VOLUME 23

BROWNFIELD, TERRY COUNTY, TEXAS FRIDAY, MAY 11, 1928

NUMBER 38

Chamber of Commerce

By the Secretary

The band is all set for Lamesa and have a dandy program worked out, which will be put over and done with by the time that this article appears. We may or may not secure the convention for next year and it is not known at this time how many will be in our delegation, as the attendance committee is not ready to report.

After twelve months of effort and the expenditure of considerable gas and oil, we have succeeded in getting the Commissioners of Lea County, New Mexico, to take steps toward opening a road from Plainview to the Texas line. Yoakum County has been ready to go, and soon as Lea County has received a report from the review committee as to the most feasible route across that country, the Commissioners of Yoakum will arrange to connect with it.

The County Agent has just about all that two men can handle getting his work in shape and efforts are being made to secure an assistant for the summer months, with some hopes of being successful.

Captain Ed Kennedy wires that he will close his contract with a large company on Wednesday of this week, for construction of his line across this section, but if he makes the deal that he is on at this time, our route will be on from Corpus Christi, via San Antonio.

The Odessa and Brownfield Motor Transportation Line, run its first car over on Monday of this week, under a temporary permit from the Railroad Commission (permanent hearing on the application will be had at Lubbock next week.) Plans are on foot and are almost completed that will allow for full seven day motor bus letter and newspaper mail service between Roswell and all points east and north, with double daily service between Brownfield and Post. One of the largest motor transportation companies in Texas, has been induced to undertake to make the consolidations with smaller lines. The State Engineer is expected here this week, for the purpose of inspecting our north and south route, or rather the one from Brownfield to Odessa. And we have strong hopes that it will be permanently designated. In the meantime, Commissioners Black and Harred, have their machinery down there knocking the rough edges off.

POINEER TEXAN PASSES AWAY AT DAUGHTER'S HOME

Friday morning about 9:30 the all wise God saw fit to pluck from among us one of the Plains earliest settlers, R. R. Hughes, born in Illinois more than 72 years ago, spent a few years of his early life in Missouri and came to Texas when still a mere youth, settling in Hunt county when it was still a cattle ranch country. His love for the open country forced him west as the settlers would come in until he finally settled near Brownfield, Terry county some 22 years ago. The last five years of which have been spent with a daughter, Mrs. R. C. Forrester of this place.

He leaves five children all of which were present shortly after the end came. They are Dr. H. H. Hughes of Brownfield; Mrs. R. C. Forrester, Wilson; H. C. (Clay) Hughes, Tahoka Mrs. Homer Scott, Lubbock; and R. E. Hughes, Carlsbad, N. M.

Funeral services were held in the Forrester home and were conducted by Rev. J. B. Thompson. Interment was made in the Tahoka cemetery.—Wilson Pointer.

Mr. Hughes was typically the pioneering type. He was restless if too crowded by the advance of teeming population, yet he had his hand in helping to absorb the fast coming pioneer—good and bad—and make respectable citizens of them, for he was for years a peace officer in Coleman county after landing there.

His home was as hospitable as it was broad, deep and long, and if he ever had an enemy in Brownfield, we never heard of it. Peace to the dust of this splendid type of sturdy pioneer.

Big Spring—Paving of forty blocks in the residential district of Big Spring will soon be underway.

Friona—The zinnia has been chosen the town flower of Friona and is being planted all over the city.

Terry Gets Over Half An Inch Rain

At last the grand and glorious rains have descended upon our parched soils, and while it was not as much as we wanted or had expected, it was enough to start hundreds of planters, probably a thousand to going here Friday morning of last week.

There was a light shower Wednesday night to be followed by another light shower Thursday afternoon and a heavy rainfall for about 30 minutes Thursday night about 9:30.

While as stated above they were not as much as was desired, it will have to do to start operations on, and we are all expecting more somewhere around the new moon. We don't know why we are all expecting it around the new moon, but we are, and we'll bet we get it too, "aptisnot."

It is said the south part of the county got most of the rain, getting less as one goes north, with barely enough in the northeast part to plant. But with the arrival of another before many days the planting can go merrily on.

Everything, and especially the trees and grass seem to have put on new life and are now spreading themselves.

Brownfield-Odessa Stage Started Monday

We understand that A. M. McBurnett has already received his charter from the State Highway Commissioner to operate a stage line from here to Odessa, making a junction point here with the Lone Star people, which carries passengers on into Amarillo within 12 hours after they leave Midland, a saving of several hours over any route so far to be inaugurated.

Mr. McBurnett has purchased a President Eight Studebaker bus car, and later on means to add one of the newest President Straight Eights. He has been over the route on a trial trip and made the run from here to Odessa in four hours without apparent trouble, and will likely be able to make better time as these new roads settle.

This new short line from the Panhandle to Trans-Pecos Oil Fields is going to be a great help to Brownfield and we congratulate Mr. McBurnett on promoting it. He passes through Seagraves, Seminole and Andrews, we understand enroute to Odessa.

Arrangements are also under way with the postal authorities for a mail pouch to leave here at 6 P. M. on the bus for Lubbock, giving us our first real night service mail to points north, east and west.

POURED WHILE RUNNING NOT "TRANSPORTED"

AUSTIN, May 2.—Liquor is not being transported in the legal sense if it is being poured from a fruit jar while a man is running from officers, the court of criminal appeals held Wednesday in one of the five liquor cases reversed and remanded for new trials.

Lee Murphy, Crosby county, was the man doing the running, testimony showed in his appeal from a one year liquor transportation sentence. He and a friend, named Thedford, were out in a maize patch on the Lemly farm near Crosbyton, partaking of some fruit jar liquor cached in a shock of maize. Officers bore down upon them and they both sprinted. Murphy pouring out his portion as he ran 25 or 30 steps. This was not actual transporting and Murphey is entitled to a new trial under that form of indictment, the appeals court ruled.

WHY HE CAME

A Scotchman aroused the ire of a fellow workman, an American, by forever boasting about his native land.

"If you like Scotland so well and it is such a wonderful place, why did you come to the United States?" said the American.

"It's like this," said the Scot. "In Scotland everyone was as clever as myself but here I'm getting along verra weel."

Matador—Matador will have natural gas by September 1, 1928.

Cowpuncher Takes Cracks at the Crowd

Plains, Texas

Editor Herald:

We note with interest the continued complaints of our friend Geo. W. Neill, in your columns concerning the slaughter of rabbits, and the unwillingness of the Genius Homo Capiens to obey the mandates of those who would lead him to higher levels—and especially do we wonder at his cringing criticisms concerning the dress of our modern maidens.

Please, to inform him that when Terry county's rabbit supply plays out that he can find them in Yoakum at the rate of 50,000 per capita. And that they destroy corn and other grain enough each year to fatten forty barrels of pork. While we have never presumed to lecture the ladies on what they should wear or how they should fix it, we have wasted 40 years, like Judge Neill, following the advice of Pope, making man our chief study and having arrived at the ripe conclusion that Pope was all wrong, and the proper stuff is not MAN! But that his chief mission in life should be the study of matrons and maids. I fear that my friend, Judge Neill, like the Bishop of Ely and Viscount Lascelles and the balance of the benedicts need to know "What Iago said to the Moor."

For fifty centuries, you benedicts have struggled along trying to harmonize the Commandments of Moses, Dallings of David, Excentricities of Ezekiel and the preachments of the Apostle Paul—and you have utterly failed just how to "Feast Upon The Felicities of Peninine Fastidity." That you know absolutely nothing of the Great Deciderium of the Soul of Man. That accordant to Scientific Research, as yet only 5% of married women have reached the realm of (earthly) Elysian Bliss. That 30% of the Matrons manage to worry along, holding the Race in hazardous harmony—While 50%, fully one-half of the women who wed, are floundering along from the Divorce Courts to Damnation; and that the other 15%, or about one out of every seven modern maids who dare the dive into the dark realms of wifehood are sure to land head first into h—? Well putting it rather strongly you say? But Science is just knowledge, and facts are irrefutable—alho a condition that should be, can be, must be remedied.

