CISCO, TEXAS, THURSDAY, JUNE 18, 1953

NUMBER 140

The Gay Philosopher

By J. W. S.

IT HAS BEEN about five weeks since the good rain and the insurance adjusters are still the job. It has been estimated that the hail storm will cost the insurance companies about \$100,000 in this area.

Needless to say, the roof re-building business has been right since the hail storm.

CONSUMPTION OF water has been high the past few 100-degree days, the city officials tell us. The use of water, however, has been conservative as compared with the hot weather of a few years ago. People are conservation minded.

If you must water the grass, the city discourages the practice, a few simple rules of horticulture should be considered. The people who sprinkle their lawns twice as much water as actually is needed.

The rule they fail to observe is this: one deep soaking once a week is better than several surface soakings three times a week. This rule applies to St. Augustine as well as Bermuda grass.

Some residents may use up to one and a half gallons per square foot during a week of surface soakings. By watering once a week, no more than half a gallon per square foot is needed.

Under the once-a-week plan, the water has time to soak down before more is added. Roots reach deeper and deeper for the water and stay away from the surface where wind and sun evaporates water. For deep soakings, gardeners suggest hose saturators or slowly revolving sprinklers. Use of peat moss or a lot of dead leaves around shrubs, trees and flowers cuts down required water by half, it has been estimated. Use of liquid plant food reduces the need for water and also helps the plant, it has also pointed out.

MR. BOBBY BAKER, one of the Mineral Wells Legion baseball players, lost his wallet here one night when his team played the Cisco team. He reports that it contained no money but a lot of valuable papers, and like. He'd like very much to get the wallet back. If you found it drop it off at The Press office and we'll see that Bobby gets it.

THANKS TO Miss Zelda Sandler, we've learned the difference between Father's Day and Mother's Day. They're the same, except the Father's Day gifts are as expensive as the Mother's Day gifts.

NEXT SUNDAY is Father's Day. And a look at the record shows that Father's Day has been celebrated in this country since 1910. Yet, in all that time, not a father has asked to have it dropped off the calendar. Conclusion: the dads like it.

In fact, fathers in a lot of countries like it. China likes it so much that they observe Father's Day twice a year — in the spring and in the fall — to honor the guy who brings home the bacon.

In case you're wondering how Father's Day began, the credit belongs to Mrs. John Bruce Dodd of Spokane, Washington. It was her suggestion that the Spokane Ministers Alliance sponsor the first city-wide Father's Day ceremony some 43 years ago. Shortly afterwards this organization circulated a petition to the churches and civic leaders. Her plan was to emphasize such fundamentals of family life as: father's place in the home; safeguarding the marriage vows; and proper raising of children.

Gradually the aid of city and state officials was enlisted. National interest in Mrs. Dodd's effort to honor fathers everywhere was aroused, and other localities were soon holding annual Father's Day ceremonies. Then in 1924 President Calvin Coolidge recommended Father's Day be observed throughout the nation.

That same year a Bible class at Wilkensburg, Pa., hit the newspapers by suggesting adoption of the dandelion as the official Father's Day flower — because "the more it is trampled on, the more it grows."

Most communities were not impressed. The rose was adopted instead. But a keynote for Father's Day has been found. Sentiments were affectionate and topped with a dash of good-natured humor have been in style ever since.

ALL HOLDS BARRED—Joy, the 18-month-old lioness at the Little Rock, Ark., Zoo, is extending a welcoming paw to the zoo's new director, Raymond Squires, who seems pleased to make her acquaintance. There's little doubt the bars made the meeting a lot easier for Squires for there's no telling how effusively Joy might use her claws at such a moment.

Miss Cameron Is Laid To Rest In Local Cemetery

Miss Fannie Cameron, 72, was buried in Oakwood Cemetery on Wednesday following final rites held at 3 p. m. at the Wesley Methodist Church. The rites were conducted by the Rev. Bob Sanders, pastor.

Miss Cameron, a resident of Cisco for the past two years, died at her home at 4:10 a. m. Tuesday following a long illness. She came to Cisco from Lee County where she was born on October 4, 1878.

She is survived by Mrs. R. E. McCord, a sister, of Cisco and a number of nieces and nephews.

Pallbearers were Nelson McCord, Clarence Cameron, Rev. A. C. Hardin, C. W. Freeman, and John McCord. Thomas Funeral Home was in charge of the arrangements.

Crops, Pastures Deteriorate Due To Dry Weather

Feed crops, cotton and pastures began to deteriorate over the eastern half of the state as moisture reserves were running out during the past week. Droughty conditions moved eastward to again cover practically the entire state, which, combined with afternoon temperatures at the 100-plus degree levels fired maturing feed crops and wilted late feed. Scattered showers in the southeast and some central counties late in the week brought only temporary relief as the return of very high temperatures over the weekend quickly dissipated the surface moisture.

In the west and northwest, dryland feed crops and cotton were just holding on in the blazing heat, with prospects for a crop fading further each day. Combining wheat was nearly complete in the low plains, past the peak in north Texas, and getting started in the northern high plains. Hot, open weather speeded maturity in all areas. Oat harvest was practically completed with good to excellent yields realized in the important central and northern areas.

