P. Beauchamp; the mother, Dorothy Beauchamp; one sister, Kimberly, 5; and three grandparents, Aila Gibson of Lubbock and Mr. and Mrs. Jim Clower of Matador.

Visiting in the home of Mr. and Mrs. Bill Gray is Ronnie Fine of Dora, N.M. He is the brother of Mrs. Gray.

Mr. and Mrs. George Hargrove spent the Fourth of July weekend at the Cooper Canyon Lodge in Creel, Mexico, which is southwest of Chihuahua City, Mexico.

MORTON TRIBUNE, THURSDAY, JULY 7, 1966

## On buying friendship

Money doesn't buy friends. That fact has been known for centuries among individuals, but apparently it hasn't seeped through to Washington, D. C.

Texas Senator John Tower has provided us with a list of foreign aid recipients since 1945 and it is most interesting to note how many of them have failed to support United States interests in the United Nations and in keeping of world peace. In fact, it is sickening to read the list and note how many of them have actually sided against the United States.

It seems that Congress needs to take a close look at our foreign aid program and do some trimming. Since 1945, the U. S. has spent \$104,220 Million in foreign aid. Some of the current expenditures should be trimmed.

Now here are the countries and what they've received from us.

U. S. aid in millions of dollars: Afghanistan, \$306; Albania, \$20; Algeria, \$167; Argentina, \$723; Australia, \$147; Austria, \$1,199; Belgium-Luxembourg, \$1,998; Berlin (West), \$132; Bolivia, \$430; Brazil, \$2,819; Burma, \$114; Burundi, \$7; Cambodia (since 1955), \$351; Cameroon, \$25; Canada, \$36; Central Africa Republic, \$3; Ceylon, \$91; Chad, \$4; Chili, \$1,130; China (Taiwan), \$4,494; Columbia, \$722; Congo (Brazzaville), \$5; Congo (Leopoldville), \$315; Costa Rica, \$137; Cuba, \$52; Cyprus, \$19; Czechoslovakia, \$193; Dahomey, \$9; Denmark, \$983; Dominican Republic, \$206; Ecuador, \$248; El Salvador, \$97; Ethiopia, \$245;

Finland, \$134; Franco, \$9,429; Germany (East), \$1; Germany (West), \$4,995; Ghana, \$165; Greece, \$3,744; Guatemala, \$204; Guinea (Br.), \$17; Guinea, \$75; Haiti, \$103; Honduras, \$74; Honduras (Br.), \$4; Hong Kong, \$41; Hungary, \$32; Iceland, \$77; India, \$5,917; Indochina (to 1955), \$1,535; Iran, \$1,580; Iraq, \$113; Ireland, \$147; Israel, \$1,098; Italy, \$6,190; Ivory Coast, \$26; Jamaica, \$39; Japan, \$3,977; Jordan, \$509; Kenya, \$35; Laos (since 1955), \$420; Lebanon, \$89; Liberia, \$231;

Malagasy, \$8; Malaysia, \$36; Mali, \$17; Mauritania, \$3; Mexico, \$1,122; Morocco, \$513; Nepal, \$86; Netherlands, \$2,522; New Zealand, \$22; Nicaragua, \$111; Niger, \$8; Nigeria, \$160; Norway, \$1,240; Pakistan, \$2,970; Panama, \$156; Paraguay, \$91; Peru, \$627; Philippines, \$1,889; Poland, \$551; Portugal, \$515; Rhodesia-Nyasaland, \$41; Rwanda, \$1; Ryukyu, \$318; Saudi Arabia, \$139; Senegal, \$19; Sierra Leone, \$27; Somalia, \$48; South Africa, \$154; Spain, \$931; Sudan, \$89; Surinam, \$65; Sweden, \$109; Syria, \$83;

Tanzania, \$44; Thailand, \$433; Tonga, \$10; Trinidad-Tobago, \$43; Tunisia, \$472; Turkey, \$4,786; Uganda, \$18; U.S.S.R., \$186; U. A. R. (Egypt), \$1,096; United Kingdom, \$8,714; U. S. Territories, \$107; Upper Volta, \$6; Uruguay, \$122; Venezuela, \$445; Viet Nam (since 1955), \$2,387; Yemen, \$40; Yugoslavia, \$2,688; Zambia \$100.