And naught but a perfect knowledge of the actual conditions and salient remedies can cure these frightful blights of the Bliss to which our sisters are entitled, and the modern woman with all her newness and apparent rebellion, has headed for the complete conquest of her Queenly Realms and Septered Rights. Can't blame them for donning bloomers, bobbed hair, abbreviated skirts and a business career can you? Yet Geo. W. like all other benedicts from Adam to date you would insinuate that every time the ladies make a change in raiment—'tis merely to open up the way for bachelors and boys to get more information concerning the softer-sex. You haven't yet found out that clothes and fashions effect not her charms nor hath naught to do with her pride or purity. Why our common mother, Eve, clad only in fig leaves and freckles, took a fall out with the Lord and led our first father all around the orchard of Eden, and wasn't a bit afraid of snakes. I fear that you benedicts have failed to find that most any woman, thoroughly known and properly treated, can and will take deep delight in showing her rightful Lord, more of the beatitude of Elysian Bliss than he had hitherto dreamed was possible for him to experience here on earth. Inform yourself. Know her every need and whim and mood—familiarize yourself with all her coquettishness and coyness and seeming affections. Cease nagging at her nakedness and clammering about her clothing. For clothe her

With shaven head of flowing tresses, Bobbed off skirts or dragging dresses. Or beltless waists and loose kimona, Put bifercated panties on her, She's still the sweetest little dear, And I'm her Champion everywhere.

—Cow Puncher

P. S. When we finish compiling our lecture on "Woman—Past, Present and Future we will come down and deliver it for the benefit of the ladies library.

Rotary Club Has A Splendid Meeting

At the regular Rotary Luncheon, Friday the 4th, the local club had another of its usual fine sessions. On this occasion Miss Espie Castleberry was the pianist and rendered some appreciated numbers.

The Club was favored with an address from A. O. Thompson, President of the Union Bank & Trust Co., of Kansas City, Mo., who was a visitor in the city and who is a member of the Kansas City Club and had with him as his guest a Mr. Campbell, a railroad man. Mr. Thompson said some fine things of Brownfield and territory and spoke of his appreciation of Rotary and its work throughout the world. He told of Kansas City's large club and its activities.

Another feature was the presence of J. Walton Moore, a returned Missionary from China, and a former Simmons University man. Mr. Moore, graphically described the economic conditions of the Sleeping Giant, China. He told of the latent possibilities of that nation, of the characteristics of its dense population. He sang some songs in Chinese and then gave their interpretation.

The Club President, Morgan Copeland, was in receipt of a letter from the Rotary Club of De Dijon, Cote D'or France, which being written in French would become the duty of the incoming President for translation as he was pressed for time, and as the club would soon elect he would pass that to the next man. He then read an article which he had prepared on "The Elements of Friendship As Man to Man."

The local Rotary Club is doing some fine work among the Boy Scouts and the various programs of Civic Work is taking definite plans and the town is going to be in for a Clean Up Campaign soon. Balloting was conducted this week soon for the election of officers, a detailed report will appear probably by the next issue.

The club notes with regret the absence of Editor Jack on account of illness this week.

ROTAN MAN DIES IN LUBBOCK SANITARIUM

R. E. Burnett, 49, of Rotan, died in a local sanitarium at 11:45 last night following an operation.

He is survived by his widow and five children, three girls and two boys, his father, F. M. Burnett of Brownfield, a brother, John Burnett also of Brownfield and two sisters, Mrs. W. H. Rodgers of Clarendon and Mrs. Eula Ward of Wink.

Mr. Burnett was brought to Lubbock Sunday. He lives near Rotan. His body be sent to Snyder this afternoon and burial will be made at Camp Springs tomorrow. Rix Furniture and Undertaking Company has charge of the funeral arrangements.—Lubbock Avalanche.

The above are essentially the facts in the life of Redge Burnett, but Brownfield and Terry county people know more. They know him as a kind father and a loving husband; they know him as a good citizen ready to share in its advancement every way possible.

Mr. Burnett served the county as one of its commissioners for several terms and gave a good account of his stewardship. He was a loyal member of the Methodist church and a member of the Brownfield Lodge I.O.O.F. for many years.

The people in his old home town reach out in sympathy to the wife and children at Camp Springs as well as to the relatives in this county.

TO WHOM IT MAY CONCERN:

Roby, Texas April 27, 1928

I understand that W. J. Moss, formerly of this county is making the race for Commissioner of your county. I wish to say that I have known Mr. Moss for several years and all his people, they are highly respected and the very best of people. I believe Mr. Moss if elected will make you a good officer, and that you will never regret anything you may do for him.

Very truly yours,
J. S. Connell,
County Judge, Fisher County, Texas.
(Pol. Adv.)

Send the Herald to your friends.

Neill Side-swipes the Ford-Hoover Jitney

Henry Ford has declared for Hoover for President. In a recent interview in a well known magazine, he, the interviewer, attempts to give his reasons. From the phraseology of the article, one would judge that the interviewer did all the writing and most of the other. Most of the press comment on the article, tends to the idea that it is Hoover "press-agent" stuff, propaganda, etc., and point to similar procedure on former occasions, when Hoover "took off" for a flight into the limelight.

Mr. Ford has achieved wonderful success in mechanics, manufacturing, and in business growing out of it, and has along with it shown some element of greatness, and not all unmerited. But it must be noticed, that not withstanding his low priced product and high wages he has managed, in the last twenty years to acquire an individual fortune, reputed to be near the billion mark, and is known as the world's richest man, so his efforts are not altogether benevolent. We harbor no prejudice against big men or big business when honorably acquired, but it would seem that those who do, would have to include Mr. Ford.

As to Mr. Hoovers greatness we see it not. It appears he was originally a mining engineer, we assume this means a business manager; we don't know that he ever discovered any mines, or invented any processes pertaining thereto, but through employment by the owners, backed by their money he perhaps carried out his jobs successfully, most of which just prior to the war for some 15 years was in foreign countries, and most of which countries and people beng so antiquated in means and methods that any average American, with American money, methods and machinery could score a signal success over the natives, and yet be a matter of course here at home. We see no mark of greatness, nor great achievement in his Food Administration. We were at war. With great powers given him by the Government, with expenditures of enormous sums, and flaming requests to save, met with a patriotic responsive public. The man in the furrow was as patriotic as the man in the trench. Then too at that time the Government had taken over many things, and it was guaranteeing results to factories, railroads and producers, and we think Mr. Hoover made some promises to producers, but the crash of '20 answers all that.

Nor can we see any achievement of him in the Mississippi flood. He did not stay the waters or prevent their havoc. Nor did a thing to prevent repetition. The Red Cross and a charitable nation appeased the sufferer of the victims, after the disaster. What he has done looms no bigger than what he hasn't done. Neither by suggestion, or act, did he prevent the several hundred million dollar loss to Southern farmers in the fall of 1926, nor has he alleviated the plight of the two or three million unemployed in the northeast most of whom are industrial workers, and in the industries that are a feeder of commerce, and he is Secretary of Commerce.

But the greater part of Mr. Fords interview is an industrial theme; industrial ideas. He is an industrial man, in mind and sentiments, and it seems the only process accredited to Hoover is one in mechanical industry. Thus it easily appears that it is wheels that moves Mr. Ford to Hoover's wagon—like the magnet to the pole. We censure neither for it, it is natural. That is what they are, and industrialism the predominant attraction between them. History and present observations show that great men and great achievements, have been along one individual line, or on one thing, this is true of them.