Early corn, in full silk and tasseled, deteriorated rapidly over central, north and east Texas as hot dry weather continued. Late corn needed rain. Corn neared maturity in southcentral and upper coastal counties with scattered areas favored by showers. Sorghums in the high and low plains were suffering from hot dry winds and some acreages were lost from blowing sand. Much intended sorghum in these areas remains to be planted, with no moisture and time growing short. Grain sorghums were heading in central and northern Texas but needed rain. Cotton in southern counties continued to bloom.

In upper coastal, central and eastern counties, early cotton was fruiting heavily but late cotton made only fair growth. Non-irrigated cotton over the high plains deteriorated as hot dry weather continued. Plants were small, with growth at a standstill and some stands dying. Growth was slow over the low rolling plains. In the northwest much non-irrigated acreage has not been planted and considerable dry planted acreage has not germinated because of dry soils. Peanut planting continued in north and east Texas. Harvest of broom-corn started in the Karnes County area. Vetch harvest was beginning in north central counties.

Continued lack of moisture was hurting commercial vegetable crops in all areas. An east-west squall on the 12th brought only temporary relief in the form of cooler temperatures and moderate rains in southeast and some central counties. Growing crops in these favored areas were helped, but both surface and subsoil moisture were depleted in other areas.

Throughout the state farmers and ranchers rushed cattle and calves to market as the lush spring grazing faded over the northwestern, western and southern counties. Grass growth in the east has been stopped as droughty conditions were spreading over that area and the high temperatures quickly cured the generally adequate grass supply. Farmers in that area were marketing before shrinkage occurred on the less palatable grass. Stock was showing considerable shrinkage in the critical droughty areas.

UNCERTAIN MOMENT—Geoffrey Guillot looks as if his temporary duty as a snake charmer has lost all charm for him as a snake rises in response to his call in New York. Of course, the lad was just pretending and he surely knew the snake was only a piece of rope painted black, with a papier-mache head. He performed at a circus put on by the Madison Square Boys' Club.

Lions Observe 'Father's Day' At Luncheon Meeting

It was Father's Day at the Cisco Lions Club at the weekly luncheon meeting at noon Wednesday at the Victor Hotel Coffee Shop, and some 25 youngsters joined their dads for lunch and presented the program.

Miss Zelta Sandler and Miss Rhelda Reed arranged the program for Lion Charles S. Sandler, program chairman. Miss Sandler presented the program, which opened with a piano solo by Johnny Turner. Tap dance routines were given by Judy Sitton, Doris Lee Glenn and Jean Damron. Dash Crofts gave imitations, and Dick Sander sang a solo, accompanied by Miss Reed.

The presence of the children of Lions Club members was arranged as a surprise to the fathers.

Special guests at the luncheon were Acting Postmaster J. J. Porter and Assistant Postmaster Sam B. King. Following the program, final plans were discussed for a Ladies Night Banquet on Thursday night, June 25, for the installation of new officers. Tickets are on sale for the banquet and only 90 will be sold.

Use Salt If You Sweat Too Much, Dr. Cox Advises

AUSTIN, June 18.—If your work is such that it causes excessive perspiration, add a pinch of ordinary table salt to each drink of water you take to help prevent heat cramps. This is advised by Dr. Geo. W. Cox, State Health Officer, to prevent a possible increase in the number of heat victims as the Texas thermometer hits 95 degrees and above.

Laborers, mechanics, farmers and white collar workers whose work causes them to sweat profusely, are in danger of having their body salt content become deficient with resulting heat cramps or heat fog. Salt is a prominent constituent of sweat; the body may lose as high as 40 to 50 grams of salt during hot days.

In industry, a method of preventing heat cramps is to take a tablet of pure salt or a mixture of salt and dextrose with each drink of water. Workmen whose duties require muscular exertion should be especially careful to add more than the usual amount of salt to what they eat and drink.

Salt deficiency may be prevented by taking salt in various ways. Where prepared tablets are not available, table salt may be added to each drink of water. Milk is a source of salt and will help to make up for the deficiency caused by sweating. Alcoholic drinks should be avoided.

Heat cramp is characterized by pains (cramps) in the abdominal region, headache, and in severe cases, by nausea and vomiting. The body temperature remains about normal, likewise the pulse rate. Body salt losses occur without the knowledge of the individual until there is a deficiency; then the abdominal muscles begin to cramp.

Country Club Party Planned On Friday

Home-made pies will be furnished and served without charges to members of the Cisco Country Club and their guests at a game tournament Friday at 7:30 p. m. at the club, Mrs. Karl Armstrong of the entertainment committee reported today.

The program calls for a golf putting tournament, horseshoe pitching, canasta and other games. Members were asked to invite guests for the evening. "Don't bring anything to eat — it will all be furnished by the club," Mrs. Armstrong said. Home made pies and drinks will be served during the evening.

FIREMEN ANSWER CALL — Firemen were called to the 1400 block of West 5th Street late Wednesday to put out a grass fire which had gotten out of control. The blaze was extinguished without doing any property damage.

Perry, Maine is half way between the north pole and the equator.

Oil Price Raise Expected To Aid Drilling In State

DALLAS, June 18.—Stimulation of the search for oil and a shot-in-the-arm for the state's oil-based economy is expected to result from a general 25-cent per barrel increase in crude oil prices, Charles E. Simmons, Executive Vice-President, Texas Mid-Continent Oil & Gas Association, said here Wednesday.

