Rapid Progress Is Reported By Texas Farmers

Farmers made rapid progress catching up with field work in all areas of Texas during the past week. This was the first full week of open weather over the entire state since the spring rains broke the drought in April.

Wheat harvest was in its full swing in the low rolling plains, southern and central counties on the High Plains and a few fields were ready in the northern High plains counties. All areas made excellent progress in the cultivation of growing crops and in the mowing of hay. Late sorghum planting was active in the northwest.

Cotton chipping was extended into extreme northern counties, picking got underway in the Lower Rio Grande Valley. High day temperatures along with the favorable moisture from earlier rains stimulated rapid vegetative development of all spring planted crops. Scattered showers in northern High Plains counties over the weekend will be beneficial for germination and early growth of feed crops which were just going into the ground.

Corn continued to show improvement, particularly in north central and northeastern counties under the favorable conditions. Sorghum harvest was underway in the Lower Valley and the crop was nearing maturity in the Coastal Bend. Condition of the growing crop was generally good in all areas. Seeding of sorghums continued in the High Plains area. Peanut planting was well underway in northern counties, and vetch harvest was starting. Cutting of hay was unusually active.

Ranges and pastures were supplying generous quantities of green feed over practically the entire state. However, the green feed supply was limited in some northwestern High Plains and western Trans-Pecos counties, where only light showers have occurred. Marketing of spring lambs continued tapering off, but was still running above the comparable period a year ago. All classes of livestock were doing well. Screw worm infestations continue unusually severe and general.

Death Rate High In Diabetics Who Fail To Discover Condition Early

AUSTIN, June 22 — The death rate from diabetes is three times as high in diabetics whose condition was not discovered until complications developed as for patients whose illness was recognized and brought under treatment before advanced symptoms appeared.

Based on recently completed national studies, this was revealed Thursday by State Health Officer George W. Cox.

"Diabetes has not always been a public health problem," Dr. Cox declared. "It became one when we found that the death rate is much greater when the condition is discovered late.

"Public education makes for lower diabetes death rates, and public education in such matters is a health department job," Dr. Cox said.

Individuals Hold Biggest Block of Public Debt

The extent of the distribution of the public debt among the nation's major investor groups and the importance of Federal securities to their total financial resources are shown in figures compiled by the U. S. Treasury Department. As of the close of 1949, the biggest single block of U. S. Government securities was owned by individuals. This amounted to \$69.5 billion and represented 34% of the \$203 billion of aggregate liquid assets of individuals. Liquid assets are defined as currency, checking accounts, savings accounts, and savings and loan shares in addition to Federal securities.

The second biggest block of U. S. Government securities was in the possession of the commercial banks, amounting to \$67 billion

on Dec. 31, 1949. This was equal to 56% of the \$120.5 billion combined assets of these banks, and represented the highest proportion of Federal security holdings to total assets of all the principal investor groups.

Third in order was the life insurance companies with holdings of \$15.3 billion of Federal securities, equivalent to 28% of their combined assets of \$59.5 billion as

of the end of 1949. Nonfinancial corporations had \$15 billion of Federal securities at the close of 1949, or 12% of their current assets of \$124.5 billion. Holdings of mutual banks aggregated \$11.5 billion, or 53% of aggregate assets of \$21.5 billion.

Fire, marine and casualty insurance companies combined owned \$5 billion Federal securities at the end of last year, or 4% of their combined assets of \$11.5 billion.

In line with their holding the largest single block of U. S. bonds, individuals received the largest interest payments in the aggregate on these securities, according to a study made by the Federal Reserve Bank of New York. Such payments last year were placed at \$1.7 billion, which was \$600 million more than the commercial banks received in interest on their holdings of U. S. securities for the year.

Total interest charges on the Federal debt in 1949 aggregated \$5.5 billion, exactly five times 1940's total, a measure of the increase of the national debt in the last decade. Of this, non-bank investors received \$4.1 billion as compared with \$800 million in 1940 and commercial and Federal Reserve banks combined received \$1.4 billion as against \$300 million in 1940.

Record Expected For Milk During Dairy Month

Production hits its annual high, and according to the U. S. Department of Agriculture, this month may set an all-time record.

Trying for a record, too, are some 4,200 Texas 4-H Club girls who are thinking up new ways to use the abundant supply of milk. They are participating in the 1950 National 4-H Dairy Foods Demonstration program, and will vie for top honors in county as well as in state and national competition.

Under guidance of local club leaders and Extension agents, the 4-Hers work individually and in teams to show club members and other groups the latest methods of preparing tasty, nutritious dairy foods. Favorites in the summer-time menus for Texas 4-H families are ice cream, milk drinks, frozen dessert, and cottage cheese dishes.

