VOLUME 24

BROWNFIELD, TERRY COUNTY, TEXAS, FRIDAY, JANUARY 11, 1929

NUMBER 21

CHAMBER OF COMMERCE

We had a letter from Captain Ed Kennedy this week and he advises us that the railway people to whom he sold his interests in the Roswell Eastern, will be here within a few days for the purpose of closing their agreement with our railway committee and getting matters in condition to begin

work of actual construction. Commencing on the 14th, we will have double daily mail service on our Post City motor line and under orders from the postal authorities, it will leave Post earlier in the morning and reach us about 9:30. The train is also slated to change its running time and instead of arriving in the morning for Lubbock and returning in the afternoon, it arrive from Lubbock at about ten o'clock in the morning and from Seagraves at about two o'clock in the afternoon. This is a great change for us as we will get our daily papers from the north several hours earlier and will have sufficient time within which to answer all letters and get them in transit on same day.

Letters are being mailed out of this office and out of the office of the county agent, inviting people who are interested in dairying to attend a meeting at the district court room at 2 P. M. Saturday afternoon. Indications are that a large number will be on hand.

Nearly 500 booklets describing Terry county, have been mailed out to inquiries have been received and as have written asking for literature. The list was furnished by the Lubbock chamber of commerce and was received after this section had been advertised in several of the southwestern farm papers. Nearly 1,000 inquiries have been received and as soon as it is furnished us we will send booklets. It is also our intention to have copies of a special edition of the Herald, sent to all people who might be induced to investigate our section of the South Plains.

Cotton seems to have taken a drop in price with no apparent reason as exports are nearly 1,000,000 bales more than last year and all cotton mills in the United States running full time, with only small reserve stocks. There is a "Nigger" in the woodpile somewhere, but we can't locate him.

Secretary Jardine, of the United States Department of Agriculture, advises farmers of the corn growing states that there is a shortage in production of corn and very little old stock on hand. He advises them to hold or market slowly. This is the same man who put out a cotton report last year that caused us a lot of grief.

Next month will close the chamber of commerce year and the annual banquet will be held between the 7th and 14th of February. An effort is going to be made to secure attendance of all members of the organization and several who have not yet affiliated. The ladies will be invited and expected.

Cobb & Stephens Put On Removal Sale

You will note the page ad of Cobb & Stephens in this issue of the Herald in which they are reducing their stock preparatory to moving into the splendid new Bell building on the northwest corner of the square, which they expect to get into some time after the first of February. In order to have just as small stock as possible to move, they are putting on this removal sale.

The boys promise that this will be a real sale too, much of which is real reasonable merchandise, as they figure, and rightly, that it will be better to sacrifice on the price than to go to the trouble and expense of moving it into their new store building. This sale starts Saturday morning and will run the rest of this month. Be sure to visit this store soon and often.

Concludes Story of Trip To Chicago Show

Meadow, Texas
January 7, 1929.

Dear Friends:—

(Continuing the story of my trip to Chicago.) At 1:30 we went to the Horse Show, showing all the winners of the show, which was very interesting. At 8:15 the Hotel LaSalle gave the club boys and girls a party upon the nineteenth story. We all went up in costumes and paraded and played games till 10:30. Thursday we went to the International Harvester Co. where they make tractors, and finding time we first went through the tractor works. We saw the men at work making the parts of iron and steel; we visited the section where they were melting the steel and running it out in moulders. Next we went through where the workmen were beating out the pieces and getting them ready to be put together. Then we went on through where they start to put the parts together. They set the tractor upon a track, it moves along slow, and the hands along this track put on a certain thing or part and when the tractor got to the end of the track it hit the floor finished and ready for service.

At 12 o'clock the International Harvester Company served us lunch and out on a short program. After lunch we went through the twine mills. Some men took our pictures going through this mill, which you will see in the news reel at your home picture show soon. At this mill is where they make binding twine out of a certain grass. After we had gone through this we went to the Field Museum, which is considered one of the world's most wonderful buildings. As we entered the building there were two large elephants in the middle of the hall. In this museum every kind of wild animal, bird and fish is shown. It also shows the Idols that were worshipped by people in the historic age. It shows the Indians at work making their living. It showed different kinds of weapons the people use to fight with, which are very unlike the ones we use today. This museum was one of the most interesting things I saw at Chicago, and is worth your while to go through it. It is between the Soldiers Field and Lake Michigan.

After we went through the museum we went out on the lake front. You can see as much water here as you can see anywhere. We then went back to our hotel and then to a banquet. Friday we did not go to any certain place for most of the boys were ready to come home. So at 5:00 o'clock we packed our suitcases and left the hotel and went down to the station. We pulled out of Chicago at 6:30 for Texas. We reached Kansas City the next morning at 6:00 o'clock where we ate breakfast and chased around a little while. We traveled on till twelve o'clock and ate lunch at Topeka, Kansas. We reached Newton, Kansas at 3:00 P. M. where we left our Texas bus. We left Newton at 5:00 o'clock and traveled all night. We woke up next morning in Amarillo. We ate our breakfast and got back on the train. We arrived at Lubbock 12:30. W. C. Wright and I went down to the cab station and got on the line car for Meadow. I arrived home Sunday, December 10, 1928.

So I have done my best to write this story of my trip to Chicago. I do not know how to show my appreciation to Mr. Davis, and the citizens of Terry County for the way they have treated me and especially the citizens of Meadow, for making up a purse for me to spend on my trip. I am hoping that some one from this county wins the trip next year, as you cannot realize how much it means to you until you take the trip. Sincerely yours,

Herbert Chesshir.

GRADE AND HIGH SCHOOL PUPILS MUST REPORT

We are requested to say for the school authorities that all pupils of either grade or high school who have not been to school this term are expected to report, Monday, January 14th, as new classes will start that day.

The grade school will hold graduating exercises Friday (tonight) at 7:30. Everybody invited.

Jack On The Job Again By The Way

Well, for the second time in the last ten years the flu had the editor of this sheet down with his head under a pillow and a strangle hold on him, but good nursing and good doctoring have been so favorable that we are happy to state we are again on the high road to recovery but still rather weak. The writer however, has not been the only one so afflicted, for at least one day the whole family was completely out of combat, or words to that effect, not to say almost two thirds of the families of the town.

To our notion flu is the greatest scourge the human race has ever been afflicted with, not that the disease is so dangerous within itself, but it can reduce your resistance and will power to such an extent that a severe case of seven year itch would carry you off if followed directly, with ease. It is the most discouraging disease ever invented, for there is no shot of an optimistic outlook on life if you have it.

Sunshine is no longer bright and the clouds have a coal dust lining. Why you can even smell yourself in the air, and the odor reminds you of a wet dog. The medical man who prescribes a cure for this loathsome disease has a fortune awaiting him, and he can spend the rest of his life under his own palm and fig trees in worldly comfort.

But the doctors say they have never been able to corner the flu bug yet. They have, they think, got him in tight close quarters several times, but when they get ready to take a peek at him through the microscope, he is like the Irishman's flea, somewhere else yet. Maybe though he's there—who knows. All they can do is treat the symptoms, and that tends a great deal on the individual, or some likes it straight, some with sugar and water and some with warm cream.

Physicians believe the crest of the epidemic has been past here and that steady improvement will be seen from now on with a gradual lessening of cases from day to day. There were considerably less cases in the city over the past week end, but in country communities the disease seems to have just reached the high peak with a probability of lessening its grip by the middle of this week.

Ferrell Citizen Becomes Resident Of Brownfield

The Herald is pleased to announce that Mr. J. W. Neal and his excellent family have decided to make Brownfield their future home, and are now domiciled here. We welcome this splendid addition to our community, and hope their stay here will be both pleasant and profitable.

Mr. Neal is a jeweler and watchmaker by trade, having had years of experience before coming here in both. He has purchased the business, tools and stand of his brother-in-law, T. W. Bruton, at the Alexander Drug Store, where he will be found in the future, and he asks that old customers of Mr. Bruton and new ones as well call around as he wants to meet the folks whether they have business now or not.

Mr. Bruton will go on the road as a traveling salesman for awhile, with El Paso as headquarters, but we understand that he will be in Brownfield about every two weeks, so that he will not get out of line with what is going on here.

MARRIED

Despite the flu epidemic and other trouble, Dan Cupid has not exactly let up in his business of mating the young people of this community. Monday, December 31st, Mr. Rance King of Big Spring, son of Mr. and Mrs. J. A. King of this city, and Miss Queenelle Speegle, sister of Mrs. Arthur Sawyer of this city, drove to Tahoka, where Rev. B. N. Shepherd said the words that united them for life, although the marriage did not become generally known here until about the first of this week. They will make their home in Big Spring.