## VIEWS . . . of other editors

With the House Committee hearings currently underway on water pollution proposals, it seems timely to reproduce here the following facts about our water supply:

At least 20 billion gallons of water a day are being wasted in this country by pollution. This is water that could be used and reused, if treated properly. It is ravaged water which is a menace to the health of everyone who has contact with it. It offends the nose and the eyes of all who come near it, and flows uselessly past water-hungry communities on its way to an indifferent sea.

This wasted water amounts to about 6 per cent of the total needs of the nation. It is a very significant 6 per cent, however, since it constitutes better than one-fourth of the country's pure water needs, and its loss adversely affects the lives, the economy, the health and the pleasure of far more than half of our population.

The nation used about 40 billion gallons of water a day in 1900. We are using 360 billion gallons daily in 1965. The rate of consumption will continue to go up steadily. Increased uses for industry and irrigation couple with the shiny appliances of our affluent society. Automatic dishwashers, lawn sprinklers, the instant carwash, the laundromat, backyard swimming pools and massive household demands for electric energy all represent new and growing uses. This is our way of life. We sweat to pay for it. We're not about to give it up. Even with harsh restrictions in the middle of last Summer's drought, New York City's 8 million people used at least 3 times as much water daily as London's 7 million — and wasted almost as much as Londoners used.

There is no more water on the earth today than there was in the time of Adam. And despite the fact that our demands on the supply are infinitely greater than they ever have been, the amount is sufficient to sustain us — if we learn to use it and reuse it properly. On an average day in the United States a volume of almost 5 trillion gallons of water splashes on our land in the form of rain, hail, dew, snow or sleet. Three-fourths of this rises again by evaporation, unused, into the heavens whence it came. The rest either settles into the earth or runs with our rivers.

Pollution is caused by man's carelessness, indifference and callousness. It is ironic that law enforcement authorities impose sizable fines on anyone who litters at a roadside, a picnic area or a beach, but very rarely bother anyone who litters up a stream.

How dangerous is a contaminated stream? Recently a cupful of water taken at random from the Connecticut River near Hartford was found to contain 26 different infectious bacteria, including typhoid, paratyphoid, cholera, salmonellosis, tuberculosis, anthrax, tetanus and all the known viruses, including polio. The broad Hudson River, which runs slushily through New York City, could have saved the Northeast from the 1965 drought. But it could not be used. Its waters were too foul to drink. George Washington, in fact, almost died as a youth after drinking from the muddy Potomac.

Even underground water tables are subject to pollution. Largely unknown to the public, an epidemic in Riverside, California, in the Summer of 1965 afflicted 18,000 citizens with violent attacks of vomiting and extremely high temperatures. At least three died as a result. Ultimately, bacteriologists traced the source to the city's water supply, which for 75 years had been safe and pure since it comes from 30 deep wells. Suddenly, due to a subterranean contami-

## Highlights and Sidelights —

# Tax group makes report

AUSTIN, Tex. — Taxes — with its what, why, where, who and because — raised its unpopular head in the Texas capitol this week.

Texas Committee on State and Local Tax Policy presented a report to Gov. John Connally and the Texas Legislature.

Everybody's request for more money indicates that the spending program to be presented the 1967 Legislature will eat up the \$75,000,000 state surplus — and require new money to finance.

Higher education, pay raises for teachers and state employees, water development, state park and recreation expenditures, the Texas Highway Patrol — all wait in on the act.

The tax policy committee is headed by Rep. Ben Atwell of Dallas, who asked the Texas Research League to list possible sources for new taxes.

Proposed were: Increase the state sales tax from its present two per cent to two and a half or three per cent, raising \$72,400,000 to \$144,800,000 a year; Corporation income tax of 4.4 per cent (average of those in the 37 states which levy it), raising from \$18,000,000 to \$106,000,000 a year; Graduated personal income tax, raising \$75,000,000 a year. (There are 36 states with personal income taxes.)

DRAFT CALL — Texas' part of fulfilling the national draft call for 31,300 men in September includes furnishing 1,381 men in July; 1,837 in August; and 1,585 in September, says Col. Morris S. Schwartz, State Selective Service Director.

In addition, between 4,000 and 5,000 Texas men will be called for pre-induction physical and mental examinations in September.

FARMERS CAUTIONED — John C. White, Commissioner of Agriculture, advised Texas grain farmers to "make certain your harvest is stored in a state-licensed warehouse and to demand a valid Texas Grain Receipt."

