iller District Judge, Hollums District Attorney District attorney George Miller moved to the district judge office and Floydada attorney Randy Hollums moved into the district attorney office

> Briscoe's appointments on Wednesday The district judge vacancy was created by the death of Judge L. D. Ratliff. Both men were officially sworn into their new offices in the district courtroom in the Floyd county courthouse Thursday afternoon.

Friday by virtue of Governor Dolph

Judge Miller was county attorney of Briscoe and lived in Silverton from 1959 until 1965. He then lived in Amarillo three years when he was in private law practice.

He joined the law firm of district attorney John Stapleton in Floydada June of 1968. January 1, 1970 he became district attorney.

Judge Miller is a native of Lamesa, a graduate of the University of Texas Law School and served in the Navy from 1955 to 1957.

In Floydada he serves on the official board of the First United Methodist church, he is past president of the Rotary club, past vice president of the Chamber of Commerce, past vice president of the Floydada Development Company and has worked on many civic endeavors.

The Millers have two children; Pat of the home and Mrs. Mike Burk, school teacher in Abilene school system.

The new judge will office in the Floyd County courthouse.

District Attorney

Randy Hollums was born in 1943 at Lubbock, spent most of his life in Floydada. He attended McMurry, Wayland, and West Texas State University after graduation from Floydada High School.

He received his B. S. degree from West Texas State in 1966. He entered the U.S. Air Force in September, 1966 and was released from active duty March 30, 1971. He departed active duty as a captain.

In September of 1971 he entered Texas Tech Law School and graduated in December of 1973. He was admitted to practice law by

the state bar in April, 1974. He has practiced law in Floydada since that While in Law School, he was a

member of the Student Bar Association, Moot court board, Phi Alpha Delta Law Fraternity and served as a member of the Moot Court Team in the International Law Competition. He is the son of Duncan and Edwina

He is married to the former Teresa Gay of Cleburne, Texas. The couple has a son, Jay, six years of age.

During the 64th Legislature, Spring, 1975, he served as the administrative aide to State Senator Ray Farabee.

In 1975 and 1976 he served as vice president of the Floydada Chamber of Commerce, currently chairman of the American Heart Association drive in Floyd County, member-elect of the Board of Directors of the Floydada Rotary Club, member of Board of Directors of the Floydada Meals on Wheels Program, and member of First United Methodist Church and sponsor of United Methodist Youth.

Both men begin their new jobs immediately. Briscoe said, and will serve until the next general election.

Beat Abernathy! The 110th Judicial district includes Briscoe, Floyd, Motley and Dickens counties.

Attorney Hollums and Judge Miller had both filed for election to their respective offices with the State Democratic Party in Austin by Friday

The district attorney salary is \$23,500 and the county pays half the cost of a secretary. The district attorney may maintain private law

The district judge salary is \$31,000 plus \$750 from each county for travel and expenses.

In a statement to this newspaper Friday, Judge Miller said, "When I was asked to accept the appointment, one of the hard decisions was to give up private practice. I have many good friends and clients whom I have been serving, but I feel that I can continue to serve the people of this district as judge, and I will do so to the best of my ability. I also want to extend my best wishes to Randy as he enters the district attorney office.'

NEW DISTRICT JUDGE George Miller swears in new district attorney Randy Hollums in district courtroom Thursday afternoon.

Floyd Folk Loyalty To Shopping

At Home Revealed In Sales Tax Report

It appears that the people over in

Bailey county shop at home better than

the other counties studied. . . an

average of \$13.40 per person . . .

Muleshoe sales tax in 1975 was

State comptroller Bob Bullock last week released information showing how collections by Texas cities of the city sales tax, which has always been one percent have skyrocketed in recent years. Merchants charge five percent sales tax. The state keeps four percent, the city gets one percent.

From these figures can be developed statistics that show how loyal each county's shoppers are as they buy from merchants within their home county. To arrive at the amount of sales tax average for each person in the county, the amount of sales tax is divided by the number of residents in the county.

come and bring a salad.

\$112,550.73 and there are 8,400 people in Bailey county. Next is Castro county with an average sales tax per person of \$12.28 \$117,000 in sales taxes paid by a county population of 9,600 in the towns of Dimmitt and Hart.