"There is no way of telling what the immediate effect on drilling will be, but Texas oil producers have long advocated the need for more revenue to pay for drilling programs which will assure reserves to meet future demands," Simmons said. "No magic formula exists for predicting exactly how many more wells the quarter-billion dollars in new money will assure because it still may not be enough to overcome the high costs which have developed in recent years. We will just have to wait and see."

At current production rates, the new price levels will mean something like \$250,000,000 a year for the Texas economy, Simmons said.

Farmers and ranchers and others who hold royalty interests on the production of oil from Texas lands will benefit by an additional \$37,500,000 a year as a result of the increase, Simmons said.

Simmons pointed out that a primary beneficiary in Texas will be the state treasury which will get a million dollars a month more from the state production tax which is 4.6 per cent of gross amount of oil produced. As a state revenue producer, the 25-cent price increase will almost equal the yield from the gas gathering tax which has been the subject of court controversy the past two years.

Lone Star Workers Contribute Funds

Lone Star Gas Company employees throughout Texas and Oklahoma have made voluntary contributions totaling \$7,793.15 to the tornado relief funds at Waco and San Angelo, according to Chester L. May of Dallas, vice-president in charge of distribution properties.

Checks were delivered to disaster relief officials in the two cities this week. The Waco check was for \$5,455.70 and the San Angelo check was in the amount of \$2,337.45. Previously the company had sent a special \$5,000 check to the Waco disaster relief fund and San Angelo received \$1,000.

Lake Superior is the largest lake in North America.

REV. RUDOLPH PRANGE

Lutheran Church To Hear Mission Worker Sunday

The Rev. Rudolph Prange, Lutheran missionary to the Philippines, will preach in the 11 a. m. service Sunday at Grace Lutheran Church, according to an announcement today. His sermon subject will be based on I Thessalonians 5:25: "Brethren, Pray for Us."

At 8 p. m. Sunday, Pastor Prange will present an illustrated slide lecture on the mission work of the Lutheran Church-Missouri Synod in the Philippines where he has served as a missionary since 1947.

He formerly held pastorates at St. Louis and St. Joseph, Mo., and at Little Rock, Ark. For seven months he served the Lutheran Service Center for the members of the armed forces in Paris, France.

Pastor Prange is now on a nine month furlough in this country and, with his wife, will return to the Philippines on July 27.

The invitation to attend both the services and the lecture was extended to all members of this community.

Two Cisco Women Attend Meeting

Mrs. G. W. Wilcox, Jr., and Mrs. Winston Bowles have returned to Cisco after spending a day in Dallas this week attending a Prestige Silver trainers conference at the Stoneleigh Hotel. The meeting was attended by trainees from El Paso to Houston.

At the meeting top sales people for the company received large orchids as recognition for their work. Mrs. Wilcox and Mrs. Bowles each received an orchid award. Joan Bennett, prominent movie actress, talked to the group at the meeting.

Children's Home Is Dedicated By Texas Baptists

BEEVILLE, June 17.—The South Texas Children's home, Texas Baptists fourth home for dependent children situated 17 miles from Beeville, was dedicated free of debt Sunday afternoon. The project, valued at \$250,000 was made possible by the gift of a section of land by the gift of the State Department of Public Health and Human Resources, said here Wednesday.

Friends from throughout the state attended the dedication rites directed by the Rev. J. M. Lundsford, administrator of the home. John Winters, of Austin, director of the State Department of Public Welfare, and chairman of the board of deacons of Austin's First Baptist Church was one of the principal speakers. He emphasized the importance of children being brought up in a homelike atmosphere and praised the system adopted by the South Texas Children's Home of limiting to 10 the number of children in each cottage. These small cottages with a house mother, furnish to the child a more natural environment, he said.

"If we, as Christian people, believe in the teachings of Christ, we should go all out for homes like this," he said. "There are lots of good homes throughout the state, but not as many as are needed." He urged the churches to put the home in their budgets.

A. D. Foreman, of Abilene, member of the finance committee of the Baptist General Convention of Texas, also spoke to the large crowd gathered in several groups under the huge oak trees. He predicted that every Baptist Church in Texas will cooperate in assisting the South Texas Children's Home, thus following the spirit of Christ in "suffer little children to come unto me."

Local Minister To Hold Meetings In State Of Maine

A. F. Waller, minister of the Cisco Church of Christ, will leave Monday for Maine where he will conduct two meetings at mission points in that state. He will be accompanied on the trip by Mrs. Waller.

The two meetings are sponsored by the Cisco church as a part of the mission work.

After three weeks spent in Maine, Mr. Waller will return to Texas where he will hold meetings in Strawn and Eliasville. Following those meetings he will go to County Line, Okla., for a 10-day revival.

WORLD'S HARDEST JOB

Whittling down waste and extravagance in government operations — the job headed by Republican Senator Styles Bridges — may look easy to the average American, but hard facts show that it's virtually impossible, says an article in the July issue of Pageant Magazine.

