READING CLUB — These pre-registered Friday for the Reading Club at the Floyd County Public Library. From left, they are Lori Higginbotham, Joey Thayer, Cristl McNeill, Jamie Thayer and Josh Thayer. At right is Jackie Walls, librarian. The Summer Reading Club starts Wednesday, June 20 and continues through July 25, with sessions each Wednesday morning. [Staff Photo]

He's A Good Ole Boy

MARK WIDEMAN, FATHER OF THE YEAR

The Floydada Father of the Year is "a good ole boy." Mark Wideman was thus described in the letter nominating him for the award, sponsored by the Floydada Chamber of Commerce Retail Trades Committee.

Here's the full text of the nomination letter:

My Dad (Mark Wideman)
My Dad is a good Dad. He is nice to me and I love him. He helps me with baseball and cub scouts. He is a good ole boy.
Randy & Chad Wideman

Mark and Connie Wideman's sons Randy, age nine, and Chad, four, are obviously proud of their father.

Wideman is a Cub Scout Master and an assistant coach for the Thompson Pharmacy Tee-Shirt League team this year. He is a member of the Rotary Club and the Floydada Jaycees.

The first Floydada Father of the Year is a native of Cone, went to high school at Ralls, and has lived in Floydada nine and a half years. He is a Switching Equipment Technician for Southwestern Bell Telephone Company.

Wideman received a handsome "Fa-

ther of the Year" award plaque from Retail Trades Committee Chairman Randy Hardin Friday morning.

Lance Barrow, Chamber of Commerce manager, termed both the Father of the Year and the Mother of the Year

promotions successful. "We think it's a good thing to recognize some of the outstanding people of the community," Barrow noted. "Of course, anybody has a chance to be the outstanding father or mother."

FATHER OF THE YEAR...Mark Wideman (right) accepts award from Randy Hardin, Retail Trades Committee Chairman.

It's Still Not Too Late To Join The Summer Reading Club

Children are invited to join the Reading Club at the Floyd County Public Library. Beginning Wednesday, June 20, children are encour-

aged to attend each weekly session through July 25.

aged to attend each weekly session through July 25.

The theme for learning will be "In Search of Texas Treasure." Activities have been planned around our Texas heritage and include films, storytime, puppet shows and demonstrations of arts and crafts.

Each weekly session will be held in the library, located on the second floor of the courthouse in Floydada.

Ages three through children having completed the second grade will meet from 9:30 to 10 a.m. each Wednesday. Children having completed the third through sixth grades will meet from 10:30 to 11:15 a.m. on Wednesdays.

Children who did not pre-register for the reading club can still get in on the fun. Just come early Wednesday and register at that time. The following Wednesday, June 27, is the last day for registration.

Farewell Party Tuesday Night

The Floydada American Field Service chapter will sponsor a farewell party Tuesday night for Danielle Biever, the Floydada High School AFS student from

Luxembourg. Danielle's farewell party will be in the back yard at Pete and Wanda Hickerson's home, 815 West Mississippi, from 7:30 to 9 p.m. Tuesday (June 19).

Tennis Club Plans Round Robin Session

The Floydada Tennis Club will have a round robin play session Thursday June 21 at 6:30 p.m. at the high school

courts. The two top winners of the evening will each receive a can of balls. Refreshments will be provided.

Mike Acklin Government Trapper

Mike Acklin, who resides in the Cedar Hill community, is a government trapper assigned to Floyd County. Trapping services include trapping any type of predatory animal such as skunks, coons, coyotes — any type wildlife that is causing a nuisance. The service is provided free of charge upon request. The number to call is 983-5289. Acklin, who was originally from Anson, has lived in Floyd County since September, 1978. Prior to that time he served eight years in the Navy. He is married, and he and his wife Donna have one son, Jeremy.

Bike-A-Thon

Winners Named

Twenty-three eager — and tired — boys and girls participated in the first annual Cystic Fibrosis Bike-A-Thon in Floydada Saturday, May 19, according to Jan Thayer, chairman.

Generous Floydada sponsors and enthusiastic ready-riders combined to boost the amount of pledges received to CF to \$1,084.87. The monies pledged or contributed to the bikers will be sent to the Cystic Fibrosis Foundations to be used for research to find a cure not only for cystic fibrosis, but for many other respiratory diseases.

All the bikers were winners; however, the top winners were Richie Porter, most money collected (\$311.15); Randy Spurlock, most sponsors (47); Troy Faulkenberry, most miles ridden (34); and Josh Thayer, youngest participant (four years), who went one mile on his "Big Wheel."