Then Swisher county is next with an average sales tax paid of \$10.53 per person . . . there are 10,600 people in Swisher who paid a total sales tax of \$111,598 through shopping in Tulia, Happy and Kress.

Floyd county is next with \$8.27 sales tax per person in 1975. A total sales tax \$88,589 from sales in Lockney and Floydada,

The sales tax per person in Crosby county was \$7.96, from a total population of 9,000 and sales tax of \$71,613 in Crosbyton, Ralls and

Neighboring Motley county showed \$7.99 per person with total tax collected at Matador and Roaring Springs \$15,171 by a population of

INCREASE OR DECREASE

Bullock released a list comparing each city's 1975 sales tax rebates with the rebates during the first full calendar year that city collected the sales tax.

Seven hundred and eighty cities showed increases ranging up to 1,539 percent. Only 30 cities showed a decline in rebates.

"It shows what we've known all along," Bullock said, "that city sales tax has become a cornerstone of the City Hall budget."

While the Comptroller conceded some of the increase is due to inflation he said "Nobody could read this story of mushrooming retail sales and conclude Texas has anything other than a prosperous business commun-

The importance of the city sales tax to city budgets led Bullock, shortly after entering office last year, to begin sending city sales tax dollars back to the cities on a monthly, rather than The Legislature authorized cities to

assess a one percent sales tax in 1967, and they were first able to collect it in the first quarter of 1968 (shown as 681 on the list).

Floydada received \$60,756.96 in 1975 compared with \$46,540.86 the first year it collected the tax, 1971 . . . up 31

Lockney received \$27,833.16 in 1975 compared with \$21,580.69 the first year it collected the tax, 1969 . . . up 29

Other area towns increased as follows: Abernathy 44 percent, Abilene 96 percent, Ballinger 58 percent, Canyon 85 percent, Canadian 154 percent, Crosbyton 69 percent, Dimmitt 60 percent, Hale Center 43 percent, Idalou 93 percent, Levelland 60 percent, Littlefield 58 percent, Lorenzo 158 percent, Matador 22 percent, Olton 39 percent, Petersburg down 5 percent, Plainview 62 percent, Ralls 11 percent, Slaton 48 percent, Tulia 27 percent, Turkey 5 percent.

that are up for election. Friday afternoon the following candidates had filed with the office of Ben Ayres: Sheriff of Floyd County, incumbent Bud Rainey, Lockney trucker C. L. McKay and Dougherty farmer Fred Cardinal; commissioner precinct 1 Aaron Carthel incumbent; commissioner precinct 3. Grigsby Milton, incumbent; county tax assessor-collector, Jonelle Fawver, incum-

Kenneth Bain has filed for re-election to the County Attorney's office.

Income Rise Vs. Inflation In Floyd

New York, Jan. 24 - To what extent has the rising cost of living affected residents of Floyd County during the last five years?

How large an income does a local family have to have these days to equal the purchasing power it had in 1970?

A great deal more, according to data obtained from the Conference Board, the Department of Labor and others. In the five-year period, they show, the purchasing power of the dollar eroded by more than 23 cents, continuing the long-time trend in that direction. In terms of the 1949 dollar, for example, it

is now worth only 48 cents. Added to the unrelenting rise in the cost of goods and services has been the increase in taxes, especially for Social

All in all, the average family needs to be making nearly 40 percent more than it did five years ago to maintain the same standard of living.

For Floyd County families that had an income of \$6,500 in 1970, approximately \$9,100 would be required today. Those that had \$8,500 then need \$11,900 now. Those in the

\$10,000 bracket have to have \$14,000 and the ones at the \$15,000 level,

Fortunately for most local families, their incomes did rise sharply in the last five years, reaching an average of \$10,840 per household by 1975, compared with \$8,360 in 1970. It was an increase of 30 percent.

The gains they made enabled them to offset the rising cost of living better than families in many parts of the

The big losers in the race with inflation include wage earners whose paychecks haven't kept pace, those who are on fixed pensions and welfare recipients.