For instance, the budget for fiscal 1954 (beginning July 1, 1953) calls for \$78.5 billions, weighs four pounds and 11 ounces, contains literally thousands of items and runs to 1,155 pages. A cursory one-hour investigation of what every \$1,000,000 was going for would take until approximately 1990 A. D. And this investigation would take place after the President, the Bureau of the Budget, the Cabinet chiefs and the House Appropriations Committee had chipped and chopped at what they considered non-essentials in the budget.

The staggering size of the budget and its outer-space figures are only part of the Committee's job. To further complicate matters, there are innumerable smaller items buried deep in volumes of

Justifications, submitted by the various agencies who report in detail why the funds are required. Justifications for the Department of Defense alone run to about 40 volumes annually. Committees and sub-committees must hold time-consuming hearings on the 12 or 14 major money bills. In 1952, more than 2000 witnesses were heard.

The total staff of the Senate Appropriations Committee numbers fewer than 25. Even if the number was quadrupled, it would be a pitifully small force compared with the thousands of employees in the executive branches who spend all their time preparing facts, figures and justifying statements for their requests. The way things stand, it is up to each Senate Appropriations staff mem-

ber to sniff out padding where it occurs. Even non-padded requests that can be reduced may prove appallingly complex. For example, if the Defense Department is asking for a given amount to start work on arms to be delivered in 1956, it is virtually impossible to foresee whether a cold war, hot war or peace will have made these essential or obsolete by that time.

Another problem: the large sums for defense and atomic energy that come under the heading of "security," are too hush-hush for an open or public investigation. These must be accepted largely on blind faith. No matter where the Committee turns, somebody stands to get hurt, points out the magazine. Cut down on the appropriations for internal security and foreign relations — and world-wide repercussions may result. France, for instance, has been reluctant to ratify the European Army plan. Expressing our disapproval by cutting down on her funds (which are being used for re-armament and to fight Communism in Indo-China) may drive her into the Communist camp.

Requests for domestic appropriations introduce similar headaches with, perhaps, less drastic results, but, nonetheless, a tremendous amount of anguished screaming from both labor and business.

Yet, on the encouraging side, the Committee often takes a long, hard look at a single item, and saves millions, in spite of an av-

JUST WHO NEEDS THE SWITCHING?

"...BE THOU AN EXAMPLE..." - I TIM. 4:12

Mulch is Hailed as New Wonder Aid to Garden

By spreading a mulch once, the gardener saves many hours of cultivation.

heavy rain falling directly on the soil sends up dust which is blown away, to the garden's loss. This is advanced by a government bulletin.

The type of mulch which is now recommended excludes paper, sheet aluminum, concrete or any other covering which does not give free access to the soil for both air and water. Straw, leaves, dried lawn clippings, cut weeds, manure, ground-up corn cobs, sawdust, any such material not toxic to plants, will serve to shade the soil, keep it cool, retain moisture and keep down weeds, while allowing free access to air and water, much to the benefit of both plants and gardener.

Even the modern type of cultivation, which stirs the soil only an inch deep, breaking up the crust and destroying weeds in infancy, becomes unnecessary with a mulch.

"Men who have gardened for years, but who were not taught to use mulches continuously, express surprise at what a wonderful help they have found at last," says the government bulletin.

The earlier mulches are applied the better, though their greatest value comes later in the summer. Tomatoes, especially need their protection, to prevent extreme dryness in the soil, which causes blossom end rot in the fruit. But the new idea is that all crops will benefit by a mulch, including the flowers in your border.

Ground corn cobs and saw dust are both likely to draw nitrogen from the soil to feed the bacteria which cause their decay. To prevent this a nitrogen plant food should be mixed with the mulching material. All material of organic origin which is used for mulching can be spaded into the soil at the end of the season and will help improve the soil texture and humus content.

ber to sniff out padding where it occurs. Even non-padded requests that can be reduced may prove appallingly complex. For example, if the Defense Department is asking for a given amount to start work on arms to be delivered in 1956, it is virtually impossible to foresee whether a cold war, hot war or peace will have made these essential or obsolete by that time.

Another problem: the large sums for defense and atomic energy that come under the heading of "security," are too hush-hush for an open or public investigation. First Baptist Circle One Has Meeting

Mrs. J. V. Heyser, Sr., was the hostess in her home Tuesday for Circle One of the First Baptist Church which met for their regular meeting.

Opening prayer was led by Mrs. A. R. Day and Mrs. Frank Walker gave the devotional from the 91st Psalm. Mrs. W. D. Hazel ...

presided over the business meeting in which routine matters were transacted and cards sent to the sick. Mrs. J. R. Burnett taught ...

the lesson from the mission book, "Sacrifice and Song." Miss Martha Graves closed the meeting with prayer.

A social hour followed and refreshments were served to Mrs. Jeffcoat, Mrs. F. D. Wright, Mrs. A. R. Day, Mrs. W. D. Hazel, Mrs. J. R. Burnett, Mrs. Henry Fry, Mrs. F. E. Shepard, Mrs. Bond, Mrs. Frank Walker, Mrs. Heyser, and two visitors, Mrs. T. A. Graves and Miss Martha Graves.

Mrs. R. D. Carswell Has Circle Meeting

Circle Four of the First Presbyterian Church met Tuesday in the home of Mrs. R. B. Carswell for their regular business and study meeting.

