Every once in a while some fellow comes in with a special advertising proposition and puts it up to this office and then goes out and undertakes to sell it and advises his prospect that it has the endorsement of the chamber of commerce. Local Gas Co. Tells **Us A Pretty Story**

With cough, colds, operations, santarium bills and generally punk business to think about and dream about of late, it looked like there couldn't possibly be any breaks for us, but we were trying to keep our head in the air anyway. Of course there were many sympathizing friends and neighbors offering to go the limit, and meant every word of it. That was some comfort. But it remained for the West Texas Gas Co. to hand us a real peach of a package in a red wrapper all tied up with blue strings.

Last first, we were handed a bill that called for us to pay the sum of \$25.65 for gas used the previous any one month. But we attended to of you. The list follows: our own knitting, knowing that if we burned the gas we were expected to

It is believed that just as soon as the highway muddle over Dennison is straightened out at Austin, that bids drainage on that section of 137 from here to Seagraves, where it will be connected up with the Gaines county paving, and when the sections from here to the Hockley-Lubbock line and from here to the Terry-Gaines lines are finished, Terry county people will have an all-weather outlet to most anyplace they wish to go.

At this time we wish to commend the work that is being done by Mr. McBride and his highway crew on 84 west of here. All the sandy places are being topped with a good coating of caliche that is adding wonderfully to the comfort of travel over them. In these sandy sections, the sand blows out from the clay leaving great chug holes, but a topping of caliche eliminates this.