Approximately 70 warehouses have failed to renew their licenses this year, though the grain harvest is well underway in many parts of the state. Grain stored in these warehouses is not protected by the bonds and license required by law, said White.

MORE BOAT RAMPS — Thirty-three new boat ramps across the state, making a total of 94 such ramps, have been approved by the Texas Highway Commission.

Twenty of the new ones are adjacent to farm-to-market or park roads.

These new ramps will increase launching facilities by more than one-half and will cost \$241,800, or an average of \$7,327 each. Source of money, provided for under the Texas Water Safety Act, comes from Certificate of Number fees collected from Texas boat owners.

And, speaking of boats, new boat inspection fees and unclaimed boat gasoline sales taxes are reaping about \$100,000 a month for the

BATTER UP!

According to the State Parks and Wildlife Department, a new system is being set up so that fines collected for boat safety law violations will go to a State fund, rather than to county funds where most other law-breakers' fines are deposited.

BIG THICKET — State Parks and Wildlife Commission endorsed "in principle" the creation of a Big Thicket State Park. It will embrace some 15,000 acres of the 300,000 acres in Liberty, Hardin, Tyler and Livingston Counties known as the "Big Thicket."

Will Odum of Austin, commission chairman, said endorsement would be made "specific" after the Parks and Wildlife staff has studied the proposal. Then all the Commission needs is legislative approval.

OTHER PARKS NEED — According to William M. Gosdin, park services director, state parks' buildings need repairs to the tune of \$970,000.

State Parks are expected to get \$2,200,000 for improvement from federal sources during each of the coming two years. But Gosdin said a complete statewide outdoor recreation plan is needed by 1970 to keep the state qualified for federal aid for park construction.

COUNTY STUDY — Lt. Gov. Preston Smith appointed the following as an advisory committee to the Legislative Council Study Committee on County Government: Harold Green, president, County Judges and Commissioners Assn.; L. D. McCormick, president, County Treasurers Assn.; O. D. Gine-

gan, president, County Tax Assessors-Collectors Assn.; V. C. B. assistant director, Agricultural Extension Services at Texas University; Joe G. Resweber, county attorney, Dicks County; Bill Waters, president, and County Attorneys Assn. Council is composed of 18 Representatives and five Senators with Smith as chairman and Speaker Ben Barnes, vice-man.

JOB SITUATION — Texas employment is continuing its upward trend, but at the same time employment is rising too, the Employment Commission reports.

Total employment rose from 867,600 in April to 1,838,000 in May, while unemployment fell from 121,000 to 124,000 during same period. The number of non-farm payrolls rose 6,500 to 3,585,300, and farm employment jumped 23,800 to 5,000. The 3,000 increase in employment was caused by entrants into the market.

SCHOOL SNORTS — Gov. Connally has approved nine new under the Economic Opportunity Act. Fort Worth and Tarrant County got the biggest chunk of it — \$368,980 — for use in neighborhood services, family counseling, day-care services, poverty relief and dental care. Waco and Lenham County received \$100,000 for day-care services, basic education, remedial and site expansion, expansion of Planned Parenthood.

Water, water everywhere . . .

BUT officials of the U. S. Soil Conservation Service in Morton warn area farmers that the picture may soon change for the water and rainfall more effectively. USDA reports show that worse if many of them do not begin to utilize underground

overall efficiency of irrigation water in Cochran County is about 35 per cent. Farmers are urged to contact officers of the Soil Conservation Service for more information and technical assistance.

### CARD OF THANKS

We would like to extend our sincere thanks for the kindness and thoughtfulness for the food, prayers, and other expressions of sympathy shown during our time of sorrow. We pray that God will bless each of you.  
Mrs. W. E. Angley  
Mr. and Mrs. T. L. Folger  
11-22-p.

### CARD OF THANKS

Words cannot adequately express the deep appreciation and affection we feel for the many people of Morton who have assisted us during the past year, while Mr. Fleener has been in the hospital. Your cards, flowers, visits, financial assistance and, most of all, your prayers have been a source of strength to us during these trying months. We will always remember you in our prayers and ask that God will bless each of you.  
Mr. and Mrs. Dennis Fleener  
11-22-c.

### CARD OF THANKS

We extend our sincere gratitude for the many prayers, contributions and floral tributes, the many acts of kindness, and thoughtfulness during the loss of our loved one, W. W. Williamson. Every gesture of friendship, love and sympathy is deeply appreciated and gratefully acknowledged.

