No More Chickens In City Limits

If you enjoy the rooster's crow in the
early morning....and the cluck, cluck of
hens as they scratch in the sand....and
you live in the city limits of Floydada,
both sounds will fade away, as the city
council approved a "no fowl" ordinance
at its regular monthly meeting Tues-
day night.

A copy of the ordinance appears in
this edition of The Hesperian, in case
you own some chickens in the city
limits and want to know the provisions
of the ordinance.

Pioneer Natural gas manager Gene
Ehler met with the council and agree-
ment was reached for a two cent
increase in contracting natural gas for
the city's electric power plant.

In other business the council:
Approved some 25 acres owned by
Texas A&M into the city limits;
Passed an ordinance to bring Duncan
Addition Block No. 2 into the city
limits, and dedicated a 25 foot alley for
this area;

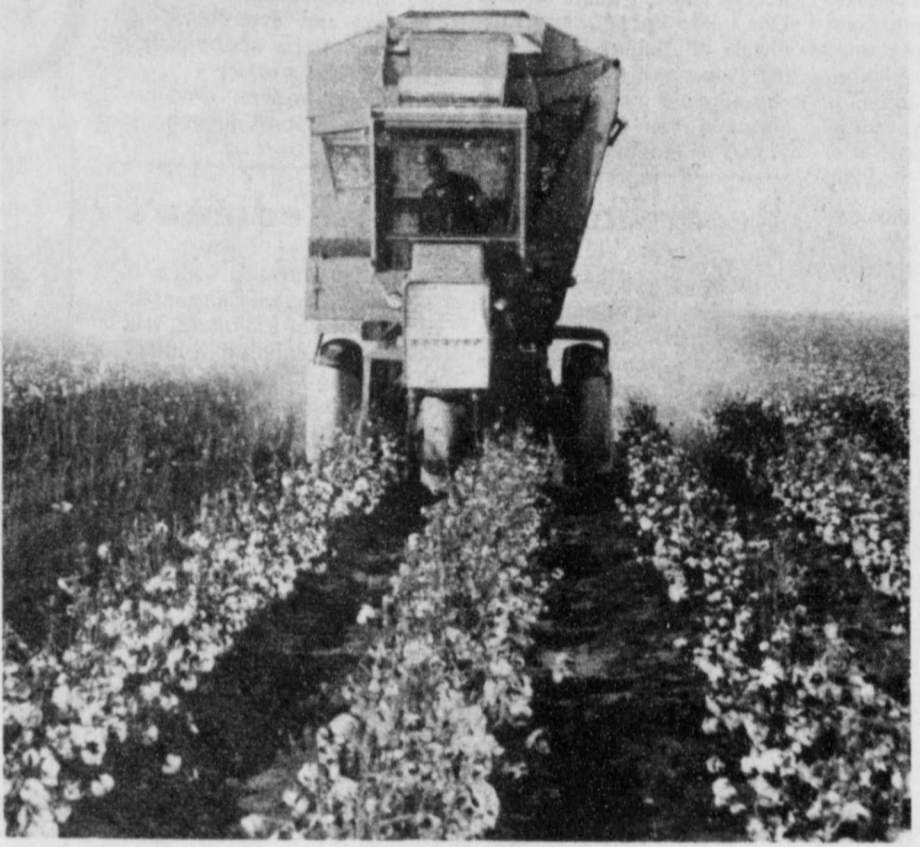

Discussed approval of opening of the
old Palace Theatre;
Approved personnel rules and regu-
lations which will apply to and govern
all employees of the City of Floydada;
Granted the Massie Activity Center
board \$50 to apply on paving in front of
the MAC;

and discussed some of the problems
in collecting money for Bell Telephone.
All councilmen were present.

