VOLUME 22

BROWNFIELD, TERRY COUNTY, TEXAS, OCTOBER 29, 1926

NUMBER 10

## Chamber of Commerce CURRENTS By the Secretary

Well, it struck us—just what all of us have expected, but hoped would not come—the slump in cotton, which brings on more talk on diversification. We want to sell two cars of hogs (gilts) for February delivery. The secretary is ready to book orders. We need more cows and chickens.

The Chamber of Commerce is in correspondence with parties who are in the market for broom corn and beargrass, and is undertaking to secure a market for castor beans with hopes of ultimate success. Castor beans will grow on any soil, and we should become a good market.

We must get away from cotton as it has been brought home to us that any country that makes it the major crop is facing disaster at all times.

During the time spent in Dallas, strong efforts were made to locate cotton pickers. They are not to be found. They are as scarce in East and Northeast Texas as here.

I met hundreds of farmers from those sections who stated that their cotton was standing open in the field with no pickers available.

Why not dismiss the schools. I talked with numbers of people who would like to take their children out, but don't want to do so because they would get behind the others in their grades. One month dismissed would largely take care of the situation.

### The Alabi

At the South Plains Fair Terry won 6th place, winning out over Lamb county only, but the score by divisions showed that our display of corn and grain sorghums was better than either Lynn or Hale. On oats and barley (cow pasture planting) our showing was better than Crosby, Dawson, Lynn or Hale. On peanuts and cow-peas, our score was better than Crosby and Lynn and equal to Dawson. On other crops we equaled Dawson and was better than Lamb.

At the Dallas Fair our standing was 33rd out of 41 entries, but the score by divisions showed as follows: Corn and grain sorghums scored higher than Floyd county who won 31st place.

On oats and barley our score was higher than Eastland, Lubbock, Wheeler, Kaufman and Floyd.

On Alfalfa, sweet clover and sweet potatoes, we were better than Randall, Hemphill, Lamar, Howard, Collin, Marion, Brisco, Dawson, Brown, Hill, Anderson, Wheeler, Rusk, Angelina, Hunt, Kaufman and Floyd.

On peanuts and cowpeas, we scored better than Hale, Smith, Collin, Dawson, Anderson, Rusk, Cass, Ellis, Angelina, Wood, Hunt, Kaufman.

On forage crops we scored higher than Hemphill, Henderson, Smith, Lubbock, Lamar, Marion, Garza, Rusk, Cass, Angelina, Hunt, Kaufman and Franklin.

On fruit we scored better than Brown and Wood.

On vegetables we scored better than Rusk, Cass, Ellis, Angelina, Wood and Franklin.

On other crops our score was better than Smith, Lubbock, Dawson, Anderson, Garza, Cass, Wood, Hunt, Kaufman and Franklin.

On attractiveness, our standing was better than Smith, Haskell, Briscoe, Gregg, Angelina and Hunt.

To sum the whole matter up, we would have taken a much higher place but for the following reasons:

The express company lost my show kaffir, cotton and corn, and in fruits I was not able to find ten quart jars containing five different kinds of fruit. I showed five quarts of fruit, and 5 plates containing five apples each, from which to make the selection.

Interest manifested in this country by people from East, North and other Texas points was greater than at any previous exposition ever attended by the writer, and a substantial immigration into this country will probably be witnessed within the next few months.

The last thing one sees at night is cotton wagons and trucks, and when one gets out at daylight, every gin yard is covered with them, and six gins are running far into night; some of them all night.

Mrs. A. E. Morgan and little son, A. E. Jr., of Panhandle, Texas, are visiting in the home of Mrs. Morgan's sister, Mrs. Stricklin.

## Indian Summer

### EDITORIAL FAMILY ENJOYS A DUCK DINNER

The editor has always believed he did not like duck meat. We haven't the slightest idea why we ever formed such an opinion or imaginary opinion, as we did some time or another in our existence. In fact we had a hunch we did not like any kind of dark, wild meat.

Last Friday we were along with the balance of the family invited to dine at the noon day meal with our County Judge H. R. Winston and family. Now we had heretofore always enjoyed a mighty good meal at this splendid home, for no one can take even a casual look at the Judge without a reserve opinion—it may be a silent one—that he has plenty to eat and eats it, and we want you to know we were tickled all morning about how we would clean up on him at the noon meal. But imagine how our feathers dropped, as it were, as on the way to his home he confided to us with a broad grin that the wife was cooking five ducks for dinner. Yet we held our piece or peace, if that correct, and even when dinner was announced, and we were pointedly asked by Mrs. Winston if we liked duck, we had to answer in the negative. But a nice juicy piece was put in our plate and covered with nice, browned cream gravy, it smelled so nice that we, like the first Chinaman that ever ate pork, couldn't resist a taste, although it meant death for him if caught. Why, bless you Paddy, the gravy was not only good, but that duck was simply larruping, and if you don't believe we made a meal of duck, duck gravy and many other side issues, ask anyone present at that bountiful. But it may have been that no other duck cooker in our young life had ever learned the art as Mrs. Winston. Anyway, we are now a confirmed duck devourer. Next!

The Judge and two or three other men of the town had killed the said ducks out at the Pickett farm north of town, and they are out there thick they report, and eating his maize to a fare-you-well. As a consequence, these ducks were so fat they could hardly toddle or quack! and that is just another reason why they were mighty good eating. We hope the judge goes hunting again and remembers to call us.

P. T. A.

The program for the Parent-Teacher Association on last meeting night was postponed until next Tuesday night, Nov. 2nd, and gave way to Mr. Frank Norfleet. The program for next Tuesday night will be a definite, resolved: That schools twenty years ago were better than those of today.

A male quartet is to be gotten up by Judge W. W. Price. You are invited to come.—Reporter.

## VISITOR GETS STRUCK ON TERRY—TO MOVE OUT

In conversation one day this week with Rev. H. D. Heath, he informed us that Mr. T. R. Baits, of Decatur, and Tax-Collector of Wise county, and who is interested in some farms with Mr. Heath just over the line in Yoakum county, beyond Tokio, was a visitor in his home last week, and inspected his place west of Tokio. Mr. Baits expressed himself as very highly pleased with everything in this section despite the depressed prices of cotton. He was especially delighted with the rapid developments here, and to see corn making as high as 40 bushels per acre and cotton from one-third to 1-2 bale per acre. It sure looked good to him, he said.

Along with Mr. Baits came another old Wise county neighbor of Rev. Heath, Mr. J. L. Kirby, who became so struck on Terry and Yoakum that he went back home with the full determination to dispose of his property and move out here by the first of the new year. In fact he has already rented one of the Heath farms providing he can dispose of his property and get out here.

An amusing incident of the visit of Mr. Kirby here, which was his first to this section, was that Rev. Heath, the first night of their arrival, and which they spent in the home of Mr. Heath in this city, was that

he (Mr. Heath) could not show Mr. Kirby as good corn as he could find in the river and creek bottoms of Wise county, he would make his present of the best span of mules he had on the farm. Mr. Heath informed us that about all Mr. Kirby would say the next day when he entered the big corn field with ears hanging off nearly as long as your arm, was "well I'll declare." He had never seen anything like it on any uplands in his life. That night Mr. Heath asked him if he wanted the span of mules, he answered that he was thoroughly convinced.

These gentlemen took a lot of the products, such as kershaws, maize, corn, turnips, potatoes, etc., back home with them, and they will be put on display in Mr. Baits' office in the Wise county courthouse.

By the way, we are going to tell our readers at an early date about a certain preacher who realizing that he and his wife were getting old and had never accumulated anything in the ministry, and with the certainty that the day was fast approaching when some younger man would take his place with the best congregations, decided that they must prepare to look out for themselves in their old age. They therefore invested their little savings in South Plains land—but wait for the whole story.

### FINISHING TOUCHES BEING GIVEN NEW COURTHOUSE

Marble cutters and workmen are here now putting up the finishing polished granite slabs around the walls, stairways and corridors of the new courthouse, and Mr. Frank Morgan believes he will have the work completed and ready for final inspection in the next week or two.

As this work goes on one can more readily see what a wonderful piece of work the county is receiving in this new building. Indeed it is a thing of beauty and a joy forever.

Strangers within our gates are all remarking on the beauty and architectural correctness of the structure. Many of them of course say they have seen larger buildings of the kind but all are agreed that none exceed it in real beauty of design and finish.

Again we wish to congratulate the Commissioners Court, the contractor, J. M. Morgan & Son, the architects, Messrs. Peters & Haynes, and last, but not least the good citizens of the county who believed in the county, and knew we needed a new courthouse.

### BROWNFIELD CLEANS O'DON- NELL FOOTBALLERS AGAIN

The local football team met their fifth team of the season on Friday afternoon and held their head above defeat again. In the five games the boys have not even been scored on.

The game was very poorly played by both teams. The locals scored a touchdown in the first of the game but seemed to have lost their balance for the remainder of the game. The visitors never did endanger our goal line.

The stars of the game were not many, however, Dallas, Tannery, Crusenau, Zackery and Goodpasture deserve mention.

The game for Friday has not at this writing been matched, but on Friday, Nov. 5th, the boys will go to Post. We should like very much to have a large number of Brownfield supporters to accompany the team on this trip as it perhaps will be the hardest game of the season, and we hope to hold up our unscored record.

Back football and let your town be known.—Reporter.

## SATURDAY A GREAT DAY IN BROWNFIELD

While the crowd seem to be a little shy of Saturday before last on account of the fact that Saturday week was a very wet day, yet sunny. There was much more trading. In fact it seemed that the people had been awaiting this great bargain event, and as the prices were more keeping with the present price of cotton, everybody seemed to be ready to make the fall and winter purchases, and purchase they did.