May God keep you in His care.  
Mrs. W. W. Williamson  
Mr. and Mrs. T. K. Williamson and Warren  
Mr. and Mrs. Jerry Winder and girls  
Mr. and Mrs. Dennis Walder and boys  
11-22-c.

## Legal Notices

U. S. Treasury Department — Internal Revenue Service Notice of Sealed Bid Sale. Pursuant to section 6331 of the Internal Revenue Code, the property described below has been seized for nonpayment of delinquent internal revenue taxes due from Western Drilling Company, Incorporated, 1603 Broadway, Lubbock, Texas. The property will be sold in accordance with the provisions of section 6335 of the Internal Revenue Code and the regulations thereunder, at public sale under sealed bids. Date bids will be opened: July 26, 1966. Time bids will be opened: 11:00 A.M.; Place of sale at Red Devil

Oil Well Servicing Company, Incorporated, yard located in Whiteface, Cochran County, Texas. Item or Group No.: 1 - Description of property: 1 - Emco GB 500 Drawworks, Serial No. 115, engine compound pumpdrive brake P-8422, 26" single, Gardner-Denver, duplex power mud pump GR-GXR8, Serial No. 127988, 7 1/2" x 18", 28 Lengths of used Drill Pipe, approximately 30' lengths, by 3/2", or approximately 840' of pipe. (the property is offered for sale in the aggregate) Property may be inspected at: Red Devil Oil Well Servicing Company, Incorporated, yard located at Whiteface, Cochran County, Texas. Submission of bids: All bids must be submitted on Internal Revenue Service Form 2222, Sealed Bid for Purchase of Seized Property. Contact office below for Forms 2222 and information concerning the property. Bids must be submitted directly to the Revenue official named below prior to the opening of the bids. Payment Terms: Bids must be accompanied by the full amount of the bid if total bid is \$200 or less. If the total bid is more than \$200, 20% of the bid or \$200, whichever is greater, must be submitted therewith. Upon acceptance of the bid, the balance due on bid, if any, will be required in full. Time of remittance: All payments must be by cash, certified check, cashier's or treasurer's check or by a U.S. postal express or telegraph money order. Make checks and money orders payable to "Internal Revenue Service." Title of offer: Only the right, title, and interest of Western Drilling Company, Incorporated, in and to the property will be offered for sale. s/Wilbur G. Yates, Wilbur G. Yates, Revenue Officer, Internal Revenue Service, 1616 - 19th St., Room No. 102, Federal Office Building, Lubbock, Texas, July 14, 1966, Phone PO 5-8541 Extension 341. Published in the Morton Tribune July 14, 1966.

**THE STATE OF TEXAS TEXAS WATER DEVELOPMENT BOARD TEXAS WATER POLLUTION CONTROL BOARD**  
Notice is hereby given to all interested parties of a public hearing to be conducted by the Texas Water Development Board pursuant to Acts 1965, 59th Legislature, Chapter 97, page 587 on July 20, 1966, at 9:00 a.m. at the Tennyson Junior High School Building, Waco, McLennan County, Texas, at which hearing a proposed plan of water development for the Brazos River Basin will be presented and evidence for or against the plan will be heard.  
Notice is hereby given to all interested parties of a public hearing to be conducted by the Texas Water Pollution Control Board relating to the development and adoption of water quality criteria for the Brazos River Basin in compliance with the Federal Water Quality Act of 1965 (P. L. 89-234). The hearing will be held at the Tennyson Junior High School Building, Waco, McLennan County, Texas, on July 20, 1966, at 9:00 a.m., immediately following the above scheduled hearing of the Texas Water Development Board. The Texas Water Pollution Control Board will be guided by the requirements of the Federal Water Quality Act of 1965 and the Guidelines for Establishing Water Quality Standards for Interstate Waters, promulgated pursuant to said Water Quality Act by the U. S. Department of Interior. The Board will consider views, comments and recommendations on the development of a plan for implementing and enforcing the water quality criteria, including a timetable for compliance.  
All interested parties are invited to be present or represented at the hearings, including representatives of federal, state, county, municipal agencies, and those of commercial, industrial, civic, highway, railroad, and water transportation and flood control interests, and property owners concerned. They will be given full opportunity to express their views concerning the character and extent of the desired development and criteria and the need and advisability of execution.  
The Texas Water Development Board and the Texas Water Pollution Control Board are particularly anxious that the views of all persons, both opponents and proponents, become part of the record of the hearing. To insure equal opportunity for all, either oral or written statements, or both, are encouraged and will be accepted. FOUR COPIES of all written statements will be required.  
s/ Joe G. Moore, Jr., Executive Director of the Texas Water Development Board and Chairman, Texas Water Pollution Control Board

## County Agent's report

By HOMER E. THOMPSON  
Increase Hybrid vigor

Researchers at Texas A&M University's Livestock and Forage Center, at McGregor are making something of an improvement on crossbred cattle.

