

Salad Supper And Program To Highlight Women's C Of C Event

April 5, in Floydada for the ladies of the annual supper and program sponsored by the Women's Division of the Floydada Chamber of Commerce.

and join with others for a style show, a fellowship and entertainment at the Massie Activity Center at 7 p.m.

promises to be one of the most enjoyable occasions of the year. Merchants are furnishing clothing and other items contributing some 60 items. There will also be a musical program from the Floydada Chamber of Commerce. Betty will narrate the

program for the style show. Models and businesses furnishing ensembles will be Mrs. Jack Stansell and Lori Vinson for Bealls; Mrs. Larry Barbee, Shayla Barbee and Mrs. Aldine Williams for Hagoods; Mrs. Jerry Thompson, Mrs. Robert Stovall and Angie Shurbet for Hales; Kathy Green for The Loft; Mrs. Andrew McCulley and Nesa Jackson for Peggys Bontique; Daralyn Williams, Mrs. David Cates and Mrs. James Race for Sears; and Rhonda Bennett, Tiffany Bennett, Ofilia Arellano and Kelly Lions for Montgomery Ward.

Door prizes are being donated by C&J Floral, Buddy's Food, Leonard's Cafe, Betty's Place, Piggly Wiggly, Ponderosa Meat, Babe's Auto Service, Producer's Co-op Elevator, City Auto, Hesperian, Kirk & Son, Solomon Jewelry, Stewart Printing, Dysons, Perrys, Arwine Drug, Rainer & Co.,

Geva's Gifts, White Auto, Parker Studio, Caprock Motor Parts & Hardware, Bishop-Ramsey Pharmacy, Collins Implement, Reed Ford Sales, Oden Chevrolet-Olds., Azteca Cafe, Parker Furniture, Thompson Pharmacy, Builders Mart, Peggy's Beauty Salon, and Cozy Corner owned by Sue Moore.

Orders will be taken during the evening for red crepe myrtles which the Chamber of Commerce women are selling to help beautify Floydada. They are \$2.25 each, in gallon buckets, which will be ready to pick up April 21st. You may call in orders by phoning 983-3163 or 3-3434.

Year's membership to the Women's Division of the Chamber of Commerce is \$5. If you wish to join you may do so the night of the salad supper. One of their main projects is to strive to keep your city beautiful.

GIFTS GALORE! These are just a few of the door prizes that will be given away by Floydada merchants Monday night at the salad supper, style show, and program being sponsored by the Women's Division of the Floydada Chamber of Commerce. The event will be held at the Massie Activity Center at 7 o'clock. Displaying gifts are Chamber of Commerce members, left to right, Mrs. Johnny Harris Jr., Mrs. Tommy Farris and Mrs. M. J. McNeill. 81 FLOYDADA, FLOYD COUNTY, TEXAS 79235 SUNDAY, APRIL 4, 1976 NUMBER 28

Floydada Lions Roar Saturday, April 10th

Floydada Lions Club has announced it will take over KFLP radio, April 10. This will be the first time the club has ever done this.

The radio station sets for the local club and all other stations in the area. The Lions Club to its many worthwhile projects. Lions sell, "write" the radio station "operate" the radio. There have been many versions of what

really happens during this 'coup,' said Art Ratzlaff who is supposed to keep things organized. "We hope to add a bit more organization to the program this year," he added, "But we guarantee nothing!"

Advertising is now being sold for the day's program by club members. Activities, special events are being planned by different members of the club to provide entertainment all through the day, beginning at 6 p.m. and signing off at approximately 8 p.m.

Sidewalk Arts, Crafts Show Set

The Floydada Lions Club have announced their Sidewalk Arts and Crafts Show for May 22 in Floydada. The event is planned on the day of Old Settlers, with hopes area artists and craftsmen will have a larger attendance and potential customers, said Boone Adams, Lion's Club president.

Floyd County's Pioneer Reunion and the Arts and Craft Show will climax the city's Bicentennial Week planned from May 16 to May 22.

Artists and craftsmen are urged to bring their own display equipment, and report to the Lemondrop Saloon headquarters for space assignment. Displays should be set up by 9:30 a.m. and remain until 5:30 p.m. Sidewalk space is free. Inside the building there will be available space for those wishing to rent a space 8 feet by 8 feet at \$10 each. The building will also be available for those wishing to have booths for food and bazaars.

Those wishing to display items are asked to call 983-3434 or 983-2191 to register. Checks for inside space may be mailed to Floydada Lions Club, Floydada 79235. Early reservations get the best space. At past shows every inside space was sold out early, so get your reservations in now, Adams said.

Persons entering items are also asked to send a picture, if one is available, of you and your entries, along with description.

Lions Club Officers Elected

Floydada Lions Club elected officers during their luncheon meeting held Thursday. They will be installed the latter part of June.

Ray McDonald was named president; Tony Whitfill, 1st vice-president; Paul Westbrook, 2nd vice-president; Wilson Bond, secretary-treasurer; Ian Moore, Lion tamer; and Art Ratzlaff, tail twister.