C. W. Switzer and Clyde Polk, prominent farmers of south route were in recently to renew.

Gaines Farmer Solves Building Problems

Mr. C. H. Wescott, a farmer near Seminole, solves his housing problems by building adobe hen houses and cow barns. Two summers ago, Mr. Wescott built his first adobe hen house by using adobe bricks laid upon a rock foundation. Last summer he built his second hen house by simply filling forms with clay mud and shucks layered on a concrete foundation. This year he built a cow barn 22-62 feet in a similar manner at the small cost of \$250.00. This barn with its stanchions for fourteen cows, a feed room, and a separator room is as warm and substantial as a much more expensive barn. Mr. Wescott uses sheet iron to cover his buildings with. They are all warm in the winter time, can be burned out or disinfected as easily as a brick or tile building.

He builds a house every year after crops are laid by for his farm animals and flocks and his records show that it pays. Since February 15th a period of 10½ months, he has sold 2314.5 dozen eggs from 275 hens that brought \$544.51. Receipts from live poultry brought \$181.99, making a total of \$726.50. Expenses including bought feed, oyster shell, and parasite remedies amounted to \$218.50, leaving a profit of \$508.00. Mr. Wescott culls his flock and keeps laying mash out the year around.

Further evidence that his care for stock is revealed in the fact that since June 1st his cream sales total \$405.71 and is now running between \$70 and \$80 a month. His cows are just the ordinary grade Jerseys, but he says that since he began to feed crushed milo and a little cotton seed meal and that when he went to giving them this feed in their stalls his cream has jumped up considerably.

Dairy Meeting To Be Held Court House Sat

The following program will be held at a dairy meeting in the district court room at 2:00 P. M., Saturday, January 12th:—

2:00—2:10 J. E. Shelton, "Facts and Figures on Terry County Cream."
2:10—2:30 Morgan Copeland, "The Farmer and the Cream Check."
2:30—3:00 Prof. W. L. Stangel, "Feeding Dairy Cows."
3:00—3:30 B. B. Holland, "Jersey Bull Circles."

If you have had the idea that cotton is the main crop and that cream is a side line, then Mr. Shelton's actual figures will give you a surprise, and there is no one that knows the farmers and their cream checks better than one of our bankers, Mr. Morgan Copeland. You will have a greater appreciation of the past, present, and future dairy possibilities in Terry county after listening to these local men.

Prof. W. L. Stangel, head of the Animal Husbandry Dept. of the Tech College, is perhaps the best authority in feeds and feeding that we have in Texas. He not only knows feeding from a teachers standpoint but he knows our home rations from a practical feeding view point. Prof. Stangel will be able to give us some rations using ground, bundles, heads and corn that are as economical as can be found.

If there is one thing that has caused the North Plains to make such a rapid advance in dairying in the last six years it undoubtedly was the establishing of Jersey Bull Circles. By a group of men joining together and buying five bulls to be owned jointly and alternating them every two years these men were able to purchase the best young bulls that could be found and were insured the services of a good bull for a period of ten years. If you have any doubt that Jersey bulls owned in a circle are not the greatest asset to dairying for the money expended why listen to B. B. Holland, of Amarillo, discuss this topic at the meeting Saturday afternoon.

R. B. Davis, County Agent, Chairman.

Mrs. W. D. Smith, one of our splendid boarding house proprietors, called recently to renew for the Herald and Star-Telegram.

Fire In Local Filling Station Saturday

The fire alarm rang out or rather firemen out early Saturday morning before many of us flu patients had got up, and of course the writer really did not know whether we had a fire or a practice alarm until he came to town, but this time it was a sure enough fire.

The gasoline heater at the Fitzgerald Filling Station became ignited and exploded, and it looked like a real fire for awhile. Some of the gas flew on J. W. Fitzgerald, the proprietor, and it kept him busy for a bit saving himself from being badly burned. In fact all were so busy that they almost forgot to turn in the fire alarm. The fire was put out without seriously hurting the stock or building.

J. W. says this is the second time the thing has been afire and it will never have the opportunity of catching again on him, as he has set it out doors and bought a new stove.

C. of C. Officials Meet In Lubbock

LUBBOCK, Texas, Jan. 9—Chamber of commerce presidents, directors, and secretaries from the South Plains section will gather in Lubbock, Tuesday, Jan. 15, for the semi-annual meeting of the South Plains Commercial Executive Association when a number of subjects of vital interest to every South Plains town will be discussed by authorities.

Efforts are being put forth by all Chamber of Commerce secretaries to get a good number, if not all, of their directors to attend along with the president. Word has been received from V. A. Wilson, secretary of the Lubbock Chamber of Commerce that the entire number of directors of that organization will be on hand.

Airports, City Planning, Fair Exhibits, Community Building and Chamber of Commerce work will be discussed.

The program starts at 9:30 A. M. The visitors will be guests of the Lubbock Chamber of Commerce at a luncheon at noon and the meeting will adjourn at 5:00 P. M.

The annual election of officers of the organization will be held during the business session in the afternoon. A general discussion of each subject will follow each address, with the exception of the address at the noon luncheon.

The subjects and the speakers follow:

Morning: "Airports," A. P. Barrett, president, and Silliman Evans, manager and vice president, Texas Air Transportation Company, Fort Worth. "How to Get Members to Work," Jack H. Hott, manager Association of Commerce, Fort Worth.

Noon: Luncheon. "Building Your Community," H. W. Stanley, Chamber of Commerce, El Paso, Texas.

Afternoon: "City Planning," E. A. Wood, City Planning Expert, Dallas. "Fair Exhibits," discussion led by A. B. Davis, Lubbock.

Each of the subjects hold a wealth of interest among the presidents, directors and other members of the chambers of commerce on the South Plains, as well as to the secretaries and for this reason, an extra effort is being made to bring a big percent of the directors and other members of the chambers of commerce to the meeting.

DIED

Grandma S. A. Daugherty, 73, died Tuesday morning after quite a spell of illness. Funeral services were conducted at the Church of Christ, Wednesday at 2 o'clock, and burial immediately followed in the Brownfield cemetery.

Owing to the fact that Grandma was a pioneer in West Texas as well as Terry county, a write up of her life will appear in these columns next week that could not be obtained ready for this week's paper.

J. D. Williamson and family, who have for the past several years resided in the Johnson community, have sold their farm, and rented the Geo. Bragg residence in Brownfield, where they now reside.

On Buying Dairy Cows By County Agent

The country has gone wild about dairy cows. In almost every newspaper you can read of shipments of dairy cattle that have been made into certain localities. A good many of these shipments are made possible by the purchase money being loaned by banks or other institutions. There is no question but that these shipments, as a whole, are a good thing for a county or a community. However, the great demand for dairy cows at this time has caused them to go so high that a milk cow must give milk or you will lose money on her.

Too many cows are sold as milk cows because they have a Jersey color. If you were to class them on their milk production they would have to be sold as goats, and some of these goat-cows are registered.

Proof that W. A. Bell is right when he said "Good milk cows are not too high, but poor milk cows are entirely too high at present," is shown by the records of the Bexar County Cow Testing Association. The receipts of production and the costs of feed for a twelve month period show the differences in profit between a good cow and a sorry one. The production of butterfat for a year and the profit above feed for a day was:

Pounds fat.	Profit above feed per day.
500 lb.	92.1c
400-500 lb	68.0c
300-400 lb	52.6c
200-300 lb	38.0c
100-200 lb	22.1c
100 lb	11.2c

Terry county needs more of the cows of a production of 300 lb or more of fat per year, but they are pretty hard to find. We need some more good cows, including some registered ones, and we certainly need more bulls. But I rather suspect that this county, and every other county, can raise their production more through providing a shelter and feeding a balanced ration of ground grain and cotton seed meal. Another thought and I am done, "The cheapest and the quickest way to own a high grade herd is to use a pure bred bull and cull out your low producers."

R. B. Davis, County Agent.

A Good Guesser Gets A Ham Saturday

W. E. Humphries of the firm of Humphries & Davis of Lubbock, and owners of the Piggly Wiggly stores of that city and the M System of this city, was in our city Tuesday when the writer made his acquaintance. At the same time we met Mr. Alex McDonald, of the McDonald Packing Co., who is furnishing the fresh and cured meats for the M System here. Both appear to be splendid, fair minded business men, and seem to be great boosters for Brownfield and think our city has a fine future.

While here Mr. Humphries authorized a bean guessing contest. A jar of beans will be placed in the front window of the M store Saturday and each and every person will be given a free guess, the guess and your name to be deposited in a box. Contest closes at six o'clock, the beans will then be counted and the number posted. Then the names will be taken from the box and the one guessing the amount or nearest the amount of beans will be awarded the biggest ham in the M System store. Try your hand.

