

The Gay Philosopher

By J. W. S.

AN ESTIMATED 1,200 people flocked out last evening to watch the Ranger Pups win over our Midgets. It was largely because of the Midgets were mid- season compared with the Pups. There will be a return game later in the season, so maybe there will be revenge. The Junior High was out to play and it ended very good. In fact, it was a big time football from beginning to end.

Understand Coach Jack Everett plans to water the field down next Friday before the Loebers open their conference season against Ranger High. The field is really dry. In fact the whole country side is dry and needs a good watering down.

MR. J. T. RICHARDSON, who is one of the few people we know who figured SMU would win the Notre Dame last week plans to go up this Saturday and see if the SMU boys look like in person. He plans to see the OU-Rice game. Mr. James Duff tells us that he saw Texas and Oklahoma play last Saturday and he didn't have a ticket. He walked up to the gate and bought one. Mr. Charles S. Sandler reports that his party was lucky at the OU-Texas game. They had goal line seats and worked out, most of the playing took place in front of them. The Sandler went out to the report to see the Mustangs come from Notre Dame. Some 3,000 people were there. They met a special train next day and her daughter, Zell, was aboard. He told them that the Texans mainly enjoyed the trip and the game. Those of us who stayed home enjoyed it, too.

IF YOU HAVEN'T done so yet, your check into the Community Chest. And remember that you are donating to five propositions and make the check big enough. Cisco must not fail to meet its \$4,200 budget. Breckenridge has raised \$15,444 on a Community Chest budget. Let's give the campaign committee and the five benefitting agencies a vote of confidence by filling the budget over the top grand style. If you haven't been contacted, send your check to Chairman W. P. Guinn or Treasurer James Duff.

THE BOYS OUT at the Legion Rating Rink tell us that they get to have everything ready by Saturday. The new rink has been completed and painting on the interior is nearly finished. A big box of new bats and parts for old ones arrived yesterday.

ONE MINUTE editorials: He shows off least shows up. You can't get rid of your temper by losing it. A lady is a woman who makes it easy for a man to be a gentleman. If you want to see 90, don't look at the speedometer. A car can be a big shot without making a big noise. Winning an argument is the best way to be a friend. Two dollar bills are bad luck only if you don't have enough of them. People commit suicide with a fork than with a knife. Be sure your idea is sound before you sound off. It's the fresh that gets slapped in the pan. An open mind gets one into a lot of trouble than an open mouth. Spending money foolishly is no worse than wasting productive hours. No matter how you slice it, it's still a golf ball. It's no more of a sin to play golf on Sunday than on any other day, the way most people play it. Lipstick, rouge and careful makeup may make a woman look younger, but you don't fool a steep flight of stairs. There was one advantage to the old-style wall telephone. The girls had to quit talking when their legs gave out. What's wrong with this statement: "We're working to build a university football team can be proud

of it."

C. W. Guthrie of Fort Worth spent the weekend in the home of his mother, Mrs. Beatrice Guthrie. Mrs. Guthrie and son visited the Lee Guthrie's in Austin Sunday.

A FAR AWAY SCHOOL—Tiny Penny Aline Lawyer, left, of Wichita, Kans., jots the answer to teacher's question, while Sharon Shannon, right, of Heyworth, Ill., puzzles it out. The teacher is Mrs. Elizabeth Foster, who heads the newly opened school for about 30 children of American Air Force personnel in Shaftesbury, Dorset, England. Her husband is now stationed over there.

RANGER HANDS MIDGETS FIRST DEFEAT OF SEASON, 14 to 0

Cisco's Mighty Midgets were bounced out of the undefeated ranks at Chesley Field Tuesday night when a heavy Ranger Junior High Pup team took advantage of the breaks to score two touchdowns in the first half to win a 14-0 conference tilt.

TRIAL POSTPONED

The trial of Horace Walker, former Eastland County delinquent tax collector, on charges of embezzlement has been postponed again and reset for November 12 in district court at Breckenridge, according to information here today.

BINT WILL SPEAK

Supt. Arlin Bint will speak on the Gilmer-Aiken Law Thursday at 2:30 o'clock at the meeting of the local home demonstration clubs. The meeting will be held at the Junior High lunch room. The public has been invited.

AGNEW IN HOSPITAL

Mart Agnew, local minister, was undergoing treatment today at Graham Hospital. His condition was not believed to be serious.

Three Honored With Buffett Supper

Harold Hammett, Lee Cheeves, and Tommy Collier were honored with a buffet supper Friday in the home of Mr. and Mrs. E. H. Cheeves in celebration of their 14th birthdays which were October 13, 14, and 15.

The football theme of black and gold was carried out in the decorations. The table was decorated with miniature goal posts, footballs, and memo phones. Tiny penants were used as place cards. The centerpiece was an arrangement of marygolds.

Following the invocation the meal was served buffet style to Mr. and Mrs. John Popalio, Mrs. C. H. Hammett, all of whom had observed birthdays within the past week, and Mr. and Mrs. J. D. Collier, John Harvey Hammett, David Cheeves, Miss La Nell Upalio, Miss Kathryn Popalio, Miss Sue Collier, Miss Linda Cheeves, Harold Hammett, Tommy Collier, Lee Cheeves, and Mr. and Mrs. E. H. Cheeves.

Ranger scored first in the opening quarter when the Midgets were forced to kick to the Ranger 45. The ball was carried back to the Cisco 40 and a series of plays and an offside penalty gave them a first down on the Cisco 15. At that point Wharton, Ranger quarterback, pulled a sneak around his own left end to score. The ball was carried over for the extra point.

Late in the second period the Pups fell on a free ball following a punt and came up with the ball on the Midget 24. They worked the ball to the 11 yard line where Willingham went through his own right tackle to score. The ball was again carried over for the extra point.

The last half was played on an even keel with neither team able to get by the opposing defense. Cisco's offense was unable to get going and the passing attack, which had worked in previous encounters, failed to click. The Midgets attempted six passes, completed one and had two intercepted.

Outstanding on defense were Edward Bernie, Buck Whitehead, Joe Wayne Farrow and Bobbie Joe Johnson. Gerald Tucker and Tommy Reynolds were the principal ground gainers for the Midgets.

The Midgets play two more conference games. They go to Comanche Tuesday night for their second game with the Indians and the following Tuesday wind up the season against the Ranger Pups. If they win both games they can either win or tie for the district crown.

Playing for the Midgets were Don Price, Edward Bernie, Bobby Joe Johnson, George Page, Tommy Collier, Kenneth Penn, Carroll Thames, Joe Wayne Farrow, Gerald Tucker, Ronnie Qualls, Roger Lisenbeck, Frank Walton, Jimmy Branton, Tommy Reynolds, Bill Smith, Buck Whitehead, John Carlile, and Benji Lipsey.

Mrs. P. R. Warwick left today for Marshall where she will visit in the home of her daughter, Mrs. R. L. Martin, Jr. and family.

Mrs. H. S. Drumwright has returned from Waco where she has been visiting in the home of her sister.

Cisco Airman Back After Korean Duty

After operating more than six months in Korean waters, William J. Eudy, airman, USN, son of Mr. and Mrs. J. M. Eudy of Cisco, recently arrived in the United States aboard the aircraft carrier USS Boxer.

