

The Gay Philosopher

By J. W. B.

IT HASN'T been too many years since Cotton was king in these parts. Peanuts now occupy the throne. But the peanut farmers are threatened with an acreage cut of some 27% in a price support movement.

So there's considerable acreage open for other crops. And it looks like our farms now are going in for blackeyed peas. This will be a fine thing, too, for it appears that some \$20 to \$25 per acre can be netted from the peas.

In recent weeks there have been several meetings over the county to talk peas. County Agent Cooper has been helping the project along. You can gather from 1,500 to 2,000 pounds of peas per acre.

This seems to be a pretty worthwhile proposition for peanut farmers to consider. They can devote such land as can't be put in peanuts to peas.

THE POPULARITY of black-eyed peas, so far as we can tell, may have originated from a Chamber of Commerce promotion over in East Texas. The idea was developed that if you eat black-eyed peas for New Year's Day, you'll have lots of good luck all year.

This resulted in a lot of people buying canned black-eyed peas for New Year's. The further result was that they made good eating and people are buying them more often.

GUESS WE OWE the people over at B. & K. Bakery an apology. Ever since we wrote a piece about what fine French bread they're turning out, they've had an awful lot of trouble keeping it. Sells as fast as they can make it. We still say it's good and you ought to try some, if you haven't sold out again.

HAVE YOU noticed Mr. Cliff Jones' cowboy? It's the new sign he built personally over in front of Claud and Don's Service Station. A real neat job, too.

JUST GOT OUR copy of The Midget News, official publication of Cisco Junior High School. The top story reports that 106 certificates have just been awarded for good attendance in the school during the first semester.

The Midget News offers a preview of a simplified income tax form, which follows:

1. What was your income for the year?
2. What were your expenses?
3. How much do you have left?
4. Send it in!

The News also comments: When things go wrong, don't try to go with them. The paper notes further that there are 77 days left in the school year. . . . That new students include Danny Mark Loudner of Coleman and Laura Bradshaws of Abilene. . . . That the Midgets have an up and coming basketball team.

BEST STORY we've heard lately goes like this:

"I'm very happy to inform you that your husband has passed the crisis," said a doctor to a woman whose husband was dangerously ill.

"Passed the crisis?" she demanded. "You told me he could not live a week."

"Well, I'm going to cure him, after all," said the physician.