Donnie Galloway and George Sweatt were named one year term directors and Bob Copeland and Jimmy McGuire, two year directors.

High School Play At UIL

High School play "A Night's Dream," under the direction of Holly Moritz, was on the program in District UIL competition at Idalou Thursday. The play will be presented for the first time in the district on Thursday night April 8 and Haral Memorial approximately 7:30.

Best Actor in UIL was Terry Wilson, who played Weaver in the play, "The Mender." Named to the cast of nine were Grant and Shonda Fulton. Mention went to Greg Derek Cheek.

BAND BOOSTER OFFICERS FOR 1975-76...were elected at a meeting held Tuesday night in the Savings and Loan office, Floydada Branch. Pictured left is Bill Hardin, who along with his wife, Betty, are pictured, are treasurers; Jerry and Julie Finley, first vice president and in charge of the band; Don and Sue Chesshir, president; Jaynette and Max Harrison, 2nd vice president in charge of transportation; Ann Helms, and husband, Adrain, not pictured, 3rd vice president, and in charge of raising committee; Carolyn Cheek, secretary; and Peggy Dyess, calling committee. Not pictured are Ann and Jimmy Wilson, reporter. (Staff Photo)

Drive Sunday For Donations To Cancer

Door bells will be ringing this afternoon (Sunday) as the house to house Crusade for Cancer gets underway. Volunteer workers will meet at Lighthouse Electric at 3 p.m. to view a film, then will leave immediately for their canvas of city residents.

Crusade workers will be handing out educational leaflets as they ask for your donations to the American Cancer Society. The leaflets seek to impress upon people the necessity of periodic health checkups for the discovery of cancer in its earliest and most curable stage.

To date, the ACS has spent more than \$375 million for the support of projects, institutions, and personnel involved in every important area of cancer research and clinical investigation. This involved nearly 9,000 grants, including major research programs at leading cancer centers.

The Society supported the development of the Pap test which has helped cut the uterine cancer toll in half during the past 25 years; advances in drug therapy and radiation which have vastly improved the treatment of Hodgkin's Disease; and the improved treatment of leukemia which has greatly increased the number of 5 year survivors. "This program is produced by the money the American people generously give during the Cancer

Crusade; your continued support will help wipe out cancer in your lifetime."

Mrs. Gene Arwine, Floydada Chapter president said.

Lighthouse Announces

Winners Of Youth Tour

Names of winners of an oratorical contest sponsored by Lighthouse Electric Cooperative, Inc. were announced this week. High school students whose speeches qualified them for an all-expense paid Rural Electric Youth Tour trip to Washington, D.C., are Mike Bean and Sharon Slough. Sharon is the daughter of Mr. and Mrs. Franklin A. Rutledge of Plainview. She is assistant editor of the school newspaper, in the Acappella Choir, the student council, and is in U.I.L.L. competition in journalism. Mike, the son of Mr. and Mrs. Don

Bean of Floydada, is involved in tennis, the school newspaper, and was recently elected president of the Student Council. Last year Mike went to state in U.I.L.L. competition in journalism and was vice-president of the Student Council.

Sharon and Mike will join young people from all over Texas. They will travel by bus to the nation's Capitol and on June 16, they will meet with youth from all over the country who have won contests like the Government-in-Action contest sponsored by Lighthouse Electric Cooperative.

ORATORICAL CONTEST WINNERS...Sharon Slough of Plainview and Mike Bean of Floydada. The two were named winners of an all-expense paid Rural Electric Youth Tour trip to Washington, D. C. in June for their speeches in the contest. The event was sponsored by Lighthouse Electric. (Staff Photo)

Special Survey Team

To Be Working In

Floydada Area

OAK RIDGE, Tenn. -- A special survey team supported by the Energy Research and Development Administration will be working in the Floydada area for the next several weeks to take samples as part of a program to assess United States uranium resources.

The objective of this program, which is being conducted on a nation-wide basis, is to complete a systematic survey of the nation's surface waters, groundwaters and stream sediments by 1980. One of the goals of the program is to assist private uranium exploration efforts by furnishing information which will identify potential new areas favorable for uranium exploration.

The program is being conducted under the overall management of the Grand Junction Office of the Energy Research and Development Administration. Union Carbide Corporation, a contractor for ERDA, is responsible for the Floydada area.

The survey will include collecting water and stream sediment samples at various spacings throughout the nation. The samples will be analyzed and the data plotted on maps. As completed, these maps will be placed on open file at various locations across the United States.

To Return

To Hesperian

James Huggins, editor of The Lockney Beacon for the past two years, will return to The Hesperian in two weeks as news editor, Hesperian editor-publisher Wendell Tooley announced today.

Charles Chesser, a native of Pettus, Texas, will replace Huggins as editor of the Lockney paper.

WATER SAMPLING --Survey teams sponsored by the U. S. Government have begun collecting water and stream sediment samples throughout the nation as part of a comprehensive effort to find new sources of uranium to supply future energy needs. This team will be in the Floydada area the next several weeks. The survey, called the National Uranium Resource Evaluation Program, is being carried out by the Energy Research and Development Administration with the assistance of the U. S. Geological Survey and state agencies. (The surveyor in this photo is James Lore of Oak Ridge, Tennessee.)