The question for the people to decide on this matter is whether we are ready to industrialize our government, and have it run by mechanicians on a single track, or by Statesmen on the broad principle of a government of and for all.

—Geo. W. Neill.

Canyon—Canyon and Hereford are contesting for the "Most Beautiful City" title; the chamber of commerce of the losing city will banquet the chamber of commerce of the winner.

Program of School Closing Exercises

There is only one more week of school left. One that will be filled with programs and examinations. The order of programs for the week will be:

Sunday morning, May 13th at eleven o'clock at the Methodist church the Baccalaureate Sermon will be preached by Rev. Douglas Carver, of Panhandle, Texas. This will be followed by a luncheon at the Brownfield Hotel for the Seniors and other guests.

Monday night, Miss Fogle will present her musical students in a musical recital.

Tuesday night Miss Lawlis will furnish a very interesting program by presenting her public speaking students in program.

Wednesday evening Mrs. Dallas entertains with her piano students.

Thursday evening the grade school graduation program will be given. Rev. E. V. May will deliver the address, and the diplomas will be presented to the class by Fladger Tannery.

Friday evening, which will be the closing program of school and of the week will be the Senior graduation exercise, the address being delivered by Rev. J. W. Chisholm, and the diplomas will be presented with other metals of award by Supt. O. W. Fagala.

STUDEBAKER DICTATOR ESTABLISHES NEW RECORD

Atlantic City, N. J., May 7.—By traveling 5,000 miles in less than 4,800 consecutive minutes, the Studebaker Dictator established a record for strictly stock automobiles costing less than \$1400, it was announced here today. The record was made under the supervision of the American Automobile Association. The new feat of two Studebaker cars began at the Atlantic City Speedway on April 20. It ended 3 days later when both cars flashed across the 5,000 mile finish line, each having surpassed all endurance and speed records of stock cars in their price class for that distance.

The first Dictator covered the 5,000 miles in 79 hours and 11 minutes, maintaining an average speed of 63.138 miles per hour for the entire distance. The second Dictator averaged 61.312 miles per hour for the 5,000 miles, making the run in 81 hours and 32 minutes. No cars selling below \$1400 have ever equalled this record.

The entire run was supervised by the contest board of the American Automobile Association. Every lap the cars made was timed and checked by official judges and timers. Both before and after the test, the cars were checked by the technical committee and pronounced strictly stock models in every respect.

"It requires super-endurance for a car to travel 5,000 miles in less than 5,000 minutes," says an announcement issued by Studebaker today. "Only recently a car costing \$4,000 was forced to withdraw from a 24-hour race after it had covered less than 1400 miles. Almost any car can run 60 miles an hour for a short time, but when it comes to maintaining that pace hour after hour, and day after day, the car must have been built of high quality materials to the most exacting of precision standards and under rigid inspections.

"Studebaker's purpose in having The Dictator make this sensational run was to prove the forgoing characteristics of Studebaker cars and also the engineering genius embodied in the car—the genius that gives this car 70 horsepower, yet permits it to be thrifty of oil and gas; the genius that permits you to drive it 40 miles an hour when it is new, 65 miles later; the genius that makes it unnecessary to change engine oil or to lubricate the chassis oftener than every 2500 miles."

CARD OF THANKS

We wish to thank our many friends and the W. O. W. Lodge, of Brownfield, who so kindly rendered us assistance in our time of need, we feel that you were friends indeed.

Mrs. Redge Burnett and children
John Burnett
J. R. Burnett.

SAME OLD STORY BUT SWEETER THAN EVER

JUST A FEW FACTS ABOUT EGGS—We usually pay top price for eggs. However sometimes competition will raise the price above the market and at the same time easily make it up—or more—on the price of goods. **WE WILL GUARANTEE** your eggs to buy more goods at 'M' System. "Nuf" said.

WE SAID IT WOULD HAPPEN!

HER ONLY MALADIES

Edward, a colored boy, had recommended his mother for the position of cook, but when she came the farmer's wife asked doubtfully:

"Do you suppose you will be able

to do the work? You don't look very healthy."

"Yes' ma'am, I is able. I ain't never been nowadays sickly in my life—ain't nuver had nothin' but smallpox

an' Edward."

HORNED RABBIT KILLED NEAR SPADE TUESDAY

Page Eastland!
A horned rabbit exhibited here Tuesday and Wednesday morning by Earnest Smith, rural carrier on Route 2, puts Eastland's little old horned frog in the background.

R. Hartsfield, living a few miles southeast of Spade, killed a rabbit which looks like the ordinary cottontail, except the head was covered with horns. About twenty horns of various sizes and lengths adorned the head. The largest horns grew out from the sides of the rabbit's jaws and were about one and one-half inches long, and one small horn was growing in the center of the forehead and one about three-quarters of an inch long on top of the head. The Record editor examined the head of the rabbit. The horns were hard as stone, it seemed, and looked more like rock formation.

We have been told that several of these kind of rabbits have been killed near Spade, but this is the first we have seen.—Colorado Record.

TIMES CHANGE

"I wonder whatever's become of the girl who used to drop her eyes, raise her face timidly and murmur 'You'll have to ask papa.'"
"She's got a daughter," answered the up-to-date matron, who shouts: "Shove her into high, kid! The old man's gaining on us."

AN EXPORTER

Sam—Say, Mose, what am you all doin' now?
Ham—I'se an exporter.
Sam—An exporter?
Ham—Yes, the Pullman Company dey done fire me.

Misses Bebe Auburg and Signa Tapp visited Midland over the week end.

Hunter School Notes

We are all happy over the rain last week but wish there had been more of it.

We are glad to have Deward Williams back with us again after a 3 weeks stay at Cleburne, Texas. He reports crops coming on fine down in that part of the State. On his return trip Sunday he was accompanied as far as Mineral Wells by his aunt, Mrs. R. Degunia and husband and her sister, Miss Beulah Milsteads and the latter's chum, Miss Adelle Wheeler.

We are sorry to report that E. L. Williams is among the large number on the sick list this week.

The pretty residence that Lee Lyon is erecting on his farm is nearly completed and will be a credit to the community.

Lonnie Reatherford has returned home from Anson, Texas.

Mr. and Mrs. E. H. Machen are visiting relatives at Seymour, Texas.

Misses Delma and Thelma Williams had as their guests Sunday, their cousin Miss Erline Williams and Misses Lora Offill and Lollia Mae Woodall.

WHAT'S DOING IN WEST TEXAS

Llano—Location has been selected for the 40 room hostelry to be erected by the Llano Community Hotel, Inc., at a cost of \$96,000.

White Deer—The White Deer Chamber of Commerce is now meeting twice a month.

Throckmorton—Throckmorton put over her rail celebration in grand style, entertaining from 15,000 to 20,000 people May 4.

The number of mules on Texas is increasing while horses are decreasing. The latest figures show 1,073,000 mules valued at \$74,525,000. This is 20,000 more than the previous year.

60 PER CENT OF WORLD'S PEOPLE EAT NO BUTTER

*American Table Delicacy
Unknown to More Than
Billion in Other Nations.*

Chicago.—Sixty per cent of the population of the earth, or 1,032,000,000 people, do not use butter and a considerable per cent have never heard of it.

This doubtless will astonish persons unfamiliar with the history of foods and accustomed to butter on the home table since infancy. Similar popular myths prevail regarding the length of time coffee, tea, and tobacco have been numbered among civilized luxuries. The addition of European people and their descendants on this side of the Atlantic to these pleasant stimulants dates back only a few hundred years. All the conquests and great exploits of the ancient and medieval world were achieved without them.