After arriving in the Far East last March, the Boxer's air-group, which consists of seven squadrons, made more than 7,000 strikes against North Korean targets.

The squadrons, which include Composite Squadrons 3, 61, 35, and 11, and Fighting Squadrons 721, 8791, and 884, and Attack Squadron 702, are all former "Weekend Warriors" ordered to active duty at the outbreak of hostilities in Korea.

In addition to flying air strikes against the Communist, 90 percent of the Boxer's crew contributed to the Armed Forces whole-blood drive, before the ship left Korean waters.

Livestock Meeting Is Postponed To Monday

A meeting for the purpose of electing officers for the Cisco Livestock Show Association has been postponed until next Monday night, President A. Z. Myrick reported today. The meeting had been scheduled for Tuesday night.

Mr. Myrick asked all directors and officers and anyone interested in livestock to attend the meeting, which will be held at the Chamber of Commerce offices.

ENTIRE SOUTH STAND RESERVED FOR RANGER FANS ON FRIDAY

Supt. Arlin Bint of Cisco High School reported today that the entire south stand at Chesley Field will be reserved for Ranger High School fans who are expected here Friday night for the opening of District AA-10 football play between the two teams.

Officials of the Ranger School system were here today and told Mr. Bint that Ranger probably would send at least 1000 fans along with students and the high school band. Cisco school authorities had sent 750 adult tickets to Ranger Monday.

Mr. Bint said that arrangements were being made for the season's largest crowd expected for the game. Tickets were selling at a rate that indicates "standing room only" for Friday night.

Good Area Reports Feature Progress Week Observance

Community Chest Committees Turn In Nearly \$1,500

A total of \$1,426 had been turned in Tuesday night by workers in the second annual Cisco Community Chest drive, Treasurer James S. Duff reported. The drive opened Monday with the goal of \$4,200 to be raised this week.

The returns represented reports from about one third of the committees in charge of the project. Drive officials were optimistic that the full budget quota would be raised to assure the five benefitting agencies of adequate finances for the coming year.

Chairman W. P. Guinn of the Rotary Club's drive committee urged members of the 24 business district teams and those in charge of residential districts to complete their work as speedily as possible, pointing out that "we want to complete our job by Saturday."

Agencies to benefit from the drive include the Boy Scouts, the Girl Scouts, the ABC Club, the Teen-Age Hobby Club and the Cisco Welfare Association.

Budgets for the agencies were submitted to the chess committee and approved.

Housing Authority Directors Meet

Directors of the Cisco Housing Authority met Tuesday afternoon to work on matters pertaining to acceptance of the 52 brick apartments from the contractor. Chairman S. H. Nane presided, with all commissioners present.

The matter of insuring the apartments was discussed and the matter was left in the hands of Chairman Nane, R. L. Ponsler and Secretary B. A. Butler for action. The authority interviewed several applicants for the position of maintenance superintendent.

Another meeting will be called soon to employ a maintenance man. Several other applicants will be interviewed. The man employed will be required to live in one of the apartments.

Sunday, Oct. 28, was tentatively set as the date for a formal opening of the housing project. The general public will be invited to inspect the apartments during the opening. Applications for apartments still were being processed.

CLUB GOES TO FAIR

The Cisco High School and Junior College choral clubs went to Dallas early today to attend the State Fair of Texas and to participate in a special program. Director Robert Clinton, Principal Buck Overall and others accompanied the group. They planned to return home tonight.

CONDITION UNCHANGED

The condition of W. H. LaRoque, who suffered a cerebral hemorrhage last Saturday, remained unchanged today, attendants at Graham Hospital reported. Mr. LaRoque is an instructor at Cisco Junior College and has been a resident of Cisco for more than 30 years.

SINGING IS PLANNED

The regular third Sunday afternoon singing will be held in Eastland at the Church of God at 2 p. m. Sunday, according to an announcement here today by the Rev. W. E. Hallenbeck, president. The general public has been invited.

Miss Lovell Paul, student at North Texas State College, Denton, spent the past weekend here with her parents, Dr. and Mrs. C. E. Paul.

GALLIC GRASS—Feeding on virgin grazing ground—the lawn of the Champ de Mars in Paris in the shadow of the Eiffel Tower—this city-bred calf wouldn't be so contented if she knew what was in store for her. Her owner, noting the French butchers' threat to strike if the government went through with a proposed price cut-back, decided to fatten up his own beef on the hoof.

WRANGLERS TO FINISH PLANS FOR DECATUR CONTEST TODAY

The Wranglers of Cisco Junior College will complete their plans in a practice session today for a conference game at 8 p. m. Thursday against Decatur Baptist College at Decatur. Coach Scat Russell reported that the Wrangler squad would leave by bus for Decatur at 2 p. m. Thursday.

The probable starting lineup indicated that the Wranglers are planning to use power for a running attack. Both Carrol Chambers and Larry Neidholt, hard-running backs, were listed as probable starters, along with Burl Moses and Wayne McLean in the backfield. Moses and McLean are also good runners.

In the line, the Wrangler offensive team will look about the same as last week with L. A. Noles and Charlie Atkinson at ends, Don Darr and Gerald Davis at tackles, Gerald Salter and Bobby McDonald at guards, and Walter Knapp at center.

If the Wranglers take to the air, Rex Moore will move into the quarterback post and Bobby Gibson will probably go in at end. Gibson proved to be the team's best pass catcher last week, with Bob Powelson a close second.

Most of the Wranglers are in good condition for the game. Bob Huffmyer, with a bad shoulder, and Gene Eddings, with missing teeth, will suit out and may play if needed. Center Wade Mitchell won't be in uniform until his broken hand comes out of the cast.

The Wranglers will have supporters at Decatur. The College mand and a delegation of students will ride school buses to the game, leaving the college at 4 p. m.

Chest x-ray Groups Will Hold Meeting

A meeting of representatives of Cisco civic clubs will be held at 7:30 p. m. Thursday at the Chamber of Commerce to make plans for the coming chest x-ray program. Dr. E. H. Ramsey will preside over the meeting.

FOR RENT — three large room modern apartment. Unfurnished. Inquire at Daily Press Office. 232 tlc

Townsite Well Is Put On Production

Oil Progress Week observance in Cisco was highlighted today by the completion of another flowing oil well in the townsite. The E. K. Carey Drilling Company's No. 1 Hoffman Heirs, Lake sand test in the south part of town, began flowing into tanks.

Bottomed in the Lake sand at about 3,475 feet, the well was given the hydrafrac treatment Monday and opened Tuesday afternoon. The oil used in the hydrafrac was flowed back as the well kicked off and it was still flowing today. Pressures were good and oil men believed it would be good for at least 50 barrels per day with a high gas ratio.

J. E. Connally, Abilene operator, was preparing to begin drilling just west of the Hoffman Heirs property in south Cisco. The new well will be his No. 1 A. Z. Myrick. Surface pipe was to be set today.

Another Oil Progress Week highlight was the outlook for Mississippian production southwest of Cisco. According to reports, the Ownsby Drilling Company No. 1 Mrs. Effie Brown has been reopened under a permit to deepen and set pipe Tuesday at about 4,000 feet. It is some five miles southwest of town. have good prospects of completion in the Mississippi line. It was originally drilled about ten months ago and plugged. After re-examination of logs and records, it was decided to reopen for a Mississippi test.

