In just 41 words, Mr. John Brookshire gives the reasons why he will again choose Servel Gas Refrigerator: "I have used my Servel Gas Refrigerator since 1936 and am pleased to say that it has not cost me one cent for repairs. The operating cost has been so small that I have noticed no difference in my gas bill."

No wonder Mr. Brookshire says, "I can truthfully say that if and when I need a new refrigerator, it will definitely be a Servel Gas Refrigerator."

Clearly, a refrigerator giving this kind of service is worth more. Thousands think so for thousands are switching to Servel Gas Refrigerator.

Not if America should ever be government-owned . . . government-controlled, you can't. The right of free choice . . . the right to work where you choose belongs only to a free people, and people living under government control are not free!

The fact that the Constitution gives every American the right to individual freedom does not mean that we cannot be deprived of it. We can ... in a number of ways!

For instance, it doesn't always take a revolution or a political upheaval to change the form of a government. It can happen slowly . . . creep into existence gradually, day by day, through little things that in themselves are hardly noticed. But after a period of months and years, those little things all get together to make a big thing—a thing as big as changing our American

TEXAS & PACIFIC RY.

way of life-our system of free enterprise-to one of regimented government control where there is no freedom of choice for anyone.

The steady encroachment of government control on private business is a bigger step toward government control of our lives than many Americans realize. For by strangling private ownership of business, free enterprise, competition and initiative are strangled, and the American system-unquestionably the most democratic, progressive and productive in the world -is strangled.

The defense against loss of our individual freedoms through government control must be an individual attack by every American against any law, measure or project that seeks to put Government in control at the expense of private ownership. Only by opening our eyes to the growing danger of government control of private business-only by talking, thinking and acting-can we safeguard our most priceless possession ... the right of free choice.