Butter as a spread for bread is used only in a comparatively small area of the earth, chiefly in northern Europe and America. In other parts of the world, olive oil, tallow drippings and coconut oil take the place of butter in cooking and as a table dish. In China, Japan, India and other nations of southeastern Asia, where rice is the staple food, no butter is used and various fats and oils are added to the cereal to give it flavor and nutritive value.

Margarine has been an established article of diet in Europe and America since the reign of Napoleon III in France when Hippolyte Mege-Mourles developed the method of manufacturing it. It was at first considered a substitute for butter but now in several European countries butter is a substitute for margarine. In Denmark, notably, one of the leading dairying countries of Europe, it is almost a universal custom among the farmers to export their butter to England and

use margarine on their family tables.

No prejudice exists in Europe against margarine and the inimical sentiment against it which developed a decade or so ago in America and which, from an economic view is difficult to understand, is gradually disappearing. Margarine is a wholesome food made under thoroughly sanitary conditions and government inspection. It is made only from the finest oils, vegetable or animal or both combined, milk, and salt and its manufacture is a source of immense profit to American farmers. As far as taste goes, it is difficult for even a connoisseur to distinguish between the best quality of margarine and the best quality of butter. As a spread for bread, both butter and margarine are considered by dietitians merely as delicacies or what are known technically as accessory foods.

"Given an ordinary, every-day reasonably well-balanced diet for the average man, or child," says Dr. William D. Richardson, internationally famous scientist and dietitian, "it does not make any difference from the dietary standpoint whether the individual eats margarine or butter and the one he chooses is entirely a matter of taste, preference, or economy. He may choose to eat one or the other or neither without any appreciable influence on his growth, health strength or physical or mental energy. His diet usually is, and should be, so balanced and varied that he is not dependent on the small quantity of fat which is spread on bread to make it palatable."

Knew Horrors of War

Take my word for it, if you had seen but one day of war, you would pray to Almighty God that you might never again see even an hour of war.—The Duke of Wellington, conqueror of Napoleon at the battle of Waterloo.

First Colonial Wedding

Misses Ford brought her maid, Ann Burras, to Virginia in 1708. The latter soon married John Lawden. This is the first recorded English wedding on American soil.

TOMATO, Pepper, Cabbage plants

LOTS OF RECONDITIONED CHEVROLETS SELLING

Detroit, Mich., May 8.—An entirely new slant on the used car, elevating it to its rightful place in the industry, was taken here by R. H. Grant, vice-president in charge of sales of the Chevrolet Motor Company, in an interview just prior to sailing for a month's trip to Europe.

As evidence of the growing importance of the used car, Mr. Grant pointed out that during the first quarter of 1928, when the Chevrolet dealer organization was moving 250,000 new cars, it also was delivering at retail more than 200,000 used cars.

This was made possible by a changing attitude toward the used car on the part of both the automobile dealer and the public, Mr. Grant said.

"Where the automobile dealer formerly paid little attention to the used car," Mr. Grant declared, "the proportion of used car to new car sales has mounted so high that used cars are now an important part of his business. Today, practically all the direct dealers in the Chevrolet organization have Ducoing equipment with which they refinish used cars in a manner similar to the factory. Cars are gone over from head light to tail lamp by skilled mechanics trained in approved factory methods. The reconditioned cars bear an 'O. K. Tag' showing that every vital part has been checked. They are then displayed attractively, and lenient time payments are made available to the purchaser.

GOMEZ CONQUISTORS CLUB

Mr. Davis, our county agent came out Wednesday, May 2, and organized our club.

We named our club Gomez Conquistors Club.

We elected the following officers: President, Happy Hudson; Vice-pres., Edward Walker; Sec-Treas., Elizabeth Gaston.

There were 17 that joined and expecting more later on.

"No matter what the game we play, We put our whole heart in it; No matter what the odds, we stay, To lose the prize or win it!

We don't snifle when we are beat, But whatever the game, we dare it, And if we go down in defeat, We grin and gamely bear it."

—Dollie McLeary, Reporter.

There is a vast amount of poor and mediocre teaching in high school classrooms and all too little that is excellent. But evidence is at hand that instruction is improving under the guidance of better preparation of teachers, improved supervision, and an enlightened theory of education.

With our energies directed in co-operative endeavor for the solution of our common problems, with a growing faith in secondary education as evidenced by the increasing enrollment of our high schools, with new science and the philosophy of our instruments of attack, we confidently

CHARACTER IN PUBLIC AFFAIRS

Much is being said of the importance of character training in educational institutions, from the greatest universities down to the smallest public school in the country.

The essentials of character building are being studied by Child Welfare Associations and colleges for the training of students in university and post graduate courses.

The Dean of New York University speaks of character instruction as all-important and that it must never be made a mere classroom exercise, divorced from conduct and conscience.

Dr. John H. Denbigh of Parker Institute, Brooklyn, insists that in our social relationships behavior be made more enlightened, more consistent, more vigorous and less selfish.

Apply this need of stressing character and conduct to our political affairs and the conduct of public officials and we would have better standards in local and national affairs.

FORRESTER CLUB ORGANIZED

Our county agent, Mr. Davis, came to Forrester last Thursday, May 3rd, and helped us organize a club, which contains fifteen members. Our Club name is Forrester Fearless Fighters, and was suggested by Opal Travis.

You may think by the name that this is a rough bunch but it means that we are not afraid to work.

All the girls belonging are in gardening except two and they are in poultry. Several of the members are already started in their work.

We intend to work very hard and live up to our name.

Our club officers are: Arthur Lee Rogers, President; Opal Travis, Vice-President; Avis Minnix, Sec-Treas.; Zoree Crone, Reporter.

LOCAL PEOPLE TAKE PART ON PROGRAM AT MEADOW

On last Friday evening the Parents and Seniors of Meadow High School met in the hall of the school building for a banquet given for the benefit of drawing the students and parents of the school into closer relations on school matters. The evening was filled not only with good eats but a very good program. The two ministers of Meadow gave interesting talks as well as Mr. Martin an unusually clever welcome address. Mrs. Roy Herod of Brownfield favored those present with a very beautiful vocal solo. After this a talk was given by Fladger Tannery of Brownfield on P. T. A. work and the need of such an organization in the community and for the success of a progressive school. This talk was closed by the organization of a P. T. A. with Mrs. Harris elected as president.

assert that the year now closing has been one of decided progress for the American high school.—J. T. Giles, Madison, Wisconsin.

S. A. Lauderdale.
T. W. Moss.
S. F. (Sig.) Lane
Marion B. Stone
B. W. Stinson

For Weigher Pre. No. 4:
R. A. (Richard) Crews.

A negro republican will likely be elected to congress from Chicago, but he will likely be so far away from the Texas gang that they won't notice any change in the perfumery.

Which every way you look now you see the black streaks appearing in the fields denoting the progress of planting. This color is much more restful to the eye than the light redish glare that has greeted us for the past few weeks.

Well, the old man's sick again this week and is "tendering" you another short paper, forsooth you accept it. Just can't help it though. Our doctor said he would tail us up again this week and hoped we might succeed in standing on our own bottom from this on.

Speaking of sickness there are lots of people in Brownfield who delight in visiting the sick, and most of them know how to talk with sick folks—on other subjects. But a few have to tell you that a double half uncle of theirs died with very similar symptoms to yours. Their whole run is on disease and you just can't derail them.

FALSE ECONOMY IN BUILDING CONSTRUCTION

False economy in building homes, office buildings, stores and factories often leads to useless fire waste. A few more dollars invested in better building methods, would often check the spread of flames, making it possible to keep a fire under control until the fire department arrived.