Corn Research Underway At Halfway

HALFWAY - "Research package" is the term used by Texas Agricultural Experiment Station leaders to describe a multi-phase program getting underway which they hope will provide some solutions to corn production problems on the Texas High Plains.

Research studies comprising the package will focus on fertility, water, insects, varieties and weed control, with virtually all the work to be conducted at the Experiment Station at Halfway.

Seven research scientists assisted by associates and technicians will join in the effort. Resident director Dr. Bill Ott of Lubbock says the research package will bring the Experiment Station's best resources to bear on needs and problems facing corn producers in this area.

"Corn acreages have increased so rapidly in the past five years on the Texas High Plains," he said, "that we are doing everything possible to give this crop immediate attention in terms of improved varieties, how to use water and fertilizer more efficiently, and how to control major insect pests of corn."

Ott added that as a spin-off to the research he hopes improvements can be found in cultural practices as well.

He said that in 1975, about one million acres in the 42 county High Plains area were planted to corn. This compares to 700,000 in 1974, most of which were grown for grain and the other for silage. In 1965, only 50,000 acres of corn were planted with practically all of it for silage.

Nearly all the corn in this area is grown under irrigation, Ott added. Yields of 130 bushels per acre or more have far outlasted the rest of the Texas acreage, most of which have been grown without irrigation, averaging 45 bushels.

Ott said that corn is adapted to the soils and climate of the High Plains

and responds to proper irrigation, fertilizer and management practices. Despite these distinct advantages, corn uses relatively more water than most crops, is plagued by the Southwestern corn borer and several other insects, and more needs to be known about fertility requirements.

One of the most important needs, Ott said, is that of new breeding lines suitable to the High Plains area.

Dr. J. W. Collier, a corn geneticist with the Experiment Station at College Station, said that evaluations would be made of breeding lines that have characteristics needed in the High Plains area, such as heat tolerance, corn borer resistance, lodging resistance and improved leaf type for increased photosynthesis.

New hybrids, Collier added, should be capable of performing under high plant populations, well above the 20,000 per acre mark, a level needed to achieve a 200-bushel yield.

To handle the irrigation part of the research package Dr. Bill Lyle, newly appointed agricultural engineer at Halfway, will work jointly with Dr. Charles Wendt and Dr. Otto Wilke of the Lubbock Experiment Station. Their research will be in addition to the extensive work being conducted at Etter, north of Amarillo, by Dr. John Shipley, Experiment Station scientist at Bushland.

The three men plan to investigate alternate furrow irrigation, the use of tensionmeters in applying water at various stages of growth and comparing yields with water applications during these various stages.

Dr. Charles Ward, newly appointed research entomologist at the Lubbock Experiment Station, will conduct studies dealing with insect pests of corn. Ward's work will be in addition to research being carried out by Dr. Norris Daniels of the

Bushland Experiment Station who has done extensive studies of corn borer control. Daniels will continue these studies.

Ward said major efforts will be centered on the Banks grass mite and other species of spider mites which have become economically harmful insect pests on the High Plains and in New Mexico, Colorado, Oklahoma, Kansas and Nebraska.

His first objective, he said, will be to evaluate effectiveness of several new pesticides labeled for corn insects, and determining the population levels necessary before economically damaging thresholds are reached.

Long-range plans call for evaluations of corn lines that carry host plant resistance to mite damage. Pest management concepts will be used in determining the roles of predator enemies of corn insect pests.

Ward hopes to develop a pest management strategy that utilizes natural insect populations to control insect pests as well as moderate chemical control measures and cultural practices.

Observations also will be made of the Southwestern corn borer, corn rootworm and white grub.

Dr. Art Onken, Experiment Station soil researcher at Lubbock, will carry out studies dealing with fertility requirements of corn. Using soil test data and projected yields for given nutrient levels, Onken plans to correlate nutrient requirements of corn at various stages of growth.

Weed control studies round out the research package. Dr. John Abernathy, Experiment Station weed scientist from Lubbock will evaluate preplant, pre-emergence and post-emergence applications of corn herbicides to find the most effective chemicals against economically important annual grasses and perennial weeds.

Included in Abernathy's studies will be the effects of rotational herbicides, or those which are used as preplant control agents for weeds in cotton and soybeans. Abernathy plans to measure their residue effects on corn which is planted following cotton, soybeans and other crops.

Ott said that while the research, which could take from three to five years or more, may yield important solutions to some cultural problems, possibly the greater hazards of corn production are economic in nature. Inflation drives up both variable and fixed costs, he said, and market fluctuations can discourage corn production from one year to the next.

"If we can save farmers and consumers money and resources as a result of these research efforts," he added, "then it may be that the effects of increasing costs can be partially reduced."

Democrats will be welcome, and that there will be no charge for the seminar.

The Texas Democratic Party Participation Program Workshop is a major aspect of the Affirmative Action Program to teach the traditionally underrepresented groups, such as women, young people and ethnic groups, how to effectively participate in the Democratic Party delegate selection process, so that their viewpoints can be heard in selecting the Democratic presidential candidate.