Not only did most every dry goods house in town have on a sale, but our grocery merchants were right at their warm side, not to mention the furniture and hardware men and as a consequence, Saturday was made an all round gala day for the buyer. And they were here from the four quarters of the trade territory.

A whole week of pretty weather favorable for cotton gathering had passed, and as a consequence the grower and the pickers as well had some cash on hand to make their week end purchases, and they found

that the merchants were all prepared to make their dollars go just as far as possible.

In our rounds Monday morning, we learned that our merchants had done a great business Saturday, and a few of them reported the greatest day of the season by far, and were more optimistic about the general outlook than they have been all fall. Indeed one merchant informed us that he had driven out Sunday afternoon and said he could not miss the cotton that had been picked to date. He said the fields were truly white unto the harvest.

These great bargain events are being extended into and including this week in almost all cases, so the purchaser in the Brownfield territory is assured of another banquet of bargains this week.

Don't forget that Brownfield is not only a good place to sell cotton and other farm products, but is also the best place on the South Plains to do your trading.

### PAVING BONDS WERE BADLY DEFEATED

The anti-bonding people had their ending here Tuesday, and defeated the paving bonds at a tune of 149 to 64, according to unofficial figures given the Herald. The anti folks did hard work all day, but the pro folks seemingly took little interest.

Thus paving is delayed for a time, but every public improvement has had to be fought out at the ballot box from one to three times here, but we finally get them. The pessimistic cotton outlook just now no doubt figured in the defeat of the bonds.

Probably if the election had been called a month sooner than it was and found cotton around 17 cents, the history of the election would have read quite different. As it was the anti crowd had some good arguments according to their own notion, and they did not fail to use it.

Of course those who want decent streets admit defeat for the time, and are too democratic to even argue the question, but they know how to fight when well organized, having had many battles already, for as we stated above, not a single improvement has ever been made in the city but has been purchased by a hard battle with some here who do not want anything but a country village.

Our old friend J. S. Day, of Tokio, donated this week to keep 'er coming out his way.

### TWO CARS WRECKED HERE THIS WEEK

There are still lots of people in this old world in an awful hurry to get nowhere in particular, and if they would just endanger themselves as the two strangers, whose names we did not try to get very hard, did this week, we would just say: "Take to it all topper, you know the road." But they endanger everybody else as well as themselves, for you cannot sometimes always tell when they are going to use both sides of the road.

The first car wrecked was a new Buick touring, which the driver lost control of out on the Plains road about a mile and near the Peters farm. As a result of wallowing in the ditch it was whamper-jawed and a general ugly sight to behold. But it was somewhat mended by a local garage crew.

The second stranger went into the ditch a few miles out on the Lubbock road Monday afternoon with a Ford, and those who reviewed its remains were of the opinion that it was an even sorer sight than the Buick.

We failed to learn just what either of them were drinking, but none of the local toppers seemed to want any of it.

Births: A girl was born to Mr. and Mrs. C. George, last week. Also a boy to Mr. and Mrs. Virgil Bynum. Boys appeared at the homes of Mr. and Mrs. Carl Lewis and Mr. and Mrs. Mun. Telford this week.

## FARMERS OBLIGED TO SNAP THEIR COTTON

The Herald and everybody else we have heard anything about have been advising the farmer to pick all their cotton this year and let the bollies go. Good advice—but—

Like a whole heap of other advise, is going to be mighty hard to comply with, in fact, from what we can learn from our farmer friends, it would be almost a human possibility this year.

The fact of the matter is that the abundant rain and much cloud weather has rotted the burrs until they will pull off with the cotton in spite of all that can be done. But the cotton is well opened and reasonably white considering all the rainy weather we have had.

Another good thing in their favor is that all our gins are now equipped with the very latest cleaning devices, and this burry cotton comes out surprisingly clean and free from foreign matter. For this alone the old farmer can thank his stars. He had to put up with the equipment of the early childhood days of the writer, they would simply be out of luck as sure as you are born.

Now as to some extended vice, being as advice is free and they are getting it from many sources, is not

to pick the cracked bolls. There is an abundance of the well opened fellows yet. In fact those who have examined the fields recently say the cotton that has been picked cannot be missed—look as if a sack has not been dug in any of them. Therefore it would be foolhardy to pick brown or stained cotton that would only ruin the sample, and it takes a good grade and long staple at the very best to bring 11 cents.

We can remember the first year we landed in Texas, 1900, when the farmers begin to get ten cents for cotton, and they figured they had almost struck a gold mine, and they had for those days, but calico was selling for 50 per yard, percales 7 or 8c, and raw bonam around 10c. If other things were down in proportion to 1900 now, no one would be grumbling much. If the farmer was able to buy bacon—and he shouldn't have to buy any—and Ford cars for any amount, he'd be alright.

It is not going to the bow of the boat that has too many natural resources, and is capable of producing many things.

Put on the old smile and smile awhile.

## Highest Quality

YET COST NO MORE

We carry the best meats and give the best service of any establishment on the South Plains. We carry the finest line of groceries that money can buy, and our quick turnovers means that our supply is always fresh.

### C. D. Shamburger

No other state has such potential as Texas has in petroleum, natural and developed diverse fuel resources gas, and lignite.

### THE "FIRE-PROOF" MYTH

"An important truth is constantly being emphasized by the experience of fires occurring in so-called 'fire-proof' buildings, which are not what their name implies. In other words, while they will not burn 'down,' they will burn 'out.'"

"This fact has been demonstrated in several more or less recent occurrences, in some instances in fires arising from outside exposures, and again from the contents, inflammable in their nature, becoming ignited and the fire spreading thru ventilating shafts and other openings to other floors, where more burnable material is stored," says the magazine, Fire Engineering.

"No matter how fire resistant the structure itself may be, it is only as fireproof as its contents. If the contents are inflammable, there is just as likely to be a hot and severe fire in the 'fireproof' building as in that of less resistant construction.

"The term 'fireproof,' as applied to buildings, is very deceiving, and its use should be discouraged, as it naturally gives to those not well informed in the matter, a false sense of security which is dangerous in the extreme.

"A much more sensible and certainly truer term is that of 'fire resistant,' which tells the story of the modern building, and emphasizes its advantages, without exaggeration."

### Man Changes Little

#### After Age of Fifty

The man of fifty is a completed work of art. The man of thirty, even the man of forty, still manifests signs of indecision and incompleteness. They may develop into demons or demigods, into swineherds or supermen, into sinners or saints.

As the man is at fifty he will probably remain to the end of this terrestrial phase, to say the least. His features are sharply cut and chiseled and polished as if by a sculptor's tools.

Every light-hearted deed he has uttered, every careless word he has uttered, even the secret thoughts that have crept through his memory or imagination—these are some of the sculptor's most delicate tools which have played their part in making his face what it is today.

His characteristic tricks of manner are as unalterable as the shape of his skull. Those who know him intimately can predict almost with precision when he will wave his hand or shake his head or lift his eyebrows, when he will smile and when he will scowl.

The peculiarities of his speech and the general tenor of his conversation are quite invariable from day to day.

A thousand factors in his early environment and education have determined the timbre of his voice and the emotional reactions which control his words and gestures. After the age of fifty such inflexible indices of character as the eyes, hands and voice rarely change. This is because at fifty the character is substantially fixed. It is indeed extremely difficult to prove that the man of fifty possesses free will. He will almost inevitably respond to a given combination of stimuli in precisely the same way.—American Church Monthly.

### Style Gives Comfort

French scientists have been investigating to learn if women can stand more cold than men. The man bundles up in cold weather, but of recent years the woman has "unbundled." Sheer hose, light clothes, low shoes, low necks and all of the other fancies have caused many doleful prophecies by the men.

Now comes the Frenchman who says that the fibers of their muscles are finer and thus cover the nerves better. The blood vessels are larger and their heart action better, thus distributing the blood better. He gives another reason which is passed on in fear. He says that their bodies are covered with a layer of fat, sometimes very thin, it is true, and this helps them to resist the cold.

Whatever the scientist may say, he has overlooked the fact that a woman is only comfortable when she is in style. Did nature consider this when woman was developed, or has woman realized it as the ages passed and taken advantage of the kind Mother Nature?—Anderson Herald.

Horse-racing trophies that have been won in England this season have been sent to augment the wealth of gold and silver plate won on the turf that is stored away in the vaults of safe deposits and leading London jewelers. Families who have had winning owners for generations own so many cups that they refuse the responsibility or anxiety of storing them in their own homes. In London vaults there are several collections numbering more than 100 pieces.

### AARON SAPIRO TO SPEAK AT THE TECH

LUBBOCK, Oct. 27.—Aaron Sapiro, America's foremost co-operative marketing expert, the man who worked out the fundamentals of successful grower cooperation and who is general counsel for the Texas Farm Bureau Cotton Association will speak at the Tech Pavillion here in Lubbock, Tuesday, November 2nd, at 2 o'clock. Sapiro will speak upon the subject of the existing cotton condition and the cause and will outline a permanent program of solution. He comes to Lubbock under the auspices of the local branch of the Texas Farm Bureau Cotton Association with the cooperation of the Lubbock Chamber of Commerce.

Sapiro is a national authority on orderly and cooperative marketing, according to N. H. Payne, field representative of the Texas Farm Bureau Cotton Association.

With the drop of the cotton market, business men and financiers of the entire nation have been seeking a solution to remedy the situation. The cooperative marketing idea is thought to be the best solution and the Texas Farm Bureau Cotton Association is the only association of this nature in this section.