"When a man is building a home and the architect draws his plans according to all the standards of fire protection, should the owner wish to reduce the cost as shown by the estimate, the first things to be eliminated are too often the factors of safety," says Warren Ellis of the National Board of Fire Underwriters. "A cedar-lined closet seems far more important than the fact that their stairway is unenclosed, that fire stops within the walls have been eliminated or that their chimney has a flue which is not absolutely safe. If it means elimination or that their chimney has a flue which is not absolutely safe. If it means elimination of a breakfast nook to get a fire-resistive roof, they much prefer to get along without the safe roof. This is false economy.

"False economy is a habit of the American people when it comes to constructing fire-resistive buildings and a campaign against this attitude should show results in the first generation. We can just as readily acquire the habit of desiring fire-safe buildings as of being willing to take chances."

BEWARE OF OVER-CONFIDENCE

Ever study "Bagology?" No? Well, it's worth studying for it gives you tips like this:

If anyone working for you gets a "swelled head," just call him in and tell him this story.

It concerns a chap who conceived the idea of becoming a tight-rope walker.

He practiced. He stretched a wire on the ground and equipped with a balancing pole, attempted to walk the wire. After a little bit he concluded that it was wonderfully easy.

Before long he threw away the balancing pole and much to his amazed delight, he found he really didn't need it at all.

Full of confidence, he stretched a wire about fifty feet from the ground. Climbing to the top of one of the posts, he struck out across the wire.

The funeral was largely attended. "Funerals" are being held every day for men who throw away their balancing poles too soon. Confidence is an asset; but over-confidence is a liability.—The Office Cat.

THE PATH OF RIGHTEOUSNESS

Mark Twain was called upon to speak at a club, and took for his subject, "Honesty." He said that when he was a boy at home he one day saw a cart of melons. He was a boy tempted; besides, he liked melons.

"I sneaked up to that cart," said Mark, "and stole a melon. I went into the alley to devour it. But—I no sooner set my teeth into it than I paused; a strange feeling came over me. I came to a quick conclusion. Firmly, I walked up to that cart, replaced the melon and—took a ripe one."

A relief agent was sent here this week to take R. L. Harriss' place.

PRINCIPLES OF OPERATION

We believe that a bank should not only be a depository of funds, but indeed a haven where the rich and poor alike can confide their financial troubles, fears and doubts into the attentive ear of their mutual friend and counsellor the BANKER. The bank, the foundation of all saving, should be solid like the granite, standing the acid test of time, pursuing a conservative but friendly course.

This bank like the great Oak from a little acorn, of persistent effort and sound business principles has grown. It stands today like the Oak, it many services and ample resources like the limbs, cast their shadow of protection over those whoseek its shelter, a mecca which invites the confidence and patronage of the public

EXPLODES MANY SNAKE THEORIES

Scientist Makes Exhaustive Study of Private Life of Mr. Rattler.

Chicago.—John Erskine's study into the "Private Life of Helen of Troy" had nothing on the intimate study of the daily life and habits of one of nature's most repulsive reptiles, the rattlesnake, by Dr. William H. Welker of the University of Illinois college of medicine in this city. Nor did Erskine find out anything more of interest about Helen than did Doctor Welker about the rattler. The scientist, through his study of the private life of Mr. Rattler, has been able to explode a number of pet snake theories and superstitions that strike terror into the hearts of every one when this reptile is mentioned.

For three years he pried into the life of the reptile, extracting poison and hoping to give the world an antivenom. When he finished he had this to say:

"Mr. Rattler is a perfect gentleman," Doctor Welker insists. "He is quiet and well behaved. He does not go out stalking trouble but rather will slip silently away into the sand and snagebrush if given half a chance."

Plays With Rattlers.
Doctor Welker, one of the three men who have studied the venom of the deadly "diamond back" extensively, is professor of physiological chemistry of the University of Illinois

college of medicine and his experience with the rattlesnakes has been gained through his study of the proteins of the venom. The venom looks much like the white of an egg except that it is colored deeper yellow and is not quite so sticky. For three years he handled rattlers, kept them in his laboratory, played with them, experimented with them and during the entire time never did he have one of them attempt to strike him. He keeps, in one of the drawers of his laboratory desk, several vials of hard dark orange granules that he handles rather carefully, but which in themselves in the dry state are not harmful—so he says. These orange crystals are dried rattlesnake venom in its most concentrated form.

"I have roughed it in many of the rattlesnake areas," Doctor Welker said, "and I have handled snakes in my laboratory; therefore, I can say without regard to what others believe that a rattler never strikes except when colled.

"Some who have seen rattlers strike may be deceived by the slowness of the eye. A rattler is about as quick as lightning.

"You come on a rattler stretched out, and the next instant his fangs have pierced your leg. You think that he has struck when uncolled, but your eye was not swift enough to follow the action. However, you seldom see a healthy rattler uncolled. When one is at rest or asleep he is usually wound up in a coil or cone formation.

Strikes Only When Angered.
"The rattler never strikes unless provoked. He is peace loving and if given notice will avoid a fight. Only when he is startled or angered does he flash his fangs.
"I have seen a guinea pig live un-

**ANCIENT CITY IN GREECE,
LONG LOST, AGAIN FOUND**

Johns Hopkins Savant Discovers Site of Olynthos, Razed 2,500 Years Ago.

Baltimore, Md.—Dr. David M. Robinson, professor of archeology in Johns Hopkins university, has located the lost site of the city of Olynthos, which was razed by Philip of Macedon 400 years before Christ, and the exact location of which has been for centuries uncertain.

Informed by cabled authority from a group of Baltimore men, most of whom are connected with the Baltimore Museum of Art, Doctor Robinson has put 100 men at work excavating the site. A cable received recently by Dr. Hugh Young announces that the discovery may be even more important than was anticipated.

The message, signed by Doctor Robinson, reads:

"Excavation of Olynthos begun. Fortress, granaries, wine press, many statuettes, large head of Sthenus, many vases, important Greek villa, coins, already found. Most promising. One hundred refugees employed."

It was only on January 15 of this year that Doctor Robinson, who is on a year's leave of absence from the university for study and research in Greece and Macedonia, located the site of Olynthos, which was destroyed nearly 2,500 years ago. On that date he wrote to Doctor Young that "I think I have located the site of ancient Olynthos, about which Demosthenes wrote many orations. It was the most important place in Macedonia from the Sixth century B. C. to Roman days."

Doctor Robinson wrote that the site was located only about forty kilometers from Salonika, and that he expected to get, almost at once, a permit from the Greek government to begin excavations. If possible he wished to press the digging from February 15 to May 20, he said, after which date climatic conditions are not good.

The cost of the work for the first year he estimated at \$10,000. He asked Doctor Young if Baltimore would undertake to finance it; at the start some \$5,000 would be necessary. Doctor Young immediately cabled authorization for the expenditure of \$5,000, and then took up the matter of raising the money with a group of friends.

**18-Ton Bell for U. S.
Completed With Fete**

Croydon, England.—This ancient town recently held a high festival of bell ringers, the occasion being the completion of an 18-ton bell which will be added to the carillon of the 53 bells in the Cathedral of St. John the Divine in New York.

The great Bourbon, which is the largest ever cast in England, was sounded for the first time. Selections were played also on a carillon of 23 bells which is being assembled for a church in Rochester, Minn.

Cyril Johnston, head of a famous bell foundry, invited representatives of all the bell-ringing guilds in the country. All the famous ringers from St. Paul's cathedral in London came and those from other churches swelled the total to about 2,500. The festival was graced further by the presence of the archbishop of Canterbury and other church dignitaries.