Instead of breeding a crossbred cow back to one of the parent breeds, the cow is mated to a bull of a third breed. For example, a cow that is one-half Hereford and one-half Brahman, is bred to a Charolais, Charbray, Brown Swiss, Red Poll or Santa Gertrudis bull.

The results have been outstanding. Average weaning weight of straight bred calves at the McGregor Station for the last 11 years is 392 pounds.  
Average 180 day weaning weight of three-bred cross calves is 460

## MAINTENANCE ON MOTORS

On today's farm, dozens of electric motors provide the mechanical energy for countless devices that help the farmer get his chores done faster, more efficiently, and at less cost.  
The electric motor is probably the most reliable piece of machinery found on the farm, and is often located in hard-to-reach places and easily overlooked at maintenance time.

An electric motor like other farm equipment, needs a periodic checkup. Keeping open motors clean and dry and properly lubricated are two preventative maintenance procedures recommended to help assure reliable operation of your electric motors.  
In general, sleeve-bearing motors require re-oiling after three years of normal or one year of heavy-duty service. Ball-bearing motors should be relubricated after 10 years of normal service or every five years under heavy-duty or severe temperature use. Severe-duty, explosion-proof, and motors with low or high temperature grease should be lubricated in accordance with manufacturer's instructions.

Belt drives should be checked to be sure belt tension is not taut at standstill, and mounting bolts should be checked to assure tightness and proper motor alignment.  
Your electric motors should be serviced by qualified shops that have the experience and equipment to provide fast, dependable service.

**Federal gasoline tax refund**  
Farmers and ranchers will not file a claim for refund of Federal tax on gasoline used on the farm or ranch as in the past. The refund on gasoline used after July 1, 1965 must be claimed as a credit on their annual income tax return.

**Antidotes for shin oak poisoning**  
Commercial tannic acid representing the same class of tannins as isolated from shin oak was used in the preliminary attempt to find an antidote, or neutralizing agent, for oak poisoning. Numerous chemical compounds were administered to rabbits along with tannic acid in an effort to find one with beneficial effects. Ferrus citrate, calcium chloride, calcium lactate, calcium carbonate and calcium acetate failed to provide any protection against tannic acid poisoning. Bone meal, defluorinated phosphate, calcium gluconate, and dicalcium phosphate provided a slightly beneficial effect when administered in equal quantities with tannic acid. Calcium hydro-

### Cpl. Patterson is honor Marine

Cpl. Billy L. Patterson of Morton was chosen as Man of the Month by a board of H&HS Staff Non-commissioned Officers. The choice was made on the basis of sound judgement, outstanding initiative and attention to duty.

He was commended by Maj. E. F. Huizenga for his willingness to improve his professional qualifications and thus, the efficiency of the squadron.

Cpl. Patterson is a clerk for the household goods section. He has been in the Marine Corps since July 1962, and stationed at Yuma, Ariz., since 1965, when he returned to the U.S. from Okinawa where he served with the Third Marine Division.

He was born in Lubbock on September 12, 1943. His parents, Mr. and Mrs. Leon W. Patterson, reside in Morton. He is married to the former Miss Patsy A. Walden, also of Morton.

CPL. BILLY PATTERSON

## Grass seedlings should be protected from weeds

By JOHNNY K. OHLENBURG  
SCS Staff

In order to let pasture grass get a good start, weeds should be controlled, or at least rendered less competitive in seedling grass.

Probably the most widely used method of weed control is through mechanical cultivation and shredding. It is most widely practiced on smooth terrain and near susceptible crops where chemical weed control can't be used. For control to be effective, weeds must be moved before they become mature. If a shredder is used, the blades should be set from eight to ten inches above the ground to avoid harming the grasses.

Where there are no crops that

might be damaged, chemical weed control has proved to be the most practical and most economical method. This allows seedling grasses to make maximum use of soil moisture and the nutrient available in the soil.