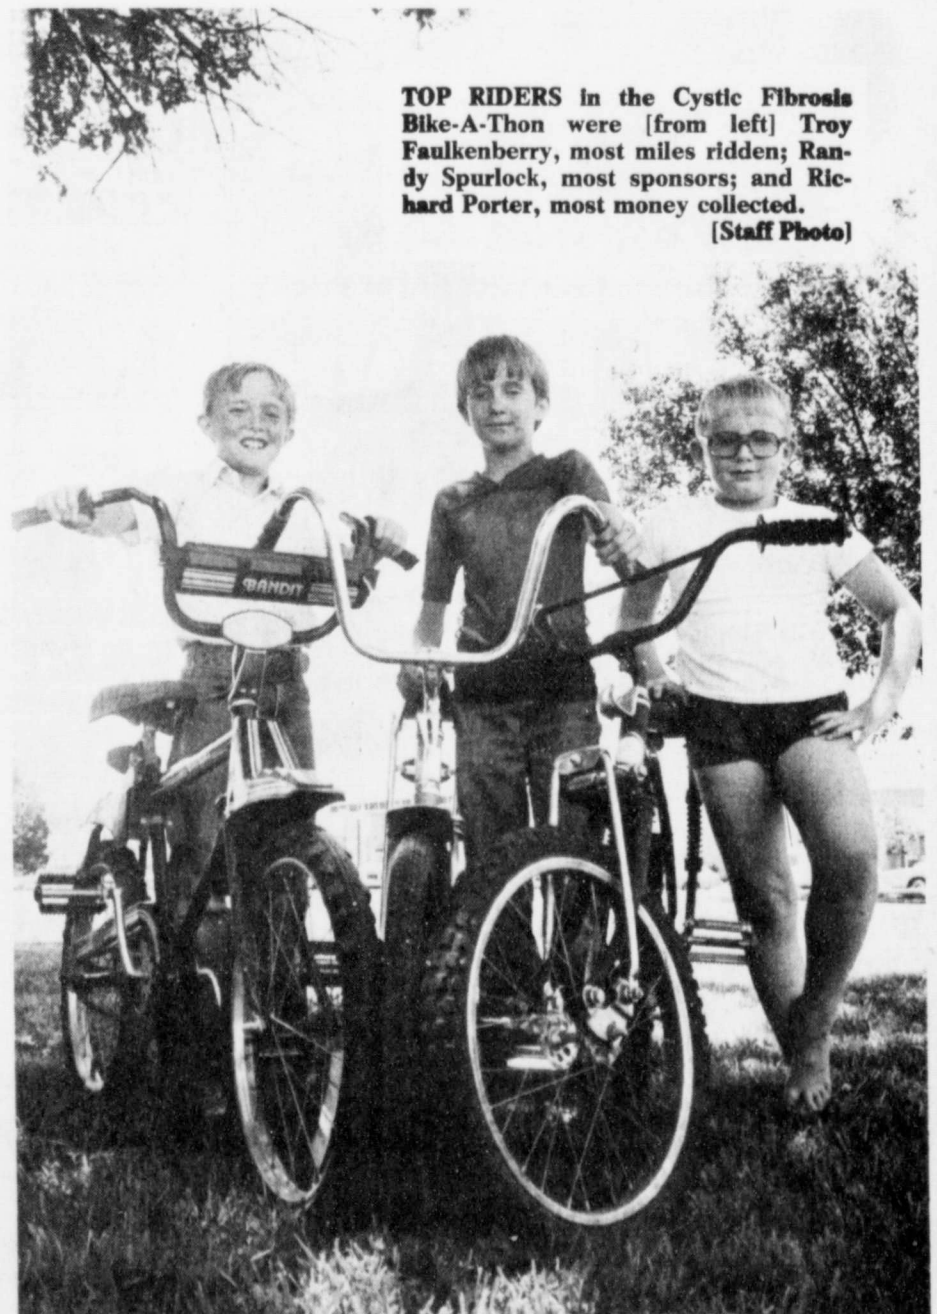

On behalf of the Cystic Fibrosis Foundation, I would like to express my gratitude to the bikers and to my helpers, Mrs. John Dunlap, Mrs. Eddie Smith, Mrs. Michael Hinsley, Mrs. Dennis Dempsey, and Mrs. Teddy Porter," Mrs. Thayer said. "My special thanks to the following businesses who donated prizes for the bikers:

Thompson Drug, Hale's Department Store, Perry's Variety Store, Pizza Gold, John Deere Implements, Piggly Wiggly, Leonard's Cafe, Dairy Queen, Tastee Freez, My-T-Burger, Dixie Dog, Buddy's Super Market, Kirtley's Market, Azteca Drive-In, and Char-Lee's."

History Book

Business history pages for the Floyd County Historical Book will still be taken by the project committee until the middle of the week. Contact the Floyd County Museum in Floydada or Virginia Taylor in Lockney to buy the pages.

TOP RIDERS in the Cystic Fibrosis Bike-A-Thon were [from left] Troy Faulkenberry, most miles ridden; Randy Spurlock, most sponsors; and Richie Porter, most money collected. [Staff Photo]

CHECK — The \$25 pre-registered first load of Floydada-Cooperative Elevator in Floydada, where the first load arrived at 5:20 p.m. Tuesday. Larry Barbee, sales manager for the elevator, is also pictured. [Staff Photo]

Bride And Groom Cookware Guide

Not too long ago, after the honeymoon, the bride headed for the kitchen and the groom to his work. Not anymore. Today it's more likely that both make a beeline for the kitchen when they return home from their jobs. According to recent surveys, many young couples are sharing the cooking chores, and what's more, they're "cooking from scratch" with fresh ingredients.

This change in lifestyle has made husbands-to-be as concerned as their brides in choosing the right cookware for their new home. After all, pots and pans will be used every day, so it's important to check out performance, convenience and necessary upkeep as well as appearance. To guide future couples to the type of cookware that will best suit their needs, here is a rundown on the different kinds.

To begin with, metal cookware is made of metal — aluminum, cast iron, stainless steel and copper — each has its attributes.

By far the most popular metal for cookware is aluminum, for lots of good reasons. It's an excellent conductor of heat, cooks food fast and without hot spots, which means better browning and less scorching. Also, it's lightweight and easy to handle, and relatively inexpensive. Available either in a polished bright finish or clad in porce-

lain enamel in a range of popular colors, new aluminum cookware is attractive and functional. Another plus in some heavy-weight aluminum cookware is a thick, durable non-stick "SilverStone" surface that resists staining, chipping or peeling; it releases food easily and is a snap to clean.

Cast iron cookware has been around for centuries and with proper care, can last for centuries. It, too, is an excellent conductor of heat and cooks food slowly and evenly. However, it is extremely heavy and often rusts, so it needs frequent seasoning. Some iron cookware is coated with brightly colored enamel which eliminates the rusting problem but which adds to its weight as well as the price.

Public Invited To Ranching Heritage Center July 4th Event

A flag-waving, whizz-bang 1979 Fourth of July, with singing, games and oratory in the best American tradition, will take Ranching Heritage Center visitors back to Independence Day celebrations of yesteryear.

As many as 3,000 are expected to participate this July 4. Before the celebration, which lasts from 5-9 p.m., there will be dedications marking progress in the development of the Ranching Heritage Center of The Museum of Texas Tech University. Dedication ceremonies, for which there is no charge, will last from 4-5 p.m.

The Ranching Heritage Association will dedicate the Jowell House, a mid-nineteenth century limestone ranch house which stood roofless at the center until research could determine the roof contours.

A special time is reserved for nostalgia in the dedication of a live oak tree to the memory of the late Mayor Ray Bass, whose earlier Fourth of July oratories endeared him to Ranching Heritage Center audiences. His law partner for more than 19 years, Kenneth

Hobbs, will speak at the dedication of the Roy Bass tree.

Dr. Leslie C. Drew, director of The Museum, said that guests will be invited to join the dedication procession which precedes the festivities. Following the dedications the site will be closed briefly and then reopened for the fun and games.

The celebration is sponsored by the Docent-Volunteer Guild of The Museum. Cost is \$2 a family and first and second place ribbons will be presented for all contests: watermelon-eating, seed-spitting, washer-pitching, horseshoe-pitching, three-legged and sack races. Competition will be divided by ages.

There will be patriotic singing by Dr. Moses Turner, director of the Lubbock Civic Chorale. Eddie Nicholson, the rocking chair philosopher, will perform as will the barbershop quartet, Music West, and the Lubbock Municipal Band.

Lemonade and popcorn, small flags and balloons will be available for purchase on the site, with all proceeds benefitting the Docent-Volunteer Guild and the Ranching Heritage Association.

heat, prone to hot spots and scorching. To overcome this, most stainless cookware is combined with other metals. Some have copper bottoms, others a core of carbon steel or aluminum which helps to distribute heat evenly. To keep it looking its best, stainless must be polished occasionally with special cleansers. Prices for quality stainless cookware range from high to expensive.

Copper is an excellent conductor of heat and makes superb cookware. It's also highly decorative but requires frequent polishing to keep it bright and shiny. Unfortunately, it is now so expensive as to be virtually out of reach except for professional chefs.

Some other things to look for when buying cookware: covers fit snugly, bottoms are flat or slightly concave, utensil has proper balance and doesn't tip; knobs and handles are heat resistant and easy to grasp; and utensil has no

seams, cracks or crevices that will make it hard to clean.

Lastly, no matter what cookware you select, read and heed the manufacturer's use and care instructions. They will tell you if the utensils are dishwasher safe, can go in a hot oven and the proper cleaning products to use. Following this advice, and your saucepans and skillets will reward you with a countless number of efficiently cooked meals.

Select beans, peas and lentils with a bright, uniform color, a consumer marketing information specialist recommends.

Loss of color usually indicates long storage, lack of freshness and a product that will take longer to cook, Gwendolyn Clyatt, with the Texas Agricultural Extension Service, The Texas A&M University System, points out.