A study by the Conference Board, covering the past 10 years, shows that taxes continue to absorb a rising share of personal income, about 23 percent

Social Security contributions constituted the fastest growing segment of the total tax, shooting up 283 percent in the 10 years. State and local taxes went up 266 percent, it finds, and Federal income taxes, 170 percent.

Kiwanis Club Sponsor Blood Donor Day

The Floydada Kiwanis Club is sponsoring a "Blood Donor Day" in Floydada on Wednesday, February 4 from 3 to 6 p.m. in the community room of the First National Bank. Appointments are not necessary, but

may be made with C. J. Payne or Tommy Farris. Blood donated goes to the Blood

Services of Lubbock which supplies blood to Caprock Hospital for people of this community.

A DONOR RECEIVES..

When a person becomes a Community Donor, Blood Services will take responsibility for blood center charges which the donor or members of his or her immediate family (spouse and unmarried dependent children under 19 years of age or under 23 years if also full time students) may incur within the six month period following donations. This does not include transfusions related to the treatment of hemophilia.

GENERAL DONOR QUALIFICATIONS

Age - Between 17 and 65 years. Seventeen year old donors must have parental permission. Blood Services form must be used.

Weight - At least 110 lbs. No current health problems.

Can not have had major surgery within past 6 months.

Can not have had major dental surgery within past 6 months.

Can not have had tooth extraction within past 72 hours. Can not be pregnant now or in the

past 6 months. Can not have been in malaria endemic area in past 3 years.

months. Can not have had: viral hepatitis or 'yellow jaundice," malaria, diabetes (requiring insulin or oral drug therapy), surgery for cancer, other

conclusions, Supak says,

Controlling Volunteer Sunflowers treatments were found to be cording to Abernathy's

Lubbock - High Plains farmers who grew oilseed sunflowers in 1975 probably will be fared with potentially severe volunteer sunflower problems this crop season.

Dr. James Supak, a Lubbock-based area agronomist for the Texas Agricultural Extension Service, says that the volunteer seed from last year's 325,000 acres of sunflowers have had little chance to germinate or rot during the rather dry fall and winter months. He believes they'll begin cropoing up in March when the soil warms up, and growers will be faced with varying degrees of volunteer pro-

"Many growers already have attempted to reduce this weed problem by shredding and disking sunflower stubble shortly after harvest to encourage fall germination and eventually winter killing of volunteer

DAVID CATES

983-3273

have deep-broken their fields with the intent of burying the seed too deep for germination, thus causing them to gradually rot in

Supak says that virtually the entire 325,000 acres planted to sunflowers have been or will be rotated to other crops. Farmers will need to seriously consider best weed control methods for their farm situation.

"Some of the 1975 sunflower acreage is being double-cropped with wheat," Supak explains. "Invariably, volunteer sunflowers emerged with the wheat seedlings but were destroyed by the first freeze in the fall. The second volunteer crop will probably emerge in March when soil temperatures reach or exceed 50° Fahrenheit. Unlike the fall crop, the volunteer sunflower seedlings that emerge in seedlings." he says. "Others __March will probably be

much more tolerant to cold temperatures and will have to be controlled with

herbicides." The agronomist recommends from 0.5 to 1.0 nounds of 2, 4-D applied after the seedlings emerge. This, he says, should not only control sunflowers but will also eliminate other winter weeds such as tansey

mustard. Supak says volunteer sunflower control in field crops such as cotton and soybeans poses a more serious problem. In 1975 Dr. John Abernathy, weed researcher with the Texas Agricultural Experiment Station in Lubbock, tested a number of preplant incorporated (PPI), pre-emergence (PE) and post-emergence herbicides to determine their effectiveness in controlling volunteer sunflowers. None of the 25 treatments tested provided satisfactory control. The best treatment (Caparol plus MSMA applied as a post-

ess than 50 percent of the volunteer seedlings. "With these crops," the Extension Service specialist says, "growers will have to depend largely on mechanical tillage to destroy volunteer plants. Where feasible, it would be advantageous to delay listing until after soils begin to warm up in March. If rainfall occurs before this time, part of the volunteer crop will emerge and can be destroyed by the listing operation. After the soil is stirred during listing, more seed will germinate and emerge after a rain or a preplant irrigation. These can be

directed spray) controlled

planting "Additional seedlings probably will emerge after the soil is stirred during planting," Supak adds. "Cul tivation or a post-emergence directed application of Caparol plus MSMA can be used to kill many of these seedlings. Since sunflower of the family . . . assuring equality of benefits. If your son is ready to seedlings will tend to emerge simultaneously with cotton, the post-directed herbicide treatment may be of limited value except where cotton is planted on

