It appears there is one Texan not too proud to learn from Oklahoma. In that State recently a relatively obscure citizen made a slight adaptation in his name so as to make it conform to that of a better known man, and shortly thereafter was elected to Congress. This example has spread in Oklahoma this year, with some half dozen or so candidates for various offices appearing under a few selected names.

The Texas example-follower, however, made a more thorough job of it. He changed his whole name, by resort to the courts, and while it may have been only a coincidence that the new name he chose, and which he filed for a place on the state ballot, was identically the same as that of the retiring "lone-wolf" of the Texas dence that the name Terrell is con- Southwest corner of Yoakum. sidered lucky in Texas political campaigning.

There used to be an item in the Texas code of good manners which forbade "going behind" the name a man used for himself. ### John B. Kennedy

ASK the average radio listener who has the most easily understood speaking voice on the air today and who it is who talks most entertainingly, and he will reply John B. Kennedy.

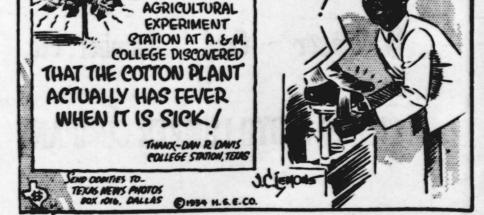

Kennedy is heard over a nationwide hook-up of 26 N. B. C. stations every Wednesday night and like others who have been trained in newspaper and magazine offices, knows how to present his facts in the order of their importance.

Kennedy was born in Quebec, Canada, and was educated abroad and at St. Louis University. He began newspaper work with the Chicago Journal and the St. Louis Globe-Democrat. He served on Hoover's relief committee in 1920 and 1921. The same year-1924-he joined the staff of Collier's Weekly, he made his radio debut.

Every Wednesday night several million radio listeners tune in to hear Kennedy. They are always well paid.