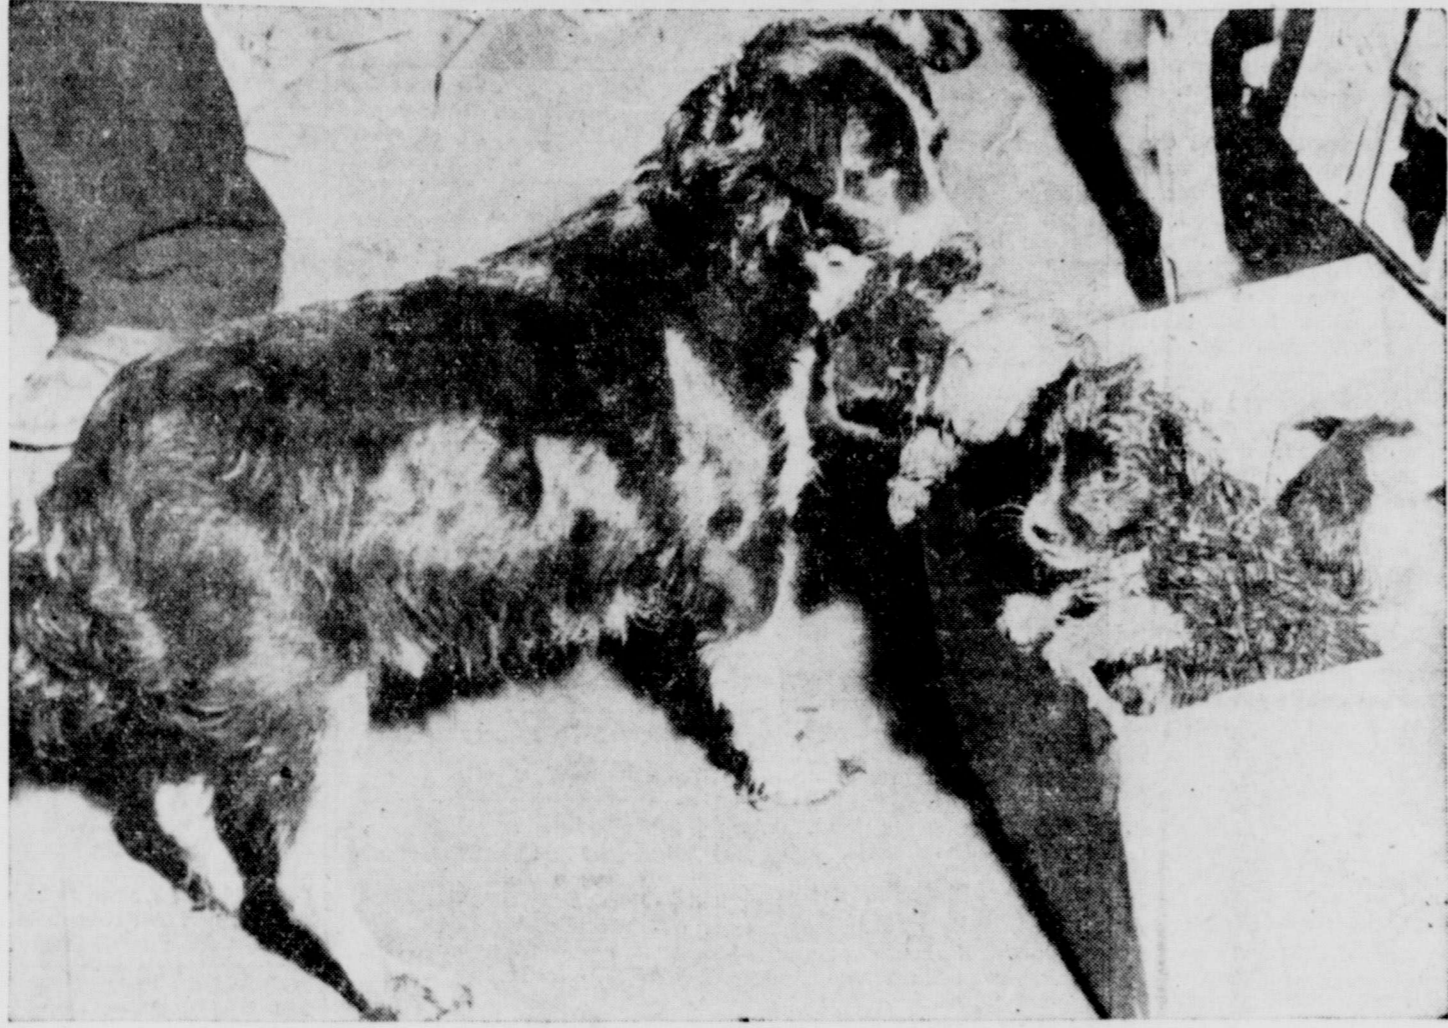

"The woman nodded slowly. 'I guess so,' she admitted. 'But it puts me in a bit of a hole. I've sold all his clothes to pay for his funeral.'"

Two Men Face Forgery Charges

Sheriff J. B. Williams reported Friday that two men were in the Eastland County jail facing charges of forgery and passing instruments in Cisco and other Eastland County towns.

Facing forgery charges was Norman France, while his partner, Charles Watson, was charged with passing forged instruments. The two were captured by Brown County officers after they were alerted by Sheriff Williams. They were apprehended on a description given by Williams of the men and their automobile.

The two men allegedly cashed a forged check at a local jewelry store and attempted to pass several more here. The checks were drawn on the A. R. Elam Co.

The two were said to have used the name of Roy Henderson in cashing the checks and carried identification showing that the passer's name was Henderson. Sheriff Williams was checking the identification papers in an effort to find how they came into possession of them. He was also trying to trace the car which had the identifying numbers removed.

Local Man In Tennessee Accident

Word was received in Cisco Friday that L. B. Mayhew, local carpenter, was involved in an automobile crash near Arlington, Tenn., Thursday. Mr. Mayhew was en route to Kentucky for a visit.

He was not seriously injured but the car in which he was riding was demolished when it struck a bridge railing.

COPLINS MOVE

Mrs. Simon Coplin and son, Donald, left Cisco Thursday for Houston where they joined Mr. Coplin to make their future home. They had been Cisco residents for many years where Mr. Coplin was manager of the West Texas Produce Co. branch house. He has purchased an interest in a similar business in Houston.

Mrs. Minnie Woods left Tuesday for Crane with her long time friends, Mr. and Mrs. Dal Melette. Her sister-in-law went to Ranger where she was scheduled to visit her grand daughter and family.