Invitations are being extended to the citizenship of the entire South Plains to attend the meeting and hear the address from Sapiro. The biggest number of farmers that have gathered in Lubbock in many months are expected.

Sapiro is a forceful and dynamic speaker. He speaks plainly, frankly and in a magnetic manner. In addition to a large number of farmers of the South Plains, bankers, merchants, professional men and others are expected to gather here from every town on the South Plains to hear his message.

Sapiro has twelve speaking engagements in Texas. He talks at Abilene, Colorado, Lubbock, Lamesa, Plainview, Childress, Vernon, Waxahachie, Hillsboro, Marlin, Temple and Texarkana.

### SURE

A certain newspaper that made a practice of answering inquiries from readers received this one:

"Please tell me what is the matter with my chickens. They go to roost apparently well. The next morning we find one or more on their backs on the floor, stiff, combs white and the feet in the air."

It was the editor's busy day, and this was the answer his reader received:

"Dear sir, your chickens are dead."—Kreolite News.

Rudolph Moorhead, druggist, and Red Nabors, filling station man, both of Meadow, were here on business Monday.

Judge T. O. Stark, of Seminole, was a business visitor in Brownfield, Monday.

Texas stands away up in the list of oil producing states where crude oil is processed into the finished product.

### CARR HOME DESTROYED BY FIRE WEDNESDAY MORNING

The citizenship of the town were vigorously awakened about 2 o'clock A. M. Wednesday by the scream of the fire siren, and looking toward the eastern section of the city, a big blaze was discovered already making rapid headway on the C. D. Carr residence. The fire boys responded as hurriedly as possible, but the home was destroyed with almost all the contents.

It is thought the house caught from defective wiring, as the fire when first discovered, seemed to be in the ceiling and roof. We understand that Mr. Carr carried some insurance.

Miss Olga Fitzgerald is away this week at Abilene attending the bedside of her mother who is in a sanitarium. Miss Sadie Cox is taking her place at the Collins Dry Goods store during her absence.

### HISTORY PUPILS TO BE TAUGHT BY MOVIES

AUSTIN, Texas, Oct. 25.—Pupils in the history classes of the public schools will not have to depend entirely on their own conception of the historic places of Texas when an extensive series of slides called "Historic Spots in Texas" is completed by the bureau of visual instruction of the University of Texas. In the first group of slides now in preparation are included such scenes as the Fannin battle grounds at Goliad, the cannon used by Fannin's men, old missions, stage stands of the early days and the like. Distribution of these slides is part of a general movement toward furthering teaching by means of pictures which is being carried out in cooperation with the Texas Federation of Women's Clubs.

Texas leads all the states in the use of natural gas for fuel in producing power and in industry.

## At Your Service Santa Fe System Lines

Whether you are shipper, traveler,  
business man or farmer

**Freight**—Modern freight cars of steel under-frame construction, equipped with air brake and automatic coupler, insure safety for consignments.

Through package and carload Red Ball service from Chicago, St. Louis and Kansas City, Mo., to principal points in the South and West.

Emigrant Movables are given special attention.

**Passenger**—In addition to the four transcontinental trains which the Santa Fe for years has been running between Chicago, Kansas City and California, "Santa Fe all the way," a new extra fare train, The Chief, has been established, which makes the run between Chicago and Los Angeles in two business days.

**Colonization**—This department of the Santa Fe is prepared to furnish dependable information with reference to land values, the class of crops that can be grown most successfully, community development, and a general survey of the country, so that a good idea may be obtained of the opportunities that each region affords.

**Agricultural Development**—The Santa Fe Railway is cooperating with the United States Department of Agriculture, State Agricultural Colleges, State Boards of Agriculture and County Farm Bureaus in helping to develop the agricultural resources of

the territory served by its lines, including California, Arizona, New Mexico, Texas, Louisiana, Colorado, Nebraska, Kansas, Oklahoma, Missouri, Iowa and Illinois.

**Industrial**—Are you seeking raw materials, cheap fuel, pleasant surroundings for your employes?

Cannot a new branch house, strategically located, better serve your trade and save transportation charges?

Our men are familiar with conditions throughout the twelve great states reached by the Santa Fe and will give you reliable information concerning any portion of this vast territory.

**Live Stock**—Consult us on your shipping problems. We are anxious to serve you by advising as to rates, routes, equipment, quarantine regulations, pastures, feeding facilities, etc. Santa Fe equipment and feeding facilities are second to none. It is our desire to see that your shipment is carefully and expeditiously handled.

**Refrigeration**—The Santa Fe Railway operates its own refrigerator cars for perishable freight, cheap and less than carload. Its Refrigeration Department gives efficient supervision to dependable protective service from origin to destination.

W. B. Stearns, President  
Santa Fe Railway System

The Herald is fearful that Barny and Sparky are going to find the waters of the English Channel rather icy at this time of year. But as for Barny he will probably start out on the French side where the grapes are still being crushed.

The government seems to have a fine bunch of scouts, as they seem to be able to find more cotton in the United States than any private report would indicate. And, too, they are away in advance of the ginners, or what the ginners will finally report.

All hail the coming farm who is going to be braced up with a few good milk cows, a yard full of chickens, and a big lot of grunners. Milk, butter, eggs, fried chickens, ham, bacon and lard is a fortification that no "bear" has ever been able to pry open in no age of the world.

The Herald had the pleasure of a short call from Harry N. Stone, editor of the Seminole Sentinel Tuesday afternoon, who was on his way to Lubbock on business. Harry now seems to be entirely well and hearty after several years of suffering and a number of operations, the last one of which seemed to be successful.

Tuesday is general election day, but Texans as a rule think they have complied fully with all the rights and blessings of citizenship if they vote at the two primaries. But, our vote next Tuesday will determine our strength in the national conventions and elections two years hence. So let's poll a good stiff vote, especially us Democrats.

Many of the schools over this section are turning out in order to let the children help gather the cotton crop, some of them as large as the Brownfield school, notably the Littlefield and Levehand schools, and in view of the scarcity of cotton pickers we do not believe it would be a bad idea for Brownfield to follow suit.

While the loss of a cool half million on the present cotton crop is a rather costly lesson, we hope our farmers have learned the lesson well and will not try the single track idea again. Those farmers who have not

been led by the jure of all cotton this year, even, are in fine shape with nothing to bother them. What they get out of either the cotton or feed crop is theirs.

The loss to Terry county owing to the slump in cotton from about 17 or 18c to the present low level, which is about \$30 per bale, basing the county yield on only 20,000 bales which is a low estimate, will mean a loss to Terry county farmers of the sum of \$600,000.

The Herald received the first issue of the Miami Chief this week that ever came to our exchange table. It is now being edited and published by Bob Haynes, erstwhile owner and publisher of the Seagraves Signal and is still owner of the Meadow Review. He is being ably assisted by his mother in the work of editing. Youbet, we'll gladly exchange. Bob always gets out an interesting paper.

The probe of the different departments at Austin are disclosing many things that many a real good Texan ashamed for his State. If half the secret grafts now being disclosed are true, somebody who is responsible, should be put behind the bars for the rest of their lives. If a few lessons in the pen were given some of our state officials instead of the white wash brush, it would have a very wholesome effect on all others for a long time to come.

### WHAT'S DOING IN WEST TEXAS

**SEMINOLE**—Following out a suggestion made by officials of the West Texas Chamber of Commerce, Gaines Country roads are to be marked at all intersections and other points. The movement will be undertaken through the co-operation of the Seminole Chamber of Commerce and the Commissioners Court in belief that such markings will prove of inestimable value to both tourists and the general public.

**BAIRD**—Baird, one of the oldest towns in the state, now claiming 10,000 population, has recently let contracts for the installation of a modern sanitary sewer system and a first class water system.

**THROCKMOTON**—Throckmorton County is being ruined by a drain of its citizenry caused through the possession of 66,000 acres of so-called school land in its territory by outside counties, according to A. H. King, member of the state legislature. The movement for taxation of such school land still existing in the state is backed by the West Texas Chamber of Commerce, and will reach a climax in November when an amendment will be presented to voters of Texas, recommending that these lands be made taxable. Should the measure pass, a great impediment to the progress of a number of West Texas Counties would be removed.

**BRADY**—More turkeys and less cotton was advocated by a number of delegates to the Texas Poultry, Butter and Egg Association convention held in Fort Worth October 13 over which Wilson D. Jordan, member of

## "Your Account Valuable"

When you deposit your money in this bank, you not only have safety and protection; as well as our appreciative service, but you are helping to develop our town and community in their civic and commercial industries for the resources of this institution are backing these enterprises in their development. Therefore your account with this bank is valuable. It means something when placed here for it has a civic and economic value to our town and community...Bank where your account is valued.

### Brownfield State Bank

Brownfield, Texas

Conservative Accommodative Appreciative

the executive board of the West Texas Chamber of Commerce presided in the president's chair. The meeting was told that Thanksgiving turkeys would be plentiful and of good quality this year.

**SAN SABA**—Officials of the West Texas Chamber of Commerce have been invited to attend the celebration of San Saba's Annual Pecan Day. "Pecan Coronation, King of the Nuts" was recently chosen as the name of the observation which will take place November 8. The opening address will be made by Governor-Elect Dan Moody. A big parade and a sumptuous banquet are promised attractions of the day.

**CHILDRESS**—Plans are being completed for the establishment of a big industrial plant here that will involve the expenditure of \$2,000,000. The factory will consume 5,000,000 cubic feet of gas daily, and will furnish employment to between 400 and 500 workmen.

