### ON POLIO CURES

information about the new "polio drug" is being demanded by the general public. An exclusive detailed report, prepared with the ap-Laboratories, appears in the September issue of Science Illustrated

After years of assault, reports the magazine, science has at last ( breached the barrier behind which some of man's greatest enemies the virus diseases, lurked unmolested. Among the forty dangerous diseases caused by viruses, which may be brought under control by. the new drug, are: polio, vellow fever, influenza, pneumonia, rables

Scientists have successfully attacked many diseases by destroying the bacteria which cause them. But the average bacteria is one hundred times larger than the largest virus. Viruses are just too small to work with handily, explains the magazine

duced by Dr. Martin E. Hultquist, Dr. Robert Parker, and a numbe of associates who had been experimenting with hundreds of varia tions of the sulfa drugs in the Calco Chemical Laboratories in Bound Brook, N. J. Their aim was to increase the germ-killing power of the drugs and weaken their power to destroy healthy cells.

The Calco group did not know what they had when they sent the new drug to Pearl River, N. Y., for routine screening tests by Fritz Popken and his group under the supervision of Dr. Y. SubbaRow director of research of the Lederle Laboratories. The results of one of the tests were dramatic. Something which never was done before in medical history was accomplished. The new drug saved the lives of test mice innoculated with a class of viruses which attack the starting salaries of \$3718 a year. of aeronautica communications

This called for further tests. Dr. Murray Sanders of Columbia's College of Physicians and Surgeons was asked to find out what the drug would do to polio. He found that "Darvisul," as the new drug the C. A. A. along Alaskan air- be allowed at the discretion of is known at Lederle Laboratories, will protect a large percentage of ways. mice against a lethal infection of at least one strain of polio.

Along came the polio epidemic in Texas. Why not try the drug eventual promotion to higher-

#### WANT TO TRADE PLACES

While the whole nation sweltered in a heat wave, two Northwestern proval and help of the discoverers of the drug, and the Lederle University students shiver at 20 below in an experimental "cold room Evanston, Ill., campus. Donald Collins and Jeanne Popp wear Arctic clothing in a room which can be lowered to temperature of 86 degrees below zero for testing airplane and other equipment for us in cold climates. (NEA Telephoto).

> there? While impressive, the results were still inconclusive because a few apparent successes don't make a polio cure.

> Other good features of phenosulfazole are 1) it can be taken by nouth 2) it will be inexpensive to make in large quantities.\* But, the article cautions, further tests must be made and if the drug proves seful, it may be months before it can be produced in volume.

While urging patients and caution, Science Illustrated says that the discovery might prove to be one of the great triumphs of science.

### Communicators Needed by CAA Alaskan Air Duty

assigned to the 45 airways com- alent in education and experience munications stations operated by Slight code speed deficiences may

grade jobs paying up to \$6540 a year. Additional earnings are possible in all grades through authorized overtime beyond 40-hour week, and through a 10 percent night differential.

Basic qualifications for the job are the ability to transmit and receive International Morse Code ration has opening for a number at minimum speed of 30 words a of qualfied single men as aircraft minute; to touch typewrite at 35 ommunicators in Alaska, at words a minute; and 18 months Successful applicants will be experience or an acceptable equivthe appointing officer if t appears Men selected will be in line for that they can be compensated.

## TAKE A LOOK AT VOUD INCIDES

NATURE'S DANGER SIGNALS

When your stomach, liver, and gall bladder have been upset by improper eating or drinking, or when they are not working well because retained and putrefying food matter in your intestines is poisoning your entire body, you, sooner or later, begin to feel some of the following symptoms:

Your breath may become unpleasant (halitosis), your tongue coated, a rections. At your druggists'.

bad taste in your mouth, your coffee (and tobacco) lose their natural flavor, your food does not agree with you; you may have heartburn, gas and dizzy spells, you may be troubled with belching; at night the gas in your bowels may press upon your bladder making you get up frequently, thus breaking into your sleep.

In the morning you are tired in-In the morning you are tired in-stead of refreshed. Gradually your health is impaired.

health is impaired.

Your complexion may become sallow or bilious; dark rings may appear
under your eyes, you may feel lazy,
dull and irritable or blue and melancholic. You may have frequent colds
(catarrh) or dull head-ache; your
bowels stop their free, full and natural action; you have constipation,
gas, putrefaction and self-poisoning
("intestinal toxaemia" or "acute gastritis" as many doctors call it).

HOW TO GET RELIEF You can relieve this condition, usually overnight, by taking Calotabs at bedtime and drinking water freely next day.