It is an expanded program to also bring all participating Democrats up-to-date as to the new rules and techniques to be utilized in the political process this year. As a consequence, all County Chairmen and Precinct Chairmen are invited to attend.

The topics will be the new presidential primary; new rules as related to precinct and county conventions; precinct organization; the new voter registration law; and the use of campaign volunteers.

Stenholm pointed out that this is the first program of its type in the history of the Democratic Party of Texas, and is a massive program to encourage participation by the grass roots Democrats and the traditionally underrepresented minorities to train them to be effective political participants.

All persons interested should contact Marguerite Snyder or Charles Stenholm or their local Democratic County Chairman.

Food Crisis Big Problem

PLAINVIEW... "The food crisis is a big problem and the farmer is always pushed for a high yield," which is the basis for the research being done by Wayland senior, Charlene Steele.

Miss Steele's research involves isolating soil fertility problems and then finding solutions and she has been very successful.

According to Miss Steele, farmers have previously resorted to the use of anhydrous ammonia and other harsh chemicals to rapidly obtain high yields. However, these chemicals have destroyed bacteria in the soil which are vital to fertility.

"Bacteria produce plant growth hormones" and they break down minerals in the soil to make them available to the plants.

One example of her search is a mixture for rice paddies. In this flooded environment the plants are deprived of oxygen and the soil becomes acid, deactivating the bac-

Texas Industry Week April 1-7

Texas has come out of the national recession with flying colors, although, admittedly, we never did feel the pinch as badly as the other states in the union.

The Texas Industrial Commission reports that in 1975 nearly 200 major new industries set up shop in Texas and almost 300 expanded.

In response to a request from Governor Briscoe, more than 37,000 jobs for unemployed and underemployed Texans have been identified through the Governor's Job Creation Campaign to make TEXAS FIRST in economic development. This surely indicates Texas is First.

Industry confidence in Texas has given Texas confidence in industry. Texas Industry Week is a perfect opportunity to thank our state's industry for Texas' sound economic base.

Cotton Prices Steady To Weaker

Grower prices were 75 cents to \$1.50 per bale lower during the week ending March 26, according to Paul R. Dickson, in charge of the USDA's Cotton Classing Office in Lubbock.

Farmers sold mixed lots of mostly grades 32, 42, 33 and 43; staples 29 through 31, mikes 3.2 and lower for 42.50 to 44.00 cents per pound.

The USDA's Agricultural Marketing Service reported trading was slow and growers offered cotton in light volume.

Demand was light, Dickson said.

Predominant High Plains Cotton grades this season were 41, 42 and 52. Grade 41 accounted for 14 percent, 42 and 35 percent and 52 tallied at 13 percent. Last year's predominant grades were 41, 51 and 42. Grade 41 accounted for 20 percent, 51 was 26 percent and 42 registered 25 percent of samples classed.

Twenty-three percent of this crop was reduced one grade because of bark. Bark effected 35 percent of last season's samples.

Average staple length of the 1975-76 crop was 30.3 thirty-seconds of an inch compared to 31.8 thirty-seconds for 1974-75.

Micronaire readings in the premium range of 3.5 to 4.9 accounted for 11 percent of this crop while 21 percent registered premium last year.

Pressley strength averaged 85,000 pounds per square inch this year and 83,000 last year.

Farmers averaged about \$87.50 per ton for their cottonseed this year compared to \$122.50 per ton last season.

Samples from 1,228,000 bales were classed for High Plains farmers this season while 1,110,000 was the total the year before.

USDA Proposes Time Limit For Providing Food Stamp Benefits

Households eligible for food stamps would have to be given a chance to purchase their coupon allotment within 45 days after the state welfare agency receives their application, under a proposal announced today by the U. S. Department of Agriculture (USDA).

In a related development today, USDA also issued final regulations establishing permanent procedures for restoring lost food stamp benefits.

The proposed amendment to USDA's food stamp program regulations entitles households to any food stamp benefits lost because the state agency delayed the opportunity to purchase stamps for more than 45 days after receiving any eligible application.

For subsequent certifications, benefits would be retroactively restorable if opportunity to purchase food stamps was delayed more than 15 days after expiration of the household's certification period. The proposal sets the first of the month in which the first of the month in which the 45th day, or 15th day, falls as the day from which restorable benefits should be calculated.

Food stamp households pay a sum of money (purchase requirement) based on family size and income, receiving food stamps of greater value than the amount paid. However, certain households with little or no income can get stamps without paying a purchase requirement.

The proposed amendment requires state agencies to restore lost benefits to these "zero purchase" households by increasing their monthly food stamp allotment by up to 50 percent, until all lost benefits are restored.

The final regulations on benefit restoration procedures require state agencies to take immediate action to restore lost food stamp benefits as soon as they detect an administrative error resulting in loss to a household, such as when benefits are wrongfully denied, delayed or terminated.

The agency must notify the household of its entitlement, the amount of restorable benefits and the method of restoration. Under the regulations, the state must restore benefits by reducing the household's purchase requirement.