**RANKIN**—Contract for the building of the Upton County Courthouse has been let and work will begin at once.

**McCAMEY**—Construction of a 2 story, 85 room, semi-fire proof hotel of sheet rock and steel is announced by the McBurnett Hotel Company. It is expected that the structure will be completed in 30 days. The building will cost around \$25,000.

**FORT STOCKTON**—Cotton grown this year on irrigated lands adjacent to Fort Stockton has brought the highest average price of any cotton grown and ginned in Texas, according to a letter from I. A. Gans of the Fort Worth cotton firm of Gans and Bath, and according to daily cotton quotations.

**DECATUR**—Plans for terracing many Wise County farms are being pushed here by County Agent E. C. Jameson. Application to the extension department of A. & M. College has been made for assistance of the farm engineer of that institution in the movement.

**CARLEAD, N. M.**—Construction work on four business houses in a block started here recently, to be completed in December.

**WHEELER**—Plans are underway for the opening of a new addition to this town.

### IT IS STRANGE

Isn't it funny?  
That so many  
Business men  
Will get up in the morning  
Shave with an advertised razor  
And advertised soap,  
Put on advertised underwear,  
Advertised hose, shirt, collar, ties,  
Shoes, and suit;  
Seat themselves at the table  
And eat advertised breakfast food,  
Drink advertised coffee or substitute,  
Put on an advertised hat,  
Light an advertised cigar,  
Go to their place of business in  
An advertised automobile  
And  
Turn down an advertising plan  
On the ground  
That  
Advertising doesn't pay?—Hartford Agent.

### THE GOVERNOR REBUKES A LAW-ENFORCING JURY

If there is another flogging in Williamson County, Governor M. R. Ferguson ought logically to share the blame at least to the extent that she has rebuked a law-enforcing jury by turning loose Murray Jackson, convicted flogger, with the insouciant announcement that somebody has told her that "they do not believe guilty of the charge." The jury thought Murray Jackson was guilty, and it did not depend upon hearsay testimony or the affidavit of accomplices just out of prison.

Of course Jackson may actually be innocent. If he is, then the fact that the Governor says she has also heard that an agreement has been made that after one year he would be recommended by the District Attorney and others for a pardon as an immaterial as it is hearsay itself. If Jackson is innocent he should have been pardoned irrespective of any agreement, and his vindication would have been more effective if it had come before the Ferguson administration itself stood discredited in the eyes of Texas.

Using pardons to rebuke juries who did their sworn duty as they saw it, and employing the pardon proclamation as the vehicle for statements with reference to the District Attorney (Dan Moody) which read like extracts from Jim Ferguson stump speeches—surely this sort of thing does more to cheapen the gubernatorial office than to enhance its prestige.—Dallas News.

## Pains disappeared

"SEVERAL years ago I was badly run-down," says Mrs. John Bunch, R. F. D. 3, Columbia, S. C. "I could not do any of my work. I was so weak I could not wash a dish. My back and sides hurt me at times dreadfully. I dragged around until I finally got down in bed." Then, explains Mrs. Bunch, she happened to read about Cardui, the woman's tonic, and decided to give it a thorough trial, the results of which she describes below:

"It seemed to reach the cause of my trouble at once. I did not take it long before my appetite began to improve. I gained in weight from 114 pounds until now I weigh 125 pounds. I soon was able to be up around the house. I took up my household duties and was delighted with my returning strength.

"I now do all my own work. The pains in my sides and back have disappeared and I feel like a different person."

Cardui has been helping suffering women for nearly 50 years. Sold by all druggists.

### WE CAN'T GO EVERYWHERE BUT YOU CAN COME HERE

We would like to call on everybody but obviously that is impossible.

We can, however, make it convenient for anybody to call on us. This we have done. We sell Abstracts of Land Titles and Farm, Ranch and City Loans and General Insurance, "over the counter." You can come to us and buy protection just as you go to your butcher and buy a beefsteak.

This is a new departure in selling Abstracts of Land Titles: Farm, Ranch and City Loans, and General Insurance, but I am convinced that it is a sound one. No one could be as greatly interested in your protection as you are yourself, and Abstracts, Loans and Insurance are essentially your buying problem—not our selling problem.

We stand ready to supply you with Abstracts of Land Titles, Loans and Insurance of every sort. We represent the Federal Loans, strong, reliable old line Loan and Insurance Companies and write practically all forms of insurance protection.

"If its Abstracts, of Land Titles, Loans and Insurance—Ask—"

# Progress and Approval

For Dodge Brothers, Inc., 1926 already stands out on the calendar as a year of unprecedented progress and success.

From January to date sales have exceeded any previous year's total by a margin at once impressive and significant.

New engineering records have been established by a succession of major improvements extending back to the first of the year.

Never has Dodge Brothers Motor Car ranked so high in public favor. Never before has it so richly deserved the world's good will.

## Let These Machines Handle Your Corn Crop

**McCormick and Deering  
Corn Binders**

Five to seven acres a day with one-man outfit, and the one man does the work of half-dozen men with corn knives. McCormick and Deering Corn Binders are light, strong, and substantial. Roller bearings insure light draft. Both types do clean work, have ample adjustments for tall and short stalks, pick up the down and leaning stalks, and make neat, easily handled bundles. McCormick and Deering Corn Binders are equipped with a smooth working bundle carrier and they can be fitted with wagon elevator, tongue truck, etc. These two binders have been standard for years. The McCormick binds the bundles vertically and the Deering binds them horizontally.

LEE SMITH

### STATE LEADERSHIP OF FORESTRY MOVEMENT URGED

WASHINGTON, D. C., October, 25.—State rather than Federal activity in forest conservation must be looked to for the main progress in timber growing from now on, W. B. Greeley, chief of the Forest Service, United States Department of Agriculture, told the meeting of State Foresters assembled here to confer on Federal cooperation in forestry. The Federal forest policy for a good many years to come, according to the Chief Forester, was completed with the enactment of the Clarke-McNary Law in 1924, providing for financial cooperation in forest fire control between the Federal Government, the States, and private landowners, and the chief development henceforth should be in the forestry undertakings of States, local institutions, and individuals.

Fifty million acres of forest land should be acquired by the States, counties, and municipalities, in addition to their present holdings of 11 million acres, said Mr. Greeley, and the Federal Government should add 3 or 10 million acres to its present forest area of 89 million acres. "Perhaps the greatest single obstacle to the rapid spread of timber growing in the United States," he continued, "is the unstable ownership, not only as meeting an urgent problem in land utilization but as offering substantial public returns in the long run. Moreover the more demonstration we can get in all parts of the country of good forest practice and profitable forest management the more will the whole process of reforestation by all agencies be stimulated."

### OLD FRIEND PASSING

According to the health department at Washington, D. C., our old time friend, "the old oaken bucket" ought to be condemned as unhealthy and unsanitary. Should this edict become a reality it would not effect many citizens around Littlefield, but it would affect them indirectly. Out here there are very few oaken buckets, if any; but a great many of us came from a section of country where they were common.

Most of us can look back to some old home spot where the 'old oaken bucket, the moss covered bucket, the iron bound bucket' hangs in the well. As we think of it there rushes over us a flood of memories. Somehow the water we drank from that well tasted better than any other. There was a coolness, a freshness, an invigoration that came from it equaled by no other, and today we would give a good deal could we let that old oaken bucket down into the well and bring it up again brimming full with its sparkling nectar.

It may be true, as the health department claims, that the old oaken bucket harbors some germ of disease; but so dear to our hearts is this old oaken bucket we are still willing to take some chances. We've been robbed of most of the delights of early days, and the most of us are ready to fight to preserve this one—one of the last ones left to us.—Littlefield Leader.

### IS THERE ANY EXCUSE FOR ILLITERACY

Is illiteracy ever excusable? I recall a great aunt who could not read. She was a good housekeeper and a woman of poise. Her husband became very wealthy and they lived in a fine house.

She was an Englishwoman, and had been a victim of the early factory system under which children were put to work at seven or eight years. She never attended school, and apparently never had time to learn to read and write.

As a youngster, I felt sorry for her when I visited at her house, but in later years I have concluded she must have lacked enterprise. I fail to see why anyone who cares to make the effort cannot learn to read in eight weeks, and to write in twenty. Children learn as rapidly as this.—The Imperial.

W. R. Roach, special agent of the U. S. Employment Service, who has been located in Lubbock for the past month was in Brownfield, Thursday. Mr. Roach states the demand for cotton pickers will be fairly well supplied by the first of next month, due to the trend of pickers coming to the South Plains daily. He stated that practically all of the cotton fields of southeastern Oklahoma and South Texas have been finished and pickers are headed for the South Plains in large numbers.

Andy Williams, cattleman of Seagraves, was a business visitor here Tuesday.

S. A. Lauderdale has accepted a position as engineer at the city light and power plant. S. A. is a good man and we imagine he will always be found on duty with his eyes open.

### PERFECT PLAN TO RETIRE 4 MILLION BALES

WASHINGTON, Oct. 21.—Preliminary arrangements of a plan for retiring 4,000,000 bales of cotton, or approximately one-fourth of the indicated crop, from the market, were perfected with the President's cotton committee as the result of conferences Monday and Tuesday by a committee representing the American Cotton Growers' Exchange of Memphis, headed by John T. Orr of Dallas. Members of the committee left for home Tuesday night convinced that the scheme is workable and that the machinery would be put in motion to meet a large part of the emergency brought about by drops in the cotton market.

Southern capital is to be invited to participate in the plan along with financial offerings by the Government through intermediary credit banks. It is suggested that local financial organizations be perfected at central points in the cotton belt to serve as a guaranty to the Government against loss in its advances to the co-operatives which might arise by a further fall in the market, at the same time cover the cost of operation of the plan by the cotton co-operative associations.