Cotton Prices Steady To Firm Demand Good

Grower prices were steady to firm
during the week ending November 5,
according to Paul R. Dickson, in charge
of the Lubbock Cotton Classing Office.
The USDA's Agricultural Marketing
Service reported trading was slow to
moderate. Growers offered small lots
of new crop cotton in moderate volume.
They sold small mixed new crop lots
of mostly grades 32, 42, 33, and 43;
staples 30 through 32; mikes 2.7
through 4.9 in range of 68.00 to 69.00
cents per pound. Mixed lots of mostly
grades 33 and 43, staples 32 and 33,
mikes 2.7 through 3.2 brought 65.00 to
66.00 cents.
Demand was good, Dickson said.
Prices paid growers for cottonseed
ranged from 80 to 90 dollars per ton.
Grades 41, 32, and 42 were predomi-
nant grades classed at Lubbock this
week. Grade 41 was 11 percent, grade

32 33 percent, and grade 42-31 percent.
Bark reductions were assigned to 16
percent of the samples classed.
Staples 30, 31, and 32 were predomi-
nant lengths. Staple 30 was 23 percent,
31, was 25, and 32 accounted for 21
percent.
Mike readings 3.5 through 4.9 a-
mounted to 76 percent of the total.
Mikes above made up 12 percent and
mikes below were 12 percent, also.
Pressley tests indicated breaking
strengths at Lubbock averaged 84,000
pounds per square inch.
About 9,400 samples were classed by
the Lubbock Classing Office during the
week ending November 5. This season's
total stands at 38,000 samples
compared to only 19,000 on the same
date a year ago.

Commissioners Give Deputies Pay Raise And Rescind Earlier Motion

Floyd County commissioners voted Monday to give county sheriff deputies a pay raise and increase their travel pay, then rescinded an earlier motion made in a called meeting held last week which would have given all county hired employees a monthly raise with the exception of sheriff dispatchers.

County deputies wages were raised from \$605 per month to \$700 per month, and their mileage expenses increased from 13 cents per mile to 15 cents per mile, retroactive from November 1, 1976. Bob Jarrett made the motion for the wage increase which carried three to one, with Jack Lackey voting against the motion. The motion which was rescinded by commissioners

old tile, preparing hall flooring and installing 452 square feet of carpeting. They also accepted the bid from Plains Machinery Co., of Plainview of \$26,000 difference in the trade-in of one use Galion model motor grader, for a later model and better equipped Galion motor grader.

Court adopted a resolution in relation to getting Floyd County designated for the use of Emergency Loan Funds due to the October 7, 1976, freeze and the hail storms and drought which hit some parts of the county earlier this year.

Commissioners canvassed votes and found no irregularities.

Frank Milby Visits Kansas City To See New Case Tractor

The PTO rating for the 2870 is 250 horsepower. In addition to its big power features, standard equipment includes a 12-speed range power shift offering three on-the-go speed choices in each of four ranges, four-way selective steering and an air conditioned, environmentally controlled cab.

In addition to a first hand viewing of the 2870 tractor, Mr. Milby and other dealer representatives heard evaluations of the current situation in agriculture by top Case Company officials. Included among the speakers was James J. Gill who heads the firm's Agricultural Equipment Division as vice president and general manager.

Farmers Are Doing Worse Since Great Depression

Texas Farmers Union has reacted to the agricultural "price report" released on Friday, October 29 with a statement that it amounts to "bad news for farmers and consumers."

The statement released for publication on Friday at the Texas Farmers Union state office in Waco stated as follows:

"The 'agricultural prices' report reflecting prices received by farmers as of October 15, shows that the economic well-being of the nations farmers and ranchers has slipped again. The national parity ratio, an accurate measure of the agricultural economy, relative to other segments, has dropped to the lowest of any months since 1971. The report shows that it is now only 68% of parity.

This means that farmers are doing worse, relative to the rest of the economy, than they did even in the depression years, when they were receiving 81% of parity. Farmers did best during the Truman administration, 1946-1952, when farmers received an average of 107% of parity. They did worse during the administration of President Ford since 1975 when they only received an average of 73% of parity.

The fact that farmers are not being compensated for the tremendous risk that they take, and are only earning a "return on equity" of about 4.7%, translates into a serious economic problem for our nation's agriculture as well as the consumers.

The administration has the tools and the capability of reversing the situation. Their unwillingness to do so is jeopardizing the incentive

which is necessary if the American farmer is to produce and adequate amount of food and fiber. The present policies are sure to result in severe shortages in possibly one year or 18 months at the longest.

