article in the Amarillo News-Globe, it was reported that the well was found to a total depth of 9,825 feet.

significant find as far as the Palo Verde is concerned. Joe Loftis, of Strata Reserves Inc. of Fort Worth, is now producing 182 bbl and 1.1 million feet of gas from the well.

The well "is a fault trap mechanism, and I think it happens within (throughout) the basin," Loftis says. Strata plans some offset drilling.

Horizon Exploration has leased 1500 acres of land in Floyd County and more land is available for leasing. At this point no one will comment definitely as to how big the well is going to be or to any other activity. It would probably be 60 days before any results are definitely known.

The Lucie D. Stephens well is on the property owned by the DiFede children.

## Winds zap Bobcats 31-0 in 2nd loop win

Floydada zipped past the Childress Bobcats Friday. The final score was 31-0 making this their second District win. After a good initial field position, Bruce Williams returned a Childress punt 57 yards to put the Winds on the scoreboard first. A Donnell Weeks kick put the Winds in the lead at 7:35 left in the first quarter.

Again it was Williams that brought in the score. Barely two minutes later after Childress fumbled a punt and turned the ball over to the Winds on the 18 yard line. Williams drove those 18 yards to a score on the next play. Another Weeks kick made the score at the half 14-0.

The Winds limited the Cats to only 60 yards rushing and 61 yards passing. The Winds managed to rack up 234 yards rushing and 39 yards passing.

During the third quarter Weeks capped off a long scoring drive with a 14 yard score. Weeks then turned around and booted in the PAT. Later Weeks scored again with a 32 yard field goal.

The final score came from a 45 yard scoring drive that set up a John Foley five yard scoring run with Weeks adding the PAT.

The entire game was dominated by Floydada as the score indicated. The Winds had a few mistakes and penalties, but not as many as last week's game.

The Winds sacked the Childress quarterback several times and intercepted four passes.

The Winds face top-ranked Post this week in Floydada for their third conference try.

MIKE SALAZAR #24 takes advantage of a block to make one of the major gains against Childress Friday. The Winds face Post Here tomorrow.

Primera Mision Bautista, the Spanish mission of First Baptist Church, will observe a special day of activities on Sunday, October 24, to dedicate its new facilities at 400 W. Kentucky. Pastor Eloy Felan and the members of the mission have extended an invitation to the public to attend.

The activities will begin with Sunday School at 9:45 a.m. with an attendance goal of 150. Following the morning worship service at 11 a.m., a meal will be served at noon.

Open House begins at 2:30 p.m. and the Dedication Service will be at 3:30 p.m. Preaching the Dedication Sermon will be the Reverend Glen Godsey, pastor of Primera Iglesia Bautista in Plainview. Other guest speakers will be Dr. Strauss Atkinson, missionary for Caprock-Plains Area; Dr. Floyd C. Bradley, pastor of First Baptist Church; Pete Reyes, a deacon in the mission; and Pastor Felan. Dr. Bradley will present a brief history of the mission. Refreshments will be served during the Open House.

The mission occupied the facilities of what previously was the Cumberland Presbyterian Church on March 1, 1982. Since that time the members have been remodeling, repairing and painting the inside of the building, and improving the facility and grounds outside.

Through assistance from the Baptist Church Loan Corporation, the facility was purchased and is the property of First Baptist Church. A gift from the Oldham Little Church Foundation made it possible to complete needed repairs and painting. The building has educational space, an auditorium, kitchen, nursery, and the pastor's study.

The mission is a bi-lingual congregation. All children and youth Sunday School classes are taught in English. There are three adult classes taught in Spanish. Preaching services are in Spanish and English. In addition to its Sunday morning service, the mission also holds Training Union at 5 p.m. and Evening Worship at 6 p.m. each Sunday. There is also a full schedule of activities on Wednesday evenings.

## Safety emblem posted

You may have noticed this black, orange, and yellow sticker in windows around town and wondered what it meant. The 1956 Study Club has been concerned with community welfare and safety.