While a demonstration looks easy, it is by no means easy to achieve, reports a national cham-

panion. Many hours of study and of practice go into perfecting a demonstration before the girls are ready to step on the stage in their crisp white uniforms — poised, confident, and sure of their subject. They also must be ready to answer questions from the audience later.

Awards for outstanding performance are provided by the Carnation Company, sponsors of the program. Gold medals are presented to county winners, while each state winner is given a handsome watch. A trip to the National 4-H Club Congress in Chicago in November is in store for eight national champions.

Last year national and state honors were won by Alice Faye Davis of Leming. Gold watches also were presented to Gerolean and Grace Elaine Gislis of Victoria. They also were awarded county medals, along with 26 other 4-H club members.

The program is arranged by the National Committee on Boys and Girls Club Work and supervised by the Cooperative Extension Service.

NEWS FEATURES OF THE DAY

Sedan Defies Lightning Bolt

SUNNYVALE, Cal.—Using a Chevrolet four-door sedan, the Westinghouse Electric Corp. demonstrated here that a man's best friend in an electrical storm is his automobile. Joseph H. Cox, engineer, sat nonchalantly behind the wheel while a 2,400,000-volt of man-made lightning banged into the steel roof. As shown below, the shock passed around the roof and harmlessly out through the Chevrolet's tires. The volt was produced by the 25-foot-high "surge" or impulse generator which can be used for a quality control test on big power transformers.

BODY, SOUL AND BELONGINGS—These squatters, in Chichester, England, are sorting their goods after a demolition squad wrecked the Royal Air Force huts into which they had fled. One group of workmen, who had been given the wrecking job, put down their tools and went home because the evicted families had no other place to go. But another crew took over and set the

A FRIENDLY INTEREST—Snooky, a friendly pup owned by Mrs. Harry Rallis of Yakima, Wash., is just looking in on his friends, a mother cat and her three kittens. Snooky takes his meals with the cat family and looks after the kittens with as much interest as does their mother.

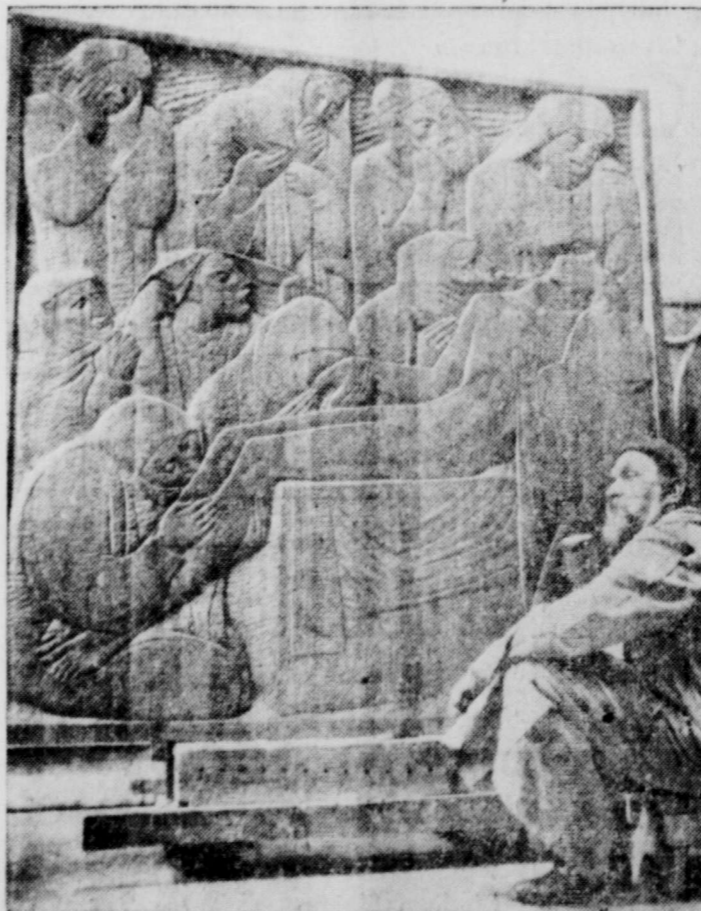

WITH THE WIND—International One Designs competing in the annual Amorita Cup Series between the Royal Bermuda Yacht Club and a U. S. group hit a good speed during one of the races on Great Sound, Bermuda. In the foreground is Sea Horse with Samuel Barton of Larchmont, N. Y., at the tiller. Bermuda won.