Parity is the best measure of the economic well-being of farmers, and is still an integral part of national farm laws. Farmers are entitled to 100% of parity to give them the incentive to take the risks that they must take to produce in abundance. The news that the parity ratio has dropped below the 70% mark is very bad for the nation.

Pre-Nuptial Coffee Given Recent Bride

Mrs. Brooks Carroll, the former Doretta Couch, was complimented with a pre-nuptial gift coffee in the Olton home of Mrs. Billy Smith recently.

Receiving guests with Mrs. Smith and the honoree were mothers of the newweds, Mrs. James Couch of Olton and Mrs. M. T. Carroll of Floydada.

An arrangement of yellow mums centered the serving table which was laid with a yellow cloth. White ironstone appointments were used to serve coffee, spiced tea, breads and fruit skibobs. Presiding at the table were Jan Burkhalter, Cindy Neinst and Kay Givens, assisted by Marla Faver and

Charla Shipley.

Guests were registered by Mandy Griffin and gifts by Lorenda Couch, sister of the honoree.

Hostess included selection of pottery, a vacuum cleaner, blanket, sheets, electric mixer, decorative plant holders, cookware and a towel set.

Out of town guests attending the gift coffee included Mrs. M. T. Carroll, Floydada; Wynne Lee Hyman and Kym of Amarillo; Mrs. Viola Vestal, great grandmother of the honoree, and Janello Smyth and Jennifer and Vivian Nebhut all of Morton; Terri Nebhut of Lubbock; Ruby Bumpus, Plainview; Mrs. Erlene Couch and Mavis Conkin, Anton; and Mrs. Jack Burkhalter of Hart.

Caprock Hospital Auxiliary Meets In Smith Home

Mrs. Bill Smith presided over the regular business of Caprock Hospital Auxiliary at a coffee meeting held in the Smith home Monday morning.

Members made plans to have a booth in the Lions Club Christmas Bazaar in December. Each member was asked to make baked items for the booth and a work time schedule was set.

In other business the treasurer reported \$735 on hand, and hospital officials were asked for suggestions suitable for memorial gifts.

Mrs. Gordon Latta and Mrs. Paul Leach from the High Plains Hospital Auxiliary in Plainview presented a very interesting and informative program for the Caprock Auxiliary members. The two women explained how their auxiliary operated and how profitable their gift shop in the hospital is proving to be. They also suggested a number of ways the Auxiliary in Floydada

could profit from a gift shop and also gift carts, with members making some of the gifts. They suggested other services to people which would also benefit the Auxiliary, stressing to the Floydada members that the Auxiliary is a service organization and not a club, and that to give services, members must fulfill their commitments.

Attending the meeting were guests, Mrs. Latta and Mrs. Leach, and members Mrs. Dallas Ramsey, Mrs. Jerry Thompson, Mrs. Ned Bradley, Mrs. Pedro Ochoa, Mrs. W. L. Moore, Mrs. Dan Hagood, Mrs. J. R. Turner, Mrs. Terry James, Mrs. Bill Tye, Mrs. Bill Smith, Mrs. Avis Bartley, Mrs. A. L. Wylie, Nancy Noland, Mrs. Troy Patton and Mrs. Ben Whitaker.

For another occasion will soon be rather expensive. This is the eighth coffee price hike this year and apparently there is little relief in sight for U. S. coffee drinkers.

A popular bumper sticker reads, "If God had meant Texans to ski, He would have given them mountains." But neither lack of mountains nor any other obstacle discourages multiple thousands from all over Texas to hit the slopes each year. Unfortunately thousands of people literally "hit" the slopes and don't get up. If I tried my luck on the ski slopes, I'm afraid I would be one of those that would never get up, however it does look easy.

This essay was clipped. It was written by a second grader concerning anatomy: "Your head is kind of round and hard, and your brains are in it, and your hair is on it. Your face is in the front of your head where you eat and make faces. Your neck is what keeps your head out of your collar. It's hard to keep clean.

Your shoulders are sort of shelves where you hook suspenders on them. Your stummick is something that if you don't eat often enough it hurts and spinnage won't help it none.