Wranglers Play Two More Games

The Cisco Junior College Wranglers will conclude their 1950 basketball season with two games next week, Coach Stormy Davis reported today.

Monday night the Wranglers will meet Hardin-Simmons at the Community Gym. And they go to Decatur Tuesday night to end conference play.

Davis said the was a possibility that the Wranglers might end in a tie for the conference crown. If they can beat Decatur, they would end in a tie with Ranger for the title.

Earlier in the season, Cisco scored a 76-26 victory over Decatur in the local gym. Thursday night, Decatur defeated Ranger.

Conoco Dealers Attend Meeting

Conoco Agent Claud Wilson and Service Station Operators Carrol Smith and Paul Yardley attend a joint meeting of Conoco dealers and agents in Abilene Tuesday night at the Wooten Hotel for a discussion of a new super oil that the Continental Oil Company will introduce to the public about Feb. 15.

More than 250 distributors heard talks about the new oil that is the result of more than eight years' laboratory research, two winters of testing in Montana and Colorado, and a 50,000 mile road-run in temperatures that ranged as high as 110 degrees in the shade, Mr. Wilson said.

The new oil will be sold under the label of Conoco Super Motor Oil.

Lone Star Hopes To Resume Drilling In Wildcat Oil Test

OUTLOOK FOR PEA PLANTING IS DISCUSSED AT ROTARY MEETING

Moran News . . .

Amateur Show Nets Moran \$58

In an amateur show at Moran High School Monday night that netted \$58 for the athletic fund, M. L. Clifford took first prize with his version of "Blues, Stay Away from Me," accompanying himself on the guitar. His prize was \$5.

Gwendolyn Burton earned the \$3 second prize with a lively and clever tap dance. Betty Ruth Williams sang "That Lucky Old Sun" to take the \$1 third prize.

All three performers were well applauded by the crowd who filled the auditorium to capacity.

School Supt. McKenny was master of ceremonies. He has indicated that the popularity of the talent show makes it advisable to stage similar attractions in the future.

Others competing included a rhythmic dance team from the first grade; a skit by the fourth grade students; a trio composed of Judy Harper, Lucille Hamilton, and Jo Allen Holland in "Forever and Ever"; an accordion solo by Oma Dale Shelton; Edna Mae McCoy singing "Far-away Places"; Betty Thomas, a steel guitar solo; Rita Agnew in the song, "Filipino Rose."

Also James Bankston, James Agnew, and Danny Connally in a stunt; Sharon Midkiff, steel guitar; Patsy Walker and Oma Dale Shelton singing "Atchison, Topeka, and the Santa Fe"; steel guitar solo by Alvin Huskey; Marquata McQueen, skit; Garland Sargent, steel guitar; a trio, Ethel Mitchell, Teva Hallmark, and Dale Fite, singing "Dreamer's Holiday"; Billy Bone in a vocal solo, "I'll Be Hanged"; Sue Hamilton, vocalist; Carolyn Louse, piano solo; and Sara Rose Ellis, clarinet solo.

Rotarians, at their meeting at the Hotel Victor at noon Thursday, heard County Agent J. M. Cooper tell of the prospects of raising peas as a secondary crop in Eastland County.

Mr. Cooper was on the program as a guest of Leon Maner, chairman for the meeting.

He told of the contact that had been made with L. R. Barron of Athens, who had visited the county and agreed to establish a cleaning and purchasing plant in the county if as many as 1,000 acres of peas would be planted. At a recent meeting in Carbon attended by some 150 farmers, 61 agreed to plant a total of 1,077 acres of various types during 1950. Others were expected to sign.

The crop will be planted the last part of April and the first part of May, Mr. Cooper reported, in order to allow harvest in July and August. Some 20 to 25 lbs. of seed will be planted to the acre using 100 pounds of 412 fertilizer to the acre. The seed will be inoculated prior to planting and can be combined.

Mr. Cooper explained the value of the crop, both as a financial benefit and as a soil builder.

He stated that the movement was brought on by the unsettled condition of the peanut industry due to prospective cutting of acreage from 20 to 30 percent.

Visitors at the Thursday meeting were Rotarians L. R. Pearson, Ranger; Earl Stephens, Eastland; Jack Reynolds, Brawnwood; and Dan Dillingham, Abilene. Other visitors were A. Z. Myrick, Cisco; H. V. McCorkle, Humble Pipe Line Co. district superintendent, Pampa; and Mrs. S. E. Hittson, guest pianist.

