The Voice of Defense" **Reports to Texas**

In times like these, when our way of life is threatened, Texans turn to their fastest, most dependable means of communication-and ask-

Is our telephone system prepared to handle its vital role as the 'Voice of Defense' ...

Here's part of the answer. There are twice as many telephones serving Texas as there were before World War II. Thousands of miles of long distance circuits have been added. Over 17,000 more telephone men and women are on the job to see this new emergency through-skilled, experienced people, tested and proved in many emergencies.

But preparedness means continued growth. We're looking ahead and working ahead to keep telephone service one of Texas' greatest assets in its defense efforts.
