By J. W. S.

ONE OF THE biggest rattle snakes you ever saw was displayed in town the other afternoon at the Municipal Airport. It was five feet long and had 12 rattlers. Several of the big rattlers were missing. It was killed 100 yards off the Lake toward the airport.

TWO FORMER Ciscoans flew at noon Wednesday at the local airport for a brief reunion with relatives. Dr. and Mrs. Roy Brock of Grandbury came in their own plane to see Mrs. L. L. Johnston and Mr. and Mrs. V. S. Johnston of our town.

DRIVE OUT INTO the country late yesterday to admire the green fields and trees. Things smell good. You can hear quail whistling in several directions. Cows and horses are slick and fat from eating the lush grass. Farmers are plowing and planting. There's just nothing like plenty of rain to make things beautiful and prosperous and busy in the country.

DROPPED BY the football field last evening and found a goodly crowd enjoying the Little League benefit concert under the lights of Chesley Field. The show was played for a time while the Little League boys finished up a game. A fine crowd was at the baseball game.

THERE'S GOING to be some pretty good eating over at the Greater St. Mark's Church at noon Saturday. That's the advice of Earl Floyd who runs the elevator at the Reynolds building. Proceeds from the dinner will be used by the congregation in improving the church building. Earl says the menu will be featured by barbecued chicken, and you can eat it there, pick it up and take it with you or order your dinner and it will be delivered.

SOMEBODY SENT us a clipping about mowing your lawn at night. A lawn mower manufacturer has come out with a power mower that has headlights so you can work at night. Beat the heat, says by mowing at night. The clipping says the lights are so good you can read a newspaper 50 feet away. They even have white sidewall tires for this particular lawn mower.

WHO DEvised the first practical television system? We ran into that question the other day, and the answer kind of astonished us. The first practical television system was devised in 1884 by a German, Paul Nipkow, who used a series of discs. Modern television research of the 1920's was based on Nipkow's discoveries.

MR. J. T. EDWARDS reports that there's a lot of interest in "Joseph and His Brothers," a religious picture which opens Saturday for a four-day run at the Palace. They held a special preview recently and invited a good many people to see it. Our representative thought it was a fine picture in all respects and predicted that everybody would enjoy it.

MR. W. P. KNIGHT, manager of the Lake Cisco Swimming Pool, reports that last Friday was their biggest day to date. A total of 109 tickets were sold, mostly to out-of-town high school students here for their annual outings. A total of 754 persons went swimming during the first 15 days of the month. A good many private parties are enjoying picnics and outings at the park. They're taking the names and license numbers of people who are driving their cars too fast and in a careless manner through the park.

**THREAT IN PANAMA**—A surveyor is checking a deep crack which threatens to open wider and cause a landslide which might block the Panama Canal. The 600-foot-deep crack is in a rock ledge overlooking the canal in the famed Gaillard Cut. First noticed some years ago, the crack has been widening recently and the rainy season could create a real avalanche.

## WTUC Wins First Place In National Advertising Event

Recognition of outstanding achievement in the field of utility advertising came to West Texas Utilities Company this week when it was named as winner of a first place national award in the 1954 Better Copy Contest sponsored by the Public Utilities Advertising Association.

The award was announced Friday afternoon at the annual convention of the Association in Boston, Massachusetts. The First Place Award was achieved for the "Best Single Newspaper Advertisement Promoting the Use of Electric Service" and is the fourth such award received by the Company since 1949. This winning advertisement was produced by the Company's Advertising Department and appeared in this and other newspapers in the Company's service area.

This year's contest attracted a record of nearly 2,059 entries in 22 separate classifications. Electric, gas and transportation utility companies from practically every state in the union and from Canada and Hawaii were represented.

The Better Copy Contest of the Public Utilities Advertising Association is the oldest and largest continually conducted advertising competition in the United States. The contest just closed was the 31st of its kind and it has grown steadily in importance and size throughout the years. Today the awards presented by this association are regarded as the highest recognition attainable in the utility advertising field.

## Fishermen To Aid Creel Census In Agency Projects

AUSTIN, May 21.—Texas freshwater fishermen are being recruited by aquatic biologists to advance a creel census as a key factor in fish improvement projects at several large lakes.

The Chief Aquatic Biologist said dozens of fishermen are being checked each month, mainly by field men operating at the landing docks. The checks at Caddo Lake near Marshall necessarily have to be made on the highway.