Johnston Slated To Drill In; Huff Ready To Spud In

Lone Star Producing Co. hoped to be able to resume drilling operations today in their No. 1 J. W. Dennison, wildcat oil test five miles southwest of Cisco, after being shut down for several days with trouble.

Thursday afternoon, a fishing job was still under way in an effort to retrieve two cones from a drilling bit that were lost early in the week. The McCulloch Tool Co. was conducting the fishing job.

Lone Star expected to run drill pipe into the hole today and drill for a short time in an attempt to loosen the cones. The hole was bottomed at 3,730 feet when they ran into trouble last weekend.

On top of the Duffer, in which production was considered a slight possibility, the well is expected to top the Ellenburger at about 4,000 feet. If there is Mississippian lime in the area, it will be on top of the Ellenburger.

If no pay is encountered, it was considered likely that Lone Star would attempt completion in the upper Caddo where a gas show of some 12,000 feet and oil mud were reported in drill stem tests.

Johnson Well

Drilling-in operations were scheduled to begin today in the E. C. Johnson No. 1 Eppler, two miles southeast of Cisco. The well was cemented on top of the Lake Sand, from which an offset well is producing at 3,336 feet.

It was reported that Johnson had closed a deal for an adjoining 156.5 acres from the George Daniels Estate. The consideration was not announced, but it was understood to have included cash and an oil payment. The northeast corner of the Daniels tract lies 330 feet southwest of the present Johnson well.

Huff Test Ready

Everything was in readiness to spud in the Huff Oil and Refining Co.'s No. 1 F. C. Cheshire, half a mile south of the Lake Cisco (Moran Highway) Road. Equipment had been set up and the slush pit was ready.

The Huff company, which has holdings and a refinery in the old Ibox Field, took the Cheshire tract on a farm-out from Obie Bristow, former Big Spring High School coach. The lease once was held by Hickok-Reynolds on a farm-out but they turned it back without exploration.

The cable tool machinery and rig were leased for the operation by the Huff company from Pat Patterson of Cisco, who will supervise the drilling. According to plans, extensive tests will be run in the Lake, Mississippian, and Ellenburger formations. Permit calls for a 4,200 foot hole.

A successful operation would be an extension of a half mile for the Kleiner Field.

LETTERS

Dear Sir: In a recent Gay Philosopher column you expressed your opinion, again, regarding "Union" telephone workers. It is generally agreed there are some crackpots and racketeers in unions as well as the newspaper business. Each union member can not be compared or judged upon the same level of citizenship and character.

Let's view this particular union on a local community basis as each citizen and business are directly affected. There are over 50 C. W. A. members employed in Cisco. Their annual payroll will exceed \$225,000. There are approximately 35 other members of their families with an income estimated at near \$200,000. These Union employees own and maintain their homes with an estimated value of \$100,000. There is possibly about five of them that don't own at least one automobile. Check with the local and national credit agencies and you will find they have excellent credit ratings, and are good risks for underwriters.

The telephone union membership and the membership of the various other trade unions in our community number into the hundreds. The payroll is a valued source of revenue to local business, their investment is a nice credit to our local assets, their purchase of U. S. Bonds are one of the largest in the community, and their citizenship is to be proud of. These are the Union people that live in our Cisco community and deserve every respect and consideration.

Sincerely yours, E. R. WATSON (Editor's Note: We agree that the telephone people are certainly a big asset to Cisco. The latter we worked up was over the union's leaders to jam automatic switch boards - a kind of "if you don't see it my way I won't let you look" attitude. Thanks for your views. Write us again.)

Editor: In your letters column the other day, a Mr. Jenkins suggested for the needed money for our mental hospitals \$1 per thousand gallons on water to avoid piling more burdens on the taxpayers.

That would be a great arrangement for those who do not use water from lakes and reservoirs. But I am afraid it would only add more burdens to those who do and to those who are also taxpayers and are also burdened with the same taxes as those who do not use water from lakes and reservoirs.

Since it is an obligation of all Texans, why not tax something all Texans use?

MAC CHESHIRE Lake Road, Cisco (Editor's Note: We, too, disagree with Mr. Jenkins. If they are going to tax water users, how about the fellows who use irrigation wells? Thanks for the letter. Hope your oil well gives with something besides water.)