Considerable acreage is under lease in the area southwest of town.

Seven miles west of Cisco, there were good reports from the J. J. Lynn No. 1 C. C. Phippen, drilling near Dothan. A drill stem test Tuesday in the upper Caddo at 3,088 feet logged a good show of both oil and gas. A second Caddo test was run from 3,127 feet with a lessor show. Drilling was continuing.

Two miles north of Cisco, Kupp and Dickson No. 1 Weddington was drilling below 2,000 feet in a wildcat test that is being closely watched by area oil men. Located near Lake Cisco, production in this well would open considerable activity.

Two other tests, both offsetting production, are planned for the Lake Cisco area soon. A. W. Gregg of Houston will drill his No. 1 F. C. Cheshire, and W. G. Skelly will sink his No. 2 A. L. Thomas. Both are due to begin in the near future.

North of Cisco, the Sorrells Oil Company et al No. 1 Mitcham Estate was drilling at 4,100 feet in shale early today. Ranger lime tests failed to produce a show.

Cities Service Oil Company has announced plans for a new well on their Hittson Ranch leases north of Cisco. Bankline Oil Company, discoverers of the Bankline-Owens pool five miles northeast of Cisco, is readying plans for a new well in that area. They will drill their No. 1 Reynolds-White in the near future. Location is in Section 50, H&TC Survey.

Cooper and Hemphill Oil Company is drilling the No. 7-B J. S. Hart in the same pool — Section 65, Block 4, H&TC Survey. The Bankline-Owens pool has been called one of Central West Texas' major developments of recent months. Discovered in May, 1950, the pool now has 58 wells and several projects drilling or pending. The total field daily allowable was 2,449 barrels on Oct. 1.

Oil men generally have had a good year in the Cisco area, and development is at a brisk rate. Eastland County began producing oil in 1917 and had recovered 108,361,278 barrels on last January 1. Production in 1950 amounted to 984,675 barrels.

Mr. and Mrs. C. C. Clarkson and Mrs. W. D. Wheatley and daughter Virginia, of Dublin visited Sunday in the home of Mr. and Mrs. Carrell Smith.

BILLION BARREL YEAR

The first "billion barrel year" in Texas' oil history loomed in sight as the state's wells, numbering more than 130,000, produced at record rates this week.

Fired by peak demands from the public, military, and industry for petroleum products during 1951, Texas crude oil and refining activities have climbed to new heights, with crude production for the first six months totaling a record 487,830,000 barrels.

Refineries hiked activities to meet this climb in production as runs to stills during the first half of the year totaled 324 million barrels. Texas' 79 refineries during the first six months of 1951 processed 68.4 per cent of the oil produced within the state and sent their vital products by pipe line, ship, train, and truck to the marketing centers of the nation.

Since June 1951, demand for Texas petroleum has caused a steady increase in allowable until an all-time high allowable rate of 3,059,367 barrels per day for September was issued by the Railroad Commission. If this rate continued throughout each remaining month in 1951, Texas oil production would reach an annual record mark of approximately one billion barrels, it has been estimated by the Texas Mid-Continent Oil & Gas Association.

Latest production figures for the state's first half-year activities show that production ran 32.6 per cent ahead of the comparable period in 1950 and 10.5 per cent ahead of 1948, the previous peak year.

Booming production activity in Texas has given the Texas taxpayer a healthy boost in footing the cost of state government. For the 12 months ended August 31, oil production taxes hit a record \$111,949,000. Gas production taxes were \$14,246,000, or \$4,000,000 over the previous 12-month period.

Oil and gas royalties paid to Texas landowners during 1951 will reach nearly \$400 million, according to a Texas Mid-Continent Oil & Gas Association estimate.

The 200,000 Texans in the state's petroleum industry were responsible for Texas supplying 44.5 per cent of the nation's petroleum needs during the first half of this year. In addition to record production of crude oil, Texas produced 52,124,000 barrels of much-needed natural gasoline and liquefied petroleum gases, or 52 per cent of the nation's total.

Increased production in the Texas oil and gas industry has a moving effect on the state's largest industry — from actual production through marketing. Latest available figures issued by the Texas Employment Commission show that during July of this year 109,900 Texans were engaged in the production and drilling end, a gain of 9,700 over the same month in 1950.

About 44,000 Texans were engaged in petroleum refining activities during July 1951, compared with more than 37,500 for the same month last year, a gain of about 6,500.

Drilling and allied production workers were active in accelerated drilling activities in the West Texas Spraberry formation, a trend that has highlighted Texas drilling operations this year. These deeper wells are expected to add more valuable reserves to those which are important to the state's economy.

Both production and drilling workers and refinery employees receive the highest average weekly wages of any of Texas' industrial workers. Production and drilling workers received \$88.79 during July, while refinery average weekly pay was \$89.25. These wages account for a large portion of the Texas oil industry's annual payroll of three-quarters of a billion dollars.

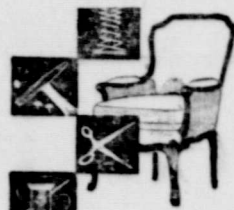

In addition to the Texans in production and refining, another 25,000 are employed in industries closely affiliated with oil and gas production and processing. Another 200,000 who are engaged in the retailing, professional, and service fields are depending upon the demand created by employees in the basic petroleum industry.

Mr. and Mrs. L. G. Skiles and Mrs. C. A. Farquhar visited relatives in Big Spring over the weekend.

Mrs. Skeet Fambrough of Strawn visited in the home of her parents, Mr. and Mrs. Paul Huestis, Tuesday.

Mr. and Mrs. J. R. Reagan visited in Dallas over the weekend with friends and also attended the State Fair.

Automatic Gas Range Sale NOW ON!

you just know she has an automatic Gas range

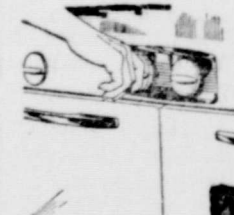

CLEAN! New automatic Gas range burners give pure, stainless heat. Pans stay mirror-bright without scouring over the crystal-clear, true-blue flame. No messy, smokey, "burning-off" when spillovers occur, either!

CLEAN! Grease-laden vapors stay inside the pan with modern waterless Gas cooking. Only Gas ranges give you the controls so necessary for this modern cooking. Why? Because there are dozens of heats to cook with—not just a few factory-set heats.

CLEAN! Automatic, accurately controlled oven lets you roast meats in their own juices... at temperatures as low as 250 degrees. No water added. Less steam or vapor—that's the secret of a spotless kitchen.

CLEAN! Only Gas ranges broil with the door tightly closed. No grease-laden vapors as in non-flame ranges. The locked-in vapors are consumed by the live Gas flame. No grime... to smudge walls and drapes.

her kitchen is spotless

HER SECRET is to control steam; thereby banishing grease-laden vapors. Only an automatic Gas range possesses the flexibility so necessary for waterless top-of-stove and oven cooking. And broils without smoking with the broiler door tightly closed!

Right now you can get an automatic Gas range that will make your kitchen lighter, brighter, 10 years younger at a special saving. It's Old Stove Round-Up Trade in Sale time at most Gas Appliance Dealers and Lone Star Gas Company. See the special values, today.