LOCAL BLACKSMITH LOSES WIFE HERE SATURDAY

Mrs. J. D. McDermot, wife of a local blacksmith, aged about 40, died here of pneumonia Saturday morning about nine o'clock, following only a few days illness. Funeral services were conducted at the family residence Sunday afternoon by Rev. E. V. May, pastor of the local Baptist church, and interment followed immediately in the Brownfield cemetery. Besides a husband, deceased leaves several children, we understand.

Miss Gladys Verner, of Brownfield entered Draughon's Business College, at Abilene, Texas last week and is preparing herself to do secretarial work.

ELECTRIC HATCHING PRODUCES

Better hatches, stronger chicks, with greater livability. Our hatchery is equipped with the famous Petersime Mammoth Electric Incubators, the most complete, up-to-date, modern equipment on the market, it embodies the latest and most efficient methods of applying and controlling temperature, moisture and ventilation, known to the science of artificial incubation. We are increasing our capacity to 45,000 eggs this season, in order to enable us to supply the demand for electric hatched chicks and to take care of our custom hatching.

Custom hatching prices—\$3.50 per 100 eggs. Baby chicks \$12.00 to \$16.00 per 100. In order to encourage early hatching we are allowing 10% discount from our regular price on all eggs set and all orders booked for baby chicks prior to January 30, 1929.

Book your orders for Baby Chicks now, or let us do your hatching under our modern process, you will receive the largest, fluffiest chicks you ever saw.

BARRON'S ELECTRIC HATCHERY
Lamesa, Texas Phone 18

REAL COURAGE

This noon I had lunch with a friend who will embark the end of this week for Australia where he expects to go into business.

Never before in my life have I had the experience of saying farewell to a man who was permanently leaving the United States to improve his economic opportunities. I have known men to leave as representatives of American corporations, but they all expected to be back after they had gained what experience foreign contacts could offer.

Opportunities in this country are so great that only rarely does anyone leave. Such farewells must be common, however, in other countries. Think of the millions of immigrants that have poured into this country from all parts of Europe.

What a lot of courage it takes to pull up roots and cross the sea. Most of us must have a good share of initiative and courage in our ancestry. Without them, our fathers, grandfathers, or great-grandfathers would never have made the break.—Ex.

The Herald is glad to note that our old friend, Lonnie Bigham, formerly of Tahoka, where he was in the coal and grain business some twenty years ago, is the new local manager of the 'M' System. Now, we know if things come to a show down where we will be obliged to have some groceries—we'll get 'em.

Eulous Key, wife and friend, Mrs. Jones, of Ropesville, Texas, were down this week and while here Eulous gave orders for some page circulars for the new store he is opening up there. Eulous and the writer came near being kin, as our brother married his sister. Pretty close.

Money won't buy everything, but it flavors everything.

LAMESA FOSTERS NEW PINK BOLLWORM LAW

LAMESA.—Plans are being formulated for introduction of a new pink bollworm law at the next session of the Legislature that will shift the burden of expense of seed sterilization and lint fumigation to the State and Federal governments. State Solons are busy in part of the State planning a bill to be introduced in January which will not only mean in the future the State will pay the incurred bills of pink bollworm regulation expenses, but will seek to reimburse all farmers for the cost of sterilization and fumigation of seed during the last year.

Carl Rountree, Representative-elect of Dawson County, is now at work with Representative Webb of Odessa in the preparation of such a bill. He declares that he consented to make the race for the Legislature primarily to change the present pink bollworm law.

TRAIN 250,000 IN SUMMER CAMPS

United States to Spend \$20,000,000 for Preparedness This Year.

Washington.—Uncle Sam will materially aid the great out-of-doors movement in America this summer by sending more than 250,000 men into barracks and life in tents, clad in army uniforms, to get fresh air and exercise, as part of his preparedness program. Into this mighty task he will pour many millions of dollars and a world of effort.

During a 15-day period more than 20,000 reserve officers of the army will be put through their paces. Ten of these officers will be put on duty here with the War department for a year, 110 with the air corps for a year, 144 from six weeks to three months with the service schools, and 236 with the citizens' military training camps as instructors.

In the reserve officers' training corps camps, lasting six weeks, 7,200 students from colleges and universities will be given a taste of real military life. From that source the army will draw many of its officers of the future.

More than 33,000 of the youth of the nation will be afforded for 30 days' training in the citizens' military training camps and more than 161,000 men of the country's National Guard.

Assisting in training all these various branches of the military establishment, which is now known as the army of the United States, will be 12,000 officers and 118,750 enlisted men of the regular army and 6,000 Philippine scouts. Nearly the entire regular army will be used in training the civilian components, but in addition the "regulars" themselves will have exercises and maneuvers.

The bill for the summer training activities of the government will be close to \$20,000,000. For the National Guard \$9,000,532 will be expended for pay and allowances. For the reserve officers \$2,583,967 has been allotted by congress, with \$673,532 for those to be in training for a period greater than fifteen days and with \$463,614 allowed for mileage to take them to and from camps. For the C. M. T. C. \$2,801,249 has been set aside for mileage and other expenses. For the R. O. T. C. \$2,970,000 is allowed for total upkeep.

These training centers are located all over the country in each army corps area and will be in full blast from June 15 to September 1.

While the army is busily engaged putting the finishing touches on plans for the summer camps, the navy, too, is busy.

Tentative plans of the navy call for training 1,325 officers and 9,500 enlisted men. This represents a jump in the number of enlisted men for last year only 5,285 underwent training.

A large share of the naval reservists' training will be aboard, the department utilizing twenty-five destroyers, in addition to four gunboats on the Great Lakes, for the 15-day training periods.

The marine corps is also shaping up plans for summer training. Most of the training is done at Quantico, Va., and it is expected that about 600 men and 200 officers will receive a stiff infantry workout.

Poker Game of Chance, Is Ruling for All Italy

Rome.—Poker is a game of chance, Italy's court of cassation, the highest in the land, has ruled, and the Fascist newspapers, which have been conducting strong anti-gambling campaigns, rejoice editorially.

Little games of penny ante at home or club are not likely to be disturbed at the decision since it stipulates that the "aim or lure" must be established as the preliminary to any prosecution.

Also "the account must be taken of the age and social and economic condition of the player," in other words, professional poker and playing for high stakes by the working classes is distinctly discouraged.

Two men were arrested for playing poker in a cafe of Novaro. They were gambling, ruled the judge of the lower court. Mere recreation, maintained both defendants, who then appealed to the court of cassation.

NOTICE!

This is to certify that the shop and service station heretofore operated by Hardin-Burnett Co. is here taken over by A. L. Burnett, who assumes all local obligations of the said company. All accounts due said company may be paid to either A. L. Burnett or W. G. Hardin.

Signed: A. L. Burnett

LUMSDEN DEATH IS UNSOLVED MYSTERY

AUSTIN, Dec. 29.—The death of Lawrence Lumsden, young former student of Texas University, found shot to death in an automobile more than a week ago, was written into the records today as an unsolved mystery. Justice Tannehill entered a coroner's verdict that Lumsden died from gunshot wounds, inflicted by a pistol in undetermined hands.

A pistol was found in the car. The verdict was held up several days during which officers investigated various clues in the case and in which the boy's father, L. Lumsden of Wilson, ranchman and banker, came here and joined the investigation.

The boy's parents, at San Antonio, declined to comment on the coroner's verdict.

Took Soda 20 Years for Gas—Stops Now

"For 20 years I took soda for indigestion and stomach gas. One bottle of Adlerika brought me complete relief."—John B. Hardy. Adlerika relieves gas and sour stomach at once. Acting on BOTH upper and lower bowel, it removes old waste matter you never thought was in your system. Let Adlerika give you stomach and bowels a REAL cleaning and see how good you feel! Overcome constipation. Alexander Drug Store.

Bailyboro's new school building is going up as rapidly as material can be obtained. It will contain four class rooms and an auditorium and be modern in every respect.

J. W. Raley now gets his mail at Plains instead of Brownfield.

THE NEIGHBORHOOD THEATRE

Mrs. Louella M. Roberts, Lakewood, Ohio recently read an estimate of the Neighborhood Motion Picture Theatre before the Women's Club in her city. Mrs. Roberts has kindly sent us a copy of her remarks. She has made some pertinent observations.

For instance she says, "The neighborhood house should seek the opinions of its patrons, and in turn they should never fail to tell their manager if the picture had been up to the standard, or above it: 'We have enjoyed the picture this week, and thank you so much,' they should say, for a pat on the back is worth much and accomplishes a great deal."