The state also must advise the household of its right to appeal through the fair hearing process if it disagrees with any action taken by the state in calculating or restoring lost benefits. If a household feels it is entitled to lost benefits but the state does not, the household must request a fair hearing. Lost benefits would be restored only if the fair hearing decision is favorable to the household.

These final regulations, and the proposed amendment on the time limit for providing food stamp benefits, are scheduled for publication in the Federal Register of Friday, March 19. Public comment is invited on the proposal. Interested persons should send written comments, suggestions or objections to Vernon R. Morgan, Acting Director, Food Stamp Division, Food and Nutrition Service, U. S. Department of Agriculture, Washington, D. C. 20250, no later than April 19.

teria. This causes certain nutrients to be unavailable to the soil. Nitrogen - which is considered an important plant nutrient - must be added as well as certain algae and bacteria which are adapted to the acidic, oxygen-poor environment.

In West Texas an inoculum, or a liquid slurry, is added to the soil since "zinc, iron and phosphorous are our three major problems here." The microorganisms in the soil make these minerals available to the plants as well as converting atmospheric nitrogen to a form which can be used by plants.

This new concept in soil fertility, admits Miss Steele, is not her own, but is that of a German microbiologist.

Miss Steele began working with the idea in 1974 with Dr. Harold Reese, biology department head, for Soil Enterprises Corporation of Mississippi. Recently, Gary Landers, freshman, has been assisting.

A commercial market for the inoculum is gradually opening. However, since the concept is new, the commercial enterprises are encountering problems such as storage of the material. Even if the inoculum is dampened it becomes ineffective.

Don't wait! Get estate tax guidance now. This is part of what W.B. Criswell and his associates at PCG's meeting April 7 when he reports on the latest tax developments for the past year. The meeting will be held at the Southpark Inn.

Criswell recently spoke in Washington, D.C., supporting passage of legislation to reduce the tax burden for farm and small business owners. "So unless we all avail ourselves of the family holdings to pay an unreasonable tax burden," he said, "we will be paying a heavy tax burden."

The estate tax exemption should be present \$60,000 to at least \$200,000. Criswell and his associates are also active in the family farm and means committee March 15, 1976. The committee is studying the value of farm land should be its value for "fair market" value which often reflects a value for other uses, he continued.

I believe the unfairness of the IRS estate tax can be shown along with the unfairness in this country on producers and well said on his return from Washington, D.C. of an election year and the broad consequences of possible loss of Federal revenue, it doesn't do anything about it before next year.

Meanwhile, notes the PCG President, "the consequences of heavy estate taxes. 'Dad's' plan for it in such a way as to preserve for our estates as possible."

Criswell, along with PCG Executive Vice President Johnson, also will report on the association's isolation, regulations and administration, and pricing, boll weevil protection, cotton production, and the establishment of textile manufacturing other activities.

Featured speaker for the half-day affair will be Assistant Secretary of Agriculture for International Commodity Programs.

Other "out-of-town" on the program announced, will be David Cox, Director of Development for Cotton Incorporated, and Fashion Director of the Dallas Apparel Manufacturers Association.

"We think we have arranged a worthwhile program, including a period in which questions are invited speakers and PCG officials conduct raw cotton marketing, retail sales of cotton operations, or PCG activities."

"These are subjects that have a significant impact on the lives of every High Plains resident, so we urge you to attend," he emphasized.

INSUR-MATION

DAVID CATES 983-3273
 JAMES RACE 652-3869

My son has a motorcycle which he rides only on lots, fields, etc., never on public roads. Is any insurance necessary?

Yes. Coverage is necessary regardless of where a motorcycle is operated. A person is legally liable for his own actions... whether on public roadways or private property. For insurance and liability coverage, motorcycles fall into the automobile category. The basic automobile policy is utilized. However, primary rating for the cost of the insurance is based on weight, engine size and use. Therefore, a small dirt-type bike would take a much lower rate than larger motorcycles such as those used on the highways.

Floyd County Draft Board Terminates May 8

AUSTIN, TEXAS-Colonel Melvin N. Glantz, State Director of Selective Service Local Draft Board in Texas will be terminated on May 8, 1976. Similar actions will occur in all states on that date as Selective Service continues to reduce its operational capability. On February 28th all draft board offices were closed. Texas has 525 members assigned to the 96 draft

boards of the state. These board members who have served in an uncompensated capacity were responsible for classifying Selective Service Registrants. Since all registrant processing has been halted there remains no active mission for the draft boards. Only a small stand-by draft organization will remain to maintain emergency plans and train a small pool of reserve and national

guard officers in procedures for restoring the Selective Service System in the event of a National emergency. The members of Local Board No. 45 serving Hale, Motley, Swisher and Floyd Counties are as follows: Romey Fennell, Jr., Plainview; Raby Webb, Matador; Davis L. Kirk, Floydada; Raul Vera, Plainview.