For chemical weed control to be most effective, weeds should be from four to six inches tall, and growing vigorously. Soil moisture also should be adequate.

For technical assistance and additional information, contact the Cochran County Soil Conservation Service.

Today, one high producing Texas dairy cow provides enough milk for the annual supply of 30 people.

Weed control effect . . .

FIELD OF SIDE OATS GRAMA shows how effective weed control can be in a planned program. This permanent grass pasture was

planted by Hub Cadenhead of Morton given the opportunity to get maximum grass by eliminating the weeds that compete moisture and soil nutrients.

# PCG okays research grants

An analysis of the agricultural research grants approved for the 1966-67 year by Plains Cotton Growers, Inc. shows the full \$36,250 aimed directly at the most pressing problems facing High Plains cotton producers.

PCG does not do its own cotton production research, but each year gives grants - in - aid to established research institutions with experienced, qualified personnel and facilities to do the work.

PCG funds this year went into only two new projects. The remainder was allocated to continuing work on projects already underway from one to ten years. Cotton producers are already putting into practice valuable information gleaned from many of these continuing projects.

Inasmuch as all cultural practices have an effect on the quality of cotton fiber, most of the research work supported by PCG relates in one way or another to cotton quality.

But two of the continuing studies and one of the new ones are directly concerned with ways to improve the quality of the area crop. And these three projects alone account for \$15,300 of the total budgeted for cotton production research.

Largest of the three, to which PCG granted \$9,000, is an undertaking to develop varieties adapted to the High Plains conditions which will upgrade length, strength, micronaire and general fiber quality and at the same time maintain high yields. Researchers emphasize that they are not looking merely for a variety with high quality fiber, but one which will have good liness, disease and insect resistance, adaptability to stripper harvesting and other characteristics necessary to make it suitable for High Plains production.

Basically, this study is of the genetical behavior of characters for the area. The work is being done at the South Plains Research and Extension Center under the direction of Dr. L. L. Ray, agronomist.

Getting \$5,000 of PCG money for work on cotton quality is another project which will study planting design and climatic influences on cotton fiber development. Here the effect of air, soil and irrigation water temperature as well as wind and methods of irrigation will be investigated. In addition to development of quality factors, plant physiology and effects on yield will be taken into consideration.

The study is to be done at the High Plains Research Foundation with Dr. Arthur Gohlke as project leader.

A smaller project, but one which perhaps might lead to more immediate quality improvement on the Plains is the evaluation of cotton strains and varieties through screening trials, advanced strain tests and cotton variety result demonstrations.

This work, to which PCG granted \$1,200, is also under the direction of Dr. Ray at SPREC. As breeding stocks are developed, and many already have been, they will be tested under this procedure for practicality under High Plains conditions.

Cotton leaders of the area recognize improvement of the area's

cotton quality as one of the most urgent needs. And this explains the large percentage of PCG's research budget being spent to that end.

But there are other facets of cotton production which are not going unattended. Grants were made by PCG for studies of water conservation measures, control of cotton diseases, weed control, climatic influences and soil fertility, all of which will be prime factors in the future of cotton production on the Plains.

The major work on cotton diseases (\$7,000 grant) is being done at SPREC. Dr. E. B. Minton will be in charge, assisted by Drs. Ray, C. C. Orr and L. S. Bird. It purports to (a) assist cotton breeding and genetics research in the development of varieties or strains adapted to the Plains with disease escape characteristics, cold tolerance, and resistance to verticillium wilt and bacterial blight, (b) develop and evaluate chemicals, fumigants and fungicides for treatment of seed and soil against diseases, (c) determine the effect of cropping systems, gin trash and heavy weed growth on the incidence and severity of verticillium wilt, (d) determine the quality of 1966 planting seed and establish guide lines on seed quality measurements for an educational program, and (e) evaluate cotton varieties and strains for susceptibility to Ascochyta blight.

The other research project on cotton diseases is a study of fatty acids as natural inhibitors of fusarial and verticillium wilts. With \$3,300 of PCG money and additional funds from other sources, Dr. Harold Lewis of Texas Tech will carry out the work.

Two grants were also made on weed control, one to the High Plains Research Foundation (\$500) and the other to the Southwestern Great Plains Experiment Station.