SOCIETY AND CLUBS AND NEWS OF INTEREST TO WOMEN

Louise Wilson Becomes Bride Of E. Campbell

Friday evening, October 12, Mary Louise Wilson became the bride of Alton Earl Campbell in a single ring ceremony at the home of Rev. Paul Stephens with Rev. Stephens officiating.

The bride wore a street length of royal blue silk crepe rhinestones trimming the Her corsage was of red buds.

The maid of honor was Miss Halie. She wore a gold and a corsage of orchid carnations. Benny Hagen served room as best man.

Misses Jessie Warren and Mary sang the couple's love "I Love You Truly." They

were accompanied on the piano by Miss Melba Harrelson.

As the couple left on their wedding trip to Houston, the bride was wearing a brown gabardine suit with matching accessories.

Mrs. Campbell is the daughter of Mr. and Mrs. J. F. Wilson of Cisco. The groom is the son of Mr. and Mrs. A. O. Campbell of Houston. He is now serving in the Navy and is stationed at Bremerton, Washington. They will return shortly and the bride will be at home with her parents.

Those attending the wedding were: Mr. and Mrs. J. F. Wilson, Mr. and Mrs. A. O. Campbell, Elizabeth and Regina, Mr. and Mrs. E. C. Mostley, and Wilma, Mr. and Mrs. J. D. Wilson, Sharon and Larry, Fred Allen and Mrs. Paul Stephens and son, Bill.

Open House Honors Ernest Schaefer

Mr. and Mrs. A. E. Soutter of Dallas honored Mrs. Soutter's sister and her husband, Mr. and Mrs. Ernest Schaefer of Cisco, with an open house Tuesday, October 11, in celebration of their twenty-fifth wedding anniversary.

The house was decorated with fall flowers which were arranged by Mrs. Irene H. Keeney, State Garden Club Judge.

Mrs. R. J. Williams presided at the guests book. Refreshments of punch, cake, and mints were served by Mrs. Fred Amsler.

Out of town guests attending were: Mr. and Mrs. Fred Amsler and Mr. and Mrs. C. H. Harber of Corpus Christi; Mrs. Albert Winz of Seymour and Mr. and Mrs. Joe W. Tate of McAllen.

Other guests present were: Mrs. Rosa Amsler, Mr. and Mrs. R. J. Williams and Joan, Mr. and Mrs. Ross Curtis, Mrs. Lewis Hogan, Miss Lucy Ann Hogan, Mrs. Julius Schaefer, Mrs. Oscar Bartel, Mr. and Mrs. J. Watt Davis,

Mr. and Mrs. Walter Sack, Walter and Ronnie, Mr. and Mrs. Don Benggie and girls, Mr. and Mrs. J. Watt Davis Jr., Mr. and Mrs. George Soutter, Mrs. Hall Brown and Judy, Mrs. Charlie Murman, Mr. and Mrs. O. M. Powell and David, Mr. and Mrs. Cotton Sterling, Mrs. W. A. Hudel, Mrs. Eula Haddox, Mrs. Irene H. Keeney, Thomas Soutter, Mr. and Mrs. Ernest Schaefer, and the host and hostess.

Those sending gifts were: Mrs. Minnie Dormier, Seymour; Mr. and Mr. Charlie Schaefer of Junction, Mr. and Mrs. Herman Schaefer of Nimrod, Mr. and Mrs. Rudolph Schaefer of Cisco, Mr. and Mrs. Londolt of Dallas and Mrs. Emma Schaefer of Cisco.

Rev. Stephens Talks At Brotherhood Meet

The Brotherhood of the East Baptist Church met Monday evening at the church for regular meeting.

The meeting was opened with prayer and the singing of two hymns. Bud Clack spoke on "The

Responsibility of Prayer" and Rev. Paul Stephens spoke on "Man's Responsibility in The Home." The meeting closed with prayer.

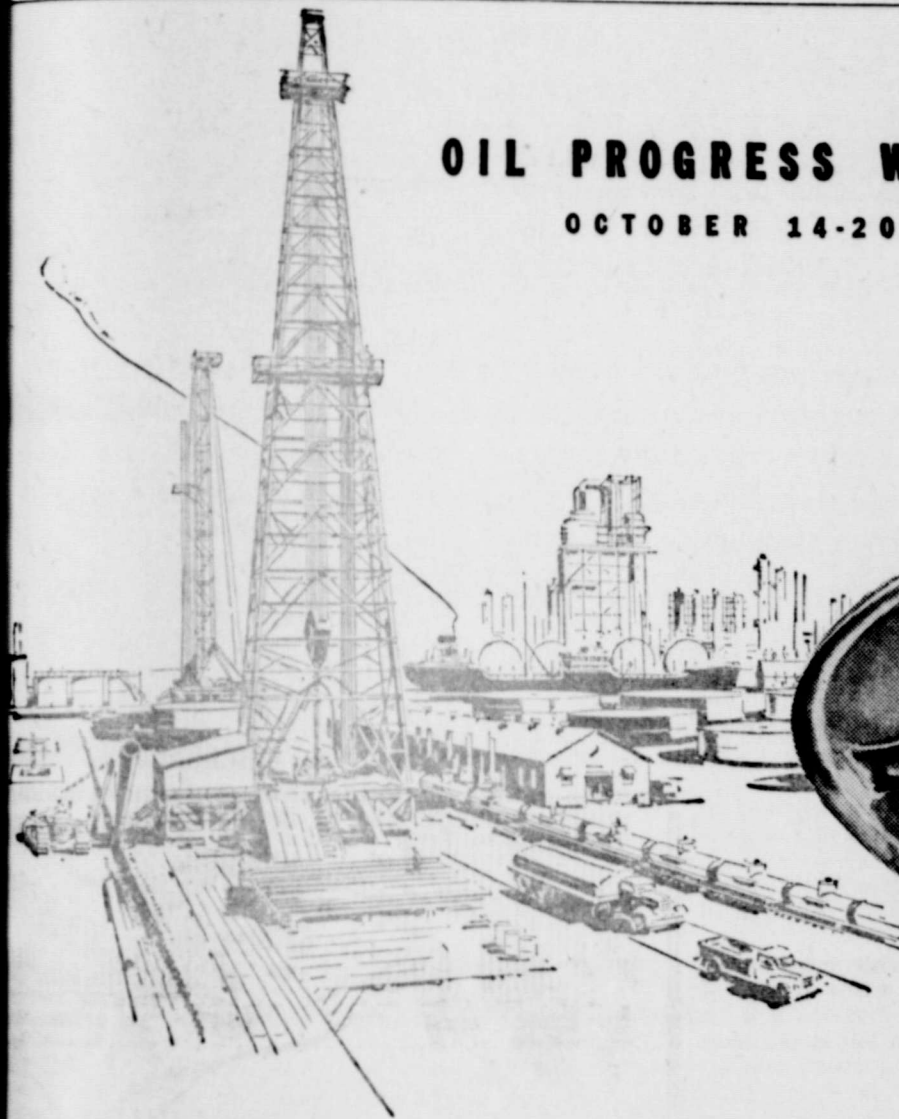

Melody YWA Meets At Church Monday

The Melody Y. W. A. of the East Cisco Baptist Church met Monday evening in the educational building of the church for community missions program.