Again she says, "It is still true that a laugh is worth all the tonics

on earth, and the neighborhood house is the one hundred per cent place in which to get it. The more we laugh, the healthier we are, and the healthier we are, the happier we are. The theatre I regularly attend is the spot where I soon learn to drop dull care upon entering. It helps to relieve the humdrum of life, the daily grind, from which millions have no other escape."—Motion Picture.

Mr. Hargrave was down this week from Ralls and informed us that his firm would occupy the building to be vacated by Cobb & Stephens, but that the interior would be entirely remodeled before he moved in. Their present quarters are proving too small for this growing and progressive firm.

Simplicity of cooling system is a feature of the new Ford

A COMPLETE water plant is a part of every automobile as it is a part of every modern city.

The purpose of this water plant is to keep the engine cooled to a temperature that will make it efficient in operation. If it were not for this, the cylinder walls would become overheated and the pistons refuse to operate.

The cooling system of the new Ford is particularly interesting because it is so simple and reliable.

When the radiator is full of water, the engine of the new Ford will not overheat under the hardest driving. Yet the water is so regulated that it will not impair engine operation by running too cold in winter.

The cooling surface of the Ford radiator is large, with four rows of tubes set in staggered position so that each receives the full benefit of the incoming air. The fan is of the airplane propeller type and draws air through the radiator at the rapid rate of 350 cubic feet per minute at 1000 revolutions per minute of the motor.

The hot water around the cylinder head is drawn to the radiator to be cooled by a centrifugal water pump of new design.

The entire cooling system of the new Ford is so simple in design and so carefully made that it requires very little attention.

The radiator should be kept full, of course, and drained once each month so that sediment will not collect and retard the free passage of water. In cold weather, a reliable anti-freeze solution should be added.

As owner and manager of this important water plant you should also see that the water pump and fan shaft are properly lubricated and the packing around the pump shaft kept in adjustment.

Hose connections may also need replacement after long service. For those little adjustments, it pays to call on the Ford dealer.

He works under close factory supervision and he has been specially trained and equipped to do a thorough, competent job at a fair price.

FORD MOTOR COMPANY

TEXANS TO STUDY CALIFORNIA METHODS

Stamford—The West Texas Chamber of Commerce will start the new year work by promoting another agricultural motorcade to California, to study the methods of farming poultry raising, and dairying in the Sunshine State.

The first trip of this kind sponsored by the Agricultural Department of the regional organization was held in September and was very successful. Most of the advertising of the trips has been word of mouth publicity given out by the twenty-five Texans who made the initial journey.

On this account several reservations have already been made for the next trip which is scheduled to start January 15. A new bus has been secured from the West Texas Coaches of Fort Worth, which has a capacity of twenty-nine passengers. Only twenty-five or twenty-six passengers will be taken on each trip, however, according to B. M. Whiteaker, who is arranging the trip. Special rates have been promised

by the motor company and the round trip can be made for less than \$50.00 bus fare. Other necessities, such as rooms and meals for the entire trip will bring the expenses for the two weeks or longer to about \$95.00.

On the first trip Scurry County sent the most representatives, there being five from Snyder. So far Haskell county leads with the largest number for this trip.

Information about this trip will be freely given from the Stamford office.

G. W. Clark, of New Mexico, came in this week and announced that he was now a citizen of Brownfield and guessed he had better get on our mailing list. Mr. Clark owns two fine farms in Terry and one over in Yoakum county. We welcome Mr. Clark and family to our city.

Calahan County farmers and ranchmen are making efforts to rid the county of wolves. One cent per acre is paid by the farmers, and this money is used to buy dead wolves. The price paid is \$7.50 for females, \$5.00 for males, and \$2.50 for pups.

CHISHOLM'S

MARRIED

Mr. James R. Bryant and Miss Thelma Offill, prominent young people of the Hunter community drove in last Saturday afternoon, secured the necessary papers and appeared before Elder A. L. Burnett, who said the words that united them in the holy bonds of wedlock. They will make their home in the Challis community, we understand.

Mr. Gibbs Phillips and Miss Opal Jeffery, prominent and popular young people of this county were married at 8 P. M. Saturday, A. L. Burnett officiating. We understand that the happy young couple will continue to call old Terry their home.

MOVIES AND BUYERS

Julia Adams, writing in The Gift and Art Shop Magazine, New York City, says, "Don't neglect the movies. Some day some one is going to make a real study of the influence of the screen drama on the clothing and customs of the nations and people are going to be very much surprised. You go to the movies to be amused of course, but consciously or unconsciously, we are always swayed in our choice of what we wear and how we wear it by what we seen worn by our favorite stars."

Estelline High School is to have a new athletic stadium to be built from contributions donated by business men. The stadium is to be built of wood and will be 84 by 90 feet wide. The ceiling will be twenty feet in the clear which will give plenty of room for basket ball games.

GOOD PARTNERS

Brownfield Herald: According to statistics furnished by the Government at Washington, the married couples of Terry county seem to be mighty well suited to each other, and a very small per cent of them agree to disband, through the help of the courts, at least. For instance, in 1927 we had ninety marriages with only two divorces, but with ninety-seven marriages in 1926 we had a total of seven divorces. We don't know what was the matter with the folks back in '26 but they didn't get along like they did in '27.

State Press: The 1927 Terry county record proved to those who had opportunity to consider it, that divorce doesn't pay. Hence the 1926 record was reduced by two-thirds. It ought to be plain to good feminine eyes in Terry county that Terry county husbands are as good as any. And to the masculine eyes of Terry county it ought to be ocularly demonstrable that Terry county wives are not surpassed by any other county's wives. Knowing and seeing how this is, it is reasonable and sensible that a Terry county conjugal firm should be contented with its partnership. The senior and junior members of any firm are happy mostly in the ratio of good treatment one by the other. If the senior partner, presumptively the husband, in matrimonial partnership is just and considerate of the junior, and devoted to the mutual interest, it is hardly likely the junior would do any better by asking for a dissolution and trying again. Likewise when the junior partner, presumptively the wife, has the intelligence and character requisite for

the founding and maintenance of a clean and cheerful home it is less than likely that the senior would improve his condition by putting away that wife and taking another. After all has been said, trest allowed and tare deducted, it remains in these hectic days as in the stage coach era that intelligence must be the brick and character, the mortar with which homes are built. Paint alone is not enough for a house.

Jim Webb of the Lahey community was in the city recently and called on the Herald.

Pyote's new \$100,000 school will be occupied in full by the second week in January. Previously it has been occupied in part while work continued on other parts of it. Two years ago Pyote's scholastics could have been housed in one room, so the growth is remarkable.

W. H. Brown, who lives a few miles north of Brownfield was in Monday looking for a residence.

J. F. Thomason of the Lahey community, was a visitor in the county capitol, Monday.

Advertising Rates on Application

Official paper of Terry County.

First reports from the firing line at Austin with the legislature is that the big road bond issue in Texas is going to have hard sledding.

One of our hustling produce men asked us this week who was the author of the statement in last week's paper that Brownfield had an income of \$10,000 weekly on what is usually termed farm products...

Some of these days we are going to give the readers a long line of produce statistics right in Brownfield that will make you stand up and take notice.

Despite the fact that a great many of our people have been sick since the holidays with flu and other ailments and farm products have slowed up proportionally...

SOUTH PLAINS WEST TEXAS RAPIDLY DEVELOPING

The treeless plains of Texas won't always be so treeless. Already in the older settled sections of the South Plains little clusters of trees are growing up around the farmsteads.

A vegetable garden, well cared for, is a part of almost every plains farm. In comparison, the results obtained by some of the plains men and women with these home gardens are in striking contrast to the efforts of the folks "back east."

mill to help out in the dry seasons, these farmers have a good garden from early spring till frost.

Right along with the garden and chickens are the milk cows. Pure-bred herds are now furnishing a profit to their owners through good production and through the sale of breeding stock to neighbors.

Many of the new settlers of the region are especially jubilant this year. A number of them, just as has always been the case in newly settled communities, are farming with a maximum of enthusiasm and a minimum of capital.

ORANGES TRAVEL LONG DISTANCES TO CONSUMER

Washington, D. C., Jan. 2—"It is evident from the almost nation-wide movement and distribution of oranges from producing sections that railway freight rates exert no restrictive influence in the distribution of that commodity."

"Long rail-hauls predominate," the study states, "in the transportation of oranges to consuming markets in this country. Out of the total number of oranges consumed at the principal markets in the United States, 58 per cent traveled distances ranging from 2,000 to 3,500 miles, while 34 per cent traveled from 1,000 to 2,000 miles; only eight per cent traveled less than 1,000 miles."