Mrs. R. Kamon presided over the business session and Mrs. A. E. Jamison taught the lesson from the book of Mark.

Refreshments were served at the close of the meeting to Mrs. H. L. Jackson, Mrs. N. A. Brown, Mrs. J. E. T. Peters, Mrs. Grady James, Mrs. P. R. Warwick, Miss Titia Bell Simmons, Mrs. R. Ka-

D. A. R. Has Final Meeting Of The Year

The last meeting of the year of the Charles Crawford Chapter of the D. A. R. was held Monday evening, May 25, in the home of Mrs. J. E. Crawford with Mrs. C. E. Berry as co-hostess.

The meeting was called to order by the regent, Mrs. Yancey McCrea and opened in regular form. Reports were given of the convention held in Washington, D. C., by Mrs. F. E. Harrell and Mrs. Berry. A book entitled "Calvary and Pioneers," given to the Cisco Library in memory of Mrs. C. R. West by the club, was shown to the members. Notes of thanks were read from Mrs. E. G. Pierce and Mrs. J. E. Chesley in appreciation of the Mother's Day gift received from the club on Mother's Day. The meeting closed in regular form.

Those attending were Mrs. Alex Spears, Mrs. F. E. Harrell, Mrs. M. H. Hageman of Ranger, Mrs. Frank Castleberry of Eastland, Mrs. Berry, Mrs. Crawford, Mrs. J. E. Elkins, Mrs. Yancey McCrea, Mrs. Homer Slicker, Mrs. W. W. Wallace, and four visitors, Mrs. Muri Shook of Lubbock, Mrs. C. E. May and Mrs. Beulah Harrison of Ranger, and Mrs. Davenport of Eastland.

Hot Weather Seed Sowing Calls for New Technique

Sow Seeds in Deep Drill on Wet Soil

Many experienced amateurs fail in starting seed in hot, dry weather. This seriously handicaps the full development of their garden plans. It cannot be done by following the methods usually successful in the spring, when moisture is more plentiful, and temperatures more pleasant.

A few extra precautions, easy to take, can insure success however, and enable you to make succession sowing of vegetables for fall harvest, start late flower seeds, and keep the garden busy producing until winter sets in.

Seed sprouts are not as strong as roots; they may fall to penetrate soil which would give the roots no trouble. So the covering soil must be given special attention in hot weather, when heavy soil is quickly baked into a crust by the sun.

Begin by making a drill much deeper than in the spring, so the seeds will be closer to the soil water. Fill the drill with water several times, so that it soaks several inches deep. Sow the seeds in the wet soil, mixing fine seeds with dry sand to spread them.

Now cover the seeds with a special soil which contains no clay whatever. A good mixture is composed of commercial peat moss and sand. Sphagnum moss is excellent, shredded and mixed with sand, or used alone. Fine top soil can be mixed with sand, provided it contains no clay, but never mix clay and sand, because that may form a harder crust than clay alone.

Saturate the covering soil, and keep it moist by sprinkling as often as required until the seeds germinate. This will usually be

Cover With Special Soil Mixture, and Soak Well.

quicker than in the spring, because of the higher temperatures. In extreme heat some extra shading will help keep the soil moist.

Shade by narrow boards held on blocks an inch above the surface, to allow free circulation of air; by covering with burlap, or cover with a mulch of lawn clippings, or similar material.

If the boards, or burlap are used, they should be removed immediately the seeds sprout. The rows should be kept moist until the seedlings are well established.

By these methods any vegetable seed can be germinated. Lettuce is likely to give the most trouble; and if it does, spread the seeds on a damp towel, roll it up and place in the refrigerator for twenty-four hours. Then remove, dry the seed and sow. The chill will usually speed germination.

Ever Thought of This?

... If you buy real estate without an abstract the chances are good that you will be required to furnish one when you sell or borrow money. It is customary for seller to furnish buyer with an abstract as he usually adds cost of same to the sale's price. So for many reasons all in your favor get an abstract and have it examined by your attorney when you buy real estate.

Earl Bender & Company
Eastland, (Abstracting since 1923) Texas

ONE WAY TO DO IT—The current heat wave in Paris has caused the residents to do something about the weather. This pretty model couldn't wait for the swimming pool to fill up, so she just stood under that big water pipe. Her expression indicates that it felt just fine, too, even if there wasn't enough water in the pool at the time to do any swimming.

EVEN EXCHANGE—At least, it appears to be as Mickey Laurent, left, of Paris lands a left hook to the head of Ralph "Tiger" Jones during a bout in Brooklyn. Jones is landing one of his own which appears to be a bit low on the French boxer.

HEALTH TALKS

Prepared by the
Texas Medical Association

The physician who examines someone with suspected heart disease must use a great many tools to make a diagnosis. No one test or procedure in itself is complete, but with each he gains useful information, then weaves all this information into a picture disclosing the true condition of the heart.

Despite the many kinds of equipment which yield precise information about the heart, the examiner still relies heavily upon the medical history, including the all important complaint of the patient, and the physical examination. Part of the examination of particular significance in suspected heart trouble are determination of the blood pressure, listening to the heart sounds through the stethoscope, and by feeling and tapping the chest (palpation and percussion.)