Your spine is the long bone in your back that keeps you from folding up.

Your back is always behind you no matter how quick you turn around!

Your arms you've got to have to pitch a ball with and also so you can reach the butter.

Your fingers stick out of your hand so you can throw a curve and hold a pencil when you add up rithmetic.

Your legs is what, if you have not got two of you can't get to first base- neither can your sister.

And that is all there is of you, except what's inside- and I never saw that."

A CHILD learns to love by being love, reminds Mrs. Ilene Miller, family life education specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

THANKSGIVING DAY— GIFT OF LIFE

IN ITALY, basil symbolizes love. Many Italian tomato and basil-based dishes contain this most agreeable and adaptable herb. It enhances the flavor of most foods it touches.

Mrs. Woodrow Wilson of 130 West Ollie, Floydada memorial committee chairman for the Floydada Unit of the American Cancer Society, today announced a special Thanksgiving Day-Gift of Life program. In the spirit of Thanksgiving, all Texans are asked to give a Gift of Life in honor of the progress being made in cancer control. Last year the Floydada Unit received contributions in the amount of \$1,159.12 for memorials.

Mrs. Wilson indicated that all contributions given during the Thanksgiving Day-Gift of Life campaign would be used to support the AC Society's three part program of Research, Education and Service to cancer patients. She also encouraged anyone interested in learning about cancer or the various program of the Society, to attend the next regular board meeting on November 18 at Lighthouse Electric at 5 p.m.

Persons wishing to give memorials may call Mrs. Wilson or go by her home.

According to Mrs. Pete Hickerson, unit president, the ability to cure and control ten kinds of cancer has been developed since 1960. These cancers frequently occur in children, cause great emotional and economic strains and a staggering loss in years of life. Mrs. Hickerson was quoting a recent report by George J. Race, M.D., Ph.D., Director of the University of Texas Health Science Center Cancer Center in Dallas. The report indicated that some cancers like Hodgkin's disease have changed from an almost 100% fatality rate to approximately 85% cure rate if the patients are treated by a team of surgeons, medical oncologists, immunologists and chemotherapists.

Mrs. Pedro Ochoa unit public education chairman reports that according to National Cancer Institute figures, over 3,000,000 A-

Floydada Men Testify In Railroad Hearing

At the end of the second day of hearing on the abandonment of the QA&P Railroad to Floydada, two Floydada men had testified in behalf of keeping the rail service.

Louis Bearden of Davis Farm Supply told the need of rail transportation for

various farm chemicals and fertilizers and Chuck Holmes of DeBruyn Produce Company testified on behalf of keeping the rail service to Floydada.

The following reports on the hearing come from an area correspondent who reported on Monday and Tuesday proceedings.

Rail Funds Juggling Charged At Hearing

By ORA LEE FRAZIER
A-J Correspondent

PADUCAH — The first day of public testimony on the proposed abandonment of 104.8 miles of the Quanah, Acme and Pacific Railway Co. line here Monday drew charges the QA&P's parent company had juggled figures to justify its claim the line was losing money.

Testimony from J.W. Wresche of Springfield, Mo., manager of cost accounting and statistics for the St. Louis and San Francisco Railway Co. (Frisco), revealed there had been an adjustment in maintenance cost figures provided by Frisco to hearing officials and the Interstate Commerce Commission (ICC).

State Sen. Ray Farabee of Wichita Falls, representing area shippers and merchants protesting the abandonment of the rail line, pointed out that maintenance figures for QA&P were shown as \$450,000 in data provided to Farabee, but were listed as \$130,000 in a report to the ICC.

When it also was learned that Frisco had not brought underlying working papers to justify their stance, Geraldine R. Keys of Washington, D.C., an ICC administrative law judge, ordered the figures be made available to the court and protestors' counsel.

Immediate Abandonment Asked
Frisco has asked for an immediate abandonment of the 104.8 miles of track which extends from near Acme southwest to near Floydada.