This sticker was designed by the club and distributed to responsible community members who agreed to help with this project.

The purpose of this project is to designate a safe and hospitable place

for persons needing help. For instance, if a small child becomes lost or frightened of an unfriendly dog, or injured from a fall, he can be assured help and will be welcome in a home with a sticker on a window or door.

Adults should explain this sticker and point one out to children to make them feel secure in seeking help in these places. If you have questions regarding this you may call any club member or club president, Stacey Smith 983-2048 or Connie Bertrand 983-2900.

### Fire Safety Tips

From time to time in this column, I will be giving tips on fire prevention, fire safety and what to do in the event of a fire. This week I will discuss how to report a fire.

When reporting a fire, the person turning in the alarm should remain as calm as possible.

They should inform the dispatcher of the type of fire (structure fire, grass fire, trash fire, vehicle fire, etc.), location of fire, their name, and the phone number where they are calling from.

Once this is done the person calling the fire has done his or her job. For your

own safety, stay away from the blaze, not in the street or under power lines.

# Discovery by partners

"...one small step for man, one giant leap for mankind."  
Neil A. Armstrong, 1969

When U.S. Astronaut Neil Armstrong made the first footprint on the moon, he and his partners Buzz Aldrin and Mike Collins fulfilled a centuries-old dream for all mankind.

The success of the Apollo 11 mission was more than a triumph of three crew members working together. It was a triumph of a great network of partners that spanned generations, uniting the discoveries of the past with the skills, courage and imagination of thousands of scientists, engineers and others.

The Apollo 11 lunar mission, which rocketed mankind into the computer age, pioneered the way to a new era of people working together as partners managing technology.

Today, you and Southwestern Public Service Company are partners discovering new ways to manage electricity. For instance, when you install a high-efficiency add-on heat pump to your present furnace, you and SPS work together to help save money. Because the add-on heat pump is a difference worth discovering.

You and SPS, partners managing electricity, make the difference.

### Q: How often should I have my car washed?

A: It depends on the external factors that your car is exposed to. For example salt or other corrosive matter such as sand should be washed off approximately every week. In seasons or climates less conducive to corrosion, every two or three weeks should be adequate. One important factor that could vary those figures is whether your car is parked in a garage overnight or left out in the elements.

## Lockney Care Center Capers

**BY VICKIE HUTTON**

The Halloween spirit has come to Lockney Care Center. We have spent the last two weeks decorating with all kinds of spooks. This has generated a lot of excitement. We are looking forward to all the little ghost and goblins visiting us Halloween night.

Monday we took Billie Self to Matador to spend a few days with friends and to visit her home there. All the residents and staff at the Care

Center send a special thanks to all the ladies who took such good care of Mrs. Self during her stay. We missed her while she was away and sure was glad when she returned Thursday. Mrs. Self is a very special lady and loved by all.

Music Therapy with Kim Sherman was an experience this week when we exercised with a parachute to music. This was a lot of fun! Kim always has a way of making Music Therapy a real treat. We look forward to Music

Therapy more and more.

## Sewing hints given in Sewing Hints Contest

As the economy becomes tighter and clothing becomes more expensive, there is a growing trend and interest in creating fashions at home. Recognizing this trend, Stitches' Pretty sponsored a Sewing Hints Contest recently.

June Ware was the first place winner of a \$50 shopping spree at the store. Second place winner, Janet Lloyd received a pair of Wiss pinking shears and Kay Hale won an Iron Safe iron converter for her third place hint.

Organization is a key part to making the home sewing experience fun and rewarding. June Ware gave a hint for a method of pattern organization which is an aid for both pattern maintenance and wardrobe planning.

She wrote, "Put pattern package in a loose-leaf notebook and store the pattern tissue and sewing guide in a zip-lock freezer bag."

"Split the pattern package so both view side and yardage chart may be sealed under clear contact paper on a page that fits a loose leaf notebook. The notebook is indexed, blouses, skirts, dresses, etc."