It is figured that the financing can be accomplished on the basis of \$60 a bale, which would mean a total outlay of \$240,000,000 of which amount the Government would advance to the co-operatives through the intermediary credit banks a maximum of \$45 a bale. To Texas this would mean a total turnover amounting to something in excess of \$70,000,000 by the action of the proposed pool and governmental assistance to the co-operatives.

### ANOTHER FORD FALLACY

Old Man Necessity, rather than a coy and demure ideal, has caused Henry Ford to inaugurate the five-day week in his factory.

At least that is the impression one gains from inside information filtering out of Detroit for several days.

Two weeks ago the industrial world read that Henry Ford, promoter of the minimum wage, had gone one step farther and established a five-day week with six day's pay. Once more Mr. Ford was hailed by industrial idealists as the savior of the workingman.

As a matter of fact, Henry Ford's plants have been operating a five-day week for six months—in fact, practically since the early weeks of the year. In recent weeks there have been slight pay increases given to a small percentage of the Ford employees. This raise has in no sense been general, but follows the line of the official statement that those considered worthy would receive additional compensation. Those favored with increases announce that the increase they received for the week is not equal to a full day's.

The prime reason behind the five-day week, it seems, is the drop in Ford sales. The present retail sale of Ford automobiles does not warrant a full week's production. Statistics prove that Ford production in the first six months in 1926 have not kept pace with sales in other years. Chevrolet, Dodge, Essex, other leading low-priced cars, show tremendous gains in production and sales.

Ford virtually quit advertising in country weekly newspapers some time ago. Other companies advertised more than ever. That had much to do with the unprecedented Ford slump—in production, profits and prestige.

Others, in time past, have also learned this lesson.—Selected.

### POWERFUL CATHODE RAY DISCOVERED

CHICAGO, Ill., Oct. 21.—Announcement of the discovery of the cathode ray, the most powerful known to scientists, by Dr. W. D. Coolidge, Ph. D., of the General Electric Company at Schenectady, N. Y., was made by Dr. A. F. Kyler of Omaha, Neb., at the meeting of the American College of Physical Therapy.

Research laboratories now must attempt to find means of controlling this new power and making it subservient to medical science, Dr. Kyler said.

Dr. Kyler, a former president of the Radiological Society of America, explained that the discovery would place the more powerful rays in this rank: Cathode ray, first; Millikan ray, second, and X-ray, third.

O. L. Stice was the lucky man at the cake guessing contest at the American Cafe Saturday. He guessed the cake to a gnat's bristle, his guess being even 17 pounds. This was certainly a fine cake, nicely decorated with "American Cafe" in big letter across it, and we bet O. L. will be eating cake for the next two or three months, as it was some 18X24 inches and 4 inches thick.

I am in Brownfield, Monday each week, Commerce Hotel

R. B. Dudley, of Fort Worth, and Earl Dunn, of Amarillo, geologists, working for the Gibson Oil Co., of Amarillo, were registered at the Hotel Brownfield this week. The company holds leases in the southern part of Yoakum county.  
Jot Smith, of Lubbock, prominent South Plains cattleman, was here Friday on business.  
Mrs. Millard F. Swart accompanied the doctor down on his monthly visit to Brownfield, last Wednesday.  
J. C. Waldrop, of Amarillo, connected with the International Harvester Co., was here this week.

**DOUBLE TRACK FROM  
CANYON TO PANHANDLE**

Work will start this week on the Santa Fe from Canyon to Panhandle. The double track was authorized two weeks ago by the board of directors after the engineers had submitted the plans made a few months ago.

Work at present will extend from Haney switch, north of Canyon, to St. Francis, 12 miles north of Amarillo. It is expected that the double track will be brought into Canyon early in the spring.

The Santa Fe is handling 300 cars of oil daily, and this great volume of business has made necessary the double track.—Canyon News.

**SOME OLD COUNTY WAR-  
RANTS BEING FOUND**

With removal of the county officials into the new courthouse, and the papers of the county to new and better vaults, many of the old documents of no more value were discarded, and with the wrecking of the old building, many of them were scattered wheresoever the wind listeth over the court yard.

The writer noticed one laying off to itself as if lonely one day recently and upon examination, we found that it was drawn on the 18th of July, 1909, or some seven months after the writer was permitted by the citizenship to stay here and call this his home.

It was for the sum of \$200.00 and in favor of W. A. Shepherd, who was our Tax-Assessor at that time. It was drawn by Judge W. W. Price, long before he was entitled to the above title, who was acting deputy County Clerk for his father, T. J. Price. It was also signed by A. B. Bynum, who was also our County Treasurer at that time. Its number was 495, and it was canceled by Mr. Price on the 9th day of November of the same year.

Many others of equal historical interest could be named. One was made to J. R. Burnett for the use of his horse for some purpose, probably as a riding baliff.

**SMALL CYCLONE STRUCK OUT  
SOUTH OF LAMESA**

Just about dark Saturday night of last week a twister of cyclonic proportions dipped down on the Geo. Hornbeck and E. Walls places about five miles south of Lamesa and did considerable damage to barns, windmills and outhouses.

Nobody was hurt in the disturbance and no reports of a visitation in other sections of the county have been received.—Lamesa Journal.

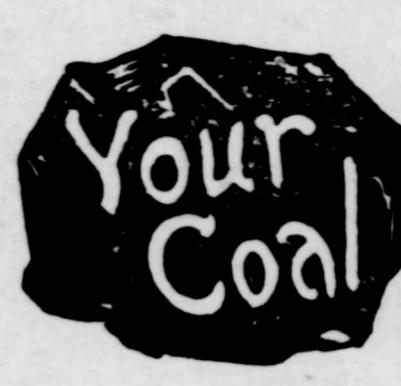

**1877 ENROLLED AT THREE  
SCHOOLS IN ABILENE**

ABILENE, Tex., Oct. 11.—Enrollment at Abilene's three big educational institutions reached 1877 yesterday, distributed as follows: Simmons University, 900, or 100 more than last season; Abilene Christian College, 607; and McMurray, 370.

Paducah—Does advertising in the local paper pay? It certainly does according to the editor of the Paducah Post. Recently a new citizen of Paducah came into the office and paid for a subscription, asserting that he bought the paper in order to find out what merchants to patronize and stating that he had always saved quite a bit of money by following the advice of ads in the local weeklies. Evidently advertising in the home town paper does pay.

If Herbert Hoover were not always so busy with more important matters, he might make a right good president of the United States.

Texas has eighteen members of the lower house of Congress. The eighteenth Texas district contains 53 counties.

**A TRAIN LOAD OF COAL**

We have bought a train load of the BEST Colorado Coal to be had. We bought this coal at a bargain and are going to give our customers the advantage of the purchase. This coal is labeled so you can see for yourself that you are getting the BEST at the very CHEAPEST price.

**LUMP COAL \$12.75 FOB railroad cars, \$13.75 FOB yard, and nut coal \$1.00 lest than lump.**

**HIGGINBOTHAM--BARTLETT COMPANY**

**WAS HE RIGHT?**

"I tell you the farmers of Texas are riding to their destruction and the business interests of Texas are flirting with ruin. It is true that the last cotton crop sold for around twenty cents per pound and at present the market for cotton is strong. But Hear Me . . . I have traveled throughout the entire cotton belt. I have seen with my own eyes that the Southern farmer is planting too much cotton. I know that barring some unforeseen calamity the South will produce a crop of sixteen million bales this year and the price is bound to go to ten or twelve cents per pound. With favorable conditions an even larger crop than sixteen million bales will be made, and if it is; . . . the people of Texas and of the South will be face to face with bankruptcy. We had better pray for an epidemic of worms or weevils to enable us to sell the 1926 cotton crop at all. I am appealing to the business men, bankers and land owners of West Texas and of all Texas to join this movement for diversification. I am not a pessimist but I am advising the bank of which I am president to arrange its affairs to weather a ten cent cotton price in the fall."

**EDITORS NOTE:**  
Above are excerpts from the address delivered by Col. R. Q. Lee, former president of the West Texas Chamber of Commerce, who devoted almost an entire year campaigning Texas urging a program of diversified farming and reduction in cotton acreage.—West Texas Today.

WASHINGTON, Oct.—A cotton crop larger than ever before grown has been produced in the South this year. The Department of Agriculture Monday placed the indicated production at 17,454,000 bales of 500 pounds gross weight, or about 8,343,000,000 pounds of lint cotton. This is about 643,000,000 pounds of lint more than produced last year.

The estimate was based on conditions existing Oct. 18, to which date 8,722,066 running bales of this year's crop had been ginned, according to the Census Bureau's announcement. There was an increase of 827,000 bales in prospective production between Oct. 1, when the last estimate was made, and Oct. 18.

Uncertainty exists as to how much of the crop will be harvested, the crop reporting board announced, in view of the present low price of cotton and the scarcity of labor for picking. The factors have discouraged cotton farmers and this may result in some of the crop, especially that of lower grade, being left in the fields.

This year's enormous production was brought about by the planting of the largest acreage on record and favorable growing conditions generally throughout the season.

Mrs. M. Harris of the Cres-Cent Store, returned this week from Moran, where she sold her variety store at that place, and will be with the store here all time now. Mrs. Harris' son, L. G. Braby and wife, of Baird, have also moved here, and Mr. Braby will have active management of the Cres-Cent Store.

Bennie O. Israel, of Co. C, 9th Infantry, of Ft. Sam Houston, was here last week on a visit to his parents who live southeast of this city.

