By the Secretary

Now that we have received good raine and crops are growing nicely with every indication pointing to a good crop, it is time that we commenced work on a county fair, and letters are going out to persons in each school district in an effort to enlist their full co-operation toward putting over the best fair that Terry ever saw. We have pulled some good exhibitions and some not so good, but where we have failed has been when one man tried to put it over by himself.

It is desired to show dairy, hog and poultry industries as well as agricultural products, and prizes will be worked out for each of the divisions and competent persons will be secured for judging.

The highway situation on the west part of the county remains as it did several weeks ago and the highway commission has not indicated what stand will be taken by it. In the meantime we are getting some pretty adverse advertising on account of the condition of the roadbed, which would be much more harmful if there were any other roads that could be used in place of it. Let us hope that some solution will present itself before the counties south of us secure a designation and open their road. They are working on it and believe me they are a busy bunch.

### Local Rotarians Entertained By Post Club

A large bunch of Post Rotary Club came over last Friday evening and put on a fine entertainment for the local club, which was highly apprecisted by the home boys. The Post club is much older than the Brownfield club, and for that reason, has had a greater opportunity of preparing entertainment for the new clubs over this section.

After the banquet at the Hotel Brownfield, the Post bunch took charge of the meeting, and gave their entertainment, which consisted of good music by an orchestra, some splendid talks by good speakers, cowboy stunts, a solo by a young lady, and black face stuff. It is hoped that he Post boys will come again soon.

THE extra mileage you get from Dunlop tires starts with the fact that Dunlop has had thirty-nine years of tire-building experience-more than any other tiremaker.

Each part of each Dunlop is built right. Dunlop owns its own cotton mills to spin selected long-fibre cotton into the special Dunlop cable-twist cords.

These cords mean extra strength-an added factor of safety against constant load and pounding of roads-longer life and greater mileage.

They mean extra "stretch"-so the tire carcass will give under blows, and come back to its original shape without the slightest injury.

Every Dunlop you buy has extra miles built into it because Dunlop knows each part of its job. That is why we recommend you put Dunlops on your car.