Railway officials have cited loss of revenue and as little as 34 cars per mile per year as reasons for the abandonment. However, shippers, merchants and other

individuals in Hardeman, Cottle, Motley and Floyd counties filed letters with the ICC protesting the abandonment and asked for a hearing.

The opening witness Monday was U.S. Rep. Jack Hightower of Vernon, whose district encompasses three of the four counties in which QA&P runs.

Concerned Over Impact
Hightower voiced concern over the economic and social impact the loss of the line could bring about in the four counties involved.

"We have to have a method of transportation to get our products to market," Hightower emphasized.

Other witnesses in the 50th district courtroom of the Cottle County Court-house included Herman Propst of Stamford, director of Rolling Plains Cotton Growers Association.

Propst testified two-thirds of all cotton produced in the Rolling Plains area is exported and vital to the economy of the state and nation.

Propst also pointed out that 41,900 bales of cotton had been shipped by rail from Paducah in 1975.

"If trucks had been used to transport this cotton, it would have required 600 to 800 trucks, had they been available," Propst said.

The cotton grower said shipping by truck was less dependable for the farmer and would result in the forced absorption of additional transportation costs.

The second day of testimony is scheduled to resume at 9 a.m. today. The hearing is expected to continue through Thursday.

Truck Shipping Proposed Blasted At Rail Hearing

By ORA LEE FRAZIER
A-J Correspondent

PADUCAH — An Iowa State University transportation specialist testifying in the second day of public hearing here on the proposed abandonment of the Quanah, Acme and Pacific Railway Co. (QA&P) line, was criticized for his study supporting shipping by truck for area farmers.

Dr. C. Phillip Baumel of Ames, Iowa, and professor of economics at Iowa State University, testified on behalf of the St. Louis and San Francisco Railway Co. (Frisco), the parent company of QA&P. Based on his study of estimated additional trucking and handling costs if QA&P were abandoned, Baumel contended area shippers would save money in most instances if they ship by truck direct to market.

In cross-examining by State Sen. Ray Farabee of Wichita Falls, counsel for local shippers and merchants protesting the abandonment, Dr. Baumel admitted he had made no in-depth study of shipping costs in the communities of Paducah, Roaring Springs or Floydada — towns currently served by the QA&P.

When asked by Farabee if he had included actual cotton bale figures from Roaring Springs or Paducah, Baumel replied, "No, we did not."

Baumel said the figures he used as to number of cotton bales produced and shipped from the area towns, came from figures provided by Frisco.

Farabee then asked the witness if he had included any shrinkage factor in the study figures on which he had testified, and Baumel answered, "No, sir, we did not."

Other questioning revealed Baumel

Mrs. Carthel Misses Three, Wins Boot Hill Contest

Mrs. W. L. Carthel of Lockney won the first-place \$25 gift certificate in Boot Hill's football contest last week. Mrs. Carthel missed only three games — the Purdue-Michigan surprise, New England-Buffalo, and Oakland-Chicago. There were five entrants who tried for second and third places with four misses, making the tie-breaker the deciding factor. Carol Bramlet of Lockney won second, the \$10 gift certificate, and Bill Kincaid of Floydada took third place, the \$5 gift certificate.

Honorable mention goes to Carrie Davis and Louise Campbell of Floydada and Mark Montandon, Boyd Lee, Lynda Wilson and Don Sutterfield of Lockney.

This week's Boot Hill contest appeared in Sunday's paper. The Lockney western store is still offering a \$1,000 cash prize for a perfect entry. Enter as many times as you wish (facsimile entry blanks are accepted) and get your entry to Boot Hill by noon Saturday before the games.

The Floyd Philosopher

Has A Few Incidental Remarks On The Presidential Election

Editor's note: The Floyd Philosopher on his Johnson grass farm reflects on the election this week, more or less.

Dear Editor:
Some random notes on the election: I asked a friend, "Well, did the election go to suit you?" and he said: "No election ever goes to suit me."
If he wasn't a farmer, I figure he'd make a good newspaper columnist.

Some people are always speculating on what influence television commentators and big syndicated newspaper columnists have on an election.
Well, for one thing this time they taught us the meaning of the word apathy: a large voter turn-out.