Mrs. Percy Ritch, of El Segundo, Calif., was visiting her sister, Mrs. J. H. Smith here last week.

Mr. and Mrs. F. C. McSpadden, were visitors in the W. A. Myrick home in Lubbock, Sunday.

### PHILATHEA S. S. NOTES

The class members and a number of friends were very pleasantly entertained with an "Autumn Leaf" party at the home of their teacher, Mrs. S. L. McDonald, last Friday evening. Refreshments of Angel Food cake, fruit salad with whipped cream and hot chocolate were served to the following: Misses Easley, Huise, Weldon, Marie Brown, Nellie, Flacke, Nina Burnett, Belle Williamson, and Messrs. Sterling Hillyard, Burton, Cox, Tannery, Scott, Lewis, Taylor, Alton Webb, Rev. and Mrs. C. E. Ball Mr. and Mrs. H. M. Oehler, and Mrs. McDonald.

We are sorry a number of the class members were not able to attend. The class is hoping for a speedy return of one of their much missed members, Miss Audie Markham, who is in the Baylor Hospital at Dallas.

We are proud of our class in many way but a new fact was produced when it was reported that while only 9 were present Sunday an offering of \$8.15 was contributed.

Reporter.

### SCHOOL LAND INTERESTS MUST BE PAID BY JAN. 1ST

following communication from J. T. County Clerk Jay Barret had the Robinson, General Land Commissioner, of Austin, under date of Oct. 13, advising those who owe interest on school land in Terry county:

"Please say to the school land owners, they will be expected to pay by Jan. 1st, all interests due on Nov. 1, 1925, or allow their land to be forfeited.

After the land is forfeited the owner will have the right to request a re-appraisal by paying one cent per acre just as was done during the last twelve months.

If any one has made up his mind he wants his land forfeited and take chances on revaluation, I wish he would at once send me a list of his land and request a forfeiture so that all of that kind of work can be disposed of before the date set for general forfeiture.

It is very much desired that these requests come in right away so they can be disposed of before the new Validating Act goes into effect, which will be on Jan. 7th. It is important that the applications to rebuy be filed in the Land Office before the New Validating Act becomes effective on January 7th.

### CAMP-FIRE GIRLS ELECT THEIR OFFICERS

The Camp-fire girls met Wednesday Oct. 20th, and elected the following officers: Frances Brownfield, President; Florence Holt, Vice-President; Norma Dell Welch, Treasurer, Miss Crawford, Captain, and Rebecca May, Reporter.

We will meet at the grade school every two weeks.—Reporter.

### HOW TO HELP MAKE A BETTER NEWSPAPER

First of all, give the editor the news; he wants it. Give it to him, even though it doesn't get in the paper. He hasn't time always to tell you why some piece of news is not used; but ten to one he had a perfectly good and impersonal reason. Give him the news, even though you may not be especially interested in it. Some folks never think to give the editor news except when they are concerned in it one way or another.

Second, don't give him a piece of news and tell him you want it printed just as it is written. There is a right and a wrong way to do even a simple little thing like writing an article for the country paper. One editor had to leave town because he printed every piece of news just as it was handed in—spelling, punctuation and all—and printed it with the name of the person who gave it to him.

Third, don't try to play a joke through the paper unless you explain it to the editor. A thing in cold type looks a lot different from a thing repeated by word of mouth, when the voice, the facial expression and a gesture perhaps help to show its meaning.

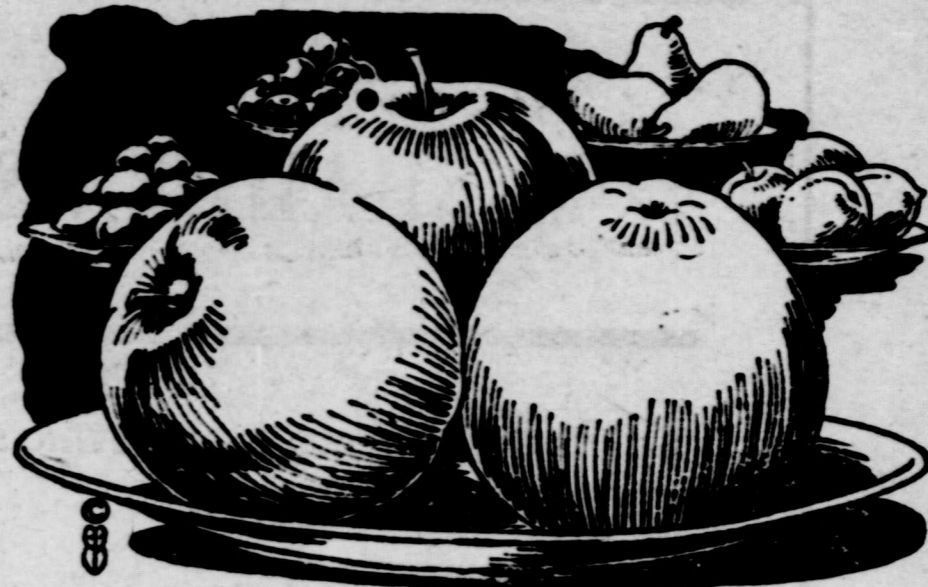

Fourth, don't worry for fear the editor is making too much money; you should want him to be prosperous. He can and will give you a better paper. He will be less likely to have to compromise with his conscience over certain kinds of advertising. And, anyway, he can't make a big fortune out of the paper; he will be lucky if he keeps it going.

Fifth, be ready to tell your editor when something in the paper pleases you. Once in awhile you tell your preacher he has a good sermon; so tell the editor the same about his paper.

Sixth, get your copy to him early. Take it in for next week the day after the previous publication day if you can. It takes time to set type and to make a paper. Did you ever wonder what the editor did all the time between publication days? You wouldn't if you were a country publisher yourself.

Lastly, go in some day when the paper is being printed. Go in several times during the day and you will have more of a realization of what a job it is to make a country newspaper.—Cornwall (Ont.) Freeholder.

In a communication from H. C. Martin, of Italy, Texas, he agrees with the Herald that the Texas farmer is to keep a stiff upperlip and to keep banking away if he is to keep his head above water. He says that the farmer can help himself more than anybody else can help him by putting on his study-cap and raising more of what he needs at home and doing his own work just like other people.

## TASTY GROCERIES THEY'LL LIKE!

### ANOTHER OIL TEST FOR GAINES COUNTY

It is reported that a deal has been consummated this week whereby Max Westheimer and associates of Ardmore, Okla., have finished blocking sufficient acreage southeast of Seminole to put down another test for oil.

As to when work on this test will be started we are unable to state, but understand that just as soon as land titles, leases, etc., are passed on by their attorneys they will get on the lease with the rig.

We are told that the above parties

are among the most prominent doing business in wild cat territory.

The location will be about 15 miles southeast of Seminole.—Seminole Sentinel.

Miss Audie Markham, daughter of Rev. and Mrs. W. F. Markham underwent an operation at the Baylor Hospital at Dallas, Texas last Tuesday. The Herald joins with her many friends in hoping for a speedy recovery.

O. C. Rose, distributor for De Laval cream separator company, was here Tuesday.

### LAW GETS HOT UNDER

#### THE COLLAR

Cold weather is coming and county officials are not going to run any risks of freezing. It was hot enough yesterday, but the large boiler was humming and some of the smaller offices at the court house resembled large incubators.

But it is all very well—they were trying out the heating system, so

when the first cold norther blows up they will be ready and not forced to call a plumber to put the heating system in order.—Lubbock Avalanche.

The Littlefield postoffice has been advanced to the second class. Littlefield, like many of the South Plains towns was nothing but a cow pasture just a few years ago.

### THE GLAD GIRLS BIBLE CLASS

The Intermediate Class of the First Baptist Church of Brownfield met last Sunday morning and reorganized their class. The following officers were elected: President, Doris Bandy; 1st vice, Norma Dell Welch; 2nd vice, Frances Brownfield; 3rd vice, Wynoa Burnett; Secretary, Lola Mae Tittle; Treasurer, Cordia Mae Shepherd; Reporter, Lucille Hunter. Motto, I am third (God is first, others second, self third.) Colors pink and green. Flower, Rose. Memory Verse, Palms 121:1

Teacher, Mrs. Mary Green.

Reporter.

Jim Moore was raising old billy about not getting the Herald the past week. He reported that his wife would hardly let him remain on the place.

### NEW HOME MAN MARRIES BROWNFIELD GIRL

Rev. W. M. Money officiated at a late hour Friday night, or rather at an early hour Saturday morning, at a wedding in which Ewel C. Burleson of New Home and Miss Willie Mae Robinson of Brownfield united their fortunes of life. The hands of the watch pointed to the hour of 1 about the time the ceremony was performed. It seems that the young people had encountered some trouble in parental consent and they appeared to be in somewhat of a hurry to get the ceremony performed. They went on their way a little excited, but happy. May they live long and prosper.—Tahoka News.

W. C. Jones, one of our south route readers, was a pleasant caller at our sanctum this week.

The banks of Washington, Ia., believe in giving the pupils of the public schools simple and practical information in regard to banking practices as a matter of education. Talks were made during the year to grade and high school students by representatives of the banks.

### Relic of Colonial Times

Finding a medal, the first of its kind ever unearthed in Wisconsin reminiscent of the treaty of 1765 between the famous Ottawa chieftain, Pontiac, and the British, has been announced by the Wisconsin Archeological society. The medal, of solid silver, was given during the reign of King George III and his bust, in armor, is on one side. Underneath are the words, "Georgius III Deo Gratia." On the reverse side is a picture of a lion in repose and at his right a snarling wolf. A church and two houses and a group of trees form the background.