Actuated by Vanity

We are not convinced of the value of an idea unless we are persecuted for it. Then it is no longer our idea that we are defending, but our vanity. —Plain Talk Magazine.

Casualties at Waterloo

In the battle of Waterloo the French lost, in killed, wounded and missing, about 31,000 men, while the losses of the allies were about 23,000.

UNUSUAL P. T. A. PROGRAM

The local chapter of the Parent-Teachers Association met Tuesday night in regular session. There was an unusual large attendance on the part of the patrons of the school and friends to school. The house was called to order by the President, after which the minutes of the last meeting were read. This was followed by a few remarks from the retiring President Fladger Tannery, who also introduced the new president, Mrs. Lawrence Dunn. A few words of the future working plans were given by the new president. The other incoming officers, namely, Mrs. Flen McSpadden, Vice-president, Mrs. W. G. Harris, Secretary, and Mrs. Walter Gracey, Treasurer, made a few remarks of thanks for the trust placed in them and solicited the help and support of those that are interested in making Brownfield the best school town on the South Plains.

After the above business had been attended to one of the best programs that has ever been rendered at any P. T. A. meeting anywhere was given by the students of the high second and high fourth. The nature of the program was a costume pageant "In the Garden of Cinderella."

The pupils and the teachers of these rooms are to compliment on the manner, and efficiency that the program was presented.

Though the present year of P. T. A. work has ended you should not stop, but work to make this school the best of schools and the town the best of towns.

DEVOTION

The teacher was trying to convey an idea of devotion to the members of her class. "Now suppose," she said, "a man working on the river bank suddenly fell in. He could not swim and would be in danger of drowning. Picture the scene—the man's sudden fall, the cry for help. His wife knows his peril and hearing his screams rushes immediately to the bank. Why does she rush to the bank?" Whereupon a boy in the rear exclaimed: "Why to draw his insurance money."

Mis Nell Flache is visiting her friend, Miss Ruth Welch at Snyder, Texas this week.

Mr. J. T. Pippin of the Tokio community was a pleasant caller at the Herald office Tuesday morning and reported that he with his son-in-law and wife, Mr. and Mrs. Paul Young had just returned from a nice trip to

Oklahoma, Missouri and Kansas, visiting relatives and friends. We are grateful to Mr. Pippin for four new subscriptions that he is sending back to the following: Mr. Wiley Pippin, Chillicothe, Texas; W. N. Reece of

Dustin, Okla.; Ray Hilkert, Wiona, Okla.; and Claud Neely, Joplin, Mo.

Miss Dollie Miller, of Tahoka, is spending the week with the Stricklin family as the latter are kinda' ill this week.

**A Friend In Need—His
—BANK ACCOUNT—**

Unexpected adversity taught him his lesson. The friends with whom he once spent freely, were nowhere to be found. He found trying to borrow a dollar the hardest task he ever tackled. But, once on his feet again, he saved as he earned. He realized a Bank Account is one's only real "friend in need!"

Moral—Don't wait until you're in a similar "tight fix"

**VAST INDUSTRIES
TRACE ORIGIN TO
NAPOLEONIC WARS**

**Two Staple Foods Result
From Privations During
Crises in France.**

Chicago.—Wars of the two Napoleons gave the United States two staple food commodities on which American housewives spend millions of dollars every day, according to a bulletin issued here by the American Research Foundation.

"Beet sugar which Americans consume to the extent of 2,000,000,000 pounds annually was the contribution of Napoleon I," says the bulletin, "while margarine of which we use 250,000,000 pounds yearly was made possible by Napoleon III in the stormy days of the Franco-Prussian war.

Mege-Mouries.

"The principle of crystallizing sugar from beets was discovered by Andrew Margraff, a German scientist, in 1747, but Napoleon I was the first to give commercial application to the discovery in his wars against England for world supremacy. The British naval blockade prevented cane sugar from the tropics from reaching France and confronted the nation with a sugar famine.

"So Napoleon determined to make France independent of other countries for its sugar supply by utilizing sugar beets. He set aside huge tracts of land, compelled the planting of sugar beets by imperial decree in 1811 and within two years financed the erection of 334 beet sugar factories.

"Impetus given to beet culture by Napoleon carried the industry to the United States where it was first undertaken at Northampton, Mass., in 1838. From this beginning beet sugar manufacturing has developed into a great American industry representing an investment of \$200,000,000 in factories and equipment and production in excess of 900,000 tons of sugar annually.

"Origin of margarine was equally romantic. The siege of Paris by the Prussian army in 1870 threatened starvation to the beleaguered city. Cattle driven inside the walls as a food reserve were being rapidly slaughtered and the life-giving fat was being destroyed. Napoleon III in desperation offered a prize to anyone who would transform the finer fats into a lasting edible product. So Hippolyte Mege-Mouries, a French chemist, discovered a method of imitating nature's process of producing milk fat by combining vegetable oils and oil.

"The French scientist's discovery failed to save the besieged city but it established a world-wide industry because of the wholesomeness and economy of the product. The Prussians carried the formula for making margarine back to Germany whence it was passed on to England, Denmark, Belgium, and eventually to America.

"From an output of a few thousand pounds, margarine manufacturing in the United States has developed into a major industry with a yearly production valued at more than \$60,000,000. About 75,000,000 pounds of milk, 129,000,000 pounds of vegetable oil, 128,000,000 pounds of animal fats, and 39,450,000 pounds of cottonseed oil from American farms, are utilized in the manufacture of margarine every year. Margarine to a very large extent is made from the products of American farms."

Shortcake Like Ma Made

Strawberry shortcake like mother used to make has staged a return to popular favor.

It's back on the dinner table again in its old-fashioned splendor, whipped cream and all, back after biscuits and cake dough have begun to pall on the whimsical American palate. And is it a toothsome dainty, that shortcake of mother's?

Try the appended recipe in your oven and let the mouth-watering result speak for itself.

Old-Fashioned Shortcake.

Ingredients: Two cupfuls of flour, four teaspoonfuls of baking powder, one-half teaspoonful of salt, six tablespoonfuls of margarine or butter, three-quarters of a cupful of milk, also two tablespoonfuls of sugar, if slightly sweetened dough is preferred.

Sift the dry ingredients together, cut or rub in margarine or butter until mealy looking, and add milk to make soft dough. Flour board well, toss dough onto it, sprinkle flour over dough, and roll the mass out one-half inch thick. Cut with a large biscuit cutter for individual shortcakes, while for one shortcake, divide dough into two equal parts, rolling each one just to fit a deep cake pan. Place one on top of the other, set in ungreased baking pans and bake at 450 Fahrenheit for about twelve minutes.

When done, slit in two crosswise, spread one-half generously with margarine or butter, then with berries placing the other half on top and cover this with whipped cream and more berries.

**EAT MORE SPUDS
URGES SCIENTIST**

**Research Proves Fallacy of
Theory Potatoes Cause
Corpulency.**

New York.—Eat more potatoes. This was the advice given by Dr. Mikkel Hindhede of Denmark here at address at Columbia university here. Doctor Hindhede was food administrator of his native country during the war and is known as the Herber Hoover of Denmark. He is a scientist whose researches into food values have given him world-wide fame.

The person who said that a fat man eating a potato was one of earth's most poignant tragedies, according to Doctor Hindhede, sacrificed truth to make a clever phrase. The ban placed on potatoes by current reducing fads, Dr. Hindhede said, is as silly as it is unscientific. Potatoes are among the best health foods, he declared.

"If Americans would eat five times more potatoes," said Doctor Hindhede, "there would be less illness in the nation and the death rate would be materially reduced. There is no reason for abstaining from eating potatoes than for cutting meat off the menu. Potatoes are 75 per cent water. As part of a balanced diet, they do not cause corpulency.