Documentary Stars

To Speak In Lubbock

Dorothy and Robert DeBolt, the parents featured in the award-winning documentary, "Who Are the DeBolts — and Where Did They Get 19 Kids?" will be guest speakers at a forum on adoptions, slated Friday and Saturday, June 22 and 23 at Lubbock Christian College (LCC) in Lubbock.

Ms. DeBolt will address the opening session of the forum, a 7:30 p.m. banquet on Friday, and she and her husband Robert will make another presentation at 8:45 a.m. on Saturday. The forum, sponsored by the Lubbock Interagency Adoption Council, is aimed at adoptive parents and grandparents, adopted persons, parents of children placed for adoption, foster parents and caseworkers.

On Saturday, participants may attend any four of some 20 group sessions which will examine specific problems and situations associated with adoption, child-rearing and the family.

Cost of the forum is \$10.00 per person for both days (including banquet and lunch Saturday) or \$5.00 per person for the banquet and \$7.50 per person for Saturday (including lunch). Child care, at a charge of \$1.00 per family each day, will be available at the Green Lawn Church of Christ adjacent to the LCC campus.

Anyone interested in attending should contact JoAnne Haggard, president of the Interagency Adoption Council, P.O. Box 1858, Lubbock, phone (806) 762-8922.

16MM FILMS

ABOUT SEX. 23 min. Color. 1972. Texture Films. Angel Martinez a youth counselor for Planned Parenthood, and a group of teenagers discuss the biological and psychological aspects of sex. Note: The film affirms the beauty of sex with a scene of a few seconds duration of a couple making love.

CAVES: THE DARK WILDERNESS. 24 min. Color. 1976. Encyclopedia Britannica. Examines the history of caves, their ecological cycle and their mystery. Includes footage of Texas and New Mexico caves.

GOT TO TELL IT: A TRIBUTE TO MAHALIA JACKSON. 34 min. Color. 1974. Film biography of the world-renowned gospel singer who died in 1972. Miss Jackson sings parts of 11 songs, and is remembered by those who knew her joys and triumphs.

GREENHOUSE. 11 min. Color. 1973. Barr Films. The theme of the film is a respect for the feelings, rights, and property of others. A boy learns this from a patient old man who cherishes the plants in his greenhouse.

HAPPY OWLS. 6 min. Color. 1969. Weston Woods. A quiet and wise legend of two owls who tell the constantly quarreling barnyard fowl why they are happy. Simple yet effective text.

ISABELLA AND THE MAGIC BRUSH. 13 1/2 min. Color. 1976. Filmfair communications. Story in animation of a poor little girl whose wish for a paint brush brings

her magical powers of creation. She rids her village of a tyrant king, and provides a better life for the villagers who then crown her queen. But she puts down the crown in order to become a painter in a world that she creates with her brush.

JUST ONE ME. 11 min. Color. 1971. Paramount Communications. A small boy daydreams of what he would like to be, a tree, a road, a car, and so on. In the end he decides to be himself.

KARATE: ART OR SPORT? 20 min. Color. 1973. ACI Media. Explores both the philosophical and physical training necessary to the serious practice of karate. Attacks and blocks are demonstrated by black-belt Western masters. Should be used either along with instruction in karate or for information — not as instruction itself.

LOOK BEFORE YOU EAT. 22 min. Color. 1978. Churchill. Critically examines our eating habits and their relationship to our health. Somewhat school oriented but useful for general audiences.

THE MOON: A GIANT STEP IN GEOLOGY. 24 min. Color. 1976. Encyclopedia Britannica Educational Corp. Explores the subject of the moon and its scientific mysteries mainly through rock samples taken from the surface. Interesting.

STRING (KNOTTING AND WEAVING). 10 min. Color. 1971. Filmfair Communications. A film to stimulate those creative "juices" in the areas of weaving, knotting, and macrame. People of various ages are shown doing and commenting upon a variety of hand weaving techniques from macrame to sailor's knots.

TEPOZTON. 11 min. Color. 1971. BFA Educational Media. Aztec legend of Tepozton, a boy, half-god and half-human, who cleverly slays a giant and is crowned king of his people.

THAT'S MY WIFE. 26 min. B&W. Silent. 1929. Eastin-Phelan. Mrs. Hardy is fed up with Mr. Laurel's two-year stay and delivers the ultimatum: "Either he goes or I do." As Mrs. Hardy is leaving, Ollie's rich uncle arrives with plans for Ollie to inherit his fortune if he proves to be happily married.

WORLD OF FRANKLIN AND JEFFERSON. 28 min. Color. 1976. Pyramid Films. Intercuts footage of the so-named exhibit created for the bicentennial administration with a visit to the vastly different environment in which these two leaders developed.

ENERGY - THE NUCLEAR ALTERNATIVE. 20 min. Color. 1974. Outstanding documentary on the controversy of whether error-proof nuclear power plants can be constructed and operated. Environmental, utilities, and governmental spokesmen center on problems of reactor safety, materials transport, and waste disposal.

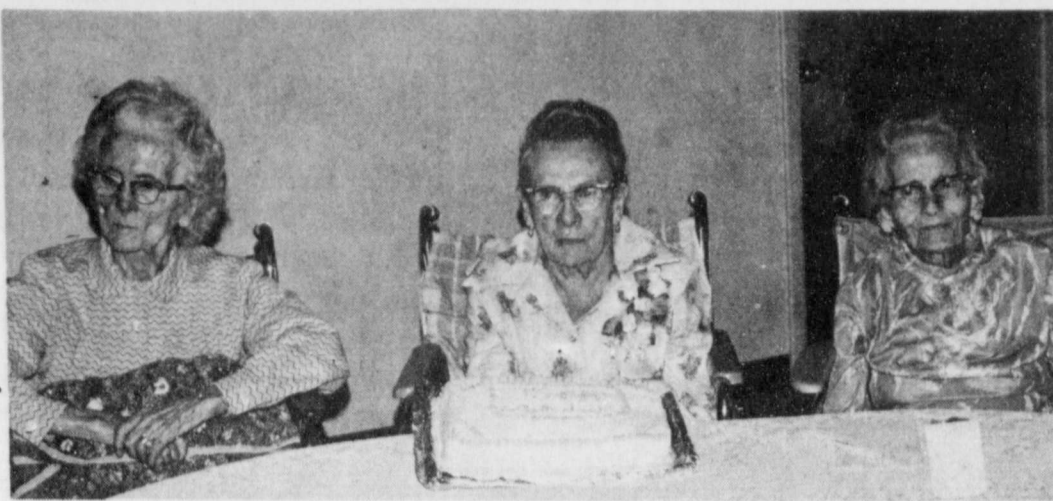

LEARNING TO COPE. 25 min. Color. 1978. Actor Cliff Robertson narrates this insightful film about various people younger and older, deal with their everyday tensions and anxieties. The straightforward presentation builds interest.

- 35MM FILMSTRIPS
1. Caddie Woodlawn.
 2. The Camel who took a walk.
 3. Charlie needs a cloak.
 4. Cookies. (Frog and toad together.)
 5. The Golden Goose. (Tales from the Brothers Grimm)

JUNE BIRTHDAYS — Celebrating birthdays this month at the Floydada Nursing Home are (left to right) Alta Probasco, who will be 86 June 27; Clara Williamson, who was 84 June 8; and Myrtle Roy, who will be 86 June 26. Not pictured is Robbie Bratton, who was 83 June 1. [Staff Photo]

Rest Home Birthday Party

June brings to us summer... With sun and winds so hot... So a "cool" and happy party Will help us all a lot!