### Congress "Kindergarten"

Symposium is the name given to the "baby congress." It is a school for beginners, where the new members receive instruction in the rudiments of being national legislators. There were more than a hundred novitiates in the last house. These are members who have not served in previous congresses and who, presumptively, are not thoroughly informed as to what is expected of them in their new jobs. They could learn all this experience in the course of a few weeks or months, but William Tyler Page, clerk of the house, offered them a short cut to knowledge.

### We'd Recognize It

Were I to paint a picture called "American Life," it would be a woman with much jewelry and a business man in the background.—Max Nordau.

### Near Enough to Bite You

"You can find the best paying gold mine in the world if you go after it hard enough," says Forbes Magazine. "It is just above your neck."

### Smoke Stopped Runaway

A new wrinkle in stopping a runaway horse was tried by a motorcycle policeman of Geneva, N. Y. After failing to catch the horse's bridle, the policeman got ahead of the horse and, maintaining a lead of a few feet, opened the cutout on the machine, sending continuous puffs of smoke in front of the horse. The smoke screen proved too much for the animal and it soon slowed down to a walk and a pedestrian stepped out and stopped him.

SCENE FROM "DADDY LONG LEGS."

"Daddy Long Legs," the fascinating comedy success by Jean Webster, will be presented on our Lyceum course by the New York Players. It was dramatized by Jean Webster from her famous book which had a record sale of over two million copies. Everyone is familiar with this story of "Judy," the little orphan girl who is given a wonderful chance to enjoy the things that all girls love, through the kindly interest of an unknown benefactor, whom she nick-names "Daddy Long Legs" for the lack of a real name. Judy's letters to her benefactor in which she pours out the story of her happiness in this newly revealed life form the basis

This splendid aggregation will be here at the Grade School Auditorium next Thursday night, November 4th. It will be much cheaper if you secure season ticket for the entire family which will cost you only \$5.00. Don't miss this great opening number of our Lyceum.

—AUSPICES—

PARENT-TEACHER ASS'N

### THE NOMINATING SPEECH OF THE FUTURE

"I rise to nominate for Congress a woman, who by the very character of her daily service, her standard of integrity and her abhorrence of all that is evil, deserves well at your hands when you march to the ballot box to exercise your sovereign right. A woman whose consideration of others is truly sublime. A woman who never has yet asked a man to open a fruit jar (applause), a woman who concedes a latch key to be the rightful property and possession of the husband (cries of Hear! Hear!), a woman who scorns bread pudding as beneath the commonest family (loud shouts); a woman who has never disturbed the peace and quiet of the family by mentioning the furnace, (applause); a woman—a modern woman to be sure, but not offensively modern—who buttons her own gowns, (cries of Name her! Name her!), a woman whose tendency toward trading stamps and coupons assures a careful safeguarding of the public funds, who would—" Nominated by acclamation.—The Buffalo Times.

### LEA COUNTY WINS THIRD AT COTTON CARNIVAL

The Shallow Water Belt of Lea County had an agricultural exhibit at the Chaves County Cotton Carnival which was held at Roswell Thursday, Friday and Saturday of this week.

To say that we astonished the natives of the Pecos Valley would be putting it altogether in too mild terms. The exhibit attracted much attention and was the subject of much favorable comment. We were awarded third place in the community exhibits, scoring above such Pecos Valley places as Hagerman and Dexter and places on the Hondo Valley.

When the awards were first made we were given the red ribbon, but later the judges claimed that a mistake had been made in addition of points and second place was awarded to Fairview, while we were given third place, which was originally awarded to Fairview. First place was won by East Grand Plains.

The arrangement of the booth was in charge of Luke Roberts, editor of the Leader, assisted very materially by Mrs. C. E. Kindel and Mrs. Luke Roberts. Assistance was also rendered by Miss Velma Clardy and Roy Beasley.—Lovington Leader.

We were right well amused at one of our new comers the past week who seemed to think the old timers here had been trying to put something by him on dry weather. After saying here the past month with something like 14 inches of rainfall, he doubts if this country has ever been the dry spot he has heard so much talk of.

## BETTER THAN BARGAINS

We started our Used Car business with the idea that a good car at a fair price is better than a fair car at a bargain price. That idea has now become a definite policy. Our customers can tell you why.

IVEY & HEARRELL  
 Brownfield, Texas

A USED CAR IS ONLY AS DEPENDABLE AS THE DEALER WHO SELLS IT

### TECH TALKS

By a Student.

The Clarendon College Bull Dogs fell before the Tech Matadors Saturday at the rate of 14 to 0. The Matadors scored a touchdown in the second quarter, and another during the last five minutes of the game.

The battle cry of the Tech is "Best T. C. U." A special train to Fort Worth will take more than 500 students and otherwise supporters of the fighting Matadors to see the big fray Saturday.

The Matador's football career is one that has not been equaled in any college of which there is an account. Up to date the Matadors have played 16 football games with only one defeat.

Texas Christian University has one of the strongest teams in Texas, and indeed in the Southwest. Consequently the Matadors are facing the hardest battle in their history. By making a good showing against T.C.U., the Matadors will not only gain recognition among the Southwestern Conference but also will gain prestige for Tech among the larger colleges of the Southwest.

Tech's excellent band of more than eighty pieces will accompany the Matadors on their invasion of Ft. Worth. This is made possible only through the student body who are giving 50c and a dollar each. While there the band will broadcast over station WBAP of the Star Telegram.

The Matadors are putting Tech on the map as a great and growing institution whose fame is rapidly spreading throughout the United States. Since Tech is the representative of West Texas and especially the Plains, the Matadors deserve the 100 percent support of those who they are representing. Let us show our appreciation of Tech by backing the Matadors to the top.

W. E. Legg is a member of the Herald.

### SIMPLE MIXTURE STOPS GAS BLOAT

Simple buckthorn bark, glycerine, etc., as mixed in Adlerika, often relieves stomach trouble in TEN minutes was in the removing of gas. Brings on a surprising amount of old waste material you never thought was in your system. Stops that full, bloated feeling and makes you enjoy eating. Excellent for chronic constipation. Adlerika works QUICK and delightfully easy.

### HALF MILLION TO BE SPENT FOR RESEARCH

Five hundred thousand dollars is to be spent exclusively for research by the manufactured gas industry, according to a report made public at the opening session of the American Gas Association Convention in Atlantic City.

The money will be used to develop new uses of gas for industrial heating operations and to improve equipment. While the use of gas in industry has grown by leaps and bounds in recent years, the industry reporting a 64 per cent increase in six years, the gas companies have labored under handicaps in securing this business. Perhaps the most significant item has been the lack of equipment of correct design and high efficiency for the economic utilization of this fuel in entirely new uses in manufacturing plants.

The half million dollars is to be collected and expended over a period of five years.

### CHAIRMAN STATE DEMOCRATS URGES PEOPLE TO VOTE

The Co. Chairman of the Democratic Executive Committee is in receipt of a letter from D. W. Wilcox, chairman of the State Democratic Executive Committee with headquarters at Houston, urging the necessity of obtaining a full Democratic vote in the General election, Tuesday, November 2nd. He points out that there are a number of special reasons why a full vote should be cast, as follows:

In 1928 we will have two Democratic State Conventions: one to select delegates to the National Convention, and the other the regular State Convention. The number of votes that each County will have in these Conventions will depend on the number of votes cast in the County on November 2nd for Dan Moody, the Democratic nominee for Governor. The larger the Democratic vote is on November 2nd, the larger the vote of your County will be in the State Conventions.

The general election should not be looked upon as a perfunctory affair. All the nominees of the Party should be elected by big majorities. If we poll a large vote it will give the Democratic Party of Texas more power in the National affairs of the Party. If we expect Texas to hold her name as the "Banner Democratic State" we should send a solid delegation of Democratic Congressmen to Washington. The indications are that the Democrats will control the next House of Representatives, and if they do, Chairmanships of ten of the most important Committees will go to Texas members. If we succeed in these things it will give Texas a high place in the National Convention in 1928.

### LESS THAN CENT A MILE FOR GAS AND OIL ON LONG TRIP

Driving a Whippet sedan, James J. Marshall of Council Bluffs, Iowa, recently covered the 1600 miles between Omaha, Nebraska, and New York City in four days of driving and at a total cost for gasoline and oil of \$15 or less than one cent per mile for fuel and oil.

His average mileage was 400 miles a day which required a high driving average making the low cost for fuel even more pronounced, the gasoline economy being 33 miles to the gallon.

The cost for oil included one complete change of oil during the trip. Previous to making the run from Omaha to New York, Marshall had driven the same car from Norfolk, Nebraska, to Seattle, Wash., thence down the Pacific Coast to Los Angeles, returning to Omaha across the Great American Desert and over the Rocky Mountains.

In 60 days he had driven his Whippet a total of 8112 miles on the original tires and has not at any time carried a spare casing with him—San Antonio Light.

### Saw Filers' Express on

rounding a saw" means to establish properly the depth of the interval between the sawteeth. This is not a serious problem on hand saws as the three-cornered file does it for, as it does its other work. On circular saws and drag saws, however, if a file is used for gumming, it must be a round file or a flat file with a round edge.

### Mine "Brakes" Costly

A sprag is a piece of wood which is thrown between the spokes of a wheel on a coal-mining car to bring it to a stop on a grade, acting as a brake, says the Dearborn Independent. Over 3,000,000 feet of timber is required annually for making sprags in Pennsylvania.

### Getting Good Out of Evil

We sometimes learn more from the sight of evil than from an example of good; and it is well to accustom ourselves to profit by the evil which is so common, while that which is good is so rare.—Pascal.