The two machines most valuable in the diagnosis of heart disease usually are considered to be the electrocardiograph and the x-ray. With the former can be traced a pattern of the heart's action, which may reveal some defects of importance. With the latter can be seen the size and shape of the heart, the appearance of the heart's chambers and valves, and perhaps defects in the heart or adjacent blood vessels. The interpretation of electrocardiograms and x-ray pictures requires much skill.

Because of much recent research, many varieties of examinations using principles of the electrocardiograph and x-ray are available today. In one, a dye is injected into the veins; this dye reaching the heart reveals its different parts clearly and in great detail on x-ray film. Some diagnostic tests can be performed only if special equipment and medical teams including highly trained heart specialists are available. One example is a procedure in which a tiny flexible tube is inserted into a vein and slipped along the inside of the blood vessel until it reaches the heart; at various steps along the way blood samples are removed for study. This is called "cardiac catheterization (withdrawal of body fluids)."

Once an exact diagnosis has been made through exacting methods, the right kind of treatment can be started.

IT'S SHARE AND SHARE ALIKE—At least that's the way it appears between eight-year-old Bobby Gibbs and her pet dog in Chicago. The high temperature caused them to take refuge at a beach—in the company of thousands of other residents of the Windy City, and another cooling aid was a dish of ice cream, which they shared. It tasted just as good to the dog.

Putnam News

Mr. Smokey of Amarillo was a Putnam visitor Tuesday.

Mrs. Samples of Mouton, Illinois is visiting friends in Cross Plains and Moran after a visit with Mrs. J. A. Hearst of Putnam.

Jessie Overton visited his parents in Granbury over the weekend.

Mrs. C. T. Hutcherson of Abilene visited her son and family, Mr. and Mrs. Alton Hutcherson Tuesday.

George Biggerstaff, I. G. Mobley, and Tood Cunningham were visitors in Baird Tuesday.

Mr. and Mrs. Will Everett were in Abilene Tuesday.

Several residents of Putnam were in Cisco Monday evening to hear the A Cappella Chorus of

the S. W. Christian College of Terrell. Mr. McMillen, former Bible teacher in A. C. C. of Abilene, is president of the College. His daughter, Miss Pauline Owens holds a degree from Freed Hardeman College of Nashville, Tennessee. She is director of the Chorus and also teacher of music in the college. Mrs. McMillan and Miss Owens are cousins of Mrs. Biggerstaff who, on account of illness, was unable to attend.

Mr. and Mrs. Loran Everett were in Marlin over the weekend.

Mrs. Lela Clark of Cisco was a visitor in Putnam Tuesday.

Mr. and Mrs. Jack Everett and children were the dinner guests of their parents, Mr. and Mrs. W. A. Everett Sunday evening.

Lon Macintosh is visiting his daughter in Arlington.

Brother Skinner and his family are to arrive in Putnam this

week where he will be the new minister of the Methodist Church.

Marvin Wingo and family of Georgia visited briefly with Mr. and Mrs. F. P. Shackelford Sunday while enroute to Sweetwater for a visit with his brother, John Poydson Wingo and family.

Dr. and Mrs. R. D. Brown of San Antonio are visiting their parents, Mr. and Mrs. George Brown and Mr. and Mrs. F. P. Shackelford.

Dr. Herb Brown, after a visit with his parents, Mr. and Mrs. Erbin Lowery, left Monday for Austin. Mrs. Brown remained for an extended visit.

Arthur Beasley of Admiral was a visitor in Putnam Monday.

Mrs. E. E. Sunderman, her sister, Mrs. Gertrude Pritchett of Petersburg, Pennsylvania, and her brother and wife, Mr. and Mrs. James E. Hines of Mt. Car-

roll, Illinois, have returned home after an extended visit with Mr. and Mrs. Sunderman.

**Moran News . . .
Rev. Karkalits
Accepts Pastorate
Of Dublin Church**

By MRS. C. C. CADY
The Rev. W. R. Karkalits, pastor of the Moran First Baptist Church, has resigned to accept the pastorate of the Dublin Baptist Church.

Rev. and Mrs. Karkalits have been active in civic work in the community while he has held his position in Moran. For the past year he served as master of ceremonies for the Moran Luncheon Club. Rev. Karkalits begins his new work with the Dublin church on Sunday. No announcement has been made as to the new pastor of the Moran church.

Mrs. Jim Strickland and Mrs. Roe Scott and the Sedwick group were hostesses at the weekly meeting of the Moran Luncheon Club last Wednesday.

The Rev. W. R. Karkalits resigned as master of ceremonies. He has accepted the pastorate of the Baptist Church at Dublin and will move this week. The club presented the Karkalits a bouquet of carnations and glads.

Mrs. Guy Fredrick and daughter Elene of Miami, Arizona, and Mrs. W. L. Longan of Tempe, Arizona, visited Mr. and Mrs. W. H. Bowne Tuesday and Wednesday.

The ladies Bible class of the Church of Christ met Tuesday in the home of Mrs. J. H. Donaho for a covered dish luncheon and to do some quilting.

Mrs. J. H. Donaho and Delma Jean visited their daughter and sister, Mrs. J. H. Singleton, in Breckenridge recently.

