The Gay Philosopher By J. W. S.

ACCORDING TO an announceof Mayor Rosenthal, the City of Cisco is making available to our citizens a program whereby they may obtain paved streets at minimum cost. This project has been studied by Street Comsioner Albert Hansen and Mr. Rosenthal for some weeks, and the city feels that it can be worth much to our town.

Under the program, each property owner contributes to a fund pave in front of his place. The ty contributes to the project by using city equipment in exchange paving street intersections. he cost is very economical, acording to a study of the deal.

Mr. Rosenthal tells us that the

ity does not want to force people pave their streets. The city is aking the program available for ose who want pavement There will be a finance plan for those who want pavement and can pay only a few dollars a month for it A similar paving program up at Albany in recent months has reulted in many blocks of new vement. Nothing improves the ppearance of a city like good reets. In this program, the city xpects to see that the quality of

The chiropractic profession in a number of other towns in this area are also planning Posture Week observances. "Spinal normality and correct posture are basic to the chiro-practic concept of health and healing," he said. "No health examination is complete if it does not include a careful examination of the spine.

A heart examination, he said, may show that the heart is functioning normally, but a spinal examination may show a condition, which if not corrected, will lead to a heart impairment a year, or even ten years, from

"Unfortunately, the spine is not seen several times a day as are the teeth and eyes," he said. It is the contention of the chiropractic profession, he said, that the spine houses the body's power and communication sys tem, both of which are impaired In observance of National by spinal defects which can lower a person's efficiency well as lower his resistance to