Another indication of this same relative unimportance of freight rates appears, according to the study, in the variations in the market prices of oranges. At Chicago, in the season just ended, the price per box varied, in the case of Florida oranges, from 50 cents to \$10.00, a seasonal spread of \$9.50, and in the case of California oranges, from \$1.00 to \$11.25, a seasonal spread of \$10.25.

The seasonal spread in prices of Florida oranges per box at Chicago would have paid the entire freight charges on nine boxes of oranges from Florida to Chicago, while the seasonal spread in prices of California oranges per box at Chicago would have paid the entire freight charges on more than eight boxes of oranges from California to Chicago.

GOVERNMENT JOB PRINTING HURTS INDIVIDUAL PRINTERS

Uncle Sam does the biggest business in the world as a job printer, by selling stamped envelopes and printing the return addresses on them, in small or large quantities.

The country newspaper and job printing offices have always protested against this as unfair competition on the part of Uncle Sam, and as taking away a large source of revenue from the smaller printing establishments in the country towns and smaller cities.

"The N. E. A. will continue the fight against unfair government competition by appealing to Congress for relief."

WALLS

College Station, Texas—"If you are first conscious of the walls on entering a room, something is wrong with the room. Probably it's due to bright colors or large figured wall paper which deprive the walls of that simplicity so necessary in making them the inconspicuous backgrounds they should be."

"For a quiet, restful place avoid intense colors and choose softer ones such as ivory, buff, tan, putty, sand or the various shades of light grey. For naturally cold and gloomy rooms try the warm shades of light yellow, but for brighter rooms the cooler light greens and blues may do."

"Large figures in the wall paper make the average small living room seem more crowded and smaller than it really is, and destroy the wall as a background for pictures. Such designs are tiresome and should be replaced with small figured paper or some of the narrow striped ones. Plain papers are in good taste and if in doubt choose such a one. In buying wall paper take plenty of time and if possible carry home a roll to hang up experimentally."

"NO STALK BURNING FOR ME" SAYS TEXAS MASTER FARMER

"I have found that the better care I take of my soil, the better cotton I grow," writes Mr. A. G. Ilse, Master Farmer from Medina County, Texas, to the Progressive Farmer, a well known Southern Agricultural Journal.

"By all means," he continues, "all farmers should see to it in time to plow under all refuse that is left on the land. Of course if the plowing is left until late in the season there is nothing to do but to burn the stalks that are left from the year before."

This is another illustration of the fact that "Good Plowing as the Foundation of Good Farming," points out the research department of the National Association of Farm Equipment Manufacturers. Mr. Ilse's experience bears out the discovery of a Georgia farmer who found that early and thorough fall plowing increased his average cotton yield by 100 pounds per acre.

SHOPLIFTERS A PLENTY

Whether some folks are born kleptomaniacs or just naturally get muddled on their mitts along about Christmas time, Littlefield officers are not sure; but that there has been considerable shop-lifting during the past week they are rather positive, according to several abortive incidents coming under observation.

Saturday afternoon a young man, claiming to be a cotton picker, lifted a perfectly good pair of trousers from a counter in the Shaw-Arnett company's store; but he got no farther with them than Officers Hoover and Wynn, who pulled them out from under his coat.

The merchant preferring not to apply charges against him the officers

stepped away a few feet for conversation. The young man did not hesitate to take the hint. The last they saw of him was a cloud of dust being raised on the highway.—Lamb County Leader.

ONLY RELIABLE WAY TO TELL A SCRUB BULL

San Antonio, Texas, Dec. 29.—You can't always tell a scrub bull by looking at him. For confirmation T. H. Royder, cow tester of the Bexar County Dairy Improvement Association points to Lula, a high grade Jersey cow belonging to Vol Peterson of Atascosa. Lula topped the production records of the 519 cows on test in the Association last year with 11,374 pounds of milk. Her dam, Nellie, produced only 7676 pounds of milk in the same time. Her sire, who was responsible for the increase, was sold several years ago as a scrub!

who can judge this woman?

—married to a brute, in love with a man

SOMETIMES, Laura thought herself gripped by some terrible nightmare. But the steaming, fever-laden jungle with its brooding loneliness and that tattered, whiskey-soaked beast, who was her husband, were only too real. How could she have ever dreamed that she loved him?—the scientist she had thought a man. True, she had been very young when she had married him, and had come to Brazil. But fever, that white man's curse, had got into his blood—and she had seen him slowly degenerate into a boozed-sodden beast.

like eyes—eyes clouded with silent misery. Amazement, anger, pity were but the prelude to love. And when one day an answering light illumined her soft, dark eyes flashing him a wonderful message—

Thus it began—this strange drama of the jungle—a drama of maddening love on Townley's part—a tragedy of renunciation, of desperate battling with conscience on the part of Laura. Don't miss this startling true-life story, "Flower of the Jungle," in February True Story Magazine.

—SANITARY DAIRY—

**LEVELLAND MADE DISTRICT
OFFICE OF TELEPHONE CO**

Levelland has been made the District headquarters of the Plains Telephone Company, in a territory which comprises practically all of the exchanges in the towns lying west of Lubbock, this place being nearest the center of that company's holdings in this section. District Manager C. R. Singer and family removed here from Littlefield last week.

Several improvements have also been made in the local exchange. A

power switch board has been installed together with larger and more modern long distance facilities. While the growth of an exchange is necessarily slow in a new town, there are about 150 local subscribers here and a great increase is anticipated within the next few months owing to the more settled conditions and the greater permanent development which is under way at the present time and which bids fair to continue throughout the present year.

years, has been promoted to Chief Operator and Miss Martha Bradley has been given the place of day operator, Mrs. L. R. Caraway, formerly Chief Operator, having resigned and moved to Lubbock.

Among the towns included in this district are Littlefield, Amherst, Sudan, Brownfield, Ropsville, Meadow, Seagraves, Seminole, Morton and Bledsoe.—Leveland Herald.

C. J. McElroy, prominent citizen and farmer out on route one, was in this week and renewed for his Herald, Farm News and Farm and Ranch. Mr. Mack informed us that he always took lots of newspapers and magazines and loved to read. He is a well posted farmer.

The Herald is now regularly going to Miss Vivian Winston, who is attending Abilene Christian College.

**T. C. U STUDIES WORKING
PROBLEMS OF WOMEN**

"In our larger cities it is becoming more and more impossible to maintain a decently high standard of living and at the same time have a large family. Among the more educated classes and those of a high standard of living the birth rate is decreasing. In order to maintain the high standard, something must be done.

"Most countries are faced today with two problems caused by women in industry," Prof. Wells points out. "First, how to prevent racial extinction and national decline, fear of this being caused by the falling birth rate. Second, how to care for married women in industry. Measures of some kind are being adopted by these countries to meet these new problems. Included in Mexico's new proposed labor plan is this provision: "That women must be paid their wages three months before and one month after childbirth."

A cross section view of the attitude taken by T.C.U. girl students on women working is shown by a vote taken in one class studying family problems. Girls in the class were asked to check what career they would choose. A large majority of the girls signified that they preferred to stay in the home to working at any profession.

"Married women working does not necessarily mean the breaking up of the home as an institution," Prof. Wells thinks. "It may remain the chief institution for bringing up children and be aided by such agencies as the day nurseries, recreation departments, and playgrounds."

E. A. Preston was down this week from Meadow and informed us that on Saturday he was changing his store from Preston Cash Store to the Hokus Pokus Store. He ordered some advertising matter while here.

Mrs. J. T. Verner of Meadow, paid the Herald a pleasant call recently to renew for her paper.

CITATION BY PUBLICATION

J. L. Costley No. 1105, vs. J. T. Williams, et al. In the District Court of Terry County, Texas.

The State of Texas to the Sheriff or any Constable of Terry County—Greeting:

You are hereby commanded, that by making publication of this Citation in some newspaper published in the County of Terry once in each week for four consecutive weeks previous to the return day hereof, you summon Warren B. Dillard and P. J. Murray whose residences are unknown, to be and appear at the next regular term of the District Court of Terry County, to be holden at the Court-house thereof, in the city of Brownfield, Texas, on the 3rd Monday in January, A. D. 1929, the same being the 21st day of January, A. D. 1929, then and there to answer a petition filed in said court on the 20th day of September, A. D. 1928, in a suit, numbered on the docket of said court No. 1105, wherein J. L. Costley is plaintiff and J. T. Williams, C. O. Adkins, R. P. Burks, Warren B. Dillard and P. J. Murray are defendants, the nature of plaintiff's demand being substantially as follows, to-wit:

That heretofore, to-wit, on the 22 day of December 1925, plaintiff was lawfully seized and possessed of the following described land and premises, situated in Terry county, Texas, holding and claiming the same in fee simple, to-wit: The N. 1-2 of Section 29 Block D-14, C. & M. Ry Co. land in Terry, county, Texas. That on the day and year last aforesaid, defendants unlawfully entered upon the said premises and ejected plaintiff therefrom, and unlawfully withheld from him the possession thereof to his damage in the sum of \$6,000.00. The second count, in plaintiff's petition set out that these defendants bought the land hereinabove described, and as a part consideration of said purchase, became liable for the payment of two series of nine notes each, the first seven numbering from two both numbers inclusive for the sum of \$200.00 each. That in said deed of purchase, said defendants herein assumed as their own obligation the payment of said notes, as well as all taxes due, no part of which has been paid. And plaintiff has exercised his rights under the law as provided in said notes and declared the same due, and has placed the same in the hands of an attorney for collection, and has agreed to pay the attorney's fees provided for in said notes.