The Rev. and Mrs. Melvin Mathis and daughters have returned from a visit to Quail with her parents, Mr. and Mrs. A. L. Robinson. Jean Marie Mathis is now in Crews where she is visiting her grandfather and aunt, W. C. Mathis and Margurite Mathis, and attending the Vacation Bible school, at the Crews Methodist Church.

The wheat harvest in the Moran area was estimated to be about 80 per cent complete this week. Reports were that 20 car loads and 49 truck loads had been shipped to storage during the past week. The quality of the wheat was excellent but the yield has been estimated to average six to nine bushels per acre.

Mr. and Mrs. Edd Tillerson of Rotan visited briefly with her parents Thursday en route to their vacation spot. Their son, Don, remained with his grandparents while his parents are on the trip.

Mrs. Grady Kelly and small son of El Paso visited Mr. and Mrs. Floyd Pool a few days last week. Mrs. Kelly was en route to spend the summer with her parents, Mr. and Mrs. A. T. Watson, of Barry.

Guests in the Lynn Williams home for the week are Mr. and Mrs. LeRoy Williams and family of Dumas. They plan to move to Albany soon, they reported.

Mr. and Mrs. Glen L. Pool of

Jal, New Mexico, visited relatives in Moran last week.

Mr. and Mrs. Cole Black of Carrizo Springs and Mr. and Mrs. John Bellito of Alton, Ill., visited their mother, Mrs. Nellie Black, last week.

Mr. and Mrs. Jack Townsend spent their vacation in south Texas visiting their two sons, James Willie and Leslie Townsend.

Mr. and Mrs. Wesley Owings of Las Cruces, New Mexico, are the parents of a daughter, Patsy Lea, born in the Gorman hospital on June 9. They are now in the home of her parents, Mr. and Mrs. O. R. McNelly, in Moran.

The First Christian Church will begin holding both morning and evening services Sunday, June 21. Everyone has been invited to the services by the pastor, the Rev. Ewert H. Wylie, Jr.

BARBARA JEAN JOHNSON
Mr. and Mrs. Harvey Johnson are the parents of a daughter, Barbara Jean, born June 10 in Graham Hospital. The infant weighed seven pounds and ten ounces at birth.

Mrs. Anton White and children have returned to their home here after a visit with relatives in Illinois.

Take your family to Sunday School and church every Sunday.

**Swimming Pool —
From Page One**

Humble Pipe Line Company gets in more swimmers than any other 1953 swimmer at the big pool. He generally tapers off his swimming with a session of roller skating and a few games of miniature golf.

A county agent from a South Plains county checked with us recently regarding his group of approximately 55 boys camping out at the lake and getting in some swimming. They have not set the date for coming to Cisco.

We often wondered what would happen if a swimmer wearing eye glasses dived into the pool. Well, it has happened. T. W. Dodd of Denver City came to the office to ask for help in finding his glasses. The lifeguard went in and soon came up with them. And then there was the lady who dived in and, while in mid-air, yelled out "Oh my goodness, my watch."

Minister Bill Cofer and family of Hobart, Okla., visited Lake Cisco on June 16. They were returning from a trip to Abilene where Mr. Cofer took a group of girls for enrollments at ACC. His wife and children were along.

The Cofers enjoyed swimming in the big pool. Both Mr. and Mrs. Cofer had visited the pool before. Her former home was Comanche. Mr. Cofer was a class mate at ACC of Church of Christ Minister A. F. Waller of Cisco. Mr. Cofer believes he may be

related to Charles Cofer, lington and formerly of They expected to look him a visit there this week. Mr. Cofer was pleased that the Cisco pool and rink were operated by 123 of the American Legion community project. He is a member of the Hobart Post.

In Belgium, pigeon racing pares with our baseball national sport. Football fields are called irons because the white crossing the field resembles iron.

"As It Looks From Here"

Omar Bureleson, Congressman from the 17th District, discusses the price decline of agriculture products, including cattle, and the need to do something with this surplus to keep the Government from losing money.

worth of products. It is estimated that by the end of the year this figure may be increased to more than 5 billion. We need to do something with this surplus to keep the Government from losing money. We simply cannot afford to have great losses. The taxpayers all over the Nation must bear the burden, and Members of Congress from the cities and non-farm areas may raise such opposition that it would endanger our entire farm program. We should do all in our power to get the farm program on a solid foundation and to keep it from getting a "black eye."

This week, I have proposed that the Commodity Credit Corporation make available to the Mutual Security Agency under the President, surplus farm commodities to sell to foreign countries, taking in payment their local currencies. One of the big difficulties in selling to foreign nations is that they do not have dollars with which to purchase. Many of the markets of the world are in what is known as the "sterling bloc," and of course that must be converted into dollars based on a gold standard. We hear a lot about the "dollar gap," and this of course is what it means in world trade.

Since we are lending aid to many foreign nations in a mutual effort to stem the tide of Russian Communism, the currency received for our agricultural products could be used in the country where the products were sold, instead of our sending dollars to them or instead of selling it to them on credit. The currency

Salad Greens All Summer Possible in Home Garden

Earliest Loose Heading Lettuce Matures in 60 Days.

An all-summer program of green salad leaves should be planned to follow the spring lettuce crop which usually fails with hot weather. It is longer than it used to be, thanks to the new salad bowl, and old oak leaf varieties, which withstand heat longer than others.