ATTEND CHURCH

THE CHURCH NEEDS YOU — YOU NEED THE CHURCH

No. 1 In A Series

MEET YOUR MINISTER

This Week: Rev. C. A. Warden

Pictured is Rev. C. A. (Chief) Warden as he appeared in his football uniform during his pre-war college days with the McMurry Indians of Abilene. Now pastor of Wesley Methodist Church, Brother Warden is still interested in sports of all kinds and often serves as referee for football and basketball games in this area.

"Chief," as he is known by his Cisco friends, is the kind of fellow one likes to meet. He seems to enjoy living and, what's more, he likes to help others enjoy living. A friendly smile, a new joke, a word of encouragement — these things are a part of almost any conversation with the aggressive young pastor of Wesley church.

He was born in McKinney, Texas, where he spent the first ten years of his life. From there he moved to Abilene with his parents, and it was here he finished high school, playing football for the Abilene High Eagles. Upon completion of high school, he entered McMurry College where he played two more years of football.

Rev. Warden's first pastorate was the Olden Methodist Church where he had a very successful

Rev. C. A. WARDEN

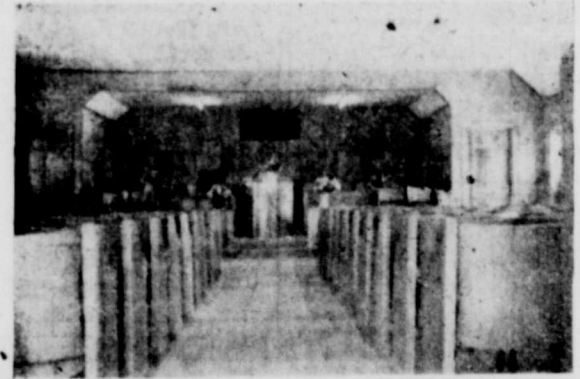

in 1941. "Chief" and Betty joined prayers and labors in the building of what is now Wesley Methodist Church. With the help of their congregation and the people of Cisco, they have built the beautiful white stucco church building on Avenue A. The interior of the auditorium is finished with knotty pine and nu-wood in various colors. It is equipped with new opera-type chairs, fluorescent lighting and venetian blinds.

The rapid progress of Wesley Methodist Church has been noticed far and wide. A recent edition of The Texas Methodist magazine carried a feature story on this church and its pastor. The publication compared the past five years at Wesley to the change of the chrysalis into a beautiful butterfly.

At present, "Chief" drives to Abilene three days a week seeking to complete his college work at McMurry while Betty stays home to take care of their two-month old son, Gary Lynn. Under this young couple's leadership and as they would put it, "by the help of the Lord," Wesley Methodist Church continues to grow and prosper "for the people had a mind to work."

Pictured above is the present church building of Wesley Methodist Church as it appeared immediately upon completion. Since this picture was taken, shrubbery and venetian blinds have been added.

At left above is pictured the interior of the beautiful auditorium at Wesley Methodist. Pastor C. A. Warden and choir are seen below.

Abraham Lincoln

EVERY SUNDAY IS....
THE LORD'S DAY
The Churches Of Cisco Welcome You

It is fitting that we consider some important words from this great American.

LINCOLN SAID: "If it were not for my firm belief in an overruling Providence it would be difficult for me in the midst of such complications, to keep my reason on its seat.

"I am conscious every moment that all I am and all I have is subject to the control of a Higher Power, and that Power can use me or not use me, in any manner or at any time, as in His wisdom and might may be pleasing to Him.

"And when the victory shall be complete —when there shall be neither a slave nor a drunkard on earth — how proud the title of that land which may truly claim to be the birthplace and the cradle of both those revolutions that shall have ended in that victory."

The Law of Diminishing Returns

... like the law of gravity, is controlled largely by natural forces. When man-made laws come in conflict with natural laws there is never any doubt which will win. Long before the point is reached where cause equals effect the diminishing law operates in. Levying taxes is an excellent example but men escape serious consequences of the law by selling a quality product for a reasonable profit.

Today Your Pharmacist Tells A Few Facts About...

THYROIDIN
On December 24, 1914, Dr. Edward Kendall wrecked an experiment with Thyroid Chemical by heating it too long in an effort to save some of it he mixed the residue with alcohol, alcohol and acetic acid. Christmas morning he found needle-like crystals along the edges of the solution which he was seeking—Thyroidin—the active principle of the thyroid gland. It proved to be the chemical which has been known to cure the disease known as "The Goiter." The medical profession has been using it for years and also show who has practiced medicine as long as the history of the world. She has been saying from say Cisco is complete.