VETERAN'S NEWS

EDITOR'S NOTE: Following are representative questions answered daily by VA counselors. Full information

is available at any VA office. Q - How is the GI Bill allowance paid for correspondence courses? How much entitlement is used for such a course? A - Instead of a monthly allowance, the VA will pay 90 per cent of the cost of an approved course. Payments are made quarterly according to the number of lessons completed by the veteran and serviced by the school. The veteran's entitlement is reduced by one month for each \$270 he receives.

Veterans Administration (CHAMPVA) is available to the spouse or child of a veteran who has a total disability, permanent in nature, resulting from service-connected cause, or to the surviving spouse or child of a veteran who has died as the result of a service-connected disability. Q - How long will it be before I start receiving my pension checks after I receive my award letter? A - Approximately two weeks from the date you are advised that your eligibility has been established.

Q - Who is eligible for CHAMPVA? A - The Civilian Health and Medical Program of the

Role Cited In Briscoe

Week Proclamation

March 31 - April 10, 1976 Driving Week in Texas is being observed by 600 training agencies in Texas coordinated by the Texas Safety Association. In 1975, more than 100,000 Texans completed the Defensive Driving Course (DDC). Calling on Texas drivers to drive defensively, Governor Briscoe said that the number of motor vehicles, drivers and miles traveled continue to increase and that

the job of reducing traffic crashes "requires more personal responsibility, individual commitment and consistent practice of defensive driving techniques than ever before." Hugh Scott, Houston, TSA President, cited the fact that Texans who complete the DDC training qualify for a 10 per cent reduction in automobile insurance as a direct personal benefit in the course. The popular training course also is available in a Spanish-language version, and also includes supplemental training in safe motorcycle riding.

Round-Plainview

Miss Steele identified the destruction of the harsh chemical and she may have in addition to the microorganisms compatible with ment.

THDA Annual Meet At Littlefield

LITTLEFIELD-Lamb County Judge Ruth Kirby will be the featured speaker for the annual meeting of the Texas Home Demonstration Association in Littlefield April 8. Floyd county delegates who will attend the day long session include Mrs. Ruth Trapp, Mrs. J. P. Taylor, Mrs. O. G. Mayfield, Mrs. Ernie Widener, Mrs. W. A. Stewart, Mrs. C. L. King and Mrs. William (Bill) Smith.

Site of the event is Littlefield Agriculture and Community Center. Registration is at 9 a. m. with the general assembly getting underway at 10 a. m. The morning assembly will include opening ceremonies, resolutions, credential reports and Judge Kirby's presentation. The afternoon program, which features three workshops on safety, health, recreation and cultural arts, will also include election of officers, a message from the state THDA Board, presentation of the 1976 THDA academic scholarship winner and a business session. Judge Kirby's speech will focus on the meaning of bicentennial celebrations. A member of a pioneer Collingsworth family and a Littlefield resident since 1956, she entered the Texas Tech Law School when it opened in 1967 and graduated in 1970 with a Doctor of Jurisprudence degree, ranking first in her class. She joined the Texas Tech law faculty where she taught for five years. During the summer of 1973 she was a visiting professor at the University of Texas School of Law in Austin. Before receiving her legal education, she worked as an administrative secretary, legal secretary and a public school teacher. The workshops, which begin at 1 p. m. will include discussions on safety measures to take during tornado weather, use of blood for therapeutic purposes and a presentation on quilting in which homemakers will participate. In the group session on safety, Dr. E. W. Kiesling of the Department of Civil Engineering at Texas Tech University will discuss research that has been conducted on movements of tornadoes and on in-resident shelters. Mrs. Nancy Adams, medical technologist at the Brownfield General Hospital in Brownfield, will present information on the function of blood and its therapeutic uses during the health workshop. And in the cultural arts session, two home demonstration club members will present a talk on the art of quilting. Club members will demonstrate how to make yarn dyes. Concluding the day-long annual meeting will be announcements of officer elections and decisions on the location of the 1977 meeting. The District 2 Chapter of the Texas Home Demonstration Association is made up of homemakers from throughout a 17-county area of the South Plains.

Study Club Receives Award

The 1956 Junior Study Club of Floydada received an award of recognition from the West Texas Area of the American Lung Association, March 29th, in Lubbock. Mrs. Jerry Thompson and Mrs. John Dunlap accepted in behalf of the club. The award was presented for demonstrating Smoking Sam in public schools. Mrs. Jack Jordan of Floydada were among those making presentation awards during the annual meeting of the association. Members and friends were also feted at a reception and dinner prior to the business session and program.

Wilson sang "More" before the wedding. Mrs. Chuck Wilson played "The Wedding March" on the accordion.

At the end of the ceremony, Mrs. Rick Mosley played the guitar and sang "We've Only Just Begun."