About Half Of Normal . . . Crying Time? . . . April 15 Important To Agriculture . . . Exports Significant For

Take a look at the rainfall totals for various crop reporting districts in Texas and you can understand why many of the state's farmers are worried about lack of

More than half of the crop reporting districts report rainfall at half of normal for the last three months of 1975. And according to statistics for the first half of January in the state, only the east Texas area has had as much as a half

Only the southern half of the Low Plains and the Upper Coastal Bend section of the state reported above normal rainfall during the late fall and winter months. The far west Texas area had only a third of normal rain during

Due to lack of rain, wheat on the High and Low Plains is furnishing very little grazing with the exception of irrigated stands. Oats are also at a standstill in many areas of the state due to lack of rain.

Although crop producers can wait awhile yet for rain, the livestock producer and dairyman are finding lack of rain "a tough row to hoe."

THIS MIGHT BRING TEARS TO YOUR EYES later this year. The Texas Crop and Livestock Reporting Service notes that the state's spring onion crop is estimated at 23,500 acres. This would be 38 per cent larger than the 1975 harvest and the largest projected acreage since 1964.

If good weather prevails now and through February, harvest of early fields can begin by mid-February and general harvest will be underway in early March.

APRIL 15 IS INCOME TAX DEADLINE for most Texans, and it also is important for agriculture producers. That is the date of the next prospective plantings report. Survey information for the report will be gathered around April 1, which will permit producers to report their plans just prior to the major planting period for spring crops.

It will contain information for corn, sorghum, cotton, oats, barley, soybeans, wheat, rice, peanuts and other crops.

LIVESTOCK EXPORTS FROM TEXAS continue to set new records. During 1975, a total of 25,417 head of livestock were shipped from Texas.

The Texas Department of Agriculture is in charge of livestock are shipped.

Cattle were at the top of the list, followed by dairy animals. Beef breeds purchased by foreign buyers were Angus, Beefmaster, Brahman, Brangus, Charolais, Chianina, Hereford, Santa Gertrudis and Simmental. Brahmans led the total with 1,130.

Mexico was the major importer. Other countries involved in the export marketing venture during 1975 A portable TV stand will included Nicaragua, British Honduras, Bolivia, El Salvador. Panama, Brazil, Venezuela, Ecuador, Guatemala, and

In addition to beef and dairy cattle, other kinds of livestock exported were hogs, sheep, dairy goats, and

porated prior to planting with a rolling cultivator at a rate of 2.5 pounds per acre (on clay loam and sandy clay loam soils) provided about 50 percent control. Similar results were obtained with pre-emergence applications of AAtrex (altrazine) plus oil and Banvel. Both of these treatments controlled from 80 to 100 percent of the volunteer crop.

Supak says AAtrex (altrazine) incorporated prior to planting, applied preemergence or mixed with oil and applied over the top after emergence of seedlings provided 90 to 100 percent control of sunflowers in corn. Banvel applied postemergence provided equally effective control. Bladex applied pre-emergence and Evik plus surfactant applied as a post-directed spray also provided satisfactory sunflower control in corn.

"It was of interest to note that after Dr. Abernathy destroyed his test plots in July, no additional volunteer seedlings emerged," Supak says. "This indicates that all the volunteer seed already had either germinated or rotted."

He says in view of Abernathy's research findings, he would recommend that sunflower land be rotated to corn or sorghum where AAtrex, heavy rates of Biadex, Milogard, Evik or Banvel may be used to control volunteer sunflow-

Retation with cotton or soybeans should be avoided. he emphasized.

