CONFIDENTIAL CREDIT SERVICE

A cooperatively designed confidential credit service has been designed by Cisco credit grantors to assist individuals in paying their past due accounts.

The plan is simple. For a legal-rate service charge to the borrower the total amount of his accounts is grouped into one, repayable in monthly installments.

In other words! A person who owes money to several creditors, but just can't seem to stretch his pay check to all of them. can put "all of his accounts in one note."

Why endanger a good credit standing for many months by paying a little amount here and there? By this simple plan, all accounts are pooled and paid IN FULL at one time . . . thereby a good past credit record is protected.

A detailed explanation of our plan can be obtained by calling. or writing at the offices of . . .