"Potatoes have as many calories as meat, butter, and eggs but less of vitamin A. Too much vitamin A produces sluggishness and lessens resistance to disease. Too much of the vitamin consumed in food by children causes tonsillitis, eczema, enlarged glands, and anemia."

Denmark is one of the great dairy countries of Europe, Doctor Hindhede pointed out, but practically all Danish farmers, he said, export their butter to England and serve margarine on the family table.

"The people of Denmark eat about a half as much butter as American and nearly twenty times as much margarine," said Doctor Hindhede, "and the Danes are celebrated for their health and sturdiness. The death rate in Denmark from tuberculosis, various forms of kidney diseases, and ailments due primarily to improper diet is about 30 per cent less than the death rate from similar causes in the United States."

Doctor Hindhede illustrated his lecture with 100 charts explanatory of his experiments in Denmark to determine an adequate ration for children and adults. He showed pictures of adults in a perfect state of health after living for a year on nothing but potatoes and vegetable margarine.

"If you want to find out what rat can live on best, you should experiment with rats," he said. "If you want to find out what human beings can live on best, you should experiment with human beings."

During his stay in this country, Doctor Hindhede lectured before a number of universities and scientific bodies. He spoke before the Department of Agriculture in Washington and was entertained at a luncheon at which were present Governor William B. Franke, Danish minister to the United States, Dr. H. W. Wiley, internationally known nutrition expert, and Assistant Secretary of Agriculture Benck W. Dunsen.

**AUTOMATIC GAS RANGE
IS AID TO RELIGION**

Church attendance by those whose custom has been to serve the "Sunday dinner" at approximately the noon hour has been increased through the use of gas in the home, comments the Texas Public Service Information Bureau.

Sunday dinner in most American homes is the most bountiful of the culinary week. Elaborate preparation, however, until the advent of the gas range, usually demanded that one or more members of the family remain at home.

Now gas ranges equipped with thermostatic control have solved this problem. With the aid of this device the Sunday dinner can be cooked while the entire family is attending church service. A prominent clergyman relates that his family for a long time has entrusted the gas range with the task of cooking dinner while his family is in church.

TOO BIG TO HIT

BOBBY—Daddy! A boy at school told me that I looked just like you!

The Dad—That so? And what did you say?

Bobby—Nothin'. He was bigger'n me.

Edgar Allan Poe's personal copy of the first edition of "The Raven" sold at auction in New York last week for \$7,600. It was bought by Gabriel Wells. The copy bears Poe's autograph on the cover. Early in 1840 the poet gave the book to a friend, in whose family it has remained ever since. A copy of the first edition of the second part of John Bunyan's "The Pilgrims Progress," published in London in 1684, went to J. F. Drake for \$2,600.

Chickens and eggs produced in Texas annually are valued at more than \$35,000,000.

There are between 200,000 and 300,000 bee hives in Texas with an annual production in honey valued at more than \$2,000,000.

The source of most of the honey produced by bees in Texas is the same crop that stands at the top of Texas products—cotton. The major part of the honey comes from the cotton stalk.

The mails brought us the subscription price to send the Herald to C. F. Stovall of Snyder, Tuesday. The Stovall are old Terryites and say "we can't forget it, so please send us the paper." We sho' will.

Mr. J. T. Ott, of Detroit, Michigan, called on the Herald office Tuesday morning. Mr. Ott is a representative of the Campbell-Ewald Co. advertising agency of the Chevrolet people.

O'Donnell—The O'Donnell Luncheon Club has just been organized and has started a program of civic work.

Mrs. S. H. Holgate is having us send the Herald to her daughter, Mrs. Earl Williams, at Irran, Texas.

Graham—The value of a year's demonstration work in Young county done by Miss Norfleet Grimes is placed at \$15,000.

Advertise Terry with the Herald

**Reports Cancer Cure
by Electrical Waves**

Washington.—Dr. A. M. Stimson of the public health service has disclosed to a house appropriations committee that cancer artificially induced in mice has been cured in some instances by an electric treatment.

The method employed consisted of an oscillating current of very high frequency, and Doctor Stimson said further researches into the adaptability of the current for treating the disease would be carried on by the health service.

Use of this electric phenomenon had never before been made in connection with cancer, he said. Dr. J. W. Schereschewsky is in charge of the work.

"He has found that by submitting mice that had had cancer artificially induced in them to this high-frequency current a certain percentage of them can be cured," Doctor Stimson continued. "At the same time he has found that some of them, if the dosage is a little too high, will die. It is a question of further investigating the exact dosage of this physical agent."

"However, he has had some thirty mice there that had terrible tumors, and after the treatment the tumors subsided and the mice were still living at the last report."

Getting Squatter's Right

Starting at the bottom of the ladder is all right; it's camping there that's wrong.—Boston Transcript.

Mind and Matter

"A man is as old as he feels fit." And a woman as old as she thinks fit.

United States' Seal

The seal of the United States was decided upon June 20, 1782.

**LOCAL BOY SCOUTS
VISIT UNION BOYS**

Last Thursday, Assistant Scout Master W. E. Williams, took Scouts Lee Brownfield, John Chisholm, John L. Cruce and "Speck" Kendrick to Union to give a demonstration of scout work to the boys of that community. They carried their complete paraphernalia with them such as the mess kit, canteens, rope, knife, personal aid kit, and equipment to throw a tent and carried out a complete program of the work.

Plans were made for an organization in that community and the Union boys will meet with the local boys Thursday night to complete the organization. Also each local boy will choose a Union boy as a fellow-partner and thereby will aid each other in putting on their work.

STUDEBAKER

The Great Independent

**A New Record
for stock cars under \$1400**

**Better than
a mile a minute
for 5000 miles**

The Dictator \$1195 to \$1395

BY traveling 5,000 miles in 4,751 consecutive minutes, the Studebaker Dictator has established a record unequalled by any stock car under \$1400—comparable to the existing world record of 5,000 miles in 4,559 minutes made by the Studebaker Commander last fall.

And not one, but two Dictator Roadsters, fully equipped, each traveled 5,000 miles in less than that number of minutes. The run was made at the Atlantic City Speedway, April 20-23, under the supervision of the Contest Board of the American Automobile Association. Before and after the run, the cars were checked by the Technical Committee and were pronounced strictly stock models.

CLAIMS vs. FACTS

Automobile advertising is full of extravagant claims of performance. But Studebaker offers you definite FACTS supported by the certificate of the highest motoring authority. Under A. A. A. supervision

The Commander has made a record never approached by any other car on earth (25,000 miles in less than 23,000 minutes). The Erskine and The Dictator have made records unequalled by any other stock cars at or near their prices.

The high quality of materials, the precision workmanship, the rigid inspections and the engineering genius in the Studebaker Dictator are proved not only by its ability to travel 5,000 miles in less than 4,800 consecutive minutes, but also by the fact that any Dictator can be driven 40 miles per hour as soon as it leaves the assembly line at the factory.

Backed by Studebaker's 76-year reputation for quality and value, The Dictator offers champion performance at a low One-Price price.

Values in Four Price Fields

President Eight, \$1985 to \$2485; The Commander, \$1435 to \$1625; The Dictator, \$1195 to \$1395; The Erskine Six, \$795 to \$965. All prices f. o. b. factory.

WHITE & MURPHY

Just East of the Rialto Theatre

MEADOW BRIEFS

By Aesculapias.

When our editor complains of illness interfering with his activities, may we not as humble purveyors of health and happiness be allowed to also offer a few plights: I have been compelled to associate with rabbit hunters and sick people so much recently that it is necessary to "Tail me up" as we were forced to do in the good old days with emaciated cows.

