The Gay Philosopher By J. W. S.

lext to Christmas, it seems to us that Mother's Day is one of the most fitting observances we have. Each year, the Golden Rule Foundation (a national organization) elects a U. S. mother and honors ner as American Mother of the

The committee that selects the mother has a list of requirements she must possess, including:

(1) That she be a successful mother, as evidenced by the charcter of her individual children; (2) That she reflect a strong reigious and spiritual integrity; (3) nat she embody those traits ighly regarded in mothers: courge, cheerfulness, patience, kindess, understanding and a homenaking ability; (4) That she exmplify in her life and conduct the precepts of the Golden Rule (5) That she have a sense of civid and international understanding and that she be active in communty betterment or in service for public benefit; and, (6) That she be qualified to represent the Mothers of America in all responsibi lities attached to her role as the National Mother.

The best cattle country an be divided into four districts The Barkly Table land district as some of the highest carrying capacity land in the N.T. and turns tens of thousands of head of cattle to the rail head near the border in Western Queensland each year. The land is flat with rich black-gray soil with a limestone base, and the geological map shows territory swamp' deposits which are now flat downs in a 17-18 inch rainfall district covered with waving open prairies of Mitchell and Flinders grasses. These two grasses are among the best in Australia for cattle fodder. Cattle in this district water almost entirely at water wells, and are, consequently, quiet and easily handled. Brian, our experienced cattle man in N.T., rated the Barkley Tableland as his number one preference for a cattle station. The Barkley Tableland is located in the middle eastern part of the N.T. and mainly held by large successful cattle

Make up to 3 MORE PROFIT

Two eggs laid before Christmas usually bring more money than three eggs laid afterward. That means you can make 1/3 more profit simply by getting your pullets in full production early this fall. And the best way to do that is to feed a really good growing ration like PURINA.

Makes YOUR GRAIN do its best work

Purina Growing Chow helps you grow fine, big pullets with your own grain. (It also helps you turn the little roosters into big springers ready to eat when just 9 or 10 weeks old.) When your growing birds run on range, they need only 6 to 7 pounds of Purina apiece, plus your grain, to be ready for the nest.

READY TO LAY for less than 40¢ cash outlay

That's right, it will take less than 40¢ worth of Purina Growing Chow, with grain, to help you grow a fine, big pullet ready to lay. She'll quickly pay you back in heavy egg production.

Feed Purina Growing Chow as soon as chicks are 5 weeks old SEE US SOON!