Herein fail not, but have you before said Court on the first day of the next term thereof this writ with your return thereon showing how you have executed the same.

Given under my hand and the seal of said Court, at office in the city of Brownfield, Texas, this 19th day of December, A. D. 1928.

Witness: Jay Barret, Clerk, 21 District Court, Terry Co., Tex.

RIVERS AND CAPTAINS NOT SUDAN SPECIALTY

"Erudite Reader" writes in for information, and has addressed its mis- sive to the correct fountain head of all conclusive proof, The Sudan News. Erudite inquires concerning the rivers which are in close proximity to Sudan, and the names of a few steamboat captains. Sudan, brother, is closer to the River Styx than any other, and Sir Conan Doyle is a real cap- tain. Those who are now in transit for foreign shores and ports report rowing easy, pools placid and cur- rents assistable to rapid locomotion. Also report comes by detour, that the river is full of fish, mostly suckers, and that they bite almost any sort of bait, oil stocks preferable. In a radio message (we refrain from mention- ing any names,) the report is made that some of the passengers are south bound and part north, but that they will part company at Ninevah, those going south being handed a No. 2 scoop and those north their harps and feather fertilizer. South bound pas- sengers made numerous requests for abtost life-preservers; those north for silken garments, with lace as trim- ming. This message was so hashed by storm waves that it was scarcely intelligible, but close study decipher- ed the fact that conversation of south bound passengers concerning accom- modations were depleted by censure, while that of north passengers was in song to the tune of "There's A Long, Long Trail Unwinding."

We would advise if you are con- templating this trip, to go by the Gas route, as it is said to be easiest, but prepare for both routes, for there is no telling when you will have to de- tour.

We thank you for the inquiry, and sincerely hope you will be pleased with the information.

P. S.—There are no captains, as everybody paddles his own canoe.—Sudan News.

"LEVEL OF 'EM UP AGAIN" MAINE SAYS RANK SOCIALIST

Down in Lewiston, Maine, accord- ing to Arthur Staples, they once had a character called Henry. Henry was a good talker, a quiet drinker, and something of a radical. His particu- lar theme was dividing up all the money in the world among its in- habitants and making everyone happy. He called it "levelin' of 'em up."

One day Henry was only half ele- vated, broke and consequently feel- ing pretty radical.

He explained his "level of 'em up" theory.

A bystander, a temperance man, saw an opportunity to puncture the ar- gument and also to enforce a lesson.

"Henry, what would be the use," he asked. "If you got your share of all this money, you would spend it all in a year, mostly on that which seems to do you nothing but harm. You know you would, don't you?"

"Pobblubly I would," admitted Hen- ry. "Pobblubly I would."

"Well, then," said the exhorter, "what would you do the next year? Your money would have all passed in- to the hands of these money-grabbers, as you call them, and what would you do then?"

"What would I do then?" shouted Henry with a fine assumption of con- viction and righteous indignation.

"What would I do then?" Why, suh, I'd level of 'em up again."

A. P. Stewart sent his renewal in for the Herald this week and also for his son in California. Mr. Stewart writes in that the Herald is one of Terry's greatest assets, he considers, and is always glad to renew.

OFFICIAL ETHICS

When a lady of the State of Texas announced some weeks ago that she would not accept expensive presents from the employees in her depart- ment, she threw a bombshell into a vicious custom masquerading in a Christmas cloak. Other State offi- cials hastened to put themselves on record in line with the high-minded lady's lead, and it began to look as if State employees would be able to spend their Christmas money upon their own families without being os- tracized by their colleagues.

But it was not to be so. A group of said employees proceeded to in- dignantly assert their great Ameri- can right to buy presents of any magnitude or cost for the heads of their departments. Nobody would deny them that right were it not un- fair to some of their fellow-employ- ees, whose home responsibilities may demand the use of their entire wage, but when the list is passed, dare not withhold their contribution to the common pot.

We honor those who are discourag- ing this custom. As an expression of affection there is nothing to be said against the giving of presents to anyone, even though that one be a superior. But the custom is at least open to the suspicion that it has other motives, and without doubt it is un- fair to the underpaid employee, or one with a fine sense of honor which pro- hibit him from placing himself under suspicion of trying to curry favor with the "boss." Far better small individual presents or a "Merry Christmas" when it comes freely from the heart.—Farm & Ranch.

Will Cunningham of Lou commu- nity, was in Monday.

Almanac Traced to the Ancient Saxons

In the early days of Greece it was customary to announce the first day of the month either through a herald or placards posted on the city walls. These placards were known as kal- ends, or kalendae from the Greek, "I call or proclaim." The book of ac- counts referring to the days of the year was known as a calendarium, hence the word calendar. Excava- tions at Pompeii have discovered a square block of marble that served the Greeks as a calendar. Each side served as a record of three months. Each month was headed by the prop- er sign of the zodiac, and contained astronomical, agricultural and reli- gious information. Versteegan, early lexicographer, tracing the origin of the word almanac, says:

"Our ancient Saxon ancestors used to engrave on certain squared sticks about a foot in length, sometimes more, sometimes less, the course of the moons of the whole year, where- by they always certainly tell what new moons, full moons and changes should happen, as also their festival dates; and such a carved stick they called al-man-act; that is to say, al- man-beed, to wit, the regard or ob- servation of all the moons; and hence is derived the name almanac."—Detroit News.

Are Stevenson's Books to Stand Time's Test?

The bishop of Durham in his oration at the Stevenson commemoration dinner indirectly raised the question whether physical disabilities are a handicap to individual distinction in life. His observations suggest that weakness in one sense may be the path to greatness in another. Robert Louis Stevenson was an only son and a chronic invalid. His physical weak- ness, like Scott's lameness and By- ron's club foot, the bishop remarked tended to induce in him an almost morbid cult of virility.

The bishop wound up his address with a question to which Stevenson enthusiasts of the present day would admit of but one answer. When his books had to stand nakedly on their merits would they be able to hold their own against the rival claims of new works armed with all the subtle appeal of direct relevance to the time present? When we think of the fa- rice over the Waverley novels for long after they were published and of the apathy regarding Scott in the present generation, no one can answer the bishop's question dogmatically.—Week- ly Scotsman.

Bad but Usable

Verlaine, the French poet, once sold a sonnet to Gil Blas Illustré. He took a cab to the offices of the paper to col- lect the money. It was one cent a line, sixteen cents. Not that there are sixteen lines in a sonnet in Paris but that the title and signature were paid for.

On another occasion he sold a poem to Art et Critique for 5 francs, money down. Next day he returned to the editor and complained that he had been given a bad five-franc piece. The editor instantly gave him a fresh one, and then discreetly demanded the bad coin.

"Monseur," said Verlaine, depart- ing, "I have passed it; but I assure you I had considerable difficulty in do- ing so."

Counted Out

Jacqueline Spencer, was told by her old-fashioned grandfather, who once followed the sea, that she must walk to school herself every morning on her two legs and must rely on no- body else—that to bank on being ef- fered a lift in the motors of neigh- bors and acquaintances was a cheap and unbecoming policy for a Spencer.

"Rely on nobody else," finished the old man, an expert at weekday preach- ing.

"I can rely on two people," quoth Jacqueline.

"Who?"

"On God and myself."

"What about your parents?" asked he, fishing.

"Oh, they're 'else.'"

Schools in Old Prisons

School is being held in old Span- ish fortresses as the first step in Americanization processes being car- ried on by the United States in Por- to Rico. Cells where once prisoners peered to and fro now contain desks. Many of the classes are conducted be- hind barred windows and heavily grated doors, installed more than 100 years ago, and the somber walls are decorated with modern blackboards. American officers are learning to speak Spanish and Porto Ricans, who are also enrolled in the Sixty-fifth infantry regiment at San Juan are learning the English language. The schools are maintained in El Morro and San Cristobal fortresses.