Our Mrs. Clara Williamson Is one so nice to know... She wears a smile like sunshine. Or, could it be "moonglow".

Our Mrs. Robbie Bratton Is always nice and sweet... And as a friend to count her

Is really quite a treat!

We give a special greeting To our Mrs. Myrtle Roy.... For a very happy birthday And another year of joy!!

Another lovely lady Is Mrs. Alta Probasco... And if a friend you're needing She is MIGHTY nice to know!

Let's serenade these ladies To make them feel real great With the good old birthday "ditty".... And help them celebrate!

Thursday afternoon, June 14, was birthday time again at the Rest Home and ladies of the City Park church of Christ were hostesses. Residents and guests were ushered into the dining room where the festivities took

place. The table was laid with a white cloth and centered with a lovely arrangement of light coral Chinese camilla and white forget-me-nots in a white basket and crowned with candles in white frosted cups. Each place was marked with a special birthday card and all the honorees were able to attend except Mrs. Bratton... and we are hoping she will feel much better soon.

James Huggins, Mrs. Roy's grandson, was a special

guest to do the picture taking and Mrs. Roy's other special guests were her daughters Evelyn Huggins and Imogene Gray.

After the pictures were made the poem was read and all joined in singing the birthday song. A delicious birthday cake, decorated in coral icing, and a tasty fruit punch were served to residents, guests, honorees and employees. The next party will be Thursday, July 12, 2:30 p.m. You are invited to attend and please come if you have a loved one or friend being honored.

"The two greatest stimulants in the world are youth and debt." Benjamin Disraeli

Floydadans On Tech's Spring Honor Rolls

LUBBOCK — More than 5,300 students at Texas Tech University qualified for dean's honor rolls during the spring 1979 semester by achieving grade point averages of 3.0 or more on a 4.0 scale. Of that number seven were from Floydada.

They included: Jimmy W. Finley, 816 W. Lee; William G. Hambricht, 815 W. Missouri; Obie G. Kelly, Box 212; Billy F. Marquis, Rt. 1; Lana D. Reed, 809 W. Mesquite;

David J. Schwertner, Rt. 3; and Doug E. Simpson, 715 W. Mississippi.

Texas Tech University, one of the four major Texas universities, has an enrollment of 22,500 students in six colleges and three schools. These include the col-

leges of Agricultural Sciences, Arts and Sciences, Business Administration, Education, Engineering and Home Economics and the Graduate School, School of Law and School of Medicine.

WHOZITS . . .

Jonelle Fawver Was Floydada Whozit

Last week's Floydada Whozit must have been an easy one — no fewer than eight persons correctly identified Jonelle Fawver. The first to call in with the correct Whozit identification was Lee Burton. Then came C.W. Dennison, Nell Ferguson, LeAnn Neeley, Rhonda Ward, Roy Teague, Sam Spence and Mrs. Jim Owens.

FLOYDADA WHOZIT — He was two years old when this picture was taken, and his appearance hasn't changed all that much. Floyd Countians, especially those who live in the Cedar Hill area, should recognize him easily without further clues, but here's one anyway: He likes to sing, we're told.

Only Two Identify Whozits

Lockney Whozit guesses this week have been J.R. and Maye Belt (guessed by Nettie Williams), Dub and Doyle Dipprey (guessed by Arlene Raissez of Sandhill), L.N. and Carlene Johnson (guessed by Keith Jackson and Beth Kropp).

Who's right? Keith and Beth were the ones able to relate the little girl on her first day of school to Carlene Daniel Johnson. And of course L.N. Johnson was the boy in the polka-dot tie.

LOCKNEY WHOZIT — He was raised around Lockney, but Floydada people will know him too. This picture was taken about 1938.

Congressman Charles W. Stenholm

Congressional Comment

WASHINGTON D.C. — The true test of the greatness of a nation is never how well it deals with war, but how well it can learn to live in peace. Wars have always been the easy way to settle disputes, but peace has always been difficult to maintain. Nowhere is this more evident than in the Middle East today.

The roots of our culture, our religion, and our way of life all come from this region. Now, as in the beginning of civilization, this area continues to be one of the centers of world conflict. From the

Assyrians, to the Babylonians, to the Macedonians, Romans, Turks, and Europeans this area has for 5000 years been subject to repeated wars and foreign domination. In recent history the Middle East has been involved in a 30 year war that has often had profound effects throughout the world. In 1956 an Arab-Israeli War also involved France and Britain because of the nationalization of the Suez Canal by Egypt. Soviet military intervention was narrowly averted. The 1973 Arab-Israeli conflict led to the oil embargo

and rapidly escalating oil prices at a cost to the U.S. economy of billions of dollars.

But starting in November of 1977 with the visit of Anwar Sadat to Jerusalem the hopes for stability and peace in this region began to be a possibility. In March of 1979 a peace treaty was signed between Egypt and Israel. Though there are still significant obstacles to overcome, this action is a major step in the right direction.

All parties concerned are learning that the price of peace is never cheap. Anwar Sadat has been ostracized by his Arab neighbors and marked for assassination. Israel will have to withdraw from certain occupied lands making their strategic defense capability considerably more vulnerable. The American government will be required to pay \$1.1 billion dollars in grants and provide \$3.7 billion in military loans for Egypt and Israel.

**Letters
TO THE EDITOR**

To the Editor:

I have been watching for any response concerning Don Williams and any connection that he might have with Floydada. I am Jeane Brannan, former Jeane Simmons, daughter of Mr. and Mrs. W.S. Simmons. Mother and Daddy lived in Floydada from 1942 until Mother moved to New Braunfels, Texas in December of 1974. Daddy died in 1962 and is buried there at Floydada. I was away in college when the family moved to Floydada so I only lived there during the summer of 1943. At that time I worked as a bookkeeper in Martin's Dry Goods store.

This is what I know about Don Williams. My husband and I moved to Portland, Texas in 1959 with our family. This is on the coast near Corpus Christi. Our oldest daughter was a teenager in the early 1960's. She was dating a boy (who later became our son-in-law), John Miller. A friend of his was Lofty Kline and Lofty and some friends frequently got together to sing at the Millers. Our daughter sometimes joined in these singing sessions. A couple of times she remembers singing when Don Williams was there. A year or two later Lofty Kline, Don Williams and a girl named Susan Taylor formed a group called the Pozo Seco Singers. They recorded a few singles together before the group disbanded and Don went on to become a solo recording artist. At that time he lived with his family, I believe, in Portland, Texas. He married a girl named Joyce Bucher from Portland. I do not know if they are still married or not.

We still have a recording of the original Pozo Seco Singers and Don still sings some of the songs that they sang back then.

I subscribe to the Hesperian so that I can transmit news to Mother from Floydada. She is not able to read any more since she has lost much of her vision because of macular degeneration. Dr. Tommy McIntosh had diagnosed this condition before Mother left Floydada but she could still see pretty well then. She still sees well enough to keep house and take care of herself but has to have help with anything that requires reading. She enjoys hearing about the people of Floydada. I keep her up to date by cassette tape.