Miss Jessie Warren led the group in the singing of the YWA song, "Oh Zion Haste," and "We've a Story To Tell to The Nation." Mrs. Jimmie Ervin led in opening prayer. The hymn, "Take Time To Be Holy," was then sung by the group and Marshall Ervin led in prayer. The president, Mary Dryden, then presided during the business session. Melba Harrelson was in charge of the program, "The Four R's." Those participating on the program were Mrs. Jimmie Ervin, Melba Harrelson, Mary Wood, Jessie Warren, and Mary Dryden.

OIL PROGRESS WEEK

OCTOBER 14-20

Oil Progress means more to Texans!

This week the United States will focus its attention on the oil industry's contributions to the high American standard of living, to the nation's industrial progress, and to the national defense. *This is Oil Progress Week.*

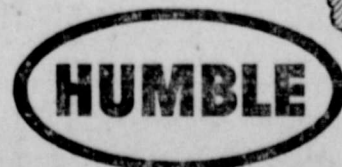

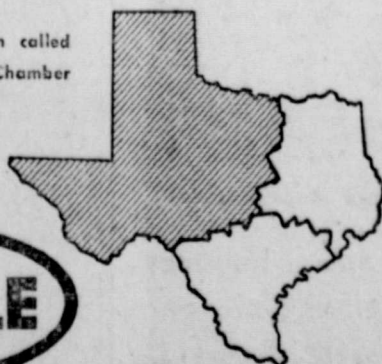

Texans know the story well: as home folks in the oil country, they share the oil industry's pride in supplying the resource that powers a major share of the country's industries, all its airplanes and automobiles, most of its ships and trains.

Texans realize, moreover, that oil's progress means even more to them than it does to many other Americans. For example, the value of the crude oil produced in *West Texas** in 1950 was approximately a billion dollars. This is not "boom money." West Texas uses it to pay taxes, salaries and wages; it buys homes, groceries, light and heat; doctors collect a portion of it; landowners receive

royalty and lease payments; a sizable portion of it is reinvested in the further development of the region's oil resources.

In a word, the progressive development of the petroleum resources of West Texas has enormously stimulated its thriving industrial, commercial and agricultural development, and this is the *more*, the plus, that oil's progress means to West Texans. Modern, efficient production practices will conserve the oil and gas resources of the region, and oil's progress will continue to mean more to West Texas for many years ahead.

* The shaded area is the region called West Texas by the West Texas Chamber of Commerce.

HUMBLE OIL & REFINING COMPANY
HUMBLE PIPE LINE COMPANY

THE CITY OF CISCO SAYS

HATS OFF TO CISCO'S

PROGRESSIVE OIL COMPANIES

Our hats are off to the oil companies of our community — part of a progressive industry that has met every challenge you and the nation have given it in peace or war.

With civilian use of oil mounting to new peaks every month and military requirements increasing steadily, U. S. oilmen are breaking all records to meet your needs.

This week we are glad to join Cisco's oilmen in observing Oil Progress Week. By their continuous, faithful service to our community, the oil companies of Cisco have helped make every week of the year Oil Progress Week.

Cisco Chamber of Commerce

— OIL PROGRESS WEEK — OCTOBER 14-20 —

A SALUTE TO The Oil Men of the Cisco Area

We're all proud of the way Cisco has grown over the years — proud of the way we've grown as a community.

As local businessmen Cisco's oil men have helped make this progress possible. They have met every challenge we have given them and have constantly gone all-out to meet our ever increasing needs.

This week we're happy to join every one in observing Oil Progress Week. It's our opportunity to salute them for their continuous, faithful service in our community.

50 MILLION "MOUTHS" TO FEED

That's what we've got today. Yes, there are now 50 million oil-powered motor vehicles on the nation's streets and highways—and we have our share of them right here. Supplying this fleet of cars, trucks and buses is one of the biggest challenges the oil industry has ever faced. This is our pledge that we'll continue to be on the job for you—doing everything we can to keep your gas tank filled, your car serviced and rolling smoothly.

OIL AND GAS OPERATORS PAY LARGE PART OF STATE TAXES

Texas oil and gas operators poured a record \$126 million in production taxes into the state treasury during the 1951 fiscal year, indicating that the producers' tax share will be the highest percentage load on record, compared with other tax-paying groups.

Final comparative figures are not available, but preliminary calculations by the Texas Mid-Continent Oil & Gas Association indicate that based on previous records, the Texas oil and gas producer carried a major share of the state's tax income during the fiscal year ended August 31, 1951.

The State Comptroller's recent report showed that during the 1951 fiscal year the petroleum industry paid \$112 million in crude oil production levies and \$14 million on natural gas. The industry's ad valorem taxes, which usually make up about one-third of the state's property tax yield, possibly were more than \$11 million.

The significance of the role of oil and gas producers in financing state government is shown in 1950 figures, which reveal that the \$93 million paid by oil and gas operators amounted to 54.1 per cent of the state's total tax revenue, exclusive of consumer taxes, such as those on gasoline, cigarettes, cosmetics, etc.

Production taxes on Texas oil and gas operators are levied through an occupation tax, as it is called under the law. The present rate of taxation on crude oil is 4.6 per cent of the value of the oil produced. On natural gas the rate is 5.72 per cent. For administrative purposes the state also levies a tax of three-sixteenths of one cent on each barrel of crude oil. The occupation tax is a per-centage levy on the gross sales of the producer.

It allows no deductions of any kind.

The additional natural gas gathering tax of 0.45 cents per thousand cubic feet, which went into effect September 1, 1951, is expected to raise \$12 million to keep the state's treasury out of the red for the next two years.

In addition to its share in financing state government and education programs through production taxes, the oil industry also pays ad valorem and franchise taxes. About one-third, or 34.5 per cent of the total ad valorem taxes paid by the industry were about \$10 1/2 million, while franchise taxes amounted to over \$3 million.

The petroleum industry operates under a tax system that is different from most other businesses in that the oil and gas operator is taxed under a set rate and the amount paid by him cannot be passed along to the consumer.

There is also a heavy tax on gasoline, the industry's principal product, but this is not included in the following analysis because the gasoline tax is paid directly by the consumer.

During 1950 Texas oil and gas operators continued to absorb a major share of the cost of state programs. A study of the funds used for state educational purposes shows that the petroleum industry paid 33.3 per cent of the \$60 per scholastic received by the public schools from the Available School Fund.

During the 1950 fiscal year, \$69 million was made available to the Foundation School Fund. Of this, \$34 1/2 million came from the oil and gas industry, or 50 per cent of the total. Of the funds appropriated during 1950 for the University of Texas, almost one-half were derived from oil and gas taxes. Appropriations to other state colleges carried a similar share of oil and gas tax money.

Nearly half of all the appropriated money for educational institutions, correctional institutions, and state hospitals, as well as many administrative agencies, came from the Texas oil and gas industry.

Not included in the analysis of these funds, which are based only on direct taxes on the industry, is \$18,926,260 that went to the Permanent School Fund and to the Permanent University Fund from lease rentals, bonuses, and oil and gas royalties.

The petroleum industry also continued to play a major role in financing state welfare. State contributions to assistance to the aged were \$31 million during 1950. The industry's share in this was \$16.3 million, or 52 per cent. The industry paid 54 per cent of the \$10.4 million that went into the Teachers Retirement System during the year.