"The pattern tissue and sewing guide are put in a zip-lock freezer bag. The clear bag is labeled with the pattern number, size, etc. The pattern view side of the sewing guide is placed to show along with the pattern number. The plastic bag then may be filed in numerical order in a cardboard file box or storage box."

The notebook may be carried to the fabric store; thus, one has her whole

BY COACH L.G. WILSON

Boy, it was good to beat Childress. Even though they are not as strong this year, they are still a well coached team and when you win a game from them, it cannot be classified as a "gimmie."

Our boys played a good balanced game. The defense was much improved. The four passes intercepted by our secondary was one of the top performances of any secondary we've had, if not the top performances.

The linemen and linebackers led the tackle parade, which indicated they were doing their job well.

We had a balanced performance from our offensive backs - all ran hard and blocked tough. Again, our kicking game was outstanding.

This week we take on the #1 Post Antelopes. This is a challenge we're looking forward to. We as coaches, and the boys must concentrate on an all-out effort this week—both in preparation and execution.

We are a little bruised up, but by Friday night I expect everyone to be ready. Come Friday night, Whirlwind Stadium will be the place to be for an entertaining night.

By Coach Mike Cocanougher

The Whirlwind freshman team lost a decisive game to the Childress Wildcats. The final score was 38-8.

Childress scored three times in the first half. Our only score came in at the end of the second quarter. A pass from Joey Kemp to Dale Minner led to the 30-yard touchdown. The PAT was run in by Tony Caballero.

The Childress team had their JV and freshman teams combined. We were playing a more experienced team. Overall, considering who we played, the boys played a hard whole game. I was pleased with their performance. They played a closer game than the score indicated.

Again, the boys played a good hard game and didn't give up even at the end.

## Local & Yocal

Two out of three is not a bad average for a country boy fresh in from the sticks. Yocal I will concede one thing to you last week. Your stones and bones were more correct than my educated crystal ball. I had not fed my computer the information that Tony Rodriguez was hurt and might not play against Idalou.

Boy howdy did you have too much to drink or what? I had much trouble trying to get the gist of what you meant.

Now for this weeks computerized clear as crystal critiques of this weeks contests.

The Red Raiders will travel many miles and be away from little if any crowd support. They should contact the Buffaloes of WT to see how it felt. The Raiders will lose to Washington the #1 team in the nation by 20 points. They barely kicked the Owls.

The Harris poll last week had the Winds as 1 point favorites. I wonder how Mr. Harris sees this week's bout between the Winds and the Lopes. The home crowd and fan support along with Donnell's talented right foot should prove too, two no three points to many. Go Winds win District.

Longhorns you have improved greatly and maybe with Tony coming back and the Lockney spirit building to a peak you can tame the Tigers. Better be ready. Horns by!!

From a source I dare not reveal some folks are trying to win the money that their paper is trying to give away. Yocal my clue this week is. Reckon you and I are one person doing both columns. I had a garden. I wear 10 1/2's. I'm an optimist. I have a wife. I play golf, fish and hunt and have been known to say back up ten yards and punt.

Local, maybe you're right about me being an 'Old Fossil'. I'm certainly going to need an innovation in message transportation to the newspaper. At present, I rely on carrier pigeons to do the trick. They must be deficient in vitamin K or something, according to the way my article looked last week. Seems like they had a hayday with the ole pulp before publication. It took me 15 minutes to make out what the column was saying and I wrote it. I've started my birds on oyster shells to supplement their feed, so my articles should look better from here on in.

Local, I hate to be an "I told you so", but, how 'bout' those predictions last week. Three for three - you can't beat that.

Those Raiders slipped past Rice in the last 3 seconds of the game, and that's just too close for my blood pressure to take. Come on Tech, let's stop dragging your feet. I see you on top of Washington Saturday, by 7 points.

Idalou had little trouble against Lockney Friday night with a 27 to 12 victory. I'm going to pull for the Longhorns, but, unfortunately the bones show Slaton coming out on top by 10 points.