The angler is asked to permit his catch to be counted and measured and to tell how many hours it required to make his catch. Length-weight curves have been compiled on the various reservoirs under study. Consequently, weights can be ascertained from the length of the fishes.

Such curves, made several years ago, reveal that a two-pound black bass from Possum Kingdom would be 13 1/2 inches long; or 16 inches long on Medina Lake; 17 inches on Lake Travis; and 15 1/2 on Texoma.

The variations in weight on the measurement basis themselves provide the field men with data in their study of condition factors, and thus accelerate plans to strengthen food sources in the lagging lakes.

The creel census is designed to determine the catch of fish per man hour; types of fish caught; and a combined total of annual fish production on the lakes being studied.

Lakes now being used in the creel census are Devils Lake, near Del Rio; Medina near San Antonio; Lake Travis near Austin, Nasworthy and San Angelo near San Angelo; Whitney near Hillsboro; Caddo near Marshall; and Lake Corpus Christi at Mathis.

The Chief Aquatic Biologist said other lake areas will be checked later as additional phases of the state-wide fish management program are put into effect. "On behalf of our field men," he said, "I hope fishermen will understand the necessity for this check and cooperate fully. Frankly, the anglers stand to benefit in the long run."

Rotarian Ernest Hittson was in charge of the program for the day. Anderson is also a member of the club.

President W. H. McAnally reported that the Cisco club was in second place in attendance in the district for the month of April with an average attendance figure of 99.5 per cent. Crowell was in first place.

## Farm Bureau To Sponsor Queen Contest Again

The Eastland County Farm Bureau will sponsor a Queen Contest again this year, according to a decision of the officers and directors at a meeting last week. President A. Z. Myrick presided over the meeting.

The purpose of the contest is to give the county unit an opportunity to select a girl to enter the district contest, a state-wide Farm Bureau project to encourage recognition of farm and ranch girls.

The rules of the contest are the same as last year. The girls must be single, sisters or daughters of Farm Bureau members, excluding county officers, between the ages of 16 and 21 years, who have not previously won the contest.

The girls will be judged on poise, personality and appearance. Each community has been urged to sponsor a girl in the county contest, scheduled for early summer, Mr. Myrick said.

A community meeting, set for June 15, was planned at Gorman. It will be in the form of a picnic supper and talent show at Boss Lake Park. Other community meetings will be held at Okra in July and Olden in August.

Quality of Seed Farmers Sow is Shown by Survey

This pulverizer-packer-seeder is an ideal implement for sowing pasture seeds but it cannot improve seed quality or remove noxious weed seeds. This can be avoided by using high quality tested seed tagged in compliance with Federal and State laws.

What quality seed does the farmer sow? A drill-box survey made in Minnesota in the spring of 1953 answers this question. This showed the purity, germination and weed seed content of seeds farmers sow and may well be taken as representative of the situation in many other States. A total of 732 samples were collected from 65 counties. From 10 to 15 samples were collected from each of most of the counties. Pure seed content per sample for each county ranged from a low average of 94.9% for 14 samples in one county to a high of 99.3% for 3 samples in another county. Germinations ranged from a low average of 69.7% for 14 samples in one county to a high of 95.5% for 11 samples in another county. More than half averaged 90% or above. Violations of the Minnesota seed law were found in 166 samples, of which 36 were farmers' own seed, 3 were other farmers' seed, 1 was dealers' seed, and 3 were from other sources. Prohibited weed seeds were found in 25 samples, of which 21 were farmers' own seed, 2 from other farmers' seed, and 2 from unknown sources. Two samples contained field bindweed seed at the rate of 5 per lb., 15 samples contained Canada thistle seed at an average of 7 per lb., and 9 samples contained perennial sow thistle seed at an average rate of 213 per lb., of which 49 were farmers' own seed, 5 were other farmers' seed, 1 was a dealer's seed, and 2 were from unknown sources. Wild mustard seed at an average rate of 213 per lb. was present in 57 samples, of which 49 were farmers' own seed, 5 were other farmers' seed, and 2 were from unknown sources. The results of this drill-box survey showed very clearly the necessity for the farmers to clean seed grain which they have produced themselves or bought from their neighbors. Over 95% of the samples found to be in violation of our seed laws belong to these two groups. Farmers may think that their seed is free from excessive or noxious weed seeds, but this survey illustrates clearly the need for cleaning and testing seed grain produced on the farm and purchasing tagged and tested seed of all kinds from reliable sources.
