Cisco

Not warmed over but strictly brand new!

Vou owe it to your pocketbook to I drive this Chrysler engine before you buy any fine car today.

It's not a "warmed-over" engine, but a basically brand-new one!

It gives a new kind of performance that means new value for every dollar you pay out for purchase, upkeep, or operation.

It was built brand-new around a hemispherical combustion chamber which makes better use of gasoline, and also permits sounder all-round engine structure, than any American motor car engine has had before.

It delivers 180 horsepower . . . without requiring you to buy premium gasoline. It runs with less waste, less heat, less friction and less wear than previous designs can equal. Its combustion is so clean it literally develops almost no carbon deposit at all. It will last longer than any

engine you've ever known. It will cost you less along the way. It will stay "young" in performance thousands of miles past the point where an ordinary engine shows old age. And on top of all that, it makes

driving a lot more pleasure! Its smooth response . . . its safety-power, in reserve for emergencies . . . its easy scorn for distance or hills . . . make you just plain feel good at the wheel as you've never felt before.

For the good of your purse and your pleasure too . . . we invite you to drive it, soon!