I wouldn't be surprised to see some young person running for his first office the next election tell his supporters: "Let's go out and get people stirred up. If we can get an

apathetic turn-out, we'll win."
You see, big-time reporters work on the domino theory. If one of them finds a small pocket of people saying they don't intend to vote and reports on it, other reporters start looking for similar pockets and before you know it they're all reporting the country is apathetic. The public opinion polls take it up and for the next few months it's the theme song of the media. This may explain why the Mayor of New York, kidding some reporters, said media is the Latin plural for mediocre.

As for the public opinion polls, I don't know how much they spend sampling the voters but they could have saved their money by going off by themselves and figuring that when you've got two ordinarily decent, likeable men running for President, neither one of whom can raise or lower taxes himself—that's done by Congress—you're likely to have a fairly close vote.

Yours faithfully,
J. A.

SCHOOL-AGE children eating breakfast make sharper decisions, become less tired and work and play longer than children who omit breakfast. Breakfast should supply one-fourth of the day's intake of calories and nutrients, Mrs. Mary Sweeten, foods and nutrition specialist with the Texas Agricultural Extension Service, The Texas A&M University System, advises.

PARENTS who allow their children to make decisions at an early age and continue to trust them as they develop enable their children to be independent thinkers and decision makers. Hints for HOMEMAKERS

Money-Saving Tips

THE BASICS OF HOME DYEING

If you're like many homemakers you look forward to an occasional change of wardrobe or home decor—but you don't want to empty the family pocketbook. Then think about home dyeing, perhaps the quickest and most economical way to refashion your clothes and your home.

To assist you in achieving successful, trouble-free results, the dye experts at RIT have compiled a list of questions that homemakers ask most frequently about home dyeing.

Q What kinds of fabrics are best to dye?

A Almost any fabric that is washable can be dyed: cotton, linen, silk and wool as well as nylon, rayon and acetate.

Q Are there any fabrics that can't be dyed?

A Some man-made fibers, such as fiberglass, polyesters and acrylics either resist home dyes completely, or take only a light tint. Also, fabrics with a water- or stain-repellent finish will not dye easily. When in doubt, cut a small swatch of the fabric and test dye it first.

Q Which method of home dyeing is the best?

A It depends on the size of the article you're dyeing and the depth of color you wish. Simmering in a pan on the range is best for achieving deep, rich colors. Dyeing in a sink or basin is good for smaller items, such as lingerie and scarves. Washing machine dyeing is ideal for large, bulky items such as throw rugs, bedspreads and draperies.

Q How do you dye in the washing machine? Will subsequent loads be affected?

A When dyeing in the machine, fill the washer with as much hot water as you would use for a regular wash of the same size, allowing room for the fabric to move freely. Pour dissolved dye solution into the hot water before you add the fabric. Agitate briefly to mix well, and set washer for

the longest wash cycle. Follow with a cold water rinse. Be sure to clean the washer after dyeing by running through another wash and rinse cycle, using detergent and 1/2 cup of bleach. Plastic or rubber machine parts may be tinted by the dye, but color will not come off on your wash.

A TOUCH OF COLOR—Cotton, linen, silk, wool, nylon—all take to home dyeing

Q Can a dark fabric be dyed lighter?

A Sometimes, if color remover is used first to take out the old color or at least lighten it enough to let you dye over it.

Q Will the dye cover stains?

A Dyeing may camouflage stains, but will not cover them completely. For best results, remove all stains from an article before dyeing it.

Q How can streaking be prevented?

A This problem can be avoided by following these tips:

- Always wet the garment before immersing it in the dye bath.
- Avoid crowding; use enough water to cover the material.
- Dissolve dye in hot water before adding garment.
- Stir the article constantly while it is in the dye bath.

COOKING THAT'S FUN

One food that's as much fun to make as it is to eat is molasses taffy—provided you've got a lot of pull.

Mix water, cornstarch, salt and unsulphured Grandma's Molasses, which is sweeter than ordinary molasses, and pour it into a buttered pan. Cook it until a small amount dropped into cold water forms a hard ball.

When just cool enough to handle, pull the taffy until it becomes satiny, light in color and stiff. If it gets sticky, butter your hands lightly.