Sisters and brothers of the couple made up the wedding party. Honor attendants were Miss Deelane Dipprey of Plainview and Lee Carthel. Miss Lisa Dipprey was bridesmaid and Criss Carthel was groomsmen. Flower girl was Nicki Race, cousin of the bride. Ring bearers were Jared McCullough of Lubbock, nephew of the groom, and Licindia Mahagan, cousin of the bride. The feminine attendants wore long dresses of yellow dotted swiss fashioned with high waistslines complemented by white satin ribbon tied in a full bow at the back. They carried bouquet of colonial design featuring white daisies tied with yellow ribbon. When given in marriage by her father, the bride was dressed in a formal length gown of white Chantilly lace, patterned in floral design. The molded bodice featured a high neckline edged in scalloped lace, closely fitting around the neck to center at the throat with a reemboirered lace motif accented with iridescent beads. The gown also had long fitted sleeves of lace and tulle ending with cuffs of scalloped lace ruffling. The natural waistline was complemented in the front by reemboirered lace scallops. The bouffant skirt was enhanced with tiers of Chantilly lace ruffles gracefully continuing into a chapel train. Small clusters of iridescent beads trimmed the dress. Her tiered veil of illusion was held by a lace caplet trimmed in satin ribbon and pearl beads. She carried a cascade bouquet of white daisies and ming fern showered with white satin. After a wedding trip to points of interest in Texas, the couple will be at home north of Lockney where the groom is engaged in farming. Mrs. Carthel is a junior in Lockney High School and is employed with Dr. Paul Glasson Veterinary clinic. The groom is a graduate of Lockney High School.

MRS. RON CARTHEL

Outdoor Vows Unite Miss Dipprey, Carthel

Marriage promises were said at dawn Saturday by Miss Charla Dipprey and Mr. Ron Carthel, both of Lockney. Scene of the double-ring ceremony was the tree grove north of the home of the bridegroom's grandparents, Mr. and Mrs. John T. Carthel. Bunches of daisies were scattered about the nuptial area.

Boyce Mosley, elder of West College and Third Street Church of Christ, directed the exchange of vows. Parents of the newlyweds are Mrs. Betty Dipprey of Plainview and Charles Dipprey of Lockney, and Mr. and Mrs. John Lee Carthel of Lockney. Lesa Wilson and Melinda

Becky Culp Gives Tips On Static Electricity

COLLEGE STATION — Static electricity, making garments uncomfortable and unbecoming, can be overcome—or even avoided, Mrs. Becky Culp, a clothing specialist, says.

"Clothes that cling together or to the wearer have an excess of static electricity. Obtain temporary relief by wiping the garment with a damp paper towel.

"And if several garments

are involved, dampen each garment or between each layer of fabric. This procedure may need to be repeated several times," she said.

Mrs. Culp is with the Texas Agricultural Extension Service, The Texas A&M University System.

She said that clinging also may be reduced temporarily in small areas—such as pant legs clinging to socks—by spraying the underside of the problem garment lightly with an aerosol hair spray.

But before using, be sure the spray won't damage the fabric or the color by lightly spraying a small section on the underneath hem or seam allowance, she cautioned.

"The best solution for removing static electricity is to launder, using a fabric softener. Remove immediately from the dryer when slightly damp. Do not overdry or brush," she said.

She reported that many garments, particularly lingerie, are available with anti-static finishes. Carefully following recommended label care procedures is essential to maintain the anti-static characteristics.

"Cotton and rayon garments do not build up static electricity, but acetates, acrylics, nylons and polyesters are highly susceptible," she said.

DECA students wind up last minute details in preparation of their annual Employer-Employee banquet slated for Thursday night, April 8th at 7 o'clock in Duncan Cafetorium. The event is to honor the D.E. training station sponsors as well as deserving students. Pictured working on the seating chart, left to right are Terri Smith, Retha Bunch, Keith Tooley, Elaine Giesecke and Susie Towler. (Staff Photo)

Annette Jordan's Works Of Art To Be Displayed

WTSU - Approximately 27
works of art by Annette
Jordan, a West Texas State
University senior from
Floydada, will be displayed
from 1 p.m. to 3 p.m. from
April 4 through April 10 in
the WTSU Formal Lounge.

A reception will be held
from 2 p.m. to 5 p.m. April 4
in the Formal Lounge of the
WTSU Fine Arts Building.

Pen and ink drawings,
watercolors, photography
and jewelry will be on
display.

A graduate of Floydada
High School, Miss Jordan is
the daughter of Dr. and Mrs.
Jack G. Jordan of 802 W.
California.

We appreciate all of our
local and out-of-town visitors
who have visited with us
this week.

Mr. and Mrs. D. W. Burke
went out with their family
for ice cream on Wednesday
afternoon.

Thanks to these folks and
to anyone else who may
have brought us items
whose name I didn't receive.
Bonnie Pigg brought us
butter-cups and a corsage
made from egg cartons-cut
into petals. Pauline Sams
brought us egg and meat
styrofoam containers. Lou-
ise Nelson brought magazin-
es. Shirley Stansell brought
butter-cups and egg cartons.

Will close for now. May
God Bless!
Til next time...

STAYCE DAY WITH HER DISPLAY

Stayce Day Has Treasure Of The Month

Floydada Junior Histori-
ans are sponsoring a
Treasure of the Month, and
for April Stayce Day has the
display.

Each month one person
loans something of interest
for display, which is placed
in the trophy case at
Floydada Junior High
School.

The current display is a
collection of Indian artifacts
collected by the Bill Day
family. Included are: arrow-
heads, pottery, monies,
sneakers.