The failure of U.S. fermers to indicate 1976 as high as most had expected doubtless disappointment with crops of the past two Criswell of Idalou, President of Plains Con-Lubbock

U.S.D.A.'s Planting Intentions Report rela revealed producer intentions to plant just a acres to cotton in 1976, up 1.6 million and is but far short of the 11.5 to 12.5 million age the industry were previously forecasting

"Many in the industry, especially in the many Criswell notes, "are still of the opinion the million acres will be planted in 1976. They be For more information on fairly good cotton prices on today's mai pressed state of prices for the major competent grain sorghum, corn and soybeans."

These price factors will have a major of plantings, Criswell agrees, "but human natures many farmers will have a hard time forgetting and low prices of 1974, the low yields of 1976 returns from both crops. So while national may in fact come to more than U.S.D.A. million this year, the total may not go nearly are thinking.

The 25 counties covered by PCG plantel 2.7 million acres to cotton in 1975 and there ment that this figure will go up in 1976. Howard may be is a matter of speculation and is much commodity price relationships and moistir planting time.

Criswell doesn't think there will be more than increase over 1975 on the Plains. He reasons the lar emphasis on increasing increase (135,000 acres) would bring the areas a little above the 2,825,000 acres planted in It Trimble comes from the the record acreage seen since 1952.

Also, he continues, sunflowers in 1976 and tario, Canada, where he peting for available acreage, which was not the spent the past two years as 1973 year. "And, assuming there is no change an assistant professor of ground moisture situation between now a expect a 1976 increase in the amount of cotton row patterns," the PCG official states, adding may not materially affect production, it will acreage, especially in "light-water" areas.

Interesting to note is that, aside from 1975 and that could go to cotton in 1976, there is little panding cotton acres in the non-irrigated area with only light irrigation. Generally speaking covered by Crop Reporting District 1-South counties, which had about 2,300,000 acres of [87] total. District 1-North, where irrigation water plentiful, planted only 400,000 acres to cotton

"These factors alone, not to mention a number may change between now and planting time, against any spectacular surge in cotton acreaged 1976," Criswell concludes.

Pheasants Need A Helping Hand From The Farmers

is a remarkable bird in more ways than one. It is the most colorful gamebird found in Texas. It has been described as having characteristics of other animals, such as sly as a fox, healthy as a horse and as many lives as a cat, when it comes to outsmarting hunters or enduring adverse

climatic conditions. Since its introduction into Texas in 1939, the ring-neck has slowly increased its range and numbers in the Texas panhandle. Eleven counties now have pheasant populations that can be considered moderate and well established. Most sportsmen, and many landowners, in the Texas panhandle would like to see the ring-necked pheasant expand its range and increase its numbers.

A closer look at the pheasant's habitat needs will provide the answers that will enable it to prosper throughout more of the high and south plains areas. Food and cover are the critical habitat needs. Without good food and adequate cover throughout the year, the pheasant cannot prosper.

Being a seed or grain eater, the bird has established itself in the irrigated croplands that have crops,

such as small grains, corn, grain sorghum and soybeans as a significant part of the cropping systems. Following the harvest of grain crops, there is abundant grain and seed available to the pheasants and other game birds, such as dove and quail.

Soil Conservation Service personnel made a survey of waste grains during the 1975 harvest season. The survey was made in eleven panhandle counties and was made up of 53 samples. Crops sampled were sunflowers, corn, grain sorghum and soybeans. Raadom samples were collected following harvest and calculations extended to show the average pounds per acre of waste grains available as feed for pheasants or other birds.

The survey revealed that sunflowers averaged 38 pounds of waste grain per acre, grain sorghum 89 pounds per acre, corn 113 pounds per acre and soybeans 138 pounds per acre. Projecting these figures to the total acreages of these crops under irrigation in the Texas panhandle, shows there is ample food for gamebirds on the ground, immediately following harvest. To be beneficial

to the gamebirds on a long term basis, these waste grains and crop residue must be left on the soil surface through the critical winter months. This can be achieved by residue management practices, such as deferring all tillage practices as long as possible or adopting minimum tillage or no-tillage practices. Chiseling or one time discing will leave most of the crop residue and waste grains on or near the soil surface and available as food and winter