Sincerely,

Jeane Brannan

LEARN TO READ YOUR ELECTRIC METER AND SAVE!!!

It will let you determine how many kilowatt hours you use in a given period of time — an hour, a day, a month or a year. That's how electricity is measured — by kilowatt hours (kwh) used.

Your residential electric meter will have either 4 or 5 dials

Electric meters are easily read from right to left as you look at the meter. If the pointer on a dial is between two numbers, write down the smaller number. When the pointer is directly on a number such as one (1) (see center dial above) then read it as 1 if the pointer on the next dial immediately to the right has passed zero (0). However, read it as zero (0) if the pointer on that dial to the right has not reached zero.

The dials above read (from left to right) 9-3-1-1-5. If, however, the pointer on the second dial from the right above was between 9 and zero then the center dial would read as a zero.

Now let's read the same meter 24 hours later

The later reading is 9-3-1-3-8. Subtracting the first reading, 93115, from the new reading of 93138 — the answer is 23. Thus you would have used 23 kilowatt hours in the 24 hour period. Each kwh costs approximately five cents.

When you learn to read your electric meter, you will be able to see where your energy dollars go — then learn to use energy wisely & save!

LITTLE LEAGUE ACTION — Left Younger of the Moore-Rose Funeral Home team is the batter. The catcher is Scott Neeley of the Adams Well Service team.

JEFF ARNEY slides into third base, and Joseph Collins waits for the throw, in action during the Thursday-night Little League Game between Moore-Rose Funeral Home and Adams Well Service. (Staff Photo)

Baseball Scores

TEE-SHIRT LEAGUE

Wayne Fuller Trucking defeated Thompson Pharmacy in the Floydada Tee-Shirt League baseball opener June 4. The Truckers won by a score of 9-8. On June 7, Fuller Trucking notched its second victory, defeating Davis Farm Supply (score not available). Tee-Shirt League games scheduled June 5 and 8 were rained out.

In Tee-Shirt action this week, Davis Farm supply defeated the Ponderosa Meat Co. team 11-2 Monday evening. Jeff Smith was the winning pitcher. Jeff Rainey took the loss.

In a high-scoring contest Tuesday, Fuller Trucking ran its record to 3-0 with a 17-12 win over First National Bank. Scott Smith got the pitching win; Steven Galloway was the losing hurler.

Davis Farm Supply beat Thompson Pharmacy 12-1 in the Thursday Tee-Shirt game. Nelson got the win; Shannon Whitfield absorbed the loss.

LITTLE LEAGUE

Adams Well Service put the first mark in the win column in the Floydada Little League when they outscored Collins Implement 14-4 in the June 4 season opener. Minner was the winning pitcher.

The second scheduled contest (June 5) was rained out, as was the June 8 game. Between rains, on June 7, Collins Implement turned the tables on Adams Well Service and beat them 22-8.

The Collins Implement team won another one Monday. They beat the Floydada Co-Op Gins team 9-4, with

Floydada FFA Members

To Attend SWPS Workshop

David Cochran and Brent Duke, high school members of Future Farmers of America from Floydada, have been selected to attend Southwestern Public Service Company's 17th Annual Farm Electrification Workshop.

More than 100 FFA members and leaders will attend the workshop to be held June 18, 19 and 20 at the Episcopal Conference Center in Amarillo.

The FFA members, from Texas and New Mexico, will be competing for five trips to the National FFA Convention at Kansas City, Missouri, late this summer. Thirteen hours of instruction will be offered in each of three subjects, farm motors, farm wiring and electric controls.

Two students from each of the wiring and motor courses and one from the controls course will be selected as outstanding students and will receive the trips to Kansas City for their accomplishment. Alternates in each course will be selected in case the winner is unable to attend the convention. Each student finishing the course in which he is enrolled will be awarded a certificate.

Heading the staff of instructors at the workshop are Ken Pollard, Texas A&M Agricultural Engineering Department — Electric Controls; Frank Kennedy, Vega, and Don Ham, Dalhart — Farm Motors; Bobby Browning, Texline, and Truman Kidwell, Childress — Farm Wiring.

The program for the conference was coordinated by Jay Eudy, Vocational Agriculture Area 1 supervisor; Sam Thomas, SPS agriculture development manager; and SPS power sales engineer Glenn Bickel, who will moderate the general sessions.

KID CRUSADE

June 18 Through June 22

Evangelist, Eva Strickland

Davis, Oklahoma

Each service will be filled with fun and excitement including songs, puppets, Bible stories, contests, and a lot of prizes to be given away.

Special awards will be given for attendance, Bible memory work, and visitors brought.

Something special each night. Pastor G.M. Van Hoose welcomes the entire family each night at 7:30 p.m.

Joe Cluck Named SA Camp Chairman

Joe Cluck, vice president of the First National Bank and chairman of the Floydada Salvation Army Service Unit committee has announced that he will assume the duties of the 1979 camp chairman for the Service Unit committee.

The camp chairman will be in charge of selecting 3 boys from ages 8 to 14 to attend The Salvation Army's Camp Hoblitzelle at Midlothian July 7 - July 14.

All Texas communities are invited to send selected youths who would not otherwise get a chance to attend a summer camp. The camp

chairman is responsible for selecting the boys. The Service Unit furnishes them with any clothing, toiletries or other items they might need, arranging medical examinations and providing them with \$5.00 in cash. It also arranges transportation to and from the camp for them.

The local Service Unit guarantees local expenses in getting the boys ready. The Salvation Army Texas Division pays all costs of the camp itself, which offers swimming, hiking, athletic contests, and many group activities in each of four one-week sessions.

ASMITH
"The gas shortage seems to be affecting everyone."

electric heat pump

heats

The electric heat pump is a remarkable device that uses about one half as much electricity to heat your home as a conventional electric heating system. This means substantial savings on your winter heating bills.

cools

Operating costs for summer cooling are about the same as conventional central air conditioning systems. During summer a heat pump works like a regular air conditioner. A blower pulls hot air from the house and passes it through a filter to remove dust and dirt. The air then flows across a cooling coil to cool and de-humidify the air. It then moves through ducts to all rooms in your home.

conserves energy

During winter months this cycle is reversed. For the heating cycle, the heat pump does an unusually efficient job. The only electricity it uses is to run the fan and the compressor. This is why heating costs are dramatically lower. Heat is removed from outdoors and pumped inside to heat the house. This is the feature that surprises most people, until they realize that there is always some heat in winter air.

saves money

Original installation costs for a heat pump are usually slightly more than for separate heating and central air conditioning systems. But depending on your installation, costs may be about the same or even less than for separate systems. A properly engineered heat pump... will mean important savings to you.

FLOYDADA POWER LIGHT

So They Say . . .

Views of Other Editors

Dog Majority?

ONE OF THE PROBLEMS WITH CON- trolling the dog nuisance in a city such as Canadian is that there are more dogs than there are dog owners. And while not all dogs constitute a public nuisance, a lot of them do...and not all of those who do lack owners. Dog owners are notoriously jealous of the privileges and quick to come to the defense of their pets when any law or law enforcement person threatens the life or liberty of free-running animals.