BOOSTING THE FAIR—Crosby M. Kelly, executive manager of the Chicago Fair of 1950, and Willah Hadley examine a folder of the Fair during a press conference in New York. Replacing last year's Railroad Fair in the Windy City, the new Fair opens June 24 and will be a dramatic theme of American achievement in agriculture, commerce, industry and science.

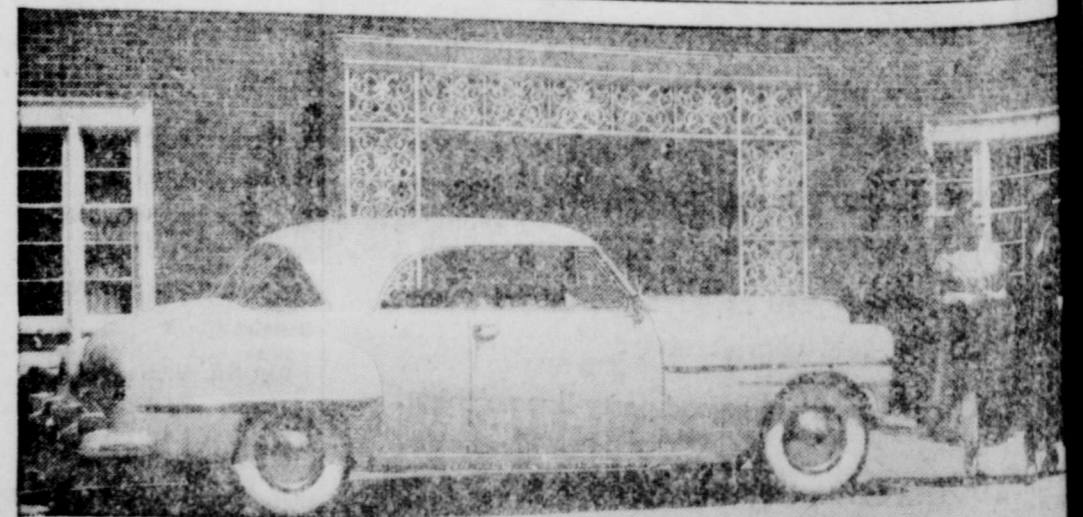

KIDDING AROUND—Joking a bit before they boarded the Queen Elizabeth in New York, actress June Havoc tries on a baseball glove while Israel-bound Eddie Cantor wears a catcher's mask. This is part of five tons of sports equipment being shipped to the displaced children of Israel.

RESTING AT LAST—Sculptor Ivan Mestrovic sits before one of the 25 panels depicting the life of Christ now on display in Syracuse, N. Y. The world-famous sculptor, who began this monumental work in 1917, is now a professor at Syracuse University.

NEW CHRYSLER "HARDTOP"

Popular "hardtop" styling has now been made available in Chrysler's New Yorker and Windsor lines. The sleek body style, shown here in the New Yorker Newport, combines the safety and comfort of the sedan with the smartness of the convertible. Open-car effect is accentuated by side windows and window frames which lower completely out of sight. Maximum rearward vision is provided by the "Clearbac" rear window which curves well into the permanent steel top.

ming, breathe in through your mouth and out through the nose, never inhaling through the nose. Improper breathing while swimming and diving frequently damages delicate nasal membranes. Infectious material may be washed from the nose into the tubes leading to the ears. "Swimmer's ear," an acute infection of the middle ear, is one of the leading summer afflictions.

Chronic sinus infections may develop when water is stuffed into the nose, interfering with the drainage from the sinus cavities. If you have recently had ear or sinus infections, get your doctor's advice on how to protect those delicate structures properly before you hit the water.

Billy's A Lucky Boy Say Bob and Kate

Bob Hope and Kate Smith are co-chairmen of the nation's first United Cerebral Palsy Appeal.

Billy Townley of Bound Brook, N. J.

Billy is five and learning to stand. He practices daily in the standing table designed for Cerebral Palsy youngsters. But only one out of 100 CP children get Billy's chance. The other 99 receive no help. Some of them are hidden in attics or committed to mental institutions, even though three out of four are as bright as Billy. Billy is lucky.

To bring hope to America's half-million Cerebral Palsied — and the 10,000 babies born with this crippling brain injury each year — Bob Hope and Kate Smith are heading the pioneer United Cerebral Palsy Campaign. Funds will provide treatment centers, train personnel and conduct research to help CP youngsters walk, talk and grow into useful citizens.

The Little Things We Notice —

... in preparing your abstract often grow into big things as time passes. For example, if the deed is drawn in a careless manner by an inexperienced person it may be full of errors which will show up in your abstract when it comes time to sell, get a loan or lease for oil and gas. The abstractor must copy the instrument just as he finds it on record. The moral is, have your legal documents drawn carefully and only by experienced conveyancers.