Social Security
Representative
Q. I became disabled
February 15, 1976. I have
been told there is a 5-month
waiting period, and I won't
be entitled to disability
checks until August, 1976.
When will my Medicare
coverage begin?

A. It will begin in August,
1978, 24 months after your
first month of entitlement to
disability benefits.

metates, and scrapers. The
artifacts were found in
Texas, as well as New
Mexico and Nevada.

The previous display was
a collection of pewter figures
depicting people from the
Revolutionary War period.

This collection was loaned
by Mr. and Mrs. Jim Word.
Families in town who have
historical collections willing
for the Junior Historians to
display, are asked to contact
the Floydada Junior High
School.

Eye-Opener Sandwiches Help Start The Day

We all know that a good breakfast helps you start the day off right. It keeps you mentally alert and feeling good throughout the morning.

However, in spite of our good intentions, many of us skip breakfast entirely. Early morning is probably the busiest time of day in most households, but breakfast need not be an elaborate sit-down meal to be a nutritious energy lift.

Delicious eye-opener sandwiches can help you solve this morning meal crisis! Start by spreading peanut butter or cream cheese on crisp, hot toast. Add bacon, fresh or canned fruit and your favorite jam or jelly for a tasty treat no one will want to pass up. Served with a glass of milk, these protein-packed sandwiches provide a wholesome breakfast with very little effort.

Set out all your ingredients first thing in the morning including a variety of jams, jellies and preserves. Their natural fruit flavors make these tempting sandwiches a great way to start the day. Let everyone assemble their own sandwich before heading out the door.

For other great sandwich ideas write for a free copy of "Take A Sandwich to Lunch." Send a postcard to: Advisory Council for Jams, Jellies & Preserves, Room 815T, 420 Lexington Ave., New York, N.Y. 10017.

bond issuances by local governments in Texas, comparing 1976 issues with those during the same period in 1975. All bonds issued by local governments must be registered with the State Comptroller's Office.

Warm And Yummy Toast
 1 cup peanut butter
 1/4 cup crumbled cooked bacon
 6 slices toasted whole wheat or white bread
 1 medium banana, sliced
 3/4 cup grape jelly

Combine peanut butter and bacon. Spread on toast. Top with grape jelly and slices of banana. Place on baking sheet. Heat at 350°F for 5 minutes. Serve warm. This sandwich is also very tasty unheated. Makes 6 servings.

taxes. What action Congress will take on these and other matters remains to be seen.

Increased Sales Tax Collection Helps Revenue

AUSTIN—Comptroller Bob Bullock said Thursday that increased collections of the sales tax, natural gas production tax and motor vehicle sales tax have helped boost state revenue to the mid-point of the fiscal year to \$3 billion, 18 percent higher than a year ago.

"The sales tax is up \$87.5 million over last year," Bullock said. "The gas production tax is up \$46.4 million and the motor vehicle sales tax up \$27

million. Altogether, tax collections are 12 percent higher than the same period last year."

However, the Comptroller noted in his March monthly financial statement, expenditures through the first six months of the fiscal year totaled \$3.3 billion, 24 percent higher than during fiscal 1975.

The biggest chunk of the expenditures, Bullock noted, has been for education.

"The state has paid out \$1.8 billion so far this fiscal year on education," he said. "That amounts to 54 percent of the state's total expenditures."

Bullock's report showed the state collected \$603.2 million in February and paid out \$510.6 million in expenditures.

The February report also contained information on

who had steady work throughout the year and, presumably, earned more than before, will have bigger tax bills.

Nationally, according to the Administration's budget predictions, personal income tax collections, including employment taxes, will add up to \$217 billion or \$14.1 billion more than the \$202.9 billion received last year.

With Floyd County taxpayers paying their normal proportion of this load, the receipts from the local area are expected to reach approximately \$9,845,000 this year.

Just what the following fiscal year will bring in the way of taxes is uncertain just now. The President has proposed an austerity program to reduce Federal spending and make corresponding cuts in income

On the basis of the latest Government estimates, it appears that the average taxpayer in Floyd County will be paying somewhat more than he did a year ago.

At that time, local returns covering income and employment taxes amounted to approximately \$9,210,000, according to an unofficial breakdown of statewide figures, just released by the Internal Revenue Service.

From the State of Texas as a whole, the Government collected a total of \$11,513,000,000, the report shows. Taxpayers in Floyd County paid an estimated 0.08 percent of it.

This time, because of the unemployment situation in most parts of the country during the past year, many taxpayers will have less to pay than previously.

On the other hand, those

For Sam

March 27 - with April 15th ahead, Floyd County taxpayers are put through a series of tax reports. Will it be a year of change into party sneakers. Besides, it's party time. White wears party.

MEET A "TOTAL SAVER"

JANICE M. ELLIS & ERIC
BORGER, TEXAS

Mrs. Ellis has shopped Thriftway for the last six years. Here's why: "The prices are lower than other stores and the meats are fresh and always good. I can shop in a hurry and get in and out without a long wait." Why not stop by our store and see why so many shoppers choose to be "Total Savers" at Thriftway.