The Lorgnette Juggler

This concerns a dancer whose tal- ents are recognized in the two-day and musical comedies. After making a hit in a show she suddenly wear- rized and affected tall millinery. He- intrigates gave her up, not being able to tolerate her poses and speech af- fections while knowing that she was illiterate. At any rate, they say that her maid at the theater asked her:

"Have you any idea where the pin- ure?"

"I regret very much," said the up- stage one, "but I do not know where the plus is."—New York Graphic.

They Dry Soft After Soaking—Due to Wolverine Shell Cordovan Horsehide

Think of tramping through rain, snow, and mud all day —yet next morning you slip into work shoes as plump and soft as the day you bought them. Think of wearing shoes that never rip or tear. And that wear long after ordinary work shoes are thrown away.

That's what you can now buy in Wolverines—due to a special kind of horsehide called Shell Cordovan Horsehide, tanned for work shoes only by Wolverine. It is taken from the horse's hips and includes the shell which reinforces the outside hide. That's why Wolverines show no signs of wear for months and months. The seams are drawn into the surface so you can hardly feel them. And the acids of clay soils, sweaty feet, mat ure piles, or dairy floors don't eat the leather.

Try one pair of Wolverines and you'll always prefer them. We have all styles—at prices that are surprisingly reason- able. Come in today.

OSCAR SAWYER DAIRY

OF INTEREST TO WOMEN home improvement and clothing.

Waco, Texas—Club dresses of cot- ton suitable to wear at club meetings and simple enough to serve also as house dresses, have been made at a cost of 78 cents to \$1.25 by 102 Mc- Lennan county farm women in five home demonstration clubs there.

"These dresses," states the home dem- onstration agent, Mrs. Lemma Perry Boles, "are of good color and design, excellently constructed and will laun- der easily." The making of them is part of the comprehensive home mak- ing program conducted there, the im- portance of which is best judged by the fact that the entire membership of 203 women report making or saving \$88,465 last year on four projects; poultry raising, food preservation,

Part of the Cap Rock Jersey Farm of Crosbyton is being cut up into blocks for rent and for sale. Each residence has five acres of fertile land surrounding it. This fills a need for new homes that has been growing in Crosbyton.

Under the joint auspices of the Brady Chamber of Commerce, and the Brady Water and Light Board eleven prizes were given for the best lighting effects used on local houses during the holidays. First prize was \$40.00.

M. C. Ammons of the Tatum route in west Terry, was a pleasant visitor in the city one day the past week.

If the Farmall Tractor Could Talk This Would Be Its Story—

"FARM WITH FARMALLS"

The Farmall at fall work. Then comes belt work, and next spring planting and cultivat- ing, haying, etc.

"I AM built different from any other tractor and am ready to take over your complete power job—corn, and other row crops, and all, from plowing to harvesting, and the year 'round. The fewer horses on the place, the better you and I will get along. That's why my name is FARMALL.

"Here is a big point I want to hammer home: *I have introduced real horseless farming on many farms.* Another point is that, on most any job, *I am a one-man outfit.* Look at my photo above: my peculiar style of berety is what makes me the humdinger I am when it comes to planting, cultivating, haying, plowing, belt work, or what have you got? You may say I talk strong but it's because I've got the goods. Modesty must go by the board to help revolutionize row- crop production, and that's what FARM- ALL, the one real general-purpose tractor, is doing in every section where its efficiency is known.

"I aim to replace an average of six to eight animals wherever I go to work and I've got

my own special crew of machines that you can take or leave—such as planters (2 and 4-row), cultivators (2 and 4-row), mowers (7-ft. and a 7 ft. trailer mower besides), middle busters, lister cultivators (4-row), sweep rakes, beet tools, potato tools, etc. There's an outfit to get things done! Or, I'll work with any machine you've got, from Jan. 1 to Christmas. At plowing, two furrows is my habit and they can't beat me at the job.

"In every section where I am demon- strated they put me to work in good numbers, and you can find farmers everywhere who will back up every statement made by me or by my designers and builders. The dealer is here to help out on any servicing I may ask for in years to come.

"My headquarters here is the store of the McCormick-Deering dealer whose name is below. I am the only square-turn tractor; come in and see what I can do in a very small patch of ground. We will be glad to give you a demonstration, here or on your own land."

Stronger Bearings Give Longer Life

Exceptionally strong, wear-resisting disk bearings, that will last long and give satisfactory service in all kinds of soil—they're the kind of bearings you get in the

John Deere No. 63-A Disk Plow

The bearings are of heavy-duty, two-piece type—selected for their simplicity and greater strength. They run smoothly and easily, without adjustments.

You will like the 63-A for its quick convertibility. Change from three to two disks or from 8-inch to 9-inch cut per disk can be made in a few minutes.

You will appreciate the sturdy, non-sagging beam—set above instead of at the side of the disks, which gives greater clearance for trash.

You will be sure to like

the way the keen-edged disks bite down and revolve freely even in hard ground or difficult gumbo. The weight of the frame being above, forces the disks to penetrate readily. An additional aid to penetration is the setting back of the seat and rear wheel.

Quickly-adjustable scrapers—either universal, hoe or rotary type—are furnished.

Remember, the 63-A is designed to meet the severest soil conditions of this region and is an exceptionally strong and rugged, lighter draft John Deere disk plow.

See the 63-A at our store.

OFFICE TALK DOMESTICATED

Of course, when you write letters you write just as you talk. But you know that there are a lot of fellows—whose names we aren't going to mention—who make use of the darndest collection of words and phrases! Being entirely innocent yourself, you'll be able to sit back with a clear conscience and read this dialogue that has been going the rounds of some of some of the trade publications lately, in which the standard

letter writer's jargon is shifted to a domestic setting:

His wife: "Did you have a hard day at the office, dear?"

Mr. Yourstruly: "In reply to your query of even date as to my day at the office, regret to say that business matters were pressing, and I am very tired."

His Wife: "You poor dear! Well, come on now, dinner is ready."

Mr. Yourstruly: "In re' your statement concerning immediate preparations to serve dinner, beg to advise

that it will be five minutes before I can act on this, owing to the fact that I have just lighted a cigar. Regretting my inability to comply promptly with your request, and trusting that the delay will not seriously inconvenience you—"

His Wife: "Lay down that cigar and come to dinner at once! It's getting cold."

Mr. Yourstruly: Your complaint regarding delay in attending to your recent order has been called to my personal attention, and I beg to assure you same will receive immediate handling. Feeling sure you will be pleased, and—"

His Wife: "Thank heavens! Won't you have some potatoes, dear?"

Mr. Yourstruly: "Your suggestion in re' potatoes strikes us as very good. However, will take this up with our appetite at once, and hope to be able to advise you promptly as to the decision."

His Wife: "For goodness sake! Please hurry!"

Mr. Yourstruly: "After conference with our appetite, am pleased to notify you that authority has been granted to pass the potatoes at your earliest convenience. Trust you can push this matter through without further delay. Also wish to call your attention to the gravy, which according to our standard specifications, should accompany the potatoes. Thanking you for the suggestion, and the favor of your usual prompt attention to this matter, beg to remain, Yours, truly."—Commuter.

EASY MONEY

Mike: "This is a great country, Pat."

Pat: "And how's that?"

Mike: "Sure, the paper sez you can buy a foive-dollar money order for three cents."

If a woman doesn't get a man on his knees before she marries him she usually manages to get him down shortly afterward.

BROWNFIELD GINS TO CLOSE - SATURDAY, JANUARY, 19 -

TO OUR CUSTOMERS and FRIENDS:—With favorable weather conditions prevailing until Saturday, January 19th, we believe that all cotton now remaining in fields can be gathered and ginned by that date, and if so, we the undersigned, will on that date close our gins for the season. We earnestly request and urge all farmers to have the last of their cotton at the gins, on or before that date, SATURDAY, JANUARY 19th.

PIECE OF THREAD MADE FIRST ELECTRIC LAMP

The recent presentation of a Congressional Gold Medal to Thomas A. Edison serves to recall that it was just 49 years ago last October that the great inventor sent an electric current through a carbonized piece of thread sealed in a glass bulb, and produced the first practical incandescent light.

Having just invented the phonograph, Edison was ready to tackle another problem and turned to the

subdividing of the electric light." Working almost constantly, he tried successively burners made of carbonized paper, metals and again different forms of carbon. They all broke, or burned out, or melted in the glass bulb from which air had been laboriously pumped by hand.

His chief difficulty having been the construction of a carbon filament, he looked around for a durable material and finally hit upon cotton thread. Bending pieces of thread into hairpin shape, he would bake them in a nickel mould until they became wisps of

carbon. But every time they would break, once just as Edison reached the glass-blower's house where the lamps were made.

