To Protect Constitutional Rights

A new bipartisan move is planned for the next Congress in initiate a Constitutional amendment to preclude any possible supremacy of so-called treaty rights over those guaranteed to Americans by the Constitution. Legislation toward that end was introduced in both chambers of Congress this year and hearings were held on a bill proposed by Senator Bricker (R-Ohio) and 58 other Senators of both parties. The purpose of the hearings was to perfect the language of a proposed amendment and it was recognized that action would have to carry over to the 83rd Congress.

Thus, the legislation will be 1. Neither treaties nor execureintroduced next year.

This move for an amendment is backed by business leadership as effective except through Constirepresented in the Chamber of Commerce of the United States. A policy declaration adopted at ment conflicting with rights prothe Chamber's last annual meet- tected by national law or the ing asserts that:

Small Towns - -From Page One 000 or over.

The movement of the population into cities has been steadily growing over the last 50 years, the statisticians pointed out. In 1900, three fourths of the population lived in places under 25,-000, and well over half the population lived in rural areas. At that time, 37 states did not have a single city with as many as 250,000 residents, and 11 states

had no cities larger than 25,000. "The preference of many families for life in small towns and the countryside is also evidenced by the rapid expansion of sub-urban areas,' the statisticians added

"In the past decade, the communities clustering around the larger cities have experienced the highest rates of growth. Through the development of suburban areas, large numbers of people are able to enjoy the advantages that small towns offer while they share in the ecenomic life of the near-by-cities."

Mrs. Lou Mendenhall was to leave Cisco Wednesday for Estes Park, Colorado. She is accompanying her aunt and uncle, Dr. and Mrs. Joe Knight of McKinney, on the trip.