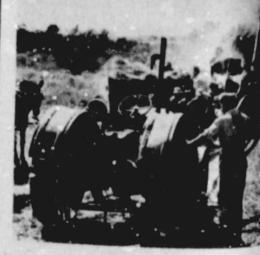

cover for wildlife. Proper crop residue management provides other benefits than food and cover for wildlife. It protects the soil from wind erosion, it holds percipitation, in the form of snow, in place for absorption into the soil and it prevents crusting of soils from rains, reducing runoff and allowing better utiliza-

tion of available moisture. Corn and grain sorghum residue provide the best winter cover for wildlife in the panhandle. Sunflower residue provides the least soil protection and wildlife cover and therefore annual cool season cover crops, such as rye or winter peas, are required to provide adequate soil protection and wildlife cover.

Leaving fence rows, odd areas, equipment yards, playas and abandoned farmsteads in natural weedy vegetation during the fall and winter months provide excellent cover for nonmigratory game birds, such as the pheasant or quail. In the panhandle eroplands where the pheasant makes his home, there is very little natural vegetative cover. Farmers who adopt crop residue management prae

pheasant with the necessary food and cover throughout throughout the lean winter months will eroplands.

The Floyd Philosopher Looking For A New York Style Bank Wity A Friendly Shaky Loan Department

Editor's note: The Floyd Philospher on his Johnson grass farm thinks he has discovered a new idea in banking, his letter this week

A friend brought me a newspaper Dear editor: yesterday saying he hoped it would help speed my recuperation from my recent illness, and I can now report, without the aid of X-rays and a battery of laboratory tests, that I am just about cured. Any time you can read the front page of a paper three days and not have a relapse you're bound to be hale and hearty, makes no difference what it was you were ailing from.

Anyway, what caught my attention was an article about two New York banks, classified as the second and third largest in the country. Although the two are in sound financial shape and are making satisfactory profits, still they have two or three hundred million dollars out in questionable loans-loans they're going to have real trouble collecting, in fact may have to write off as

losses. In short, as the article said, they're shaky Now this kind of people, but that's because

Crane from Woodbridge,

community in the form of memorial gifts to the Norma Allen Memorial Library at First Baptist Church, we want to invite -you to become acquainted with our library. Any resident of DONNY MONK AND this community may use the church library by filling out a library membership card, agreeing to abide by the same tour of the U.S. in 1975 library usage regulations that church members observe. Books are checked out for a two week period. At this time, fines are not charged for overdue materia

lost items are to be replaced by the user. Cassette tapes are checked out for a period of one week. During week days the church office is open and Secretary Peggy Dyess or Brother McGuire will open the library for you and accept returned items. On Wednesdays a library staff member will be on duty. This is the best time to come by, especially for your first visit. The library is located in the front hall just down from the church offices.

If you are physically unable to leave your home but would like to use the church library, call the church office and leave your name and number with the secretary. She will inform the library staff and you will be contacted by a staff member. Over 3600 books and more than 100 tapes on a wide variety of subjects are available. We will be reviewing some of these each week. Reading and listening materials are

abundant in America. It is our goal to select from the best of these for church library users. HANSI, THE GIRL WHO LOVED THE SWASTIKA by Maria Anne Hirshmann has been a favorite with many of our readers. HANSI'S NEW LIFE promises to be equally popular. Hansi was a leader in the Hitler Youth Movement. Her world lay in ruins about her, destroyed by the man she had been taught to worship as a god. The true God led her to

a new life in a new world, America. Maria Anne's story is an mazing account of hope and renewal on a very human scale. WITH GOD IN A P.O.W. CAMP is the moving account by Ralph Gaither of his capture and seven year imprisonment in North Vietnam. This is available in cassette tape as well as the book by the same title. It is an excellent tape for the whole family to enjoy together.

COME AS YOU ARE by Orval Austin is what I sometimes refer to as 'hidden treasure.' It is hidden because t has been on the shelf and unnoticed for awhile. We tend to reach for the newest book, forgetting that a book is new until you have read it. This is a collection of little discussions divided into six general areas. The first two are "bored with yourself" and "when the going is tough." I'm glad I picked it up I hope you will too.