So the "dog problem" often becomes a "dog owner problem". The first step toward a solution, it seems to me, has got to be to isolate the "owned" dogs from the "orphans". This can be done, under current city law, by removing all un-tagged (and therefore un-licensed) dogs from the city streets. To do this would require a concerted effort, employing several people probably several days to round up and pen up the dogs, and to do away with all those not tagged within the time required by law. Until this is done first, it is not going to be possible to isolate the problem dogs who are "owned". But it ought to be done, for the public safety and the public health, immediately after the annual vaccination licensing day on May 12...which is mandatory.

It isn't going to be done unless a lot of public pressure develops, because city officials are notoriously reluctant to take any real action to do away with the dog problem in Canadian. But it ought to be done. It can't be done by the one animal control officer the city employs on a regular basis. To do the job effectively would require extra help on an organized basis for several days. But it could be done, the cost would not be prohibitive, and it ought to be done.

The problem is obvious to many people...to those who like to walk, or jog, or exercise, for example. Canadian streets are not pleasant places, day or night, for those who enjoy having their progress heralded, but by block by barking dogs...and occasionally impeded by attacking ones. The problem is obvious also to children on their bikes...and their numbers will be increasing as school classes are dismissed because bicycles offer precious little protection from harassing dogs which impede the right of passage, and more so if a youngster has been bitten and others frightened by free-runners.

The problem is obvious, as a matter of fact, to almost everyone except some dog owners who resent any restrictions and city officials who are reluctant to enforce any. If the dogs were permitted to vote, there is no question about which side would win a public election, because the dogs would be in the majority right now, and their careless owners would surely be enough to tip the scales if they aren't.

If the people who are concerned about the dog problem in Canadian would make themselves en masse at City Hall, they might make a sufficient impression to get action...and action to reduce the dog problem and isolate the real problem is definitely needed, and needed now.

—Canadian Record

We've been hearing in the last few days a lot of concerned citizens about the price of swimming in Canadian's municipal swimming pool...and we hope our City Council members have been hearing from them, because it's the Council that sets the price, not the newspaper.

Interestingly, the protests seem to cover a wide economic and family spectrum...from those with a lot of money and those with little, from those with children and those without. Their indignation is generally what seems to be inordinately high for the use of the municipal pool which is hot air from the recreational pleasure of the whole community...rates which are more than double those charged last year. Obviously it costs money to provide recreational facilities...to operate swimming pools, light playing fields, maintain money-makers, or even to be self-supporting, any more than police protection is supporting, or street maintenance. Why we organize ourselves into committees, vote bond issues and pay taxes...so that we can do, collectively, what we are unable to do for ourselves individually.

Is it like socialism? In a sense, it is. It is a practical rather than a political issue. All democratic government is based to the extent that a majority of citizens in a democracy vote to tax themselves collectively (and proportionately) to provide services which the community or needs. "Democratic" and "vote" are the key words in the equation.

All of these people who are objecting to double rates being charged this year for use of our municipal pool make a good case. They are heard by their elected representatives on the City Council, we expect Council members will heed and act. That's the way a Democracy works. I don't ask them to provide you with anything for nothing. Let them know that you are willing to pay taxes to provide this service...that the charges for use of it can be paid by taxes to build that \$275,000 community benefit...it seems reasonable to those who can afford those \$140 rates for the season. If we stick with the rates, we predict that the "operating" costs will be greater than it was when the rates were lower.

—Canadian Record

"What do you mean, we're out of gas?"

A Tax Change

Governor Clements has signed the so-called tax reform bill which will indeed make a lot of changes for Texas taxpayers. Whether we will like all these changes once we get acquainted with them remains to be seen.

One big change is to set up a single tax appraisal board for all property within a county, except for the county government itself.

This means that the property in Ochiltree County will next year have to be appraised by an appraisal board and use the same figures for the school, city, hospital district, water district and any other taxing authorities.

The county can use this appraisal if the commissioners elect to do so, but as a matter of practical politics, we doubt if this will be done.

This is for the simple reason that rural property is already appraised on the school tax roll at more than ten times what it is appraised on the county tax roll. It would take a politician with

more political courage than most of us possess to jack rural property values ten fold at the stroke of a pen.

The new state tax law grants homestead exemptions for the disabled and the elderly. Family cars and household goods are exempt.

Farm and ranch land will be taxed on its productivity rather than its market value. Under the formula of capitalization announced by the state, it would mean a drop in taxes for some land on the school tax roll and an increase in all land on the county tax roll.

The school districts of the state stand to lose a lot of revenue under the new state law and the state will reimburse the districts for part of what they lose, leaving it up to local districts to figure out how to recover the rest.

It will take a lot of study on the new tax bill and as is always the case with a major change, some of us probably won't like it.

—Perryton Herald

FARM & RANCH NEWS

Farm - Jobless Link Shown

These graphs, which are based on government figures, show unemployment drops in this country when agriculture does well.

In 1915, for example, farm prices dropped to 34 percent of parity, and employment went up to 7.5 percent. Two years later, farmers got 118 percent of parity for their crops, and unemployment dropped to three percent.

Farm prices plunged to 57 percent of parity in the Great Depression year of 1932, and 22 percent of the workforce had no jobs.

The most recent government figures, for 1977, show farm prices dropping to 65 percent, while unemployment jumped up to 8.5 percent.

Suggestions Offered In Mosquito Battle

PAUL W. TREPTOW III
CROSBY-FLOYD COUNTY
EXTENSION ENTOMOLOGIST

Recent rains have brought a mosquito problem to many Texas communities. Standing water from these showers makes an excellent breeding place for mosquitoes, noted County Extension Entomologist Paul Treptow.

Mosquitoes can lay eggs wherever standing water is available for a week or longer. "Old tires, tin cans, birdbaths, roadside ditches, rain gutters, temporary water containers and swampy places all can hold enough water to provide breeding sites for mosquitoes," the County Entomologist warned.

If mosquitoes are a problem, the first thing to do is eliminate their breeding sites.

Empty out old tires and place them where they cannot collect additional water. Flatten and discard tin cans.

Change the water in birdbaths every week. Clean out rain gutters, remove temporary water containers and see that rain barrels and water storage tubs are tightly covered. Drain standing water from ditches and swampy areas.

"If there is standing water that serves as a breeding site but cannot be drained or eliminated, treatment with a larvicide will be necessary," Treptow said.

One of the most effective larvicides is No. 2 diesel oil with a biodegradable spreader, applied at a rate of 20 gallons for each surface acre of water, or approximately 6 ounces per 100 square feet of surface.

Abate, malathion or Dursban applied to standing water at rates indicated on their labels also are effective larvicides, the county entomologist said. But he warned that labels should read carefully to determine the hazards these insecticides pose to persons applying them and to fish and animals that may use the water.

Adult mosquitoes around the home can best be controlled by space or residual treatments of insecticides such as malathion, Dibrom, methoxychlor, or Dursban, he suggested. Space treatments, generally fogs, have very little residual activity and require repeating at frequent intervals. Space treatment should be done during the cool hours of the night or early morning and when wind velocity is less than five miles an hour.

Residual treatment applied as mists or sprays to the resting sites of adult mosquitoes gives longer-lasting control than space treatments, the county entomologist noted. These should be applied to vegetation, eaves of roofs, under porches, and similar shaded areas where adult mosquitoes rest by day.