Remaine or cos lettuce is also more heat resistant. It is the favorite with French chefs, producing oval leaves, in an upright cluster which used to be bleached by tying up the leaves as they neared maturity. This lessens their vitamin content, however, and the practice is being abandoned.

Bibb lettuce, which is currently a favorite, is especially sensitive to hot weather. Its loose heads run to seed early in the summer. Many deem it the highest in quality of all. It can be grown in early summer, and early fall, maturing in 60 days from sowing in the spring.

After the early lettuce harvest has ended, chicory, also known as endive, is available. This should be sown early as it takes 90 days to mature. Two or three sowings

should be timed to give succession crops until winter. Frost improves the flavor of the leaves, and they retain good quality until a hard freeze.

Endive is available in a broad-leaved type, also known as escarole, and the curly leaved type which is favored by many for the first crop. Both are grown by the same methods used for lettuce.

Water cress is easily grown wherever it is possible to furnish a constant supply of water to the plants. This can be done by sowing the seed in flats which are kept moist by wicks which draw water from pans below which are kept filled with water. Corn salad is a leaf crop which is hardy and can be harvested late in the fall. Upland garden cress gives a pungent flavor to the salad.

In the fall Chinese cabbage leaves are delicious. Chinese cabbage may be grown in the spring, with rich soil and an early start. But in midsummer, it always runs to seed. A late crop has no such tendency, and heads are easily produced in the fall, from plants started in late June.

could be used to produce military equipment and for military support. It could also be used in the undeveloped areas of the world where we are now seeking new markets.

This entire system would not displace agricultural markets already in being, but rather, it would be an expansion of trade never realized by this country and a stimulation of commerce between free nations with whom we are now cooperating in mutual defense of the Free World. It would do two other things. First, it would save dollars and economic assistance now going to foreign nations and would relieve the surplus commodities now being held by the Commodity Credit Corporation. It would stimulate the farm economy of this country and maintain prices to the farmer which have declined because of a lack of exports.

I offered an Amendment in the Foreign Affairs Committee this week for this purpose, but it was rejected by one vote. Immediately afterwards, I introduced a separate Bill in the House of Representatives, and I have reason to believe that President Eisenhower may favor the idea. If such authority is furnished the President, the Secretary of Agriculture, and the Commodity Credit, there is no doubt that it would have a favorable effect upon the price of cotton, grains, peanuts, and other farm products, including the livestock market.

Judge and Mrs. J. McAllister Stevenson, of Abilene, Mr. S. E. Cloninger, of Gorman, and Dr. and Mrs. A. W. Brazda and son of Ranger, were welcome visitors to my office this week in Washington.

CHOW LINE—Korean laborers are unloading 25 tons of hydroponic lettuce and radishes from a C-124 Globemaster. Under direction of the 6127th Air Terminal airmen, the Koreans, using portable rollers in an assembly line technique, can unload one of the huge ships in 30 minutes. The vegetables are then packed in refrigerated trucks and moved to front line supply centers.

The Man's Store

LET'S TALK LIVESTOCK BY TED GOULDY

FORT WORTH — Some improvement in the activity on cattle and calves, and considerable better prices on sheep and lambs were the rule at Fort Worth Monday. Stronger demand from buyers from outside the state as well as the local buyers made the difference. Lighter supplies of livestock around the market circle also were a favorable factor.

Good and choice fed steers and yearlings cashed at \$17 to \$23.00, some choice fed steers averaging about 850 lbs. from McClung Land and Cattle Company, Johnson County at \$23, and some 596 lbs. yearlings from W. W. Gilbreath of Dublin (Erath Co.) at \$23. B. T. Hill, Martin County, had a load of well fitted 818 lb. yearlings at \$22.50 and I. S. Scott, Castro County, had a similar load averaging 676 lbs. at \$22.50. Common and medium slaughter steers and yearlings sold from \$9 to \$16, a load of fleshy feeders at 1,030 lbs. from Herman Mitchell of Wichita County at \$15. About three loads of 725 lb. brahmans sold for \$10.50. D. L. Powers, Jack County, had a load of 758 lbs. at \$13.50. Rannie yearlings ranged at \$5 to \$8.

Fat cows sold for \$8.50 to \$11.50, a few heiferettes to \$12 and above. Silas Byrd, Blanket, Texas, had odd cows including a fancy fat one at 1,245 lbs. at \$12.50. Geo. M. Rucker, Bontague Co., had a load of \$17.50 yearlings at 437 lbs. and some odd cows including odds at \$10, \$11 and \$12. Cannors and cutters drew \$7 to \$8.50. Bulls sold from \$7 to \$12.50, a few to \$13, like the top bulls sent in by Don Mitchell of Bryson, O. L. Matlock of Antelope, and Chas. Blackman of Clay County.

Brown and other relatives in Cisco, Rising Star, and Putnam.

Mrs. Dora E. Kennedy has returned to her home in Abilene following a visit in Cisco with her daughter, Mrs. V. H. Bosworth and family.

FOR SALE

Large house on 18th St. A wonderful buy.

Wonderful buy on 8th St. Corner lot. Needs to be sold at once.
