BECAUSE THE 1940 CENSUS TOLD

our town did this!

- It's a wonderful new playground to keep our kids off the streets . . . and we got it because the 1940 Census figures showed our children needed it.
- That's the way the Census works . . . that's the way it's been working since the first Census in 1790. Leaders in industry, business, labor and civic groups use Census facts in planning playgrounds, parks, schools, roads, housing; a better distribution of services like gas, electricity, water, and telephones; better transportation systems. Even our representation in Congress is determined by the Census.
- A new Census will begin April 1. When the Census-Taker calls, give him straightforward, honest answers. That's one vary you can help make this community of ours a better place to live in.