The Bushland project, directed by Dr. A. F. Wiese, is not limited to testing on the station itself but is carried out on various farms all over the Plains area. It is a study to determine the value of pre-emergence and post-emergence herbicides for weed control in cotton, and to determine new cultural and irrigation practices which will make chemical control of weeds more feasible in West Texas.

The PCG Research Committee specifically asked Dr. Wiese to pay particular attention to control of annual weeds such as purple night shade (white weed) and bindweed, and to study weed population succession where chemicals are used.

HPRF will also be working with chemical weed control in cotton, with greater emphasis on methods of incorporation of both full season and early season herbicides.

Three grants were made on water conservation, two to SPREC (\$2,250) and one to HPRF (\$500). SPREC will (a) study utilization of minimum amounts of water for crop production, (b) evaluate sub-

irrigation and special methods of application of irrigation water, and (c) study water transfer from soil to atmosphere as related to climatic and soil properties. Various parts of the work will be under James S. Newman, C. W. Wendt and James Zetsche, Jr.

A new water project will also be under the auspices of SPREC. Oliver Newton, agricultural meteorologist with the Specialized Agricultural Weather Service, plans to determine through use of the most modern soil moisture measuring devices the subsurface moisture content to a depth of four feet in a major part of the Plains area.

Observations of subsurface moisture are to be taken in late Fall and again in early Spring and the information used by farmers to judge how much pre-plant irrigation water should be applied. From eight to fifteen observation sites are planned per county.

HPRF will be making a comparison of water usage and yields on bench leveled and contoured sloping land. James Valient, water engineer, will conduct the study.

Both the climatic (\$2,000) and the soil fertility (\$500) grants from PCG went to SPREC.

The climatic study is to determine the effect of temperature on growth and fruiting habits of the cotton plant as well as the maturity of the cotton fiber and cotton seed. Drs. L. L. Gibson and Ray will be in charge.

Soil fertility research at SPREC will attempt to define more exactly the requirements of cotton for primary nutrients on the major soils found on the Plains under different levels of irrigation, crop sequence and seasonal conditions.

Don Jones, Chairman of the PCG Research Committee, says it should be noted that the value of PCG research funds is at least doubled by the fact that they almost always attract funds from other sources, such as agricultural chemical companies, equipment makers, State and Federal agencies, High Plains Water District and others.

Everything but wheels . . . RONNIE ALLSUP, the 13-year-old son of Mr. and Mrs. Don Allsup of Morton appears just about ready for the district soap box derby to be held in Lubbock July 18. The race will mark his third year of competition in the annual event. He was eliminated in the fourth heat last year. Ronnie is sponsored by Doss' Thriftway. TRIBPIX

## Doug Corley on first leg of trip overseas

(Editor's Note: The following is the first in a series of reports by Doug Corley of Morton, a student at Texas A&M University, who is spending the summer in England as part of the Experiment in International Living. Other reports will follow as they are received.)

I have arrived in Putney, Vermont, at the Experiment in International Living headquarters, U.S.A. Tuesday morning at 11:20. I departed from Lubbock where I proceeded to Dallas, and landed, finally, at J.F.K. Airport in New York. The weather was very humid and foggy.

I stayed one night at the Tudor Hotel which is about 3 blocks from the U.N. in one direction, and about 6 blocks from Times Square in the other direction.

I proceeded the next morning by bus from the hotel, and arrived in Putney that afternoon (Wednesday). My young leader is Patricia Hago, who hails from Boston. Another girl and I are the only southerners in our group, and we're having a ball speaking in fake southern dialect while watching other people turn around and stare.

Putney is situated in the backwoods of Vermont. The countryside is covered in trees and very dense foliage, interspersed with New England farmhouses. The living around here is very leisurely, and it has affected not only me, but everyone.

About our orientation. We have been in several group meetings where we discuss various aspects of British life. We usually have two or three planned meetings a day. Also we hiked to Dimmerston and back, which was about eight miles. We stopped at a very beautiful "clear pond" and went swimming. Also we have had a square dance and played various games like volleyball and soccer, to occupy our time.

Well, I'll close now. My next letter should come from Stockport, Cheshire, England, where I will arrive on the 4th of July.

## Week's schedule for Bookmobile

The High Plains Bookmobile will be in the following areas this week:

Thursday, July 14: West Camp, 9:15-10:15; Larist, 10:30-11:30; Bovina, 1:00-4:00.

Friday, July 15: Lums Chapel, 10:00-10:45; Spade, 12:00-1:30; Hart Camp, 1:45-2:30; Fieldion, 2:45-3:30.