Soviets Indicate Continuing Large Purchases Of U.S. Grain

WASHINGTON — The U.S. Department of Agriculture today reported that, during regular consultations in Moscow May 31, officials of the Soviet Union indicated that relatively large purchases of U.S. grain would be continuing. These consultations continued a series held semi-annually pursuant to the U.S.-USSR Grain Agreement.

It was confirmed during the talks that purchases of U.S. wheat and corn for delivery in the year which began last Oct. 1 had reached a total of approximately 10 million tons, and that additional purchases for current year shipment will likely be made in coming months. This is the third year of the 5-year agreement.

The U.S. delegation was headed by Under Secretary of Agriculture Dale Hathaway, while the Soviet delegation was headed by Boris Gordeev, Deputy Minister of Foreign Trade.

Despite a record Soviet grain crop in 1978, it had until recently been anticipated that USSR imports of U.S. grain in the current year would total approximately 10 to 11 million tons, thus significantly exceeding the minimum 6 million tons specified in the Agreement. Now, however, as a result of recent Soviet purchasing and the May 31 discussions, the expectation is for a somewhat higher level of shipments, possibly 13 to 15 million tons. Shipments of U.S. wheat are not expected to greatly exceed 3 million tons.

Concerning prospects for the year of the Agreement, the general state of progress for the coming year of the Agreement appears to be that of one year ago. It is tentatively forecast that grain exports for 1979 will continue to be relatively large.

The next regular meeting of the Agreement was scheduled for early October.

Shipping Fever Study Underway

Shipping fever costs U.S. cattle raisers a hefty 100 million dollars per year. For every four calves that are shipped, one gets the disease. Eight percent of those contacting the disease die. Finding a cure for this disease would cut production costs and supply a lot more beef for consumers.

Dr. Mike Irwin, research veterinarian at the Texas A&M Research Center at Amarillo, has been trying to develop control methods for shipping fever. In his study of the disease, he learned that cattle are handled very much the same in Australia as the United States. There is one big difference: Australian cattle do not get shipping fever.

Irwin contacted several scientists in Australia and made a comparative study of cattle raising, marketing and transportation in the United States and Australia.

In both countries cattle are shipped long distances from where they are raised. Irwin thinks there are some differences that prevent shipping fever in Australia. Vehicle design, speed and distances traveled are different in the two countries. In the United States trucks travel 70 miles per hour. This exposes the cattle to strong winds and a severe chill factor during cool weather.

In Australia, trucks only travel up to 30 miles per hour over unpaved country roads. Cattle breathe a lot of dust but are not exposed to severe chilling. After being trucked a comparatively short distance, Australian cattle are put on more comfortable railroad cars for transportation to the coast.

Irwin and his colleagues found that weather conditions during transportation vary in the two countries. The United States has more extreme variations of hot and cold than Australia. In Australia daytime temperature at the start of the trip will be very close to that at the end of the trip at the coast. There is, however, big variation in day and night temperature, the same as in the United States. In the United States it is not uncommon to pick up cattle from the Southeast in 80 degree temperatures. After a 48 hour, 2,000 mile trip to West Texas, they may be unloaded in below freezing temperatures.

The marketing systems are different in the two countries and also could have a bearing on exposure to shipping fever. In the United States cattle are moved from farms where they are born and mixed with other cattle at sale barns. After the sale they are moved to an order buyers facility, and mixed with other cattle to make up a load.

This may take up to a week and during this time calves become weak because they eat and drink poorly. There is ample opportunity and time for exposure to disease. After this treatment, cattle are subjected to the stress and trauma of a long ride to a new unfamiliar home.

The marketing system is different in Australia. Cattle from the same ranch are shipped together. They are trucked to a rail head and are rapidly shipped to the coast where they are sold before they are mixed with other cattle. The stress of shipping comes before they are mixed with other cattle and possible exposure to disease. Irwin figures that cattle are more able to ward off disease under the Australian system than with methods used in the United States.

The scientists also made a careful study of disease organisms associated with cattle in the two countries. IBR, PI 3, and BVD are viruses commonly associated with shipping fever in the United States. Australian scientists found these organisms are widely distributed throughout the cattle population of Australia. This leads Irwin to believe that these organisms are as important as shipping fever in the United States as they are in Australia. Shipping fever is caused by a bacterium called Pasteurella hemolytica. This bacterium is not common in Australia. Shipping fever agents isolated from the United States are different from those isolated from shipping fever in Australia and cattle in Australia.

After studying all the reasons why Australia has no shipping fever, Irwin speculates there are reasons why Australia has no shipping fever. First, cattle are exposed to a variety of stresses prior to shipment. Second, the absence of the bacterium may be related to the reason why Australia has no shipping fever. Pasteurella hemolytica is a multi-ciliated bacterium. Two bacteria are common from cattle having shipping fever in the United States.

"Our studies with shipping fever systems in the United States and Australia have given us a lot of information which may help in our shipping fever in the United States," Irwin said.

MORE FEEDER CATTLE THIS FALL

Relative to feeder cattle should be considerably available this fall.

According to Lloyd Cline of Lamesa, past president and current board chairman of Plains Cotton Growers, Lubbock, the Jones-Madigan all-risk crop insurance under consideration in Washington "has been improved but is still far from satisfactory."

Cline and PCG past president W.B. Criswell represented the organization June 7 at a meeting of the Texas Association of Cotton Producers Organizations in Dallas where the bill was discussed.

The major producer objection to the bill is its "phase out" the disaster provisions of the current program which are now slated to expire with the 1981 year. As introduced the bill would have extended the program through 1981 but would have excluded participation all farmers in counties where the new crop insurance was offered.

This was changed in a House Conservation and Subcommittee mark-up session to extend the disaster provisions for all producers in 1980 and only for those not offering all-risk insurance in 1981.

"One year is of course better than nothing," Cline said, "but we are continuing to work in the full House and in the Senate for a two-year disaster program without restrictions."

The insurance feature of the bill calls for giving producers a choice of insurance coverage on 50, 65 or 75 percent of the farm's established yield with a 30 percent subsidy on premium up to 65 percent coverage.

TACPO reaffirmed its standing position, which is similar to that of PCG, asking that the disaster program be made full effect until such time as a workable, affordable crop insurance program has been developed and proven.

Castro County farmer Charles Axtell of Route 1, Springtown, has been named Chairman of the 1979-80 Plains Cotton Growers, Inc. Finance Committee and has set the date for the first meeting for June 27.

The appointment was made recently by newly elected PCG President Joe D. Unfred of New Home. Axtell is also PCG's Vice President. Gary Ivey of Ralls, who now serves as PCG's Vice President, named Henry Kveton of Route 2, Pleasanton, as Vice Chairman of the 11-man committee. Others appointed include Alvia Calvert of Brownsville, Cline of Lamesa, W.B. Criswell of Idalou, Ivey, Fred Cline of Lamesa, Myrl Mitchell of Lenora, Claude Nowell of J.D. Smith of Sudan, Dan Turner of O'Donnell, Jack Coahoma, and Kenneth Wofford of Lockney.

Cedar Hill News

by Grace Lemons

After another three inch rain the farmers are back in the fields trying to save their crops.