Rabbit drives are the chief sources of amusement while the farmer waits for that rain which is the great yearning of his heart. The last drive in

this section was pulled off Friday and yielded over eleven hundred.

This may be occasion for another out-break on the part of that "Conservator of our natural resources" George Neill, who "views with alarm" the frightful destruction of these pesky rodents. Before George and I moved from Arkansas to Van Zandt county, we were regular rabbit twist-ers as a source of the family meat supply. I have gotten over my early love but George has not been weaned.

Those of our citizens that were well enough to visit Challis Friday and engage in the rabbit drive, are loud in their praise of those hospitable people. It being the close of school a splendid dinner was served

to patrons and rabbit hunters alike and such eatables, and such quantities of it makes one feel like George over the murder of bunnies, at missing it.

The P. T. A. and Seniors of our school enjoyed a banquet at the school building Friday night, at the modest sum of sixty cents a plate. Something over a hundred were present and an interesting program was rendered between courses.

I had almost forgot to mention the fact that a small amount of rain has fallen but only sufficient to kinder raise our hopes of a larger supply next time.

Quite a number of Democrats responded to the call for a precinct convention Saturday evening. The meeting was rather late on account of waiting for the Chairman of this district. He failed to materialize. In fact it is the first and only precinct convention ever held here during the past eight years. John B. Reed, of happy memory, filled the place but he never called a meeting so far as I know but was just simply the whole cheese as long as he remained with us.

Dr. Moorhead was made chairman Saturday evening and Robert Welch, secretary. After some scattering talk one of the resolutions prepared and sent out by the Anti Saloon League demanding enforcement of the eighteenth Amendment and the nomination of a man pledged to this requirement and known to be very dry, was adopted.

The names of those two old 'stiffs' Cone Johnson and Tom Love were on most of the literature produced from I don't know where. Their past, which is most of their lives, isn't very reassuring of anything except their hunt for a soft place. We have gotten along without either of them in the politics of the state many times and it is to be hoped that a candidate will be nominated that will cause both of them to bolt and join Hoover and his negro gals.

Just what effect such demands can have when every officer of the government must take the oath to enforce and uphold the constitution of state and the United States. If he disregards his oath what effect would his acceptance of these demands have on such conscience. Everyone understands, or should, that all this stuff is intended to influence the church vote or those that oppose the candidacy of Al Smith. If Smith is nominated, as seems probable, his election will not depend on Texas, she has never helped elect but two presidents in my memory—Cleveland and Wilson.

The ticket nominated at Houston will however carry Texas in spite of Johnson and Love and the balance of the Ku Klux with Anti Saloon League thrown in.

Why any man calling himself a democrat would vote for Hoover in preference to Smith passes my understanding. He is a high finance man, has lived outside the United States since he was grown up, has about as much use for the farmer as the cotton exchanges, he was married by a catholic priest in a city full of protestants at his own request and if not one it is because he has never joined any. A negro and a white man, especially negro women, look alike to him. Between such a man and Al Smith no southern democrat should hesitate a moment as to which has the best odor.

I forgot to say that the delegates chosen to the convention are John Cadenhead, E. H. Jones and Robt. Welch, either in whole or the required part. We did not know the basis of representation.

Albany—The Bluff Creek Ranch of 13,000 acres has been sold for \$200,000 and will be stocked with fine cattle.

Protect Your Investment in Your Model T Ford

THE Ford Motor Company is making a new car, but it is still proud of the Model T. It wants every owner of one of these cars to run it as long as possible at a minimum of expense.

Because of this policy and because of the investment that millions of motorists have in Model T cars, the Ford Motor Company will continue to make parts until, as Henry Ford himself says, "the last Model T is off the road."

More than eight million Model T Fords are still in active service, and many of them can be driven for two, three and five years and even longer.

So that you may get the greatest use over the longest period of time at the lowest cost, we suggest that you take your Model T Ford to the nearest Ford dealer and have him give you an estimate on the cost of any replacement parts that may be necessary.

You will find this the economical thing to do because a small expenditure may enable you to maintain or increase the value of the car and give you thousands of miles of additional service.

No matter where you live you can get these Ford parts at the same low prices as formerly and know they are made in the same way and of the same materials as those from which your car was originally assembled.

Labor cost is reasonable and a standard rate is charged for each operation so that you may know in advance exactly how much the complete job will cost.

FORD MOTOR COMPANY
Detroit, Michigan

U. S. FERTILIZER CHEMISTS CATCH UP ON EUROPEANS

Adoption of New Process by French Reverses Order of Things in Industry.

Birmingham, Ala.—The rapid advance of chemical engineering in the United States within the last few years is being significantly demonstrated by the adoption of an American process and apparatus for electrothermal production of phosphoric acid by a French fertilizer concern.

Heretofore the situation has usually been reversed. Many of the important developments in chemistry have been achieved abroad and American companies, to keep abreast of the industry's progress, have had to purchase the right to utilize these discoveries in the United States.

The phosphoric acid process was worked out by engineers and scientists of the Federal Phosphoric company of Birmingham, and thus far has been employed only in its plant at Anniston, Ala. The French rights were purchased recently by the Societe des Phosphates Tunisiens of Paris, which at the same time arranged to have its engineers and chemists instructed in the operation of the apparatus by American experts.

In addition to phosphoric acid, which will be converted chiefly into ammonium phosphate, a concentrated fertilizer, the American equipment and methods will enable the French company to market pure phosphoric

acid and several pure salts, including mono-ammonium phosphate, diammonium phosphate and sodium phosphates.

"The production of concentrated fertilizer in Europe by means of this American development is in accordance with the tendency in the fertilizer industry to use more concentrated plant foods," says Theodore Swann, president of the Federal company.

Finds Sponge in Body

Portland, Ore.—For the last 12 years Harris Hart of Milwaukie, a local suburb, has complained of feeling ill. Recently he underwent an operation. The surgeon found in his body a sponge that had been left during a previous operation for a fractured rib 12 years ago.

World Languages

Total Nearly 3,000

Berlin.—A total of 2,976 languages spoken throughout the world is given by the Deutsche as the result of carefully compiled statistics from the various countries.

This number includes the many barbaric means of expression used in various obscure corners of the earth. Of the 800 distinctive languages existing today, 48 are current in Europe, 153 in Asia, 424 in North and South America and 117 in Oceania.

TOKIO TROPHY TAKERS CLUB.

We met May 2, 1928 and organized the club with the following as officers: Joseph Young, president; Willie Wanson, vice-pres.; Claud Buchanan, Sec-Treas.; Catherine Young, Reporter. We have 27 members and hope to have more in just a short while. We have named our club "Tokio Trophy Takers," and all mean to work hard and live up to just what the words mean. We are going to call our club the, "Three T." Now can anybody beat naming a club? If you can, send us a name and next time we organize a club maybe we will include it in our names. When you read the paper just look what the "Three T" is doing. We expect this to be a lively club and there is not going to be a backslider in our club.

The members of the club are as follows: Ernest Norris, Joseph Young, Claud Buchanan, Clebron Upton, Don Martin, Billie Burleson, Woodrow Jowers, Ross Patterson, Willard Norris, Jessie Snodgrass, Orvil Snodgrass, Red Martin, Orvil Wanson, Lowell Trout, Floyd Lee, O. D. Lovelace, Marshall Patterson, Willie Wanson, Melvin Anderson, Eunice Norris, Catherine Young, Marie Buchanan, Wilma Comstak, Avis Upton, Carrie Vilma Jowers, Bonnie Creel, Doris Snodgrass.

Everybody at Tokio seems to have just awakened since Mr. Davis came to visit our community.

—Reporter.