Saturday, July 16: Olton, 9:15-11:45; Littlefield, 1:15-4:00.

Visiting in the home of Mr. and Mrs. George Hargrove were her parents, Mr. and Mrs. T. E. Carter of Daingerfield, Texas.

Thousands of bugs . . . HERE LIES dead proof of the effectiveness of black light insect traps recently installed on the farm of Karl Griffith on the north edge of Morton. A wide variety of night flying insects are here revealed in the soft glow of the black light as they lie in the deadly reservoir of diesel fuel below. TRIBPIX

Three firemen to attend school . . . Three members of Morton's volunteer fire department are planning to attend the annual Firemen's Training School in Bryan July 17-22. The trio will include Assistant Fire Marshall Elra Oden, Fire Supt. Wayne Rowden, and Jack (Wimpy) Houghton. The city is sponsoring two of the men while the Cochran County Farm Bureau sponsors the third. The strenuous week-long course, conducted by the A&M Fire Extension Service, includes classes in a wide variety of fire fighting techniques designed to provide participants with knowledge required to combat fires common to their particular areas. Approximately 500 men are expected to attend. Classes at the special school will be conducted for 12 hours a day following registration on Sunday, July 17, and will offer training with blazes set in structures at the school ranging from houses to butane tanks. The local men will be faced with the task of battling fires in a house, garage complete with car, a cafe, and ponds of flammable liquids. The busy schedule will include instruction in rescue work practiced 50 feet in the air from the side of a building and in water. In other classes, the men will learn how to use different types of fire extinguishers, perform salvage operations, and install fire-preventive sprinkler systems. TRIBPIX

## Research foundation sets tenth field day

The High Plains Research Foundation at Halfway, Texas will observe its Tenth Annual Field Day Thursday, Sept. 8. Additional tours of the Foundation's research and educational facilities will start at 1 p.m. when visitors will be welcomed at 2 p.m. by members of the Board of Trustees of the Foundation. A feature of the Annual Field Days is the historical observance of West Texas hospitality by greeting the arriving for the days festivity with representatives of Citizens Clubs and Chambers of Commerce of the area. Members of the Home-makers Clubs and members of the Foundation greet and register visitors at registration tents on the grounds of the Foundation and the Halfway Community Center.

## New Patterson soybean seed is available

Patterson soybean seed is now available to Cochran County producers from the High Plains Research Foundation research farm at Halfway, reports Al Schrandt, Foundation business manager. Foundation seed were released for the first time this year. "The new short season Patterson soybean matures in about 105 days under normal growing conditions," said Dr. Earl Collister, Executive Vice-President of the Foundation in response to inquiry. "It was developed especially for the farmer who might have the misfortune to lose a cotton crop through adverse weather conditions when too late to replant. The new Patterson soybean is also being planted this year following wheat. The Patterson variety can be harvested in time to permit the planting of winter wheat this fall. Many farmers are planning to use this system of double cropping this year." More information about the Patterson soybean variety can be obtained from High Plains Research Foundation, P. O. Drawer 1870, Plainview, Texas.

# SEE THE MAN WHO CAN SAVE YOU THE MOST YOUR CHEVROLET DEALER

Left to right: Corvair Monza Sport Coupe, Chevy II Nova 4-Door Sedan, Chevelle Malibu Sport Coupe and Chevrolet Impala Convertible. Each comes with an outside rearview mirror and seven other standard features for your added safety. Always check your mirror before you pass.

That's the beauty of buying America's most popular make of car—especially right now when summer savings are extra tempting. It just makes sense that you're going to save in a big way by seeing the man who's doing business in a big way. So go see what your Chevrolet dealer can save you right now on a luxurious new Chevrolet, racy Chevelle, trusty Chevy II or sporty Corvair. This year's cars by Chevrolet are the most. And right now—so are the savings.

Midweek Service — 7:30 p.m.

## DOOR OPENERS

Keys and churches are door openers. In both cases, each require you to put forth some effort. The key you must insert in the lock and turn. Our Lord made the way to heaven even easier, for all that you have to do is present yourself and believe.

*"For by grace are ye saved through faith; and that not of yourselves: it is the gift of God: Not of works lest any man should boast: For we are his workmanship, created in Christ Jesus unto good works, which God hath before ordained that we should walk in them."*

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

Coleman Adv. Serv.