We both had Floydada pegged against Childress and rightly so. The most exciting thing 'bout' that game was your vivid description of the long, scenic journey. However, a win is a Win, and we'll take it. The tide will change this week as Post should come out on top by 14. Whirlwinds, I hope you can prove me wrong on this one. Now that we're nearing the end of this lark.

Some slowing down, others near park. I've recently celebrated the anniversary of my birth. And also been honored for some of my worth.

THE WHIRLWIND BAND gave another outstanding performance Friday night at Childress. Their performance is the contest marching show for U.I.L. The band will perform Saturday night at the Texas Tech Band Festival in Lubbock.

### TETANUS IN ANIMALS

Fall is the time of year that many 4-H and FFA livestock projects are purchased and put on feed. One problem that these young livestock producers will face, particularly in sheep production, is the possibility of death loss due to tetanus. This problem is faced by commercial livestock producers year in and year out.

Lockjaw, the old-fashioned name for tetanus, is a disease which affects practically all warm-blooded animals, including humans.

The name came into use because of the intense spasms of muscles about the head of affected animals. However, many different groups of muscles are affected by tetanus. For instance, the animals may show a "saw horse" appearance and be hypersensitive to sudden noise and other stimulation.

Because the tetanus organism needs dead tissue to organic material as well as a lack of oxygen to grow and produce its toxin, dirty wounds which are closed

to outside air are the most dangerous.

Horses and sheep are most commonly and severely affected, often through a puncture wound or injury. Sheep commonly become infected through castration, docking wounds and shearing cuts.

Young pigs can also develop tetanus when infection gains entrance through castration wounds, fight wounds or navel infection. Since pigs only rarely develop tetanus, producers seldom do anything to protect against the disease. If facilities are known to be heavily contaminated with tetanus spores, an injectable antibiotic could protect swine.

Spores of the tetanus organism are found almost everywhere in nature, including the digestive tract of animals such as horses and cattle. They are most prevalent in intensively cultivated soils, are resistant to chemical disinfectants, and may live in contaminated soil for several years.

Horses, the species most sensitive to tetanus infection, can be protected

effectively with vaccines called toxoids. Two doses of toxoid given four to eight weeks apart gives good immunity for at least a year.

Veterinarians may recommend an annual booster dose of toxoid vaccine in areas where tetanus is a serious threat. It's especially important that brood mares receive a toxoid injection during the latter part of pregnancy. This assures the mare's colostrum will have a high level of antibodies to the tetanus organism which are passed on to the newborn foal.

If vaccination history is not known and a horse is injured, a veterinarian will usually give a dose of tetanus antitoxin (hyper-immune serum from another horse) to protect against the disease.

Lambs can be given antitoxin or a dose of antibiotic to protect against tetanus at the time of castration and docking.

While the disease is occasionally reported in cattle, dogs and cats, it's so rare that producers and pet owners do not take any precautions.

For more information on tetanus in animals, contact your local veterinarian.

## Handwriting analysis program presented

The members of the 1950 Study Club had a very entertaining and informative program for their October meeting at Lighthouse Electric on October 8.

Dr. James Cox of Plainview, an expert in Grapho Analysis, explained that personality traits and characteristics can be determined from one's handwriting. Each member's handwriting was observed by Dr. Cox and he gave an analysis of the personalities based solely on their handwriting.

The hostess for the October meeting was Nettie Ruth Whittle. The following

members attended: Sue Moore, Roberta Russell, Lovene Moore, Wanda Williams, Peggy Probasco, Charlotte Campbell, Shirley Morton, Margie Fowler, Doris McClain, Melba Vickers, Lucy Eastham, Nettie Ruth Whittle and Dell Gray. Jo Payne attended as a guest.

Roll call was answered with "my first handwriting teacher."

Members were reminded of the Caprock Fall Board Meeting of the Federation of Women's Clubs, which will be held on October 23 at Andrews Ward School in Floydada. The 1950 Study Club will be hosting this meeting, along with Floydada's 1956 Study Club and the Lorenzo Study Club.
