# THE Sad STORY OF TEN LITTLE FREE WORKERS (It is later than you think . . . it can happen here!)

But if you cherish your freedom-worker have a care! Ten little free workers-Reddy was doing fine Until the socialists got him-then there were nine.

Eight little free workers thought this country heaven

But the government took over the railroads, then there were seven

Six little free workers 'till the day did arrive The steel mills too were federalized—then there were five

Five little free workers-but the farmers are free no more The farms have been collectivized—that leaves only four.

But with government groceries selling food-then there were two.

Four little free workers till the government did decree

All must have tree legal advice-then there were three.

Three time tree workers-the number is getting few,

Two little free workers-our story's almost done,

They work when and where ordered, and at a fixed rate you see, And it all could have been prevented if they'd only seen fit to agree And work together instead of saying "it never can happen to me!"

Does the fear of punitive action of government bureaucracies prevent your action in defense of the freedoms for which our forefathers toiled and fought . . . or is such action just too much personal trouble?