Edna Beth and Bill Tye, Winnie and Bill Beedy and Veda and Walton Wilson all of Floydada visited Mr. and Mrs. Albert Mize Sunday afternoon.

Mr. and Mrs. John D. VanHoose are enjoying this week boating and fishing in Kingsland visiting their son and family Mr. and Mrs. Cecil VanHoose.

Billy Ruth Lackey and Kim visited Dorothy Merrell in Lockney one day last week.

Elba Lee (Dillard) and her husband Mr. Riddle of Ama-

riilo visited Mr. and Mrs. Bill DuBois in Floydada this week.

Wanda DuBois visited her parents Mr. and Mrs. W.E. Lackey one day this week.

Jeanette Lackey of Floydada is improving nicely after sustaining a broken arm in a fall in her yard recently.

Edna Gilly ate dinner with her mother Mrs. Ruth Hill in Floydada Sunday.

Saturday Edna Gilly had as guests in her home Ruth Hill, Clara Redd and Virgie Flowers of Floydada and her nieces Melisa, Heather and Rebecca Hill of Springfield, Missouri. The children's parents were in New Mexico

where he preached in view of a call.

Mr. and Mrs. Marvin Lemons and family of Lockney, Mr. and Mrs. Carl F. Lemons and Jenese enjoyed a cook-out in the home of Mr. and Mrs. Phil Lemons honoring Linda Lemons, Marvin Lemons and Twyla Lemons birthdays.

Jessica, David and Diana Lemons and Jenese Lemons spent Friday night with Twyla Lemons.

A large number of friends and relatives attended the funeral of Charles W. Dillard, 83, held in Lemons Memorial Chapel Monday afternoon at 2 with Rev. M.W. Puttman, pastor of South Side Assembly of God Church and assisted by Rev. Joe Stone, pastor of First Assembly of God Church, Muleshoe. Burial was in Plainview Memorial under the direction of Lemons Funeral Home. Dillard died at 3 a.m. Saturday morning in Veterans Hospital, Amarillo. He was a native of Altia, Alabama and moved to Jack County as a child. In 1916 he

moved to Floyd County. He was married to the late Clersie Lorena Lackey in 1919 and farmed in Cedar Hill Community until his retirement in 1962 when he moved to Lockney, and later to Plainview. He was a member of the South Side Assembly of God and served as a deacon. He served in the U.S. Army in France during World War I and was a member of The American Legion. He is survived by one daughter, Joyce Morrison of Muleshoe; a half sister Hazel Boydstone of Parris, California; two step sister, Agnes Love of Wichita Falls and Ruby Beard of San Bernardino, California; and two grandchildren.

Linda Lemons was honored with ice cream and cake at a birthday party in the home of her parents Mr. and Mrs. W.T. Cooper in Lockney. Anita Bigham of Lockney, Kay Shackelford and Kevin of Plainview and Linda and children were present.

Jim Conner had a lucky ticket at Thomason Grocery this week where he won a sack of groceries.

'Texas' Opens Wednesday

Canyon, Texas June 13: Playing to the descendants of Quannah Parker as honored guests, the cast of "TEXAS" will swing into the fourteenth season on Wednesday the 20th of June at 8:30 p.m. They will appear with ringing sound and festive colors on the stage of the Pioneer Amphitheatre at the foot of the great cliffs of the Palo Duro Canyon to greet the people who have followed more than a million others to see and hear them there.

Aside from the people who are chosen with care through auditions in Canyon, Lubbock, El Paso, Austin and Dallas, many supplies are needed for the show. The list of props fills ten single-spaced pages of typewritten paper. There are ballet shoes

and hammers, lights for gels and sox, make up for Indians and scarves for black light, saddles and insect spray, flags and a wash tub, guns and a skull, wires and ribbons, wagons and long underwear, punch bowl and tomahawk, feathers and stones, hundreds of Levis and hundreds of hats.

To savor the excitement of the show which emerges from this mixture, come to "TEXAS" which plays nightly except Sundays from June 20 through August 25.

For tickets and information call 806-655-2181, or write Box 268, Canyon, Texas 79015. It is well to make reservations in advance.

There have been no gas shortages in the Panhandle.

The PMC "Wedge-Wik" rope applicator applies contact herbicide to weeds growing taller than the crop. Although this is the primary use, many other possibilities are being considered.

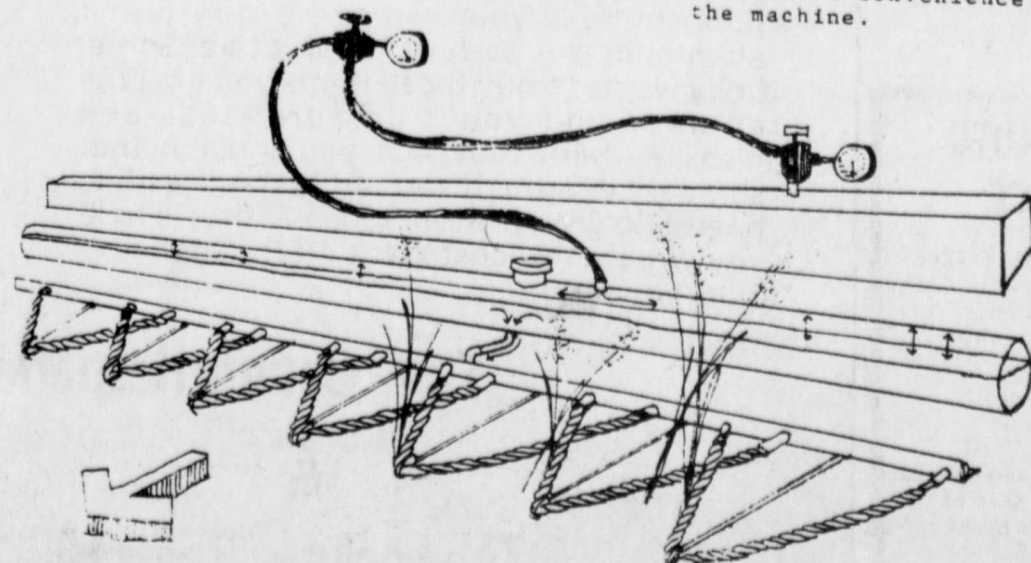

PRINCIPLE OF OPERATION

Compressed air is contained and held in the center section of the toolbar. Operational pressure is 3 to 100 psi. Optional air compressor kit maintains a steady pressure of 20-20 psi. Primary air pressure flows through manifold mounted on toolbar to cab-mounted precision regulator and special pressure gage which indicates secondary pressure from 0-60" water column. Regulated pressure then flows to the top of the PVC chemical tanks and forces the chemical out and into the hose manifold to which the ropes are connected. Varying degrees of rope wetness can be obtained easily and simply by adjusting the cab-mounted regulator.

Russell's Equipment & Supply

608 E. Houston
983-3751 Floydada

- The PMC "Wedge-Wik" is simply designed for rugged operation.
- Special rope arrangement ensured a completely saturated rope allowing maximum chemical to the weed.
- The unique tractor front mount style allows easy hydraulic adjustment to varying crop heights.
- Parking stands facilitate mounting and unmounting of the machine.
- The PMC "Wedge-Wik" Rope Applicator is designed for controlling weeds growing taller than the crop.
- A folding toolbar-type design adds extra convenience in moving the machine.