YOUR PROGRESS AND OIL PROGRESS GO HAND IN HAND

Geological Surveyor maps rock strata—an early step in oil exploration.

Known Underground U.S. Oil Supplies Reach All-Time High

Last year the American people used more oil than ever before. Yet, at the end of the year, known oil supplies in the ground were greater than when the year started. We are proud of the part our company played in setting this all-time record.

A survey just completed shows that: The search for oil in the U. S. during 1950 uncovered 3,329,000,000 barrels of petroleum.

These new additions to America's known underground supplies exceeded by over 50 per cent the

amount of oil taken from the ground last year.

Today U. S. oil supplies in the ground are more than four times greater than 30 years ago. They now total almost 30 billion barrels—an all-time high.

Year after year, thousands of privately-managed oil companies strive to find more oil than their rivals. That's one good reason America finds more oil than it uses. Here is competitive business at work—and a good example of how this system benefits you and the nation.

BIGGEST HUNT IN HISTORY IS UNDERWAY IN TEXAS - FOR OIL

The biggest hunt in Texas' history is now taking place. All over the state shooting parties are hunting for traps — traps that are full of oil. But these traps are a mile or two below the ground and the hunters have to shoot from the surface.

Oil in Texas once was found by accident, or because it seeped to the surface of springs or leaked into water wells. But the days of finding oil by accident are gone. Men now hunt for oil using every branch of science and a program of drilling thousands of wells a year. According to the Texas Mid-Continent Oil & Gas Association, Texas operators drilled about 16,500 wells last year as part of this search and about 21 per cent of those were wildcat wells in unexplored areas.

Oil traps are peculiar combinations of rock formations that occur thousands of feet underground. The word "pool" is a holdover from the days when men thought oil existed as underground lakes or rivers. Now it is well established that oil is locked tightly in certain types of porous rocks. They are limestone or sandstone rocks with oil and associated material packed tightly around each tiny grain.

Oil men use a theory of how oil was formed which works out satisfactorily in enabling them to locate traps. Millions of years ago, Texas was an ocean. Animal or vegetable life settled to the bottom of the ocean and decayed. Under heat and pressure from huge mud deposits that settled on top, this decayed matter was gradually transformed

into oil. As more mud, lime, salt, and sea shells settled, and as the earth heaved and wrinkled during its formations into different types of land surfaces, the mud layers were squeezed into many different types of rocks.

The tremendous pressure squeezed the oil into nearby layers of porous sandstone or limestone, which absorbed it like a sponge. There was salt water all through these layers of rock and it pushed the oil upward when the formation was on a slant.

This process probably took millions of years. The porous layers became twisted on a slant at the earth's surface buckled into mountains, valleys, domes, and basins. As more mud settled, the ocean floor filled up and finally emerged above the surface.

An oil trap may be in the top of a wrinkle in porous rock, which has directly above it a layer of non-porous rock. Or, it may be in what is called a "stratigraphic" trap, where the upper end of a layer of oil-bearing rock thins out into non-porous rock.

Locating these oil traps has become an expensive and challenging science. At mid-year, about 152 seismograph crews and 19 gravity meter crews were operating in Texas. Monthly operating costs for these geophysical exploration crews are about \$20,000 for seismograph and \$6,000 for gravity meter.

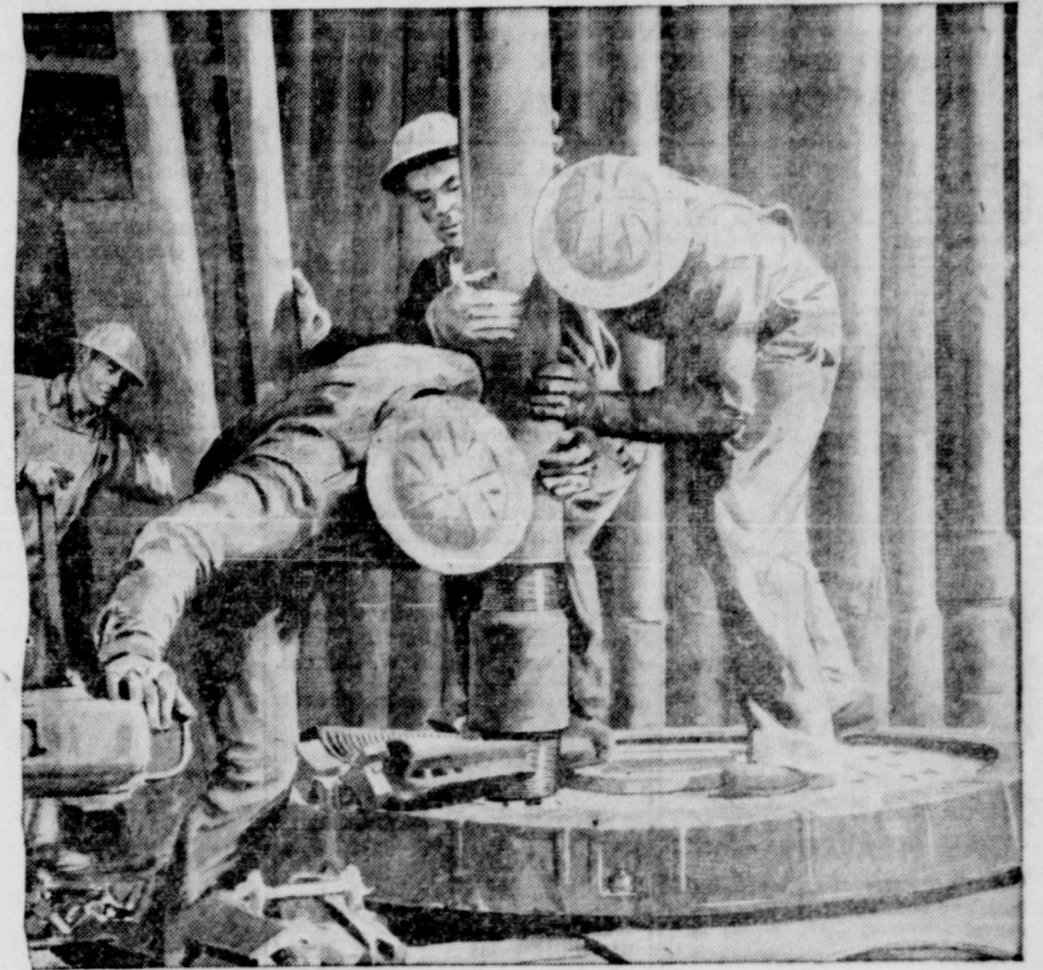

To shoot a trap, the crews drill small holes in the ground and set off dynamite charges at the bottoms. This causes shock waves to travel through the various rock layers, which in turn are recorded on the delicate seismograph. Waves travel at various speeds through the different rock layers, so by timing the waves and measuring their strength, the crews can measure the depth and thickness of the porous and non-porous rock layers.

In this way they can measure the dips and convolutions of the old ocean bottom. Their shooting and mapping is completed when a study of the layers indicates a combination of conditions likely to form an oil trap. Then, that is the place to drill a wildcat well.

But there is a catch. All traps do not have oil in them, and there is no device to determine the presence of oil except the costly method of drilling. The hunters have to locate the trap. Only the drill is proof of what is there, as evidenced by the fact that of the 3,443 Texas wildcat wells drilled in 1950, a total of 2,755 were dry holes.