Cut the strips into one-inch pieces with a scissor, and wrap them in plastic or waxed paper so they will hold their shape.

This is one kind of fun you can really sink your teeth into.

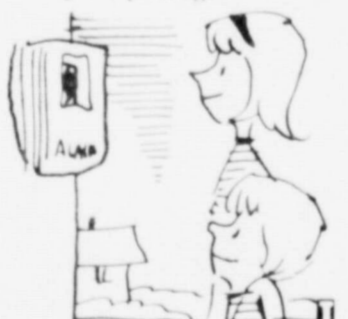

The basic formula for about two and a half cups of sugar stirred until dissolved in one cup of boiling water in a buttered saucepan. One and a half cups of unsulphured Molasses, one tablespoon of vinegar and a teaspoon of salt

ADD SPICE TO YOUR COOKING LIFE—make some salt-water taffy.

are gently stirred in and cooked over medium heat to about 270 degrees (a candy thermometer should be used). Removed from heat, a quarter of a cup of butter or margarine is stirred in and the mixture is divided into two buttered 10-by-15 inch baking pans. A teaspoon of vanilla or four or five drops of cinnamon or peppermint is poured over the surface.

In a few minutes, a buttered spatula turns the edges of the taffy in so it cools evenly, and in 10 minutes, it's ready for pulling.

Parents note that a good thing to teach a young child is fire safety. To aid them, The Hartford Insurance Group agents sponsor the Junior Fire Marshal program and participate in National Fire Prevention Week.

Psychologists note that those things a child learns when he's very young are the things he's most likely to know best.

New Tax Legislation Affects Estate Planning

COLLEGE STATION-The new tax legislation that has just become law will have a big effect on farm and ranch families, contends Tom Prater, an economist with the Texas Agricultural Extension Service. Most of the legislation is effective after Dec. 31, 1976, although gifts are effective as of Sept. 8, and trusts as of April 30.

"One item in the legislation that will affect the estate planning and management of Texas farm and ranch families will be the 'current use base' for establishing the value of farm and ranch lands," says Prater. "This will reduce the valuation below the fair market value approach which is now used."

However, there are qualification considerations for using the "current use" value:

-50 per cent or more of the adjusted value of the gross estate consists of real and personal farm and ranch property and passes to a qualified heir (member of family).

-25 per cent or more of the adjusted value of the gross estate consists of such real property.

-Such properties use for which five of the past eight years before the decedent's death was qualified and was used in business in which the decedent or a member of the decedent's family materially participated.

"The new tax law will also increase the exemption level as far as estate taxes are concerned," points out Prater. "A unified tax table would include estate taxes and gifts."

The economist cites these examples of estate taxes. Starting in 1977, there will be a tax credit of \$30,000 for any estate having a death; \$34,000 in 1978, \$38,000 in 1979; \$42,500 in 1980; and \$47,000 in 1981 and thereafter. Comparing this to the exemption equivalent would mean \$120,667 in 1977; \$134,000 in 1978; \$147,333 in 1979; \$161,563 in 1980; and \$175,625 in 1981 per individual.

The new tax bill also provides a change in marital deductions, enabling one spouse to leave \$250,000 or one-half of the estate, whichever is greater, to the surviving spouse. In addition to this deduction, there is an additional \$100,000 lifetime marital deduction gift exemption that one spouse can give to the other spouse with no tax, notes Prater. This had to come from separate property.

"Another important feature is the privilege of paying estate taxes over 15 years at 4 per cent interest if 65 per cent of the adjusted tax estate qualifies as a farm, ranch or closely held business. The federal government will have a first lien on property during this period of tax payout," explains Prater.

The recapture of estate taxes is also affected by the new legislation. If a farm or ranch is sold out of a family within 10 years, estate taxes on the total fair market value can be recaptured. If the property is held 10 to 15 years, the taxes can be partially recaptured.

State of Texas inheritance laws remain the same.

"All of these plus other changes brought on by the new tax legislation make it important for managers and owners of farms and ranches to review and revise estate plans so that all management opportunities are realized," emphasizes Prater.