Eventually, however, a carbon was completed, inserted in a bulb, the air exhausted and the lamp sealed. The current was turned on and that first lamp, lighted October 21, 1879, burned forty-five hours.

Lee Smith left Tuesday for Colorado to bring back a car load of Perchon mares to Brownfield to be sold.

QUALITY AT LOW COST

Read what these leading automobile editors said after seeing and riding in the new Chevrolet Six—

"In appearance, performance and mechanical nicety the new Chevrolet Six presents actual values far beyond its price range."

—Hazen Conklin
New York World

"Aside from beauty in body lines and attractiveness in finish, the astounding feature of the new Chevrolet Six is its powerful and flexible motor. One will have to go far to equal the high performance of this new Chevrolet in general road and traffic use."

—Leon J. Pinkson
San Francisco Chronicle

"The new Chevrolet is a triumph for volume production. The car at its price is one of the greatest achievements ever recorded in the automobile industry. Its beauty is a treat; its riding comfort a new delight and its performance a real sensation."

—Ray Priest
Detroit Times

"St. Louis motordom is tremendously enthused over the new Chevrolet Six. Personally I have never seen the public so interested in a new car. The factory should be congratulated on the truly monumental engineering feat it has accomplished."

—Robert Henry Hall
St. Louis Post-Dispatch

SOCIETY and Club

MRS. R. L. BOWERS, Editor
Phone 1-8-2

Quiet Social Week

It has been sometime since there has been as quiet a week socially as the past one has been. There is still lots of sickness; in fact, at least some one sick in every home. Hence, few of the clubs and the church societies and classes have resumed their regular meetings.

Maids and Matrons Meet

Professor Murphy of the Tech lectured Tuesday afternoon at four o'clock at the high school building. The French novel "Renee Mauparin" was completed and the English novel "The Way of All Flesh" was started.

Mrs. Stevens Hopson's mother of Lubbock visited her Saturday and took the flu Sunday.

The J. U. Club Meeting

The J. U. Club were delightfully entertained at the home of Mr. and Mrs. A. M. McBurnett with Miss Ina Patterson as hostess Thursday evening at seven thirty o'clock.

The table cuts were novelty china pin cushions and went to Miss Martin and Miss Violet McBurnett. In the games Miss Bess Baldwin was awarded a motto for high score.

Concluding the games toasted pimento cheese sandwiches, hot tea and stuffed dates were served to Misses Eunice Banks, Bes Baldwin, Larue Sawyer, Mildred Woodhead, Violet McBurnett, Lucille Flache, Fay Martin, Marie Bell and Grace Hulse.

An Error in Last Week's Rotary Report

In last week's report of the Rotary banquet, mention, due to oversight, was failed to be made of the interesting talk made by Rev. Dodson on "Rotary Principles."

New Year's Dinner

Mr. and Mrs. W. C. Smith entertained with a luncheon at twelve thirty o'clock on New Year's Day complimenting their son, Adolphus, who was at home for the Christmas holidays.

The hostess was assisted in preparing and serving by Mrs. Dalton Lewis.

The young men enjoying this splendid hospitality were Messrs Bill Collins, James Harley Dallas, Clovis Kendrick, Kerney Scuday, Ulysses Graham, Lee Orval Lewis, Otis Long brake, Curtis Gasaway, James King Jim Graves, Don Leach and John Willis of Minneola and the honoree.

Mr. L. C. Wines made a business trip to Littlefield the first of the week.

Mr. and Mrs. Oswald Bailey and daughter and grandson of Shawnee, Oklahoma were guests last week of Mrs. Bailey's sister, Mrs. L. F. Hudgins and family.

Church News

METHODIST MISSIONARY SOCIETY

The Missionary Society of the Methodist church met Monday afternoon at three o'clock at the church for the installation of officers and for a business meeting. "The New Africa" was decided on as the new text book for the year.

The members present were Messdames Webber, Thompson, Longbrake Wheeler, Linville, Cleve Williams, Johnson and Downing.

CHURCH OF CHRIST BIBLE CLASS

Some of the members of the Church of Christ Bible Class met Monday afternoon at the church, but because so many of the members were absent, it was decided to have the same lesson for next Monday.

BAPTIST W. M. U.

None of the Circles of the Baptist Women's Missionary Union met Monday afternoon, but a committee has been appointed to apportion the number of members to each circle alphabetically. The circles will meet next Monday afternoon to complete the organization.

Mr. W. I. Lovelace of Tokio has bought the Ed Spear place in north part town and is moving in.

In Lubbock Sanitarium

Miss Nancy Dumas who went to the Lubbock Sanitarium Saturday for treatment is doing nicely.

Little Miss Patsy Sue Fagala, older daughter of Professor and Mrs. O. W. Fagala was in the sanitarium for several days because of abscesses in the ear. She is better now and has returned to her home at Lorenzo.

TOKIO NEWS

Sunday morning Mr. Ira Lovelace and Miss Violet Proctor of this place were united in marriage at Brownfield. We wish them a long and happy journey. They will make their home in Brownfield.

This makes three of the Tokio pupils who have married since Christmas. At that rate there'll not be many left for the last day of school.

Jim Casey is moving the Bryson building this week.

The New York Times editor prophesied a great future for Meadow a few weeks ago. We intended to suggest there might be such a thing as Tokio Square for Brownfield, but this has been torn up since Jim Casey has already named south Tokio, Juarez. (This may increase our visitors as well as trade.)

We have just learned that C. P. Buchanan is leaving. He will make his new home near Portales, N. M.

The little granddaughter of Mr. and Mrs. Glasgow of this community fell into a tank and was nearly drowned when her mother found her. She is doing nicely at this writing.

There is quite a bit of sickness, but most of the patients are recovering.

Bro. Hicks of Plainview filled Bro. Allen's appointments this week end.

HUNTER NOTES

Christmas and New Years are past and everyone is ready to go to work again. We wish everyone a prosperous year.

Mr. Claude Williams is on the sick list. Flu being the trouble.

Mr. and Mrs. George Byrd from Toluca visited their daughter, Mrs. Lewis Dent, this week end.

Messrs. Carlton and Bobbie Williams have been visiting friends and relatives in this part.

Mrs. Brown visited her daughter, Mrs. Riley Bryan, Sunday.

Mr. Jim Price is on the sick list.

Mr. Thomas Wood from Oklahoma came in today to make his home in this community.

Miss Thelma Offill of this community, and Mr. Jim Bryant, formerly of the Union community were united in matrimony Saturday. They will make their future home in the Challis community. We wish them many long and happy years.

Mrs. Porter and daughter, Naomi Mannings, visited Mrs. L. S. Simms, Saturday afternoon.

Mr. and Mrs. Wesley Owens from Loop visited Mr. and Mrs. Charley Cheak, Sunday.

The paving of seven blocks in the business district of Muleshoe will occupy the people of that progressive town during 1929. The problem of drainage which has been a handicap is being studied by an expert engineer.

R. C. Hollman and T. A. Loe of route one are among the new readers of the Herald.

HUNTER DRUG STORE Brownfield - - - Texas

IS HELL A PLACE OF REAL FIRE?

At the Methodist church next Sunday night the sermon subject will be "Is Hell A Place of Real Fire and Real Brimstone?"

Are New Testament references to future punishment to be taken literally or are they figures or pictures referring to some kind of punishment hard to be understood by the human mind?

Don't fail to hear this sermon. It will be entertaining and instructive. If you miss it, you will miss something really worth while.

At 10:50 A. M. the sermon subject will be "Why I Like to Preach to People Who Live in Unfinished houses?"

This sermon will interest you and also give inspiration. Don't miss it. Sunday School at 9:45 A. M. Epworth Leagues will meet at 6:45 P. M. sharp. Let all the Leaguers be present.

Two worth-while messages and a hearty welcome at the Methodist

church. You are cordially invited to attend these services.

Rev. B. W. Dodson, D. D., Pastor.

The voters who strayed off and finally landed in the Republican fold on account of the dry issue received a severe jolt this week when the vote was taken in congress upon the appropriation for the enforcement of dry laws. Prohibition enforcement officers had asked for \$300,000,000 claiming that to be the least amount with which the law could be effectively enforced. A Republican committee placed the amount at \$13,000,000. Senator Bruce, a Democrat offered an amendment raising this to \$270,000,000. Upon almost a strictly party vote the amendment was defeated, all Republicans except those voting against the increase and all Democrats except two voting for it.—Lovington (N. M.) Leader.

J. H. Martin, S. C. White and Odum Wood are among the new readers on south route.

LOST between S. T. Miller and J. C. Bohannon's a child's boot. Return to Postmaster or Oden Miller, Itc.