### NOW LAY 1,200 BRICKS AN HOUR ELECTRICALLY

An electric bricklaying machine which it is claimed, lays 1,200 bricks an hour, is the latest application of electric energy to industry, says the Texas Public Service Information Bureau.

Upon rails placed around the outside walls of a building, a traveling boom is set and upon this are the mortar tank and laying mechanism operated by a 3-horse-power electric motor. The laying wheel rotates taking two bricks from the carrier, while another wheel spreads mortar as the carrier moves along the boom.

At the end of the wall the machine changes direction and proceeds as before until it has laid one row of bricks entirely around the building. The boom is then raised the thickness of one row and another trip begins.

### GAINES COUNTY HAS FULLER'S EARTH SUPPLY

AUSTIN, Oct. 5.—Increased production of fuller's earth in Texas within the last few years indicates that the state in the future may lead the United States in the production of that product, stated Dr. E. H. Sellards, associate director of the Bureau of Economics Geology of the University of Texas. Florida now has the lead.

According to statistics obtained by the bureau in cooperation with the United States Bureau of Mines fuller's earth was produced in Texas during 1925 to the amount of 30,467 tons, valued at \$310,146. The amount represents a slight increase over that of 1924 and is greater by 10,997 tons than the production of 1923, Dr. Sellards said.

The counties in which fuller's earth is now produced are Bexar, Gaines and Walker. Fuller's earth, according to Dr. Sellards, is a clay which has the special property of clarifying oils and is used extensively for this purpose.

Elder Liff Sanders filled his appointment here Sunday at the church of Christ, and announced that he and wife would move down some time this week if nothing happened. However, by a previous engagement with a church in Floyd county, he is due here the fifth Sunday, and will not be here next Sunday. Elder A. L. Burnett will fill his appointment at this place next Sunday.

Lavaca Bay was so named by LaSalle who founded Fort St. Louis on its shores in 1685.

The first Spanish settlements in Texas were made in the vicinity of Nacogdoches in 1716.

Texas is now the leading oil state producing 601,451 barrels a day to 600,000 for California and 467,110 for Oklahoma in September.

Spindletop and the Panhandle moved Texas from third place among the states in production of petroleum to first place.

Cotton Weigher J. S. Smith reports that he is weighing lots of cotton these days, although much cotton is being shipped by the Farm Bureau.

MEADOW BRIEFS

By Aesculapias.

The continued fair weather of the past week has been a great blessing to the farmers. Cotton is now rolling in at a rate of something over 100 bales per day.

Many of our citizens have scoured the state from the Gulf to the Kansas line in a vain search for pickers. The stories told show outrageous conditions in the interference of those who obtained a few.

It is beginning to dawn on the farmer that an all-cotton crop does not pay, but like most misfortunes, the memory will soon fade and another year will find them much the same.

Mr. T. H. Price, living near Claune, died suddenly, Friday 22nd, near noon. He was sick only a few hours. He lived near Meadow the past three years and was a good man.

Mrs. Moorhead and the children were down from Lubbock Thursday evening to visit the doctor, returning Saturday evening.

Three new comers put in appearance up to now the past week. A boy at Jake Beal's on the 20th; a boy at W. D. Presley's the 23rd, and a girl at J. B. Milsap's on the 25th.

Editor James Greer was a pleasant caller at our sanctum Tuesday of this week.

Mr. and Mrs. J. T. Cox left last week for Santa Rosa, New Mexico, where they went on business.

FOOTBALL BOYS ARE TENDERED BANQUET

The most enjoyable feature of any organization is the social side, especially when real food is connected with it.

Last Friday evening at 7:30, the local football boys, coaches and their lady escorts found themselves deeply interested in a social hour in the basement of the Baptist church.

The credit of the evening is due the mothers of the football men. They gave the banquet at their expense, time and labor, free to the boys and coaches. The evening was spent in eating and talks about football and football men.

This spirit which the mothers manifested is deeply appreciated by all. Such spirit will put over any team. Brownfield needs more of such a spirit shown. One business man, who was present, said the football team had given the town more publicity than anything.

We hope next game that is played on the local field, every business in town will close up and turn out to see the game.

We wish to thank the ladies again for this support, spirit and the banquet.—Reporter.

HEADLIGHTS FAIL TO MEET STATE REQUIREMENTS

AUSTIN, Texas, Oct., 25.—Over 40 per cent of nearly 70 headlights submitted to the official headlight testing laboratory of Texas have failed to meet the requirement of the automobile headlight law, according to C. R. Granberry, University of Texas instructor of electrical engineering, who is in charge of the laboratory which is located on the University campus.

A boy was born to Mr. and Mrs. Ross Berry last week.

"JOGGED UP"

Los Angeles, Calif. 6210 Crescent St.

Mr. A. J. Stricklin, My Dear Mr. Editor:

We were glad to be "jogged up" on renewal. Can't do without the weekly visit of the "Herald."

If it is really true that you have the richest potash deposits, and if you "strik it rich" in oil old Terry will surely find itself at the center of the map. Well, we wish you all the good fortune possible.

I was impressed, when I visited your city and country, some years ago, that you had a climate and soil that are favorable to all vine growing products, such as grapes, melons, citrons, pumpkins, and also small fruits and berries; but the people are proving that it is a goodly land for nearly all products and so we are ever listening for increasingly good reports from the States Magnificent—Texas.

Please find enclosed check for \$1.50 for "Herald" for another year. Faithfully, D. D. DeLong.

Dr. J. W. Head of Fort Worth, was here again last Tuesday.

C. F. Fix, of San Antonio, was here last week working for the Donald Hill Cotton Oil Co.

TEXAS TO VOTE ON FOUR AMENDMENTS

Four constitutional amendments will be voted upon by the people of Texas, November 2nd. Interest will probably center in the amendment that would permit national guardsmen and reserve officers to hold office in Texas and the amendment which would abolish the board of prison commissioners.

If the commissioners were abolished the amendment would give to the Legislature full authority and power to provide by law for the management and the control of the prison system for the entire state. The Legislature would be given the right to put the penal institutions under the supervision of "such trained and experienced officers as the Legislature may from time to time provide by law."

Complete change in the prison system probably would result with the prison commissioners abolished. Steps that would tend to put the prison system on a more economical basis and at the same time provide better quarters and training for convicts is the object of the amendment.

The amendment which would grant the right to hold office by certain reserve officers and guards would amend a section of the constitution which now forbids such persons from serving Texas in a public office. The persons who advocate this amend-

ment point out that a man who stands in reserve ready to defend his state or nation should not be barred from public office privileges allowed the civilian.

Taxation of school lands owned by counties is provided for in another amendment. Article 7 of the constitution would be so amended that it would read: "All agricultural or grazing land owned by any county shall be subject to taxation except for state purposes to the same extent as land privately owned."

Some educators are strongly in favor of the amendment which would provide different methods of taxation for certain school purposes. It provides that "one-fourth of the revenue derived from the state occupation taxes and poll tax of \$1 on every inhabitant between the ages of 21 and 60, shall be set apart annually for the benefit of the public free schools; and in addition thereto there shall be levied and collected an annual ad valorem state tax of such an amount not to exceed 35 cents on the \$100 valuation, as with the available school fund arising from all other sources, will be sufficient to maintain and support the public schools for a period of not less than six months in each year."

Under this amendment also it is the duty of the state board of education to set aside a sufficient amount out of said tax to provide free text-

books for children of the public free schools.

TWO NEGROES DIE FROM GUN-SHOT WOUNDS

Two negroes are dead as a result of a quarrel and shooting scrape out on the Lige Carter farm four and a half miles west of Ralls last Saturday night.

The difficulty arose about twelve o'clock, and evidence deducted at the court of inquiry held by the Justice of Peace F. M. Reed, assisted by Sheriff John McDermitt and Deputy Elmer Reed, indicated that Dave Ralls pulled a gun and in a scuffle over it with other negroes, Willie Bell was shot in the abdomen; after falling, he pulled a gun and shot Dave Ralls in the back as he ran.

Quite a crowd of negroes were enjoying the festival but when the shooting started it is reported they scattered with much promptness. The Bell negro died Sunday morning, and Ralls died Tuesday morning.—Ralls Banner.

C. H. Thompson and wife, of Girard, were registered at the Hotel Brownfield, Wednesday. Mr. Thompson is a Girard druggist.

D. J. Schlog and E. D. Utterback, plumbers of Lubbock, were here last week and got the heating system at the courthouse going.

"THE STORE OF BETTER VALUES"

SOUTHLAND LIFE MONTHLY CROP REPORT October 1926

LEARNING LESSON OF ONE CROP IDEA

With the major portion of the cotton crop in Texas again is learning the lesson of "too much dependence on one crop." Southland Life Insurance Company's crop reports completed by its Department of Public Relations for October indicate that while the yield per acre was considerably below a normal year, considerably more acres were planted in cotton this year than last.

Texas' grain crops, now practically all in, was the greatest ever produced by the State both in amount and in value. This, as life

insurance sales bear out, has served to place the State in a good way for prosperity somewhat above that of so called 'normal' years.

The Panhandle and certain parts of West Texas, together with the irrigated Rio Grande Valley, lead the State in prosperity according to reports, crops in both those sections being bumper crops. The Valley was especially fortunate in getting a top price for its early cotton. Conditions in all sections of the State may be considered improved over the last report as far as gross production is concerned, the money value of course, being lower on account of the low cotton price.

One of the great surprises of the year was the corn crop which exceeded all estimates of those interested in it. This, combined with the wheat, oats, rice and other crops forecast steady prosperity for the State.