The risk involved in drilling is why the oil business is still so financially hazardous. A conservative estimate of \$10 a foot is a lot of money to put into a well that may find nothing but salt water after drilling 4,000 feet or so. Texas operators lost an estimated one-quarter billion dollars in 1950 as a result of dry holes, which had a total footage of 22,554,980.

But shooting for traps is still the basic way of hunting for oil and the current high demand for petroleum from civilian and military sources has put a record number of oil-trap shooters to work all over Texas this year.

We're breaking all records—to serve you and the nation

• With civilian use of oil mounting to new peaks every month and military requirements increasing steadily, oil production companies like ours are breaking all records to serve you and the nation.

We're proud of the job we're doing. And this is our pledge that we will continue to serve you and the nation well.

Fill your crankcase with new Phillips 66 Heavy Duty Premium Motor Oil. Try it for ten days—or up to 1,000 miles. If it doesn't satisfy you completely, your Phillips 66 Dealer will arrange for a refill with any available oil you want at our expense.

The reason we dare make this guarantee is simple. We are sure this new and improved Phillips 66 Heavy Duty Premium Motor Oil will please you. It gives you a new high in Lubri-taction.

WEAR PREVENTION? Yes! It keeps corrosion and friction from harming your engine.

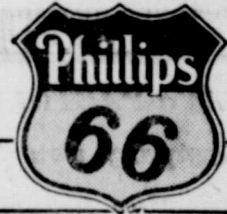

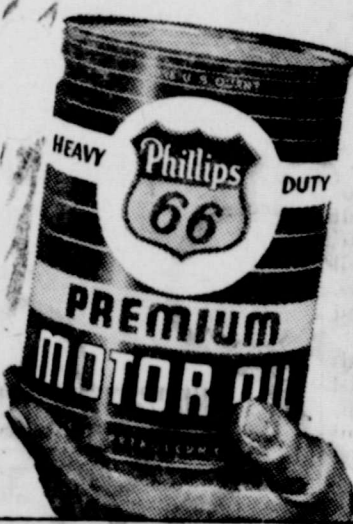

BEARING PROTECTION? Yes! Acids are neutralized—protecting bearing surfaces from pitting.

CLEANING ABILITY? Yes! And a clean engine means more power—less gasoline consumption.

LOW OIL CONSUMPTION? Yes! It resists decomposition—so fewer make-up quarts are needed over thousands of miles of operation.

It's because of important features like these that Phillips 66 Heavy Duty Premium Motor Oil

surpasses manufacturers' specifications for all makes of cars. It's truly a "Heavy Duty" motor oil—will do an outstanding job in trucks as well as passenger cars. Try it! We guarantee satisfaction.

Christian Group One Has Meeting Tuesday

Group One of the First Christian Church met Tuesday in the home of Mrs. Leon Cagle for their weekly meeting.

Mrs. J. M. Flournoy, president, presided during the business session. Mrs. D. E. Aden led in the opening prayer. The devotion on the beginning of the church and the spread of friendship,

taken from the study book, was given by Mrs. J. R. DeArmond. The roll was called, the minutes read and approved, and reports given. Plans were made for the 11th District Convention to be held in Cisco at the First Christian Church October 22. Several cards were sent to the sick and bereaved and the meeting closed with the missionary benediction in unison.

A social hour followed and refreshments of sandwiches, cookies, and lime punch were served to: Mrs. J. M. Flournoy, Mrs. Cora Davidson, Mrs. George Swartz, Mrs. D. E. Aden, Mrs. J. R. DeArmond, Mrs. J. W. Hooks, Mrs. W. E. Smith, Mrs. Winston and the hostess, Mrs. Cagle.

Power and Petroleum

PARTNERS IN PROGRESS!

OIL PROGRESS WEEK

Oct. 14 - 20

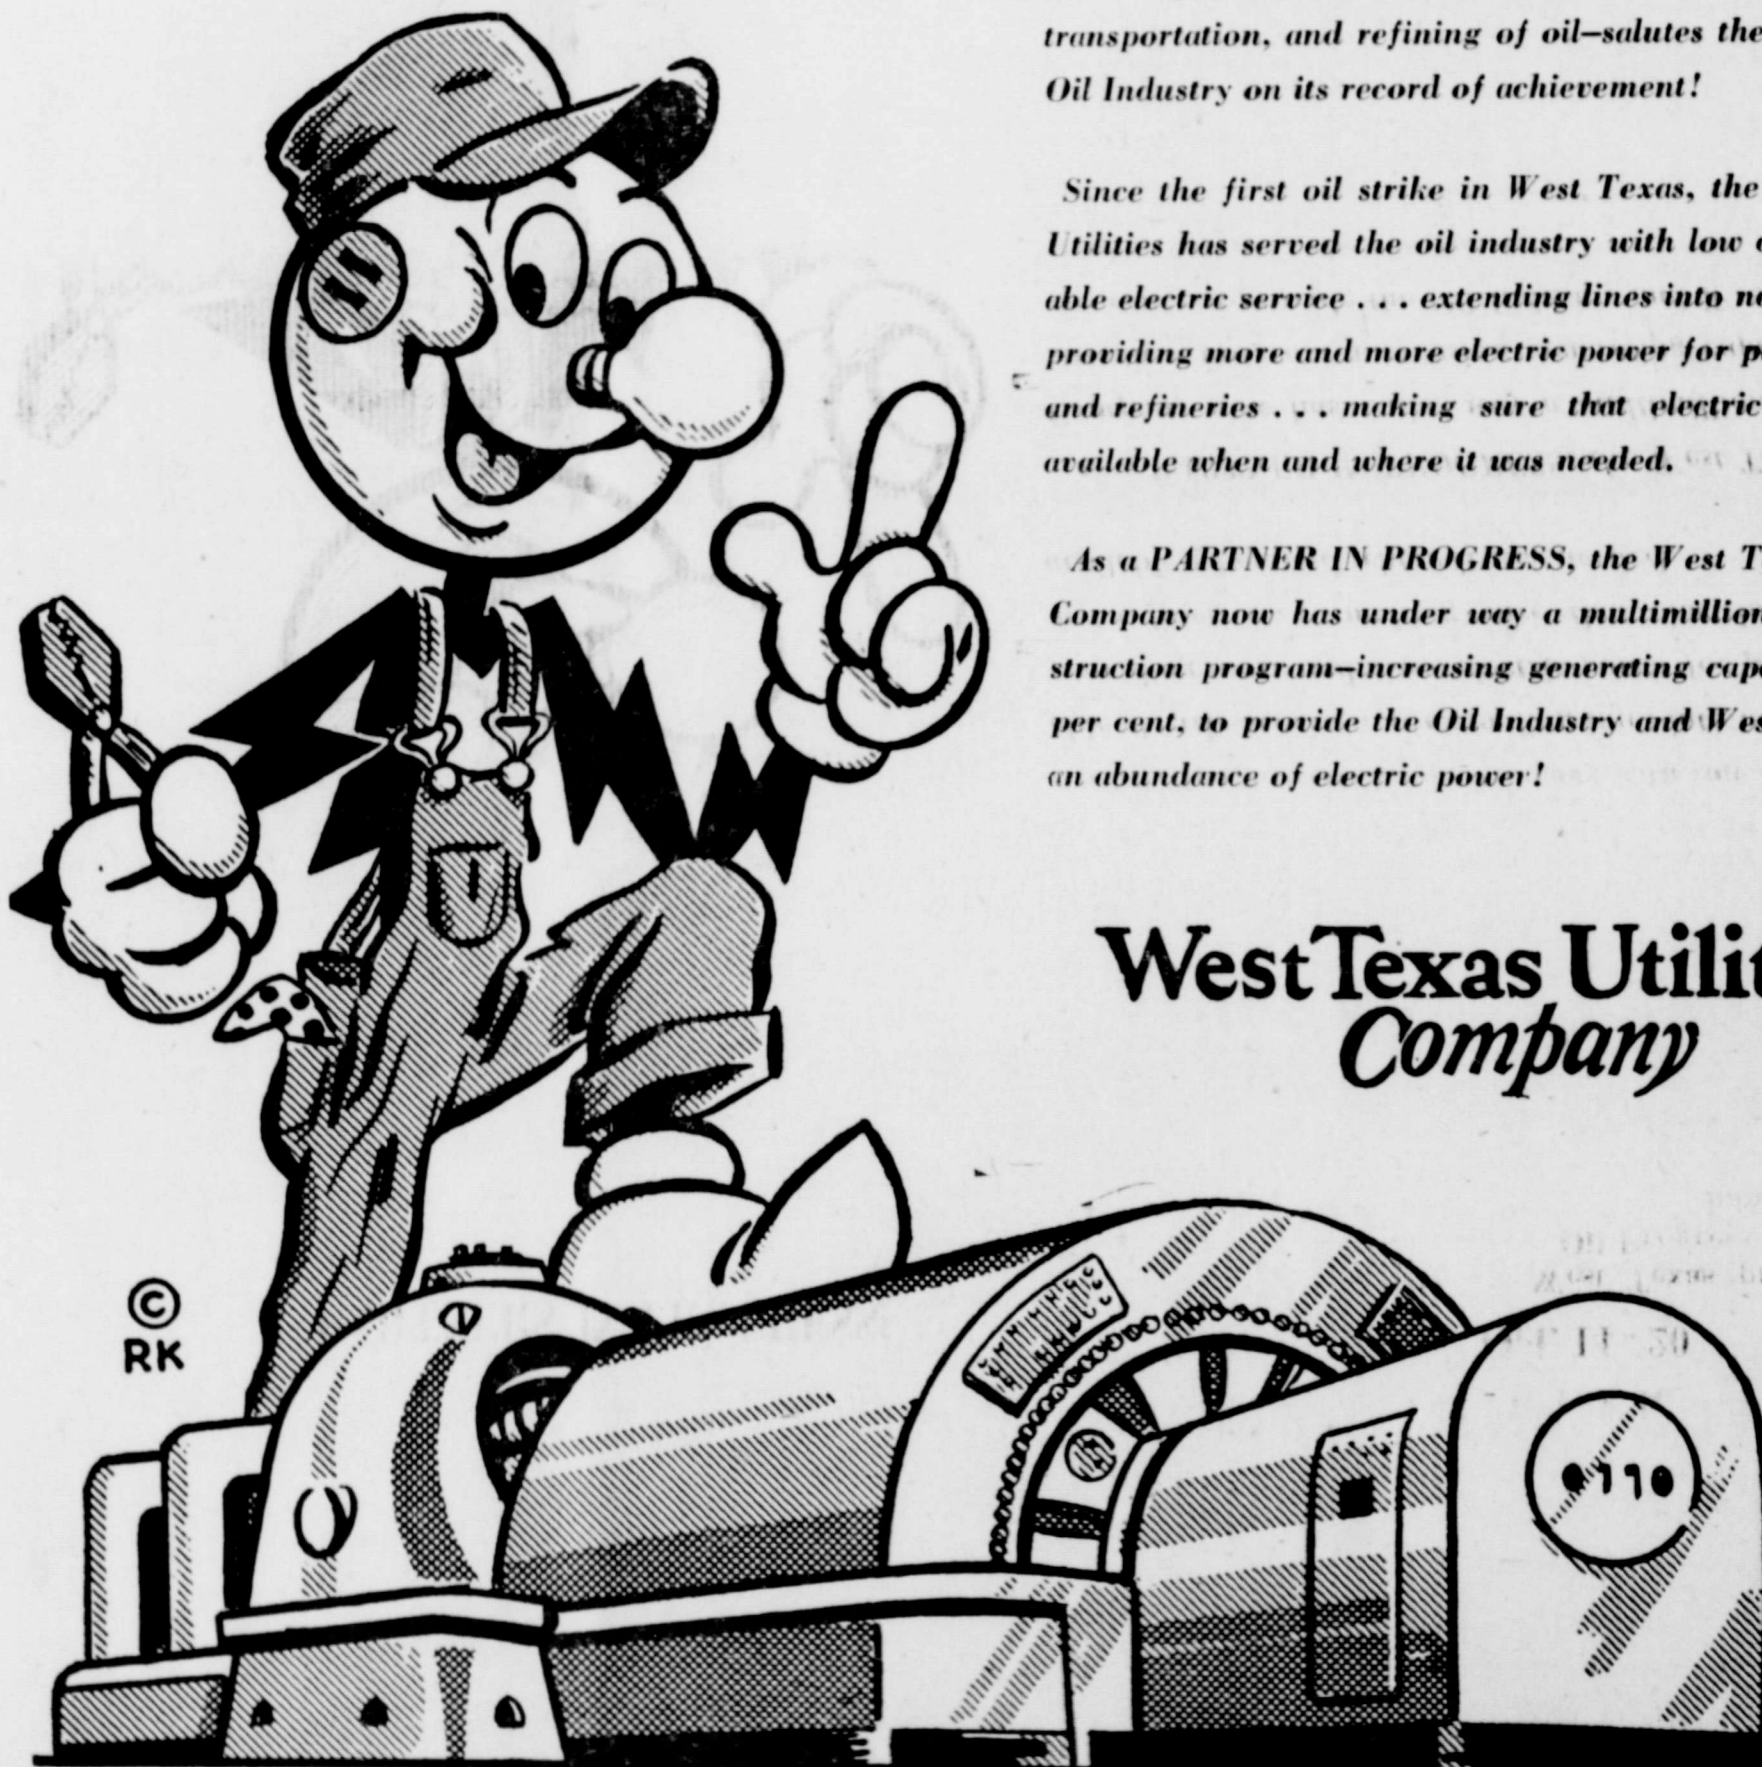

West Texas prosperity and Oil Progress go hand-in-hand.

Electric power—long a working partner in the production, transportation, and refining of oil—salutes the West Texas Oil Industry on its record of achievement!

Since the first oil strike in West Texas, the West Texas Utilities has served the oil industry with low cost, dependable electric service . . . extending lines into new fields . . . providing more and more electric power for pump stations and refineries . . . making sure that electric power was available when and where it was needed.

As a PARTNER IN PROGRESS, the West Texas Utilities Company now has under way a multimillion dollar construction program—increasing generating capacity by 150 per cent, to provide the Oil Industry and West Texas with an abundance of electric power!
